Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article I, Section 2 of the Constitution is amended to read as follows:

Section 2. That all constitutional government is intended to promote the general welfare of the people; that all persons have a natural right to life, liberty, the pursuit of happiness and the enjoyment of the gains of their own industry; that all persons are created equal and are entitled to equal rights and opportunity under the law; that to give security to these things is the principal office of government, and that when government does not confer this security, it fails in its chief design.

The rights protected by the Constitution of the State of Missouri are the rights of natural persons only. Artificial entities, such as corporations, limited liability companies, and other entities, established by the laws of any State, the United States, or any foreign state shall have no rights under this Constitution and are subject to regulation by the People of Missouri, through State, or local law. The privileges of artificial entities shall be determined by the People of Missouri, through State, or local law, and shall not be construed to be inherent or inalienable. State and local government may regulate, limit, or prohibit contributions and expenditures by artificial entities to influence in any way the election of any candidate for public office or any ballot measure in the State of Missouri, and such contributions are hereby prohibited.

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Winston Apple regarding a proposed constitutional amendment to Article III, Section 39 (2018-152)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Winston Apple on January 31, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article III of the Constitution is revised by amending Section 39 to read as follows:

Section 39. The general assembly shall not have power:
(1) To give or lend or to authorize the giving or lending of the credit of the state in aid or to any person, association, municipal or other corporation;
(2) To pledge the credit of the state for the payment of the liabilities, present or prospective, of any individual, association, municipal or other corporation;
(3) To grant or to authorize any county or municipal authority to grant any extra compensation, fee or allowance to a public officer, agent, servant or contractor after service has been rendered or a contract has been entered into and performed in whole or in part;
(4) To pay or to authorize the payment of any claim against the state or any county or municipal corporation of the state under any agreement or contract made without express authority of law;
(5) To release or extinguish or to authorize the releasing or extinguishing, in whole or in part, without consideration, the indebtedness, liability or obligation of any corporation or individual due this state or any county or municipal corporation;
(6) To make any appropriation of money for the payment, or on account of or in recognition of any claims audited or that may hereafter be audited by virtue of an act entitled "An Act to Audit and Adjust the War Debts of the State," approved March 19, 1874, or any act of a similar nature, until the claim so audited shall have been presented to and paid by the government of the United States to this state;
(7) To act, when convened in extra session by the governor, upon subjects other than those specially designated in the proclamation calling said session or recommended by special message to the general assembly after the convening of an extra session;
(8) To remove the seat of government from the City of Jefferson;
(9) Except as otherwise provided in section 39(b), section 39(c), section 39(e) or section 39(f) of this article, to authorize lotteries or gift enterprises for any purpose, and shall enact laws to prohibit the sale of lottery or gift enterprise tickets, or tickets in any scheme in the nature of a lottery; except that, nothing in this section shall be so construed as to prevent or prohibit citizens of this state from participating in games or contests of skill or chance where no consideration is required to be given for the privilege or opportunity of participating or for receiving the award or prize and the term "lottery or gift enterprise" shall mean only those games or contests whereby money or something of value is exchanged directly for the ticket or chance to participate in the game or contest. The general assembly may, by law, provide standards and conditions to regulate or guarantee the awarding of prizes provided for in such games or contests under the provision of this subdivision;
(10) To impose a use or sales tax upon the use, purchase or acquisition of property paid for out of the funds of any county or other political subdivision.
(11) To prohibit, restrict, limit, or impair, by existing or future law or ordinance of the state, the right of any county, city, town, or village, to establish, mandate or require an employer to provide to an employee a minimum wage rate or employment benefit that exceeds the requirements of federal or state laws, rules, or regulations.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-152)

Subject

Initiative petition from Winston Apple regarding a proposed constitutional amendment to Article III. (Received February 1, 2017)

Date

February 21, 2017

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this petition will have no fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added cost or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their agency.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated unknown fiscal impact.

Officials from the **Office of Administration** indicated the proposal amends Article III, Section 39 of the MO Constitution to prohibit the General Assembly from prohibiting counties, cities, towns or villages from establishing, mandating, or otherwise requiring an employer to provide a minimum wage rate or unemployment benefit that exceeds the requirements of federal or state laws, rules, or regulations.

This will not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this petition would have no fiscal impact on their city.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from **University of Missouri** indicated they have reviewed this proposed legislation and have determined they are not able to estimate any significant financial impact on their university.

Officials from **Missouri State University** indicated in response to this initiative petition, no fiscal impact to their university.

Officials from **Missouri Western State University** indicated Article III, Section 39 will not have a fiscal impact on their university.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University,**. **Missouri Southern State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Fiscal Note Summary

This proposal is expected to have no costs or savings to state or local governmental entities.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article III, Section 2, Section 5, and Section 7 of the Constitution are amended to read as follows:

Section 2. Election of representatives—apportionment commission, appointment, duties, compensation. — The house of representatives shall consist of **[**one hundred sixty-three**]** eighty members with five members from each of sixteen representative districts in the state of Missouri elected at each general election. [and] Two legislative districts are to be located within the boundaries of each congressional district in the state of Missouri apportioned in the following manner: Within sixty days after the passage of this amendment and again with sixty days after the population of this state is reported to the President for each decennial census of the United States and, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within sixty days after notification by the governor that such a ruling has been made, the congressional district committee of each of the [two] political parties casting at least two percent of the [highest] vote for governor in each representative district at the last preceding election shall meet and the members of the committee shall nominate, by a majority vote of the members of the committee present, provided that a majority of the elected members is present, two members of their party, residents in that district, as nominees for reapportionment commissioners. [Neither party shall select more than one nominee from any one state representative district.] The congressional committees shall each submit to the governor their list of elected nominees. Within thirty days the governor shall appoint a commission consisting of one name from each list to reapportion the state into [one hundred and sixty-three] sixteen representative districts, with two districts located within the boundaries of each congressional district and to establish the numbers and boundaries of said districts.

If any of the congressional committees fails to submit a list within such time the governor shall appoint a member of his own choice from that district and from the political party of the committee failing to make the appointment.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment. For the purposes of this article, the term congressional district committee or congressional district refers to the congressional district committee or the congressional district from which a congressman was last elected, or, in the event members of congress from this state have been elected at large, the term congressional district committee refers to those persons who last served as the congressional district committee for those districts from which congressmen were last elected, and the term congressional district refers to those districts from which congressmen were last elected. Any action pursuant to this section by the congressional district committee shall take place only at duly called meetings, shall be recorded in their official minutes and only members present in person shall be permitted to vote.

The commissioners so selected shall on the fifteenth day, excluding Sundays and holidays, after all members have been selected, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary and shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held. A copy of the agenda shall be filed with the clerk of the house of representatives within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable.

The commission shall reapportion the representatives by dividing the population of [the state] each congressional district by the number **[**one hundred sixty-three**]** two and shall establish each district so that the population of that district shall, as nearly as possible, equal that figure.

Should the number of congressional districts be altered as a result of any future decennial census of the United States, the total number of representatives elected will be adjusted accordingly, so that there are still two representative districts within each congressional district with five representatives elected from each representative district.

Each district shall be composed of contiguous territory as compact as may be.

Not later than five months after the appointment of the commission, the commission shall file with the secretary of state a tentative plan of apportionment and map of the proposed districts and during the ensuing fifteen days shall hold such public hearings as may be necessary to hear objections or testimony of interested persons.

Not later than six months after the appointment of the commission, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts, and no statement shall be valid unless approved by at least seven-tenths of the members. After the statement is filed members of the house of representatives shall be elected according to such districts until a reapportionment is made as herein provided, except that if the statement is not filed within six months of the time fixed for the appointment of the commission, it shall stand discharged and the house of representatives shall be apportioned by a commission of six members appointed from among the judges of the appellate courts of the state of Missouri by the state supreme court, a majority of whom shall sign and file its apportionment plan and map with the secretary of state within ninety days of the date of the discharge of the apportionment commission. Thereafter members of the house of

representatives shall be elected according to such districts until a reapportionment is made as herein provided.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.
No reapportionment shall be subject to the referendum.

Section 5. The senate shall consist of **[**thirty-four**]** five members from each congressional district, elected by the qualified voters of the respective congressional districts for four years, with each voter in each district casting a total of up to three votes ranking candidates in order of preference. **[**For the election of senators, the state shall be divided into convenient districts of contiguous territory, as compact and nearly equal in population as may be.**]**

For the general elections held in November of 2020 and November of 2022, elections for the senate will be held in all of the congressional districts. Any members of the senate who were elected in 2018 will complete the term of office to which they were elected. The number of members to be elected from each congressional district will be determined by subtracting the number of members completing their terms of office from the total of five members to be elected from each congressional district. Candidates who win election from even-numbered congressional districts in 2020 will serve a two-year term of office. Candidates who win election from odd-numbered congressional districts in 2020 will serve a four-year term of office. For the general election held in November of 2022, five members will be elected from each even-numbered congressional district to serve a four-year term and the number of members equal to the number of members residing in odd-numbered districts whose term of office expires in 2022 will be elected from each odd-numbered congressional district to serve a two-year term. Beginning in 2024 and every two years thereafter, the full complement of twenty members from districts will be elected in each general election, beginning with even-numbered districts in 2024 and odd-numbered districts in 2026.

Should the number of congressional districts be altered as a result of any future decennial census of the United States, the total number of members to be elected will be adjusted accordingly, so that there are still five members elected from each congressional district.

Section 7. **[**Within sixty days after the population of this state is reported to the President for each decennial census of the United States, and within sixty days after notification by the governor that a reapportionment has been invalidated by a court of competent jurisdiction, the state committee of each of the two political parties casting the highest vote for governor at the last preceding election shall, at a committee meeting duly called, select by a vote of the individual committee members, and thereafter submit to the governor a list of ten persons, and within thirty days thereafter the governor shall appoint a commission of ten members, five from each list, to reapportion the thirty-four senatorial districts and to establish the numbers and boundaries of said districts.

If either of the party committees fails to submit a list within such time the governor shall appoint five members of his own choice from the party of the committee so failing to act.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

The commissioners so selected shall on the fifteenth day, excluding Sundays and holidays, after all members have been selected, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary and shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held. A copy of the agenda shall be filed with the secretary of the senate within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable.

The commission shall reapportion the senatorial districts by dividing the population of the state by the number thirty-four and shall establish each district so that the population of that district shall, as nearly as possible, equal that figure; no county lines shall be crossed except when necessary to add sufficient population to a multi-district county or city to complete only one district which lies partly within such multi-district county or city so as to be as nearly equal as practicable in population. Any county with a population in excess of the quotient obtained by dividing the population of the state by the number thirty-four is hereby declared to be a multi-district county.

Not later than five months after the appointment of the commission, the commission shall file with the secretary of state a tentative plan of apportionment and map of the proposed districts and during the ensuing fifteen days shall hold such public hearings as may be necessary to hear objections or testimony of interested persons.

Not later than six months after the appointment of the commission, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts, and no statement shall be valid unless approved by at least seven members.
After the statement is filed senators shall be elected according to such districts until a reapportionment is

made as herein provided, except that if the statement is not filed within six months of the time fixed for the appointment of the commission, it shall stand discharged and the senate shall be apportioned by a commission of six members appointed from among the judges of the appellate courts of the state of Missouri by the state supreme court, a majority of whom shall sign and file its apportionment plan and map with the secretary of state within ninety days of the date of the discharge of the apportionment commission. Thereafter senators shall be elected according to such districts until a reapportionment is made as herein provided.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session, but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission. No reapportionment shall be subject to the referendum.]

A list of candidates from each political party for the general election will be determined by means of a primary election, with each party electing a number of candidates up to, but not exceeding, the number of members to be elected to both the house of representatives and the senate in the general election. All qualified candidates who file for each party's nominations will appear on the primary ballot for that party. Registered voters will be allowed to vote in one, and only one, party's primary election, and will cast a total of three votes, ranked in order of preference. A total number of candidates from each political party up to the number of senators or representatives to be elected will be included on the ballot in the general election, listed in order of number of votes received, with the candidate receiving the most votes listed first on the ballot for each party.

A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot by presenting petitions signed by one-half of one per cent of the legal voters in a given congressional district. An independent candidate may qualify for a place on the ballot by presenting petitions signed by one-fifth of one percent of the legal voters in a given congressional district. The number of "legal voters" is equal to, and determined by, the total vote for governor in that congressional district in the general election last preceding. Said petitions to be delivered to the secretary of state no later than ninety days preceding the general election. At the time the petitions are presented, the political party will also notify the secretary of state of the method to be used by said party in nominating a slate of candidates.

The signatures on petitions submitted by independent candidates and political parties shall be subject to verification according to the procedures in the code of state regulations for independent candidate petitions in force at the time the petitions are submitted.

In the general election, voters will cast a total of three votes, ranked in order of preference. Each validly cast ballot shall initially be counted as one vote for its highest-ranking candidate. The threshold to be elected shall be 17 percent of the total votes counted in any round. Ballots that do not rank any continuing candidate, that contain votes for more than one candidate at the same ranking, or in which a voter has left a ranking blank once that ranking would have been utilized, will be considered "exhausted ballots" and will not be counted in that round, or subsequent rounds.

Tabulation of votes in both the primary election and general election shall proceed in rounds, sequentially, as follows: All first-choice votes are tabulated. Any candidate receiving at least 17 percent of the total number is elected and is considered an "elected candidate" for tabulation purposes in subsequent rounds. The ballots for an elected candidate become exhausted ballots and are not counted in subsequent rounds. The candidate receiving the fewest votes in each round is eliminated. All other candidates are "continuing candidates." The second-choice votes from the ballots with the eliminated candidate as first-choice ae distributed to continuing candidates. Any second-choice votes for elected candidates are ignored and third-choice votes will be utilized instead.

If the number of continuing candidates surpassing the threshold in any round exceeds the number of additional members to be elected, the candidate(s) with the most votes are elected, in order. This process is repeated until the number of elected candidates is equal to the number of members to be elected. If all ballots are exhausted without enough candidates being elected, the continuing candidate(s) with the most votes are elected, in order, to the remaining seats.

If a senator or representative resigns, dies, or is removed from office for any reason during the subsequent legislative sessions, the seat shall be filled by the next candidate who would have won election had there been one more member elected using the prescribed method for tabulating votes.

This amendment shall take effect January 1, 2019 and beginning with the selection of candidates and election of representatives and senators in the general election to be held in November of 2020.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-151)

Subject

Initiative petition from Winston Apple regarding a proposed constitutional amendment to Article III. (Received February 1, 2017)

Date

February 21, 2017

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no fiscal impact for their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this petition will have no fiscal impact on their department.

Officials from the **Department of Public Safety** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated there is no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated reduces membership from 163 to 80. Would first affect FY 21 post the 11/2020 election. FY 21 savings is $3,879,714 (1/2 year). Savings estimate is $6,943,036 annually after that.

SAVINGS:
Member salary = 83 x $35,915 = $2,980,945
Member expense accounts = 83 x $8,400 = $697,200
Session mileage = 83 x 268 (ave weekly roundtrip mileage) x .37 x 19 (weeks of session) = $156,375
Session per diem = 83 x $113.60 x 70 (days of session) = $660,016
Legislative Assistant salary = 83 x $29,500 = $2,448,500.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no fiscal impact.

Officials from the **Office of Administration** indicated this proposal amends Article III of the MO Constitution. It reduces the House of Representatives from 163 members to 80 members (five members from each of the 16 representative districts). Two legislative districts will be located in each congressional district. The Senate increases to 40 members (5 from each congressional district). Candidates will be listed on the general election ballot based on results of a primary election held for each party and there are allowances for others to be added to the ballot with a specific number of signatures. It also prescribes a methodology for determining the winners of elections based on a ranked-choice voting system. The amendment is effective January 1, 2019 for the November 2020 general election.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated costs for their office will increase $1,461,589 annually.

Officials from the **Secretary of State's office** indicated petition 2018-151 would change the composition of the General Assembly and institute a policy of ranked-choice voting to elect state representatives and senators. This would require all voting machines statewide to either be coded to accept ranked-choice voting (which may require reprogramming) or to be replaced with new machines which do allow ranked-choice voting.

As of the 2013 voting systems survey conducted by the Secretary of State’s Office, local election authorities reported that they possessed 8,711 voting machines. The estimated cost for each new voting machine is $5,000. The total cost to the state will vary

depending on the number of machines which are ready to accept ranked-choice votes or can be reprogrammed to do so. However, using total replacement of all machines as a maximum cost, ranked-choice voting may result in a total impact to general revenue ranging from $0 up to $43,555,000.

Additionally, their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this petition would have no fiscal impact on their city.

Officials from the **City of Raymore** indicated this petition would have no fiscal impact.

Officials from **Platte County Board of Elections** indicated they anticipate no fiscal impact.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,**

the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

Legislative operating costs are estimated to decrease for state government by approximately $5.4 million. This proposal could also result in necessary voting machine replacements statewide at an estimated unknown cost up to $43.5 million.

RE: Petition approval request from Winston Apple regarding a proposed statutory amendment to Chapter 192 (2018-150)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Winston Apple on January 31, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it enacted by the people of the state of Missouri:

One new section of the Revised Missouri Statutes is enacted, to be known as section 192.008, to read as follows:

192.008. 1. "The Missouri Health Insurance Cooperative" (hereinafter referred to as "MHIC") is hereby created, within the department of health and senior services, to provide health insurance for citizens of Missouri who wish to become members of the cooperative.

2. The MHIC shall be administered by the director of the department of health and senior services. The department of health and senior services shall, within one (1) calendar year of the effective date of this section, promulgate rules necessary for the administration of this section.

3. The state of Missouri is authorized to issue bonds to cover the start-up costs for the MHIC, as well as any shortages of funds needed to pay authorized benefits until the funds received from premiums are sufficient to cover those expenses. Premiums and out-of-pocket maximums for members are to be set and then adjusted as soon as practicable to fully cover administrative expenses and benefits paid with money collected from premiums paid by members.

4. Memberships in The Missouri Health Insurance Cooperative shall be available beginning no later than January 1, 2020.

5. Enrollment in The Missouri Health Insurance Cooperative (hereinafter referred to as "MHIC") shall be voluntary and limited to citizens of the state of Missouri.

6. The MHIC shall be revenue-neutral. The percentages of income established for premiums and out-of-pocket maximums shall be adjusted annually and set at levels that will insure that revenues are sufficient to cover all costs, including amounts paid out to members for health care expenses in excess of their out-of-pocket maximum and all administrative expenses; as well as the funds necessary to pay principal and interest on bonds issued to fund start-up costs for MHIC.

7. Premiums for insurance coverage through MHIC, as well as the annual out-of-pocket maximum for members will be based on percentages of each member's gross annual income, as determined by the board. Premiums are to be set as low as possible and out-of-pocket maximums set no higher than necessary to maintain the revenue neutral status of the MHIC, while making membership as affordable as possible.

8. Only treatments and procedures deemed medically necessary, as determined by the department of health and senior services shall be covered through the MHIC.

9. Members who waive coverage for health care expenses and treatments commonly associated with smoking tobacco or consuming alcohol or recreational use of drugs will receive a discount on their premiums that reflects, as accurately as possible the benefits to the MHIC result from not having to pay for such care and treatment for individuals who do not smoke tobacco products, consume alcohol in excess, or use recreational drugs. Should the general assembly elect to provide subsidies to MHIC for health care expenses and treatments commonly associated with smoking tobacco, consuming alcohol, or other recreational drug use through the collection of excise taxes on tobacco products, alcohol, or recreational drugs, this discount will be suspended and all members of MHIC will pay the same percentage of their income as premiums.

10. Members of the MHIC and health care providers in the state of Missouri, are responsible for keeping records and receipts for covered health care, to be furnished to the MHIC if expenses for needed health care exceed the out-of-pocket maximum for a given calendar year and reimbursement is thereby requested. Receipts must be provided to the MHIC upon request.

11. All subsections and all clauses of this statute, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-150)

Subject

Initiative petition from Winston Apple regarding a proposed amendment to Chapter 192 of the Revised Statutes of Missouri. (Received February 1, 2017)

Date

February 21, 2017

Description

This proposal would amend Chapter 192 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the

costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** (DHSS) indicated expenses of $0 in fiscal year 2018, unknown for fiscal year 2019, unknown for fiscal year 2020.

An unknown number of staff to oversee the Missouri Health Insurance Cooperative program would require rental space, located in Jefferson City.

Unknown IT costs or savings related to this proposal.

Section 192.008

The proposal creates a new health insurance program, *The Missouri Health Insurance Cooperative* (MHIC), with oversight by their department (DHSS). MHIC is to be available by January 1, 2018 which is six months of fiscal year (FY) 2018.

The program is to be self-supporting by annually adjusting premiums and out-of-pocket maximums to ensure that all costs as well as funds necessary to pay principal and interest on bonds issued to fund start-up costs for the MHIC are covered..

Section 192.008

Their department is unable to determine the number of individuals who would participate in MHIC. In addition, the premium rates charged by MHIC could be affected by items such as (1) costs for covered services, (2) the scope of benefits that are included, (3) the plan's cost-sharing requirements, and (4) the health status of the plan's enrollees. Also, the MHIC program oversight responsibilities and costs would be directly impacted by the size of the program (i.e., number of participants, list of covered services, etc.). The Office of Administration could issue bonds for startup costs and to cover initial shortages. DHSS is not able to determine the amount of startup cost, premium rates, etc. They do not administer a similar program of any kind, so significant unknown staffing or contractual costs would be necessary. Due to the numerous unknown factors, they are submitting an Unknown Expense equal to Unknown Revenue (Revenue Neutral-zero impact) fiscal note.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact.

Officials from the **Department of Revenue** indicated this petition will have no fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated unknown fiscal impact.

Officials from the **Office of Administration** indicated the proposal adds Section 192.008 RSMo., to create the Missouri Health Insurance Cooperative (MHIC) which will be administered by the Department of Health and Senior Services. The state is authorized to issue bonds to cover start-up costs and funds needed for the program until the premium base has been established and is able to pay benefits and administrative costs. Premium levels are to be set and adjusted annually in order to raise sufficient funds to cover all costs, including principal and interest on bonds.

This initiative does not specify who within the state has the authority to issue bonds. There must be a vote of the citizens or there must be a specifically named Board of which a majority vote is required before bonds are issued. If it was determined that the Board of Public Buildings would issue the bonds, the bond issuance duties would be carried out by the Office of Administration. Those duties could be assumed by current staff at no additional cost. However, there would be a cost to the state for the bond issuance and

potentially for the principal and interest payments until the MHIC became self-supporting. The Office of Administration is unable to estimate the cost as it would be dependent upon the amount of bonds issued. For example, issuing $10,000,000 would cost about $692,000 per year for 25 years plus an issuance cost of $250,000. It is expensive to issue bonds regularly, especially for relatively small amounts of money such as this. It may make more sense for an entity to borrow funds from a bank in the form of a revolving loan instead of through the municipal markets.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this proposal would have no fiscal impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this petition would have no fiscal impact on their city.

Officials from the **City of Raymore** indicated no fiscal effect.

Officials from **University of Missouri** indicated they have reviewed this proposed legislation and have determined that they are not able to estimate any significant financial impact on their university.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education,** the **Department of Labor and Industrial Relations, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia**, the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College,** and **St. Louis Community College**.

Fiscal Note Summary

The program is mandated to be revenue neutral. No costs or savings are expected for state and local governmental entities.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article VIII, Section 24 of the Constitution is enacted to read as follows:

Article VIII, Section 24. In general elections for the offices of United States Senator, Governor, Lieutenant Governor, Secretary of State, Attorney General, State Treasurer, and State Auditor, voters will be given the opportunity to rank candidates in order of preference.

For offices elected by this method of ranked-choice voting, the ballot must be simple and easy to understand and allow a voter to rank up to five candidates for an office in order of preference. A voter may include no more than one write-in candidate among that voter's ranked choices for each office.

For all offices elected by ranked-choice voting, the Secretary of State shall tabulate the votes according to the following method: Tabulation proceeds in sequential rounds. In the first round, only first choice votes are tabulated. If a candidate receives a majority of the votes (fifty percent of the total votes cast, plus one vote) that candidate is elected. If no candidate receives a majority of the first-choice votes cast, the candidate with the lowest number of votes is eliminated and the candidates listed as the second choice on ballots cast for the candidate being eliminated are distributed among the remaining candidates. In subsequent rounds, a voter's third, fourth, or fifth choice may be utilized, in order, as needed. Ballots that do not rank any continuing candidate, that contain votes for more than one candidate at the same ranking, or in which a voter has left a ranking blank once that ranking would have been utilized, will be considered to be "exhausted ballots" and will not be counted in that round, or subsequent rounds. This process is repeated in as many rounds as needed until one candidate wins election by receiving at least fifty percent plus one of the total valid votes tabulated in that round.

Election officials shall determine a random selection algorithm, prior to tabulation, to resolve ties between candidates. If a tie occurs at any point in the tabulation procedure and tabulation cannot proceed until the tie is resolved, then the random selection algorithm shall resolve the tie.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-149)

Subject

Initiative petition from Winston Apple regarding a proposed constitutional amendment to Article VIII. (Received February 1, 2017)

Date

February 21, 2017

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this legislation will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their agency.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Office of Administration (OA)** indicated this proposal amends Article VIII of the MO Constitution by adding Section 24. The new section would create a ranked-choice system for election of the offices of US Senator, Governor, Lt. Governor, Secretary of State, Attorney General, State Treasurer, and State Auditor. Voters would be allowed to rank up to five candidates for an office in order of preference. The Secretary of State is responsible for tabulating the votes according to the specified method.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated petition 2018-149 would institute a policy of ranked-choice voting to elect United States Senators and all statewide officers. This would require all voting machines statewide to either be coded to accept ranked-choice voting (which may require reprogramming) or to be replaced with new machines which do allow ranked-choice voting.

As of the 2013 voting systems survey conducted by the Secretary of State’s Office, local election authorities reported that they possessed 8,711 voting machines. The estimated cost for each new voting machine is $5,000. The total cost to the state will vary depending on the number of machines which are ready to accept ranked-choice votes or can be reprogrammed to do so. However, using total replacement of all machines as a maximum cost, ranked-choice voting may result in a total impact to general revenue ranging from $0 up to $43,555,000.

Additionally, their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish

the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this proposal would have no fiscal impact on their office.

Officials from **Greene County** indicated it is anticipated that printing costs for a November General Election ballot will double to allow for the ranked voting on the ballot. In the November 2016 election, the ballot printing costs were $103,457.25 and so the new ballot printing costs would be estimated to be twice that at $206,914.50.

In addition, a new precinct counter would need to be purchased that would be programmed to count ranked voting ballots. This is anticipated to be approximately $50,000 which would be a one-time cost.

Officials from the **City of Kansas City** indicated this petition would have no fiscal impact on their city.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from the **Kansas City Board of Election Commissioners** indicated they currently don't have a tabulation system that can do ranked choices. They anticipate having a new system in place in the fall of 2018. This cost of this new system will be between $1.5 to $2 million.

Officials from the **Platte County Election Board** indicated they anticipate no fiscal impact.

John G. Martin, Clerk to the County Commission, Crawford County, Missouri submitted the following information:

Regarding the petition for a proposed amendment to Article VIII (2018-149) of the Missouri State Constitution, the opinion of the local election authority in Crawford County, Missouri, is that so-called Ranked-Choice Voting is neither in the best interest of the citizens of Crawford County, nor of the State of Missouri as a whole.

As proposed, this method would significantly increase the financial burden of our already-bankrupt county through higher ballot, programming, and machine-purchase costs. In the case of Crawford County, ballots and programming costs would rise to over $30,000.00, and purchase of additional machines to expedite counting would add another $15,000.00, at the very least.

If forced upon the counties, this method would also lengthen the wait time for results, meaning that a winner could not be announced on election night, as currently happens. Extra time required to "weed out" candidates who do not receive enough votes to move on to the next "round of voting" will require several days of extra work, as well as additional funds spent to pay for staff and election judges. These costs become larger with each subsequent "round of voting" that may be required.

The idea that this can be accomplished and still have a ballot that is "simple and easy to understand" is asinine. Experience tells us that voters generally do not read or follow directions when ballots and voting methods are changed; they tend to vote the way they always have. For example, it does not matter if the directions are to "draw a straight line," "fill in the oval," or whatever else happens to be in vogue at the time, there will always be those who will place a checkmark next to a name, circle a name, cross out names of those they do not wish to elect, etc. There is nothing in this proposal that is either simple or easy to understand.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education,** the **Department of Transportation, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

This proposal could result in necessary voting machine replacements statewide at an estimated unknown cost up to $43.5 million. Some local election authorities estimate ballot and programming costs.

RE: Petition approval request from Winston Apple regarding a proposed statutory amendment to Chapter 128, Sections 020, 346 & 348 (2018-148)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Winston Apple on January 31, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it enacted by the people of the state of Missouri:

Section 128.020 of the Revised Missouri Statutes is hereby repealed, and sections 128.346 and 128.348 are amended, to read as follows:

128.020. When any new apportionment shall be made of the members to be elected to the house of representatives of the United States, whereby the number of electors to which this state may be entitled shall be increased or diminished, it shall be the duty of the governor to lay off the state into as many districts as shall be equal to the number of electors to which this state shall then be entitled, so that the said districts contain, as near as may be, an equal number of inhabitants.

128.346. The districts established by the provisions of sections 128.400 to 128.440 for the election of representatives to the Congress of the United States shall be effective beginning with election to the 108th Congress and through the election of the 112th Congress. The districts established by sections 128.451 to 128.458 for the election of representatives to the Congress of the United States shall be effective beginning with the election to the 113th Congress. Effective beginning with the election of representatives to the 117th Congress, representatives to the Congress of the United States shall be elected at large, in the manner prescribed by section 128.348.

128.348. (1) The state of Missouri is hereby divided into nine congressional districts. Effective with the election for the 113th Congress, the state of Missouri shall consist of eight congressional districts. The legal voters of each district shall elect one member of Congress of the United States. Effective with the election for the 117th Congress, representatives to the Congress of the United States shall be elected at-large.

(2) Each political party may nominate a total number of candidates up to or equal to the number of representatives (electors) to which the state of Missouri is entitled.

(3) Political parties may determine an ordered list of candidates through a primary election, caucuses, a statewide party nominating convention, or a combination of caucuses and a statewide party nominating convention.

(4) A primary election will be the default method for parties to select an ordered list of candidates. Should a political party determine that they will select candidates by caucuses, statewide party convention, or a combination of caucuses and a statewide party convention, a legally designated representative of the party will notify the secretary of state, in writing, of the method to be used, no later than the first day of April of an election year.

(5) If a political party elects to use a primary election as the means of determining its candidates for the general election, all qualified candidates who file for said party's nominations will appear on the primary ballot for that party. Registered voters will be allowed to vote in one, and only one, party's primary election, and for one, and only one, candidate from that party.

(6) An ordered list of candidates for each party, equal to no more than the number of seats to which the state of Missouri is entitled to in a given Congress, will be placed on the ballot in the general election, based on the number of votes received by each candidate in the primary election for each party.

(7) Should a party elect to nominate candidates for the general election by means of caucuses and/or a statewide party convention, an ordered list of that party's candidates shall be filed with the secretary of state's office no less than 90 days before the general election date in election years.

(8) To qualify for a place on the ballot, an independent candidate must present petitions signed by one-quarter of one percent of the legal votes cast for the sum of all candidates for the United States House of Representatives from Missouri in the general election last preceding. Said petitions must be delivered to the secretary of state no later than one-hundred and twenty days before the general election.

(9) The signatures on petitions submitted by independent candidates and political parties shall be subject to verification according to the procedures in the code of state regulations for independent candidate petitions in force at the time the petitions are submitted.

(10) In each general election, each voter will cast a single vote for a political party, and its ordered list of candidates, or for an independent candidate for Congress appearing on the ballot, or a single write-in vote for a candidate not appearing on the ballot, having properly registered with the secretary of state as a write-in candidate.

(11) (a) To determine how many representatives (electors) will be awarded to each political party and which independent candidates will be elected (if any), the total number of valid votes cast for all parties and independent candidates will be divided by the number of representatives to be elected. The resulting number is then to be rounded to the nearest whole number. The total number of votes cast for each party or independent candidate is then to be divided by that number and each party is awarded that number of representatives, with any remaining votes for each party above the number needed to win that many seats calculated as "surplus votes" for that party. Any independent candidate receiving at least the number of votes needed to be elected is elected. The votes for any party or independent candidate falling short of the number needed for a seat are also treated as surplus votes. Any political party or independent candidate with surplus votes may transfer those surplus votes to another political party or independent candidate by notifying the Secretary of State in writing within seven days of the general election.

(c) The number of representatives thus elected is calculated and subtracted from the total number of representatives to be elected. If there are any remaining representatives to be elected according to the party or independent candidate with the highest number of surplus votes.

(d) In the event that a representative resigns, dies, or is removed from office for any reason during the subsequent legislative sessions, she or he will be replaced by the next nominee from her or his party's ordered list of candidates, or in the case of an independent candidate, by the candidate with the next greatest number of surplus votes.

My commission expires: _____

Be it enacted by the people of the state of Missouri:

Two new sections of the Missouri Revised Statutes, to be known as sections 130.230 and 143.990, are enacted to read as follows:

130.230. 1. "The Missouri Elections Trust Fund" is hereby created to provide public financing for candidates for office in Missouri who agree to accept the conditions specified herein, and who subsequently meet those conditions.
2. The Missouri Elections Trust Fund will be administered by a board, to be known as the "Missouri Elections Trust Fund Commission" consisting of seven members, to be nominated by the governor and approved by the senate. The Missouri Electors Trust Fund Commission shall, within one (1) calendar year of the effective date of this section, promulgate rules necessary for the administration of this section, including a method for the expenditure of the funds collected.
(1) No individual may be appointed to the Missouri Elections Trust Fund Commission who is:
(a) a government employee;
(b) a registered lobbyist, or who has been a registered lobbyist at any time during the 5-year period preceding their appointment to the commission;
(c) an officer or employee of a political party or political campaign;
(d) an elected official, senator, or representative.
(2) Members of the Missouri Elections Trust Fund Commission shall be appointed for a term of five years; except the second and third classes of the first seven members to be appointed, who shall be divided into three classes, as follows;
(a) The first three members to be confirmed shall serve a full five-year term;
(b) The fourth and fifth members to be confirmed shall serve a three-year term;
(c) The sixth and seventh members to be confirmed shall serve a one-year term.
(3) Members of the commission may be removed from office if convicted of fraud or mismanagement of funds administered by the commission, or conviction of a felony.
3. Members of the commission will be reimbursed for travel and other expenses at the prevailing rate for other employees and officers of the state of Missouri.
4. The funds collected under this program will be distributed only to candidates who accept and meet the conditions required to qualify for public financing.
5. Candidates accepting public funds must agree to and meet the following conditions:
(1) Not to accept contributions from corporations or political action committees that accept corporate contributions;
(2) Not to accept donations totaling more than $1000 from any individual or other source, excluding a political party of which they are a member, during an election cycle ("election cycle" is defined as the period between two general elections for the same office); and
(3) That at least one-half of the money raised, or in-kind contributions received, by the candidate will come from individual contributors who contribute a total of $100 or less to the candidate during an election cycle.
6. The funding provided to eligible candidates will be in the form of matching funds, with the ratio of the match relative to the amount of money raised by candidates to be determined by the commission based on the total amount of money raised by all candidates who have elected to accept public funds and the total amount of money available from the fund during each election year.
(1) Thirty-five percent of the funds available shall be distributed on the first day of June of each general election year, based on total monetary contributions received during the election cycle up to the date of the quarterly report filed with the Missouri Ethics Commission for the quarter ending on the thirty-first day of March. (In-kind contributions are not eligible for matching funds.)
(2) The balance of available funds shall be distributed on the third Monday in September of each general election year to eligible candidates in the general election, based on total monetary contributions received and reported through the thirtieth day of August.
7. When a candidate or committee files a termination statement and disclosure report with the Missouri Ethics Commission, any and all funds remaining after repaying any debts owed by the campaign committee are to be paid over to the Missouri Elections Trust Fund, up to and including an amount equal to the full amounts of matching funds received by said candidate.
8. All subsections and all clauses of this Section, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

143.990. 1. In each taxable year beginning on or after January 1, 2018, each individual or corporation having paid state income taxes in the amount of twenty-five dollars or more may designate that five dollars of the tax paid shall be paid over to the Missouri elections trust fund as provided in section 130.230. In the case of a husband and wife with a filing status of married filing combined having paid state income tax in the amount of fifty dollars or more, each spouse may designate that five dollars shall be paid to the fund.
2. The option to contribute to this fund, as authorized by this section, shall be clearly and unambiguously printed on the same page of each income tax return form provided by the state upon which the amount of the amount of tax owed is indicated, and shall include the following statement: "Contributing to the Missouri Elections Trust Fund will not increase the amount of tax owed or reduce the amount of overpayment to be refunded."
3. The department of revenue shall deposit the contributions made pursuant to this statute into the Missouri Election Trust Fund as created in section 130.230.
8. All subsections and all clauses of this Section, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

RE: Petition approval request from Winston Apple regarding a proposed statutory amendment to Chapters 286 & 143, version 2 (2018-146)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Winston Apple on January 31, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

My commission expires: _____

Be it enacted by the people of the state of Missouri:

Two new sections of the Missouri Revised Statutes are hereby enacted, to be known as sections 286.131 and 143.012, to read as follows:

286.131. 1. A program to be known as "The Renewable Energy Project" is hereby created within the Missouri Department of Labor and Industrial Relations.
2. Funding for The Renewable Energy Project will be provided through revenues from a tax on long-term capital gains and qualified dividends, as provided for in Section 143.012.
3. The Missouri Department of Labor and Industrial Relations shall, within one (1) calendar year of the effective date of this section, promulgate rules necessary for the administration of this section, including a method for the expenditure of the funds collected pursuant to section 143.012 in a manner that balances cost-effectiveness, amount of carbon emissions to be avoided, economic development, and employment.
4. Funds collected pursuant to this section and section 143.012 shall be used only for the purposes of improving energy efficiency in buildings, constructing and installing renewable energy resources as defined by section 386.890.2(6), modernizing public infrastructure to utilize energy from renewable energy resources, and planting trees on public lands.
4. a. The compensation provided for, and other specific policies related to, work done through jobs created by this project shall be determined and set by the labor and industrial relations commission, but, at a minimum, shall be set at a level that provides a living wage, which is hereby defined as putting a worker, and her or his dependents, at least ten percent above the poverty threshold based on the poverty guidelines published by the Department of Health and Human Services, provided a worker is present and working 40 hours per week.
b. If a household has two or more adult members and no children or other dependents, meeting this level of compensation may be based on all adults working 40 hours per week, if a household has children between five and sixteen years of age, compensation will be based on one adult member working full time and any additional adult members working during school hours. However, in no event shall the hourly wage paid under this program be less than the applicable minimum wage.
c. Management and administrative positions will pay a reasonable salary based on the prevailing salaries for positions with similar responsibilities elsewhere within the government of the state of Missouri.
5. Once the state of Missouri is producing 90% or more of its electricity from clean, renewable sources, the funds generated by this tax on long-term capital gains and qualified dividends may be used, as directed by appropriate legislation, to replace funds generated by the state sales tax so that sales taxes may be reduced or eliminated.
4. All subsections and all clauses of this Section, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

143.012. 1. Beginning with the 2019 calendar year, a tax on capital gains and qualified dividends will be imposed, with the funds collected dedicated to providing funding for The Renewable Energy Project. The amount of the tax will be the difference, expressed as a percentage, of the rate paid to the federal government on the long-term capital gain or qualified dividend, and the tax paid for an equal amount of ordinary income.
2. Any taxpayer whose total family income is less than 110 percent of the dollar amount of the poverty threshold based on the poverty guidelines published by the Department of Health and Human Services is exempt from this tax.
4. All subsections and all clauses of this Section, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

My commission expires: _____

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article III, Section 2, Section 5, and Section 7 of the Constitution are amended to read as follows:

Section 2. Election of representatives—apportionment commission, appointment, duties, compensation. — The house of representatives shall consist of **[**one hundred sixty-three**]** ten members from each congressional district elected at each general election and apportioned in the following manner: Within sixty days after the population of this state is reported to the President for each decennial census of the United States and, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within sixty days after notification by the governor that such a ruling has been made, the congressional district committee of each of the two political parties casting the highest vote for at the last preceding election shall meet and the members of the committee shall nominate, by a majority vote of the members of the committee present, provided that a majority of the elected members is present, two members of their party, residents in that district, as nominees for reapportionment commissioners. Neither party shall select more than one nominee from any one state representative district. The congressional committees shall each submit to the governor their list of elected nominees. Within thirty days the governor shall appoint a commission consisting of one name from each list to reapportion the state into one hundred and sixty-three representative districts and to establish the numbers and boundaries of said districts.

If any of the congressional committees fails to submit a list within such time the governor shall appoint a member of his own choice from that district and from the political party of the committee failing to make the appointment.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.
For the purposes of this article, the term congressional district committee or congressional district refers to the congressional district committee or the congressional district from which a congressman was last elected, or, in the event members of congress from this state have been elected at large, the term congressional district committee refers to those persons who last served as the congressional district committee for those districts from which congressmen were last elected, and the term congressional district refers to those districts from which congressmen were last elected. Any action pursuant to this section by the congressional district committee shall take place only at duly called meetings, shall be recorded in their official minutes and only members present in person shall be permitted to vote.

The commissioners so selected shall on the fifteenth day, excluding Sundays and holidays, after all members have been selected, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary and shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held. A copy of the agenda shall be filed with the clerk of the house of representatives within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable.

The commission shall reapportion the representatives by dividing the population of the state by the number one hundred sixty-three and shall establish each district so that the population of that district shall, as nearly as possible, equal that figure.

Each district shall be composed of contiguous territory as compact as may be.

Not later than five months after the appointment of the commission, the commission shall file with the secretary of state a tentative plan of apportionment and map of the proposed districts and during the ensuing fifteen days shall hold such public hearings as may be necessary to hear objections or testimony of interested persons.

Not later than six months after the appointment of the commission, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts, and no statement shall be valid unless approved by at least seven-tenths of the members.
After the statement is filed members of the house of representatives shall be elected according to such districts until a reapportionment is made as herein provided, except that if the statement is not filed within six months of the time fixed for the appointment of the commission, it shall stand discharged and the house of representatives shall be apportioned by a commission of six members appointed from among the judges of the appellate courts of the state of Missouri by the state supreme court, a majority of whom shall sign and file its apportionment plan and map with the secretary of state within ninety days of the date of the discharge of the apportionment commission. Thereafter members of the house of representatives shall be elected according to such districts until a reapportionment is made as herein provided.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.
No reapportionment shall be subject to the referendum.

Section 5. The senate shall consist of thirty-four members, divided in two groups of seventeen each, elected by the qualified voters of the respective congressional districts for four years, with each voter in each district casting a single vote in each general election for the ordered list of a political party, or for a single independent candidate appearing on the ballot, or for a single write-in vote for a candidate not appearing on the ballot, having properly registered with the secretary of state as a write-in candidate. **[**For the election of senators, the state shall be divided into convenient districts of contiguous territory, as compact and nearly equal in population as may be.**]**

For the general election held in November of 2020, the number of members of the senate to be elected from each district will be equal to the number of members from that district whose term of office is expiring. Members elected from even-numbered congressional districts will serve a four-year term. Members elected in odd numbered districts will serve a two-year term. For the general election held in November of 2022, seventeen members from odd-numbered districts will be elected. A number of members equal to the number of members whose term is expiring will be elected from even-numbered districts, to serve a two-year term. Beginning in 2024 and every two years thereafter, the full complement of seventeen members will be elected in each general election, beginning with even-numbered districts in 2024 and odd-numbered districts in 2026.

Section 7. **[**Within sixty days after the population of this state is reported to the President for each decennial census of the United States, and within sixty days after notification by the governor that a reapportionment has been invalidated by a court of competent jurisdiction, the state committee of each of the two political parties casting the highest vote for governor at the last preceding election shall, at a committee meeting duly called, select by a vote of the individual committee members, and thereafter submit to the governor a list of ten persons, and within thirty days thereafter the governor shall appoint a commission of ten members, five from each list, to reapportion the thirty-four senatorial districts and to establish the numbers and boundaries of said districts.

If either of the party committees fails to submit a list within such time the governor shall appoint five members of his own choice from the party of the committee so failing to act.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

The commissioners so selected shall on the fifteenth day, excluding Sundays and holidays, after all members have been selected, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary and shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held. A copy of the agenda shall be filed with the secretary of the senate within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable.

The commission shall reapportion the senatorial districts by dividing the population of the state by the number thirty-four and shall establish each district so that the population of that district shall, as nearly as possible, equal that figure; no county lines shall be crossed except when necessary to add sufficient population to a multi-district county or city to complete only one district which lies partly within such multi-district county or city so as to be as nearly equal as practicable in population. Any county with a population in excess of the quotient obtained by dividing the population of the state by the number thirty-four is hereby declared to be a multi-district county.

Not later than five months after the appointment of the commission, the commission shall file with the secretary of state a tentative plan of apportionment and map of the proposed districts and during the ensuing fifteen days shall hold such public hearings as may be necessary to hear objections or testimony of interested persons.

Not later than six months after the appointment of the commission, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts, and no statement shall be valid unless approved by at least seven members.
After the statement is filed senators shall be elected according to such districts until a reapportionment is made as herein provided, except that if the statement is not filed within six months of the time fixed for the appointment of the commission, it shall stand discharged and the senate shall be apportioned by a commission of six members appointed from among the judges of the appellate courts of the state of Missouri by the state supreme court, a majority of whom shall sign and file its apportionment plan and map with the secretary of state within ninety days of the date of the discharge of the apportionment commission. Thereafter senators shall be elected according to such districts until a reapportionment is made as herein provided.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session, but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.
No reapportionment shall be subject to the referendum.**]**

An ordered list of candidates, ranked by number of votes received, from most to last, from each political party that is to appear on the ballot for both the senate and the house of representatives in each general election will be determined by means of a primary election, with each party electing a number of candidates up to, but not exceeding, the number of members to be elected. All qualified candidates who file for said party's nomination will appear on the primary ballot for that party. Registered voters will be allowed to vote in one, and only one, party's primary election, and will cast a single vote for a single candidate to be nominated from that party for each office to be elected in the general election to follow.

A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot by presenting petitions signed by one-half of one per cent of the legal voters in a given congressional district. An independent candidate may qualify for a place on the ballot by presenting petitions signed by one-fifth of one percent of the legal voters in a given congressional district. The number of "legal voters" is equal to, and determined by, the total vote for governor in that congressional district in the general election last preceding. Said petitions to be delivered to the secretary of state no later than ninety days preceding the general election. At the time the petitions are presented, the political party will also notify the secretary of state of the method to be used by said party in nominating a slate of candidates.

The signatures on petitions submitted by independent candidates and political parties shall be subject to verification according to the procedures in the code of state regulations for independent candidate petitions in force at the time the petitions are submitted.

To determine how many seats in the house of representatives and the senate will be assigned to each political party and which independent or write-in candidates will be assigned seats (if any), the total number of valid votes cast for all parties and independent candidates will be divided by ten, for seats from each district in the house of representatives, and by the number of seat to be elected to the senate. The resulting number is then to be rounded to the nearest whole number. The total number of votes cast for each party or independent or write-in candidate is then to be divided by that number and each party is awarded that number of seats, with any remaining votes for each party above the number needed to win that many seats calculated as "surplus votes" for that party. Any independent candidate receiving at least the number of votes needed for a seat is awarded a seat. The votes for any party or independent candidate falling short of the number needed for a seat are also treated as surplus votes.

The surplus votes of any political party or independent candidate having surplus votes, but not having enough surplus votes to win an additional seat, or a seat, may have those surplus votes transferred to another political party or independent candidate by notifying the Secretary of State in writing on or before the date of the general election.

The number of seats thus assigned is calculated and subtracted from the total number of seats to be awarded. Any remaining seats are then awarded, in order, to the party or independent candidate with the highest number of surplus votes.

If a senator or representative resigns, dies, or is removed from office for any reason during the subsequent legislative sessions, the seat shall be filled by the next candidate from her or his party's ordered list, or in the case of an independent candidate, who would have won election had there been one more member elected using the prescribed method for tabulating votes.

This amendment shall take effect January 1, 2019 and beginning with the selection of candidates and election of representatives and senators in the general election to be held in November of 2020.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section 35 of Article I of the Constitution of Missouri is amended by modifying section 35. The existing section 35 is set forth hereinafter with the new matter underlined and deleted matter in brackets,

Section 35.

Definitions of terms, as used in this Act:

A) Cannabis: refers to the cannabis, marihuana, marijuana, cannabis, sativa, cannabis indica, cannabis ruderalis, or any variety of cannabis, including but not limited to, derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof

B) Hemp: The fiber of this plant, extracted from the stem and used to make rope, fabrics, fiberboard, clothing, and paper. The sister plant of cannabis

That agriculture which provides food, energy, health benefits, and security is the foundation and stabilizing force of Missouri's economy. To protect this vital sector of Missouri's economy, the right of farmers and ranchers to engage in farming and ranching practices, including but not limited to the right to grow cannabis and hemp, shall be forever guaranteed in this state, subject to duly authorized powers, if any, conferred by article VI of the Constitution of Missouri.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

This measure amends the Missouri Constitution by adding Section 54 to Article 4. This amendment implicitly repeals, in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105, 105.1108, 105.1112, 195.010.(10)(b)c,195.010.(10)(d), 195.010.(17)(m)(b), 195.010.(17)(g), 195.010.(17)(l),195.010(24), 195.015.4, 195.017.2(4)(r), 195.017.2(4)(z), 195.017.2(4)(ii),195.140.2(2), 195.202.2, 195.202.3, 195.211.2, 195.211.3, 195.211.4, 195.222.7,195.223.7, 195.223.8, 263.250.1.

1.The following shall be called the Cannabis Treatment Amendment

2. Definition of terms, as used in this Act:

a) "cannabis" and "cannabis hemp" refer to the cannabis, marihuana, marijuana, cannabis sativa, cannabis indica, cannabis ruderalis, or any variety of cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof. This Amendment shall apply to all rsmo mentioning marijuana.

b) "hemp": the fiber of this plant, extracted from the stem and used to make rope, stout fabrics, fiberboard, and paper. the sister plant of cannabis

c) "medical cannabis" refers to the medical use of cannabis.

d) "personal use" refers to the non-medical consumption of cannabis.

e) "Expungeable marijuana offense" are any convictions committed prior to this amendment.

f) "cannabis accessories" means any equipment, products, or materials of any kind that are used, intended for use, or designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing cannabis, or for ingesting, inhaling, vaporizing, smoking or otherwise introducing cannabis into and/or onto the human body.

g) "establishment" refers to a cannabis cultivation facility, a cannabis testing facility, a cannabis product manufacturing facility, or a retail cannabis store or other entity that cultivates, prepares, manufactures, packages, transports or sells cannabis, cannabis products and/or cannabis accessories.

3.The following acts are not unlawful and shall not be an offense under Missouri law or be a basis for seizer or forfeiture.

a) Possession, production, cultivation and distribution of hemp, marijuana and cannabis.

b) Cultivation, harvesting processing, manufacturing, packaging, distributing, transferring, displaying or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes provided the person has current applicable licensing to operate a commercial establishment. No special licensing will be required beyond that which is applicable for the cultivation, harvest, processing, manufacturing, packaging, distribution, transferal, display or possessing of any non-toxic food or food product.

4. The Missouri legislature may pass laws that doesn't conflict with this amendment. Medical cannabis, commonly known as marijuana, shall be available to patients who with a doctor's recommendation and Missouri Controlled Substance relating to marijuana schedule list shall change to reflect that cannabis as defined in Section two; clause a of this amendment, shall be available with a doctor's recommendation. The following acts are not unlawful and shall not be an offense under Missouri law or be a basis for seizure or forfeiture:

a) All Missouri patients engaged in cannabis treatment shall be afforded the same rights and privileges afforded to any patient treated through other pharmaceutical means.

b) Cannabis acquisition, possession, and consumption shall be permitted to patients under the age of 18 with the consent of a parent or legal guardian and through the supervision of a parent or legal custodian and a licensed physician.

c) Licensed physicians shall not be penalized for nor restricted from recommending cannabis for medical purposes to any person.

d) Opinions pertaining to, and willingness to recommend medical cannabis treatment shall not be a criteria for the licensure of physicians; no physician shall be subject to any professional licensing review or hearing as a result of recommending or approving medical cannabis therapy.

e) Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis.

f) Primary caregiver shall not be subjected to criminal or civil charges for providing cannabis to patients who been given a doctor's a medical professional.

5. Nothing in this section shall:

a) Require an employer to retain an employee who is impaired on the job by his use of cannabis.

b) Permit operation of a motor vehicle, watercraft, aircraft, train, or any transportation device of vehicle by anyone who is impaired by marijuana, cannabis or any other controlled substance.

c) Permit the transfer or sale of cannabis intended for medical treatment to a person engaged in personal use.

6. Medical dispensaries shall verify the following:

a) The patient has a notarized letter from medical professional recommendation cannabis for medical treatment.

b) If, primary caregiver, the dispensary verifies the patient and the primary caregiver.

c) The patient's 9 digit random alphabet. Dispensaries my issue a random alphabet after verifying the Doctor's Recommendation.

d) Retail cannabis products for medical use shall contain appropriate labeling, which outlines the weight and estimated potency of the product, lists all pesticides used in production, and summarizes the safe and effective use of cannabis. Labels shall not be false or misleading, and should be based on data derived from scientific study and prevailing human experience

7. The Department of Health and Senior Services shall issue 9 digit random alphabet out to patients and keep records of the alphabet on a state wide registry. The registry is to verify it's a patient and it shall not be subjected to Sunshine request under rsmo chapter 610. No law enforcement agency my access the list without a warrant. Law enforcement agencies my only view a printed list but not electronically. Dispensaries shall the Register with the the Department of Health and Senior Services for:

a) licensing and regulations

b) paying fees of no more than $100.00

c) to assist with the 9 digit random alphabet registry.

8. Upon the passage of this Act, all persons incarcerated or under supervision of the Missouri Board of Probation and Parole for non-violent, cannabis-only offenses which are no longer illegal for medical treatment in the State of Missouri under this Act and been convicted prior to this Act shall be immediately released and their civil and criminal records shall be expunge by the Court.

9. Any person who willfully impedes the lawful exercise of these provisions is guilty of a Class A misdemeanor.

10. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirement, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer,

manufacturer, processor or distributor. Patients are are allowed to grow cannabis for medical treatment for self. Primary caregiver are allowed to grow for their patients.
11. All provisions of this section are self-executing and severable, and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.This shall
12. become effective on December 6th 2018.

In the November general of 2020, voters shall vote to repeal the above sections 1 through 12 & replace it with the below section 13 through 25. A yes vote approve the repeal above sections 1 through 12 and replace with below sections 13 through 25. If voters fail shall to vote yes, the above sections 1 though 12 remains and voters shall vote again every four years until voters vote yes. Because such vote is contingent on passage of sections 1 through 12, voters will neither be asked to repeal sections 1 through 12 don't and replace with sections 13 through 25 if sections 1 through 12 don't pass.

13.The following shall be called the Cannabis Legalization Amendment

14.Definition of terms, as used in this Act:

a) "cannabis" and "cannabis hemp" refer to the cannabis, marihuana, marijuana, cannabis sativa, cannabis indica, cannabis ruderalis, or any variety of cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof.

b) "hemp": the fiber of this plant, extracted from the stem and used to make rope, stout fabrics, fiberboard, and paper. the sister plant of cannabis

c) "medical cannabis" refers to the medical use of cannabis.

d) "personal use" refers to the non-medical consumption of cannabis.

e) "Expungeable marijuana offense" are any convictions committed prior to this amendment.

f) "cannabis accessories" means any equipment, products, or materials of any kind that are used, intended for use, or designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing cannabis, or for ingesting, inhaling, vaporizing, smoking or otherwise introducing cannabis into and/or onto the human body.

g) "establishment" refers to a cannabis cultivation facility, a cannabis testing facility, a cannabis product manufacturing facility, or a retail cannabis store or other entity that cultivates, prepares, manufactures, packages, transports or sells cannabis, cannabis products and/or cannabis accessories.

15. The Missouri legislature my pass laws that doesn't conflict with this amendment. Marijuana shall shall not be listed in Missouri Controlled Substance to reflect the change that cannabis as defined in section 14; clause a, are permitted for personal use for persons 21 of age or older and shall be available with a doctor's recommendation without an age limit. The following acts are not unlawful and shall not be an offense under Missouri law or be a basis for seizure or forfeiture.

a) Adult Possession of cannabis for personal at 21 years or older.

b) Possession, production, cultivation and distribution of hemp, marijuana and cannabis.

c) Providing cannabis, cannabis accessories, and products for sale to consumers. Retail cannabis products for medical or personal use shall contain appropriate labeling, which outlines the weight and estimated potency of the product, lists all pesticides used in production, and summarizes the safe and effective use of cannabis. Labels shall not be false or misleading, and should be based on data derived from scientific study and prevailing human experience

16. Medical cannabis shall be available to patients who have a physician's recommendation.

a) All patients engaged in cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through other pharmaceutical means.

b) Cannabis acquisition, possession, and consumption shall be permitted to patients under the age of twenty-one with the consent of a parent or legal guardian and through the supervision of a parent or legal custodian and a licensed physician.

c) Licensed physicians shall not be penalized for, nor restricted from recommending cannabis for medical purposes to any person.

d) Opinions pertaining to, and willingness to recommend medical cannabis therapy shall not be a criteria for the licensure of physicians; no physician shall be subject to any professional licensing review or hearing as a result of recommending or approving medical cannabis therapy.

e) Any individual who is a legal cannabis patient in another state shall be granted the same rights and privileges as a legal Missouri cannabis patient.

Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis.

17. Nothing in this section shall:

a) Require an employer to retain an employee who is impaired on the job by his use of cannabis.

b) Permit operation of a motor vehicle, watercraft, aircraft, train, or any transportation device of vehicle by anyone who is impaired by marijuana, cannabis or any other controlled substance.

c) Permit the transfer or sale of cannabis intended for adult use to a person younger than twenty-one years of age.

18. Forbid any individual, corporate property owner, elementary education institutions, and secondary education institutions from prohibiting the distribution, sale or cultivation of cannabis within their dwelling for medical treatment

19. The dictates of this Initiative shall be implemented no later than January 1, following the election that placed this Initiative before the people.

20. Upon the passage of this Act, all persons incarcerated or under supervision of the Missouri Board of Probation and Parole for nonviolent, cannabis-only offenses which are no longer illegal in the State of Missouri under this Act shall be immediately released.

(a) The Court shall order the immediate expungement of civil and criminal records pertaining to all non-violent cannabis only offenses which are no longer illegal in the State of Missouri under this Act.

(b) Within 60 days of the passage of this Act, The Attorney General shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis-related nonviolent civil and criminal records in Missouri and for any offense covered by this amendment. This document shall be distributed to all Circuit Court clerks within the State.

21. No Missouri law enforcement personnel or state funds shall be used to assist or aid in the enforcement of federal cannabis laws involving acts which are no longer illegal in the State of Missouri under this amendment.

22. Any person who willfully impedes the lawful exercise of these provisions is guilty of a Class A misdemeanor.

23. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirement, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor.

24. Taxes and regulations not conflicting with sections may be imposed on the production, distribution, cultivation and possession of cannabis, marijuana and hemp shall be subjected to duly authorized powers, if any, conferred by article III and VI of the Constitution of Missouri:

25. All provisions of this section are self-executing and severable, and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article IV is amended by adding one new section to be known as Section 40(c), to read as follows:

40(c). 1. The provisions of Section 40(c) shall be known as the Fair Chase Amendment, and its purpose is to prohibit confined big game killing in Missouri. It shall be the public policy of this state to protect the health of Missouri's livestock and wildlife by changing the requirements related to captive big game species. Confined big game killing does not provide any food, energy, health benefits or security to Missouri and presents significant threats to the safety, health and welfare of wildlife across Missouri. Confined big game killing, or owning, confining, transporting or possessing big game species for any purpose shall not be construed as hunting, farming or ranching for any purpose under this Constitution or any law.

2. No person shall engage in confined big game killing, except: any person with a valid permit in effect on November 6, 2018. Such person may renew such permit up to and through November 7, 2021, at which time all such permits shall expire and thereafter all confined big game killing shall be prohibited without exception. The Missouri Conservation Commission may make such rules and regulations as may be deemed necessary for the enforcement of this Amendment.

3. At the expiration of any permit referred under subsection 2 of this section, big game species must be located only where they may be confined legally under all applicable laws and regulations in effect at that time.

4. Definitions.

a. "Big game species" shall not include any livestock as defined in this Amendment and shall include all of the following animals, either as live animals or embryos, ova, semen and genetic material intended for commercial breeding operations: (a) all cervids including but not limited to white-tailed deer, elk, mule deer, red deer, fallow deer, sika deer and moose; (b) mountain goats, bighorn sheep, Dall's sheep, pronghorn, peccary, and javelina; and (c) any ungulate (hooved animal) confined or bred primarily for confined big game killing.

b. "Confined big game killing" shall mean an act in which an owner, operator or agent of a big game preserve obtains fees or other remuneration from another person for the killing or attempted killing of privately-owned big game species confined in or released from any man-made enclosure designed to prevent escape, but shall not include any act of a government employee or agent to control an animal population, to prevent or control diseases, or when government action is otherwise required or authorized by law.

c. "Livestock" as used in this Amendment, shall mean cattle, fully domesticated swine, fully domesticated sheep, fully domesticated goats, fully domesticated bison, fully domesticated ratite birds, fully domesticated rabbits, and fully domesticated horses, donkeys, mules, alpacas and llamas, where such fully domesticated animals are raised for human use or consumption and not for uses regulated by the Missouri Conservation Commission. Livestock shall also include semen or ova of any designated animal in this definition.

d. "Big game preserve" shall mean a facility confining privately-owned big game species via escape-resistant fencing which reduces the ability of such privately-owned big game species to evade or escape pursuit.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-141)

This proposal would amend Article IV of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University, Truman State University,** the **Missouri Joint Municipal Electric Utility Commission,** and **Metropolitan Zoological Park and Museum District**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated the cost of this proposal is unknown but potentially significant to their department. The proposal takes away a portion of their statutory authority over animal movement and animal health. They lose their current authority over privately owned species under this proposal. It may prevent their department from meeting US Department of Agriculture criteria for an approved Chronic Wasting Disease program, which would eliminate FTE from the Division of Animal Health and have a negative economic impact on the Missouri economy.

The Agricultural and Food Policy Center at Texas A&M University conducted an economic impact study of the United States cervid farming industry in 2007 based on a survey of the deer farms in Texas and the elk producers located throughout the United States.

Based on the values provided by the Texas A&M study, and an estimated number of cervid producers (225) in Missouri, the industry has an estimated direct economic impact of approximately 98 million dollars. The number of individuals employed in the cervid industry is estimated to be approximately 1150 individuals. Based on the study and 2007 property tax rates, the cervid industry would pay approximately $700,000 in property taxes.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact. This initiative petition prohibits confined big game hunting in Missouri. There are no criminal penalties proposed for violating the Fair Chase Amendment.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this legislation will not have a fiscal impact on their department.

Officials from the **Department of Public Safety, Office of the Director** indicated they see no fiscal impact due to this petition.

Officials from the **Department of Public Safety, Division of Missouri State Highway Patrol** indicated no fiscal impact on their department.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal. Any cost savings in the form of staff time that would not have to be spent permitting and inspecting big game hunting preserves would be minimal, and staff would be reallocated to address other department needs.

Officials from the **Department of Transportation** indicated no fiscal impact.

Officials from the **Office of Administration** indicated the proposed amendment would authorize the Missouri Conservation Commission to regulate confined, privately owned big game species. It would also restrict or prohibit certain activities relating to such species. Budget and Planning defers to the Missouri Conservation Commission for an estimate of the proposal's fiscal impact on the Commission or the Missouri Department of Conservation (MDC). Budget and Planning also defers to the Missouri Department of Agriculture (MDA) for an estimate of the proposal's potential fiscal impact on MDA. Budget and Planning does not have sufficient information to estimate the potential fiscal impact the proposal may have on state or local government revenues derived from practices that would be regulated, restricted, or prohibited under the proposal.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated their local government estimates the fiscal impact of the above-referenced constitutional amendment for fiscal years 2018, 2019 and 2020 to be as follows:
(reminder: 2018 will likely be a portion of a fiscal year, depending on effective date of amendment)

Revenues: (explain amount per fiscal year and source or reason for increase)
This constitutional amendment will have no fiscal impact on their city.

Savings: (explain amount per fiscal year, reason for savings and area where savings will occur)

This constitutional amendment will have no fiscal impact on their city.

Costs:(explain what type of costs will be incurred, amount per fiscal year and reason)
This constitutional amendment will have no fiscal impact on their city.

Losses:(explain why revenue losses would be expected and amount per fiscal year)
This constitutional amendment will have no fiscal impact on their city.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from the **City of St. Joseph** indicated this initiative petition will not have a fiscal impact on their local government.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from the **Missouri State University** indicated in response to this initiative petition, no fiscal impact to their university.

Officials from the **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this will not have a fiscal impact on their university.

Officials from the **Metropolitan Zoological Park and Museum District** indicated if the proposed amendment is adopted, they do not believe they will be impacted fiscally.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Harris-Stowe State University, Lincoln University, Northwest Missouri State University, Southeast Missouri State University, Truman State University,** and the **Missouri Joint Municipal Electric Utility Commission.**

Fiscal Note Summary

State governmental impact is unknown. Local governmental entities expect no costs or savings.

STATE AUDITORS OFFICE

RE: Petition approval request from Marc Ellinger regarding a proposed constitutional amendment to Article IV, version 4 (2018-140)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Marc Ellinger on January 25, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article IV is amended by adding one new section to be known as Section 40(c), to read as follows:

40(c). 1. The provisions of Section 40(c) shall be known as the Fair Chase Amendment, and its purpose is to prohibit confined big game killing in Missouri. It shall be the public policy of this state to protect the health of Missouri's livestock and wildlife by changing the requirements related to captive big game species. Confined big game killing does not provide any food, energy, health benefits or security to Missouri and presents significant threats to the safety, health and welfare of wildlife across Missouri. Confined big game killing, or owning, confining, transporting or possessing big game species for any purpose shall not be construed as hunting, farming or ranching for any purpose under this Constitution or any law.

2. No person shall engage in confined big game killing, except: any person with a valid permit in effect on November 6, 2018. Such person may renew such permit up to and through November 7, 2021, at which time all such permits shall expire and thereafter all confined big game killing shall be prohibited without exception.

3. In addition to the authority vested in it by Section 40(a) of Article IV, the Missouri Conservation Commission shall have primary authority over the regulation of privately-owned big game species, but excluding bison not raised, bred or held for confined big game killing. The Missouri Conservation Commission may make such rules and regulations as may be deemed necessary for the enforcement of this Amendment.

4. Captive privately-owned big game species shall not be imported into the state of Missouri unless such big game species are being transported to and will be under the supervision of 1) publicly owned zoos or wildlife or research organizations, or American Zoo and Aquariums Association accredited not-for-profit facilities, or 2) a nationally accredited university, college, or school, an incorporated city, state or federal agency for the sole purpose of scientific research. At the expiration of any permit under subsection 2 of this section, big game species must be located only where they may be confined legally under all applicable laws and regulations in effect at that time.

5. Definitions.

a. "Big game species" shall not include any livestock as defined in this Amendment and shall include all of the following animals, either as live animals or embryos, ova, semen and genetic material intended for commercial breeding operations: (a) all cervids including but not limited to white-tailed deer, elk, mule deer, red deer, fallow deer, sika deer and moose; (b) mountain goats, bighorn sheep, Dall's sheep, pronghorn, peccary, and javelina; and (c) any ungulate (hooved animal) confined or bred primarily for confined big game killing.

b. "Confined big game killing" shall mean an act in which an owner, operator or agent of a big game preserve obtains fees or other remuneration from another person for the killing or attempted killing of privately-owned big game species confined in or released from any man-made enclosure designed to prevent escape, but shall not include any act of a government employee or agent to control an animal population, to prevent or control diseases, or when government action is otherwise required or authorized by law.

c. "Livestock" as used in this Amendment, shall mean cattle, fully domesticated swine, fully domesticated sheep, fully domesticated goats, fully domesticated bison, fully domesticated ratite birds, fully domesticated rabbits, and fully domesticated horses, donkeys, mules, alpacas and llamas, where such fully domesticated animals are raised for human use or consumption and not for uses regulated by the Missouri Conservation Commission. Livestock shall also include semen or ova of any designated animal in this definition.

d. "Big game preserve" shall mean a facility confining privately-owned big game species via escape-resistant fencing which reduces the ability of such privately-owned big game species to evade or escape pursuit.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-140)

Subject

Initiative petition from Marc Ellinger regarding a proposed constitutional amendment to Article IV. (Received January 25, 2017)

Date

February 14, 2017

Description

This proposal would amend Article IV of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University, Truman State University,** the **Missouri Joint Municipal Electric Utility Commission,** and **Metropolitan Zoological Park and Museum District**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated the cost of this proposal is unknown but potentially significant to their department. The proposal takes away a portion of their statutory authority over animal movement and animal health. They lose their current authority over privately owned species under this proposal. It may prevent their department from meeting US Department of Agriculture criteria for an approved Chronic Wasting Disease program, which would eliminate FTE from the Division of Animal Health and have a negative economic impact on the Missouri economy.

The Agricultural and Food Policy Center at Texas A&M University conducted an economic impact study of the United States cervid farming industry in 2007 based on a survey of the deer farms in Texas and the elk producers located throughout the United States.

Based on the values provided by the Texas A&M study, and an estimated number of cervid producers (225) in Missouri, the industry has an estimated direct economic impact of approximately 98 million dollars. The number of individuals employed in the cervid industry is estimated to be approximately 1150 individuals. Based on the study and 2007 property tax rates, the cervid industry would pay approximately $700,000 in property taxes.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have an effect on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact. This initiative petition prohibits confined big game hunting in Missouri. There are no criminal penalties proposed for violating the Fair Chase Amendment.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this legislation will not have a fiscal impact on their department.

Officials from the **Department of Public Safety, Office of the Director** indicated they see no fiscal impact due to this petition.

Officials from the **Department of Public Safety, Division of Missouri State Highway Patrol** indicated no fiscal impact on their department.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal. Any cost savings in the form of staff time that would not have to be spent permitting and inspecting big game hunting preserves would be minimal, and staff would be reallocated to address other department needs.

Officials from the **Department of Transportation** indicated no impact.

Officials from the **Office of Administration** indicated the proposed amendment would authorize the Missouri Conservation Commission to regulate confined, privately owned big game species. It would also restrict or prohibit certain activities relating to such species. Budget and Planning defers to the Missouri Conservation Commission for an estimate of the proposal's fiscal impact on the Commission or the Missouri Department of Conservation (MDC). Budget and Planning also defers to the Missouri Department of Agriculture (MDA) for an estimate of the proposal's potential fiscal impact on MDA. Budget and Planning does not have sufficient information to estimate the potential fiscal impact the proposal may have on state or local government revenues derived from practices that would be regulated, restricted, or prohibited under the proposal.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated their local government estimates the fiscal impact of the above-referenced constitutional amendment for fiscal years 2018, 2019 and 2020 to be as follows:
(reminder: 2018 will likely be a portion of a fiscal year, depending on effective date of amendment)

Revenues: (explain amount per fiscal year and source or reason for increase)
This constitutional amendment will have no fiscal impact on their city.

Savings: (explain amount per fiscal year, reason for savings and area where savings will occur)

This constitutional amendment will have no fiscal impact on their city.

Costs:(explain what type of costs will be incurred, amount per fiscal year and reason)
This constitutional amendment will have no fiscal impact on their city.

Losses:(explain why revenue losses would be expected and amount per fiscal year)
This constitutional amendment will have no fiscal impact on their city.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from the **City of St. Joseph** indicated this initiative petition will not have a fiscal impact on their local government.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from the **Missouri State University** indicated in response to this initiative petition, no fiscal impact to their university.

Officials from the **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this will not have a fiscal impact on their university.

Officials from the **Metropolitan Zoological Park and Museum District** indicated if the proposed amendment is adopted, they do not believe they will be impacted fiscally.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Harris-Stowe State University, Lincoln University, Northwest Missouri State University, Southeast Missouri State University, Truman State University,** and the **Missouri Joint Municipal Electric Utility Commission.**

Fiscal Note Summary

State governmental impact is unknown. Local governmental entities expect no costs or savings.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article IV is amended by adding one new section to be known as Section 40(c), to read as follows:

40(c). 1. The provisions of Section 40(c) shall be known as the Fair Chase Amendment, and its purpose is to prohibit confined big game killing in Missouri. It shall be the public policy of this state to protect the health of Missouri's livestock and wildlife by changing the requirements related to captive big game species. Confined big game killing does not provide any food, energy, health benefits or security to Missouri and presents significant threats to the safety, health and welfare of wildlife across Missouri. Confined big game killing, or owning, confining, transporting or possessing big game species for any purpose shall not be construed as hunting, farming or ranching for any purpose under this Constitution or any law.

2. No person shall engage in confined big game killing, except: any person with a valid permit in effect on November 6, 2018. Such person may renew such permit up to and through November 7, 2021, at which time all such permits shall expire and thereafter all confined big game killing shall be prohibited without exception.

3. In addition to the authority vested in it by Section 40(a) of Article IV, the Missouri Conservation Commission shall have primary authority over the regulation of privately-owned big game species, but excluding bison not raised, bred or held for confined big game killing. The Missouri Conservation Commission may make such rules and regulations as may be deemed necessary for the enforcement of this Amendment.

4. At the expiration of any permit referred under subsection 2 of this section, big game species must be located only where they may be confined legally under all applicable laws and regulations in effect at that time.

5. Definitions.

a. "Big game species" shall not include any livestock as defined in this Amendment and shall include all of the following animals, either as live animals or embryos, ova, semen and genetic material intended for commercial breeding operations: (a) all cervids including but not limited to white-tailed deer, elk, mule deer, red deer, fallow deer, sika deer and moose; (b) mountain goats, bighorn sheep, Dall's sheep, pronghorn, peccary, and javelina; and (c) any ungulate (hooved animal) confined or bred primarily for confined big game killing.

b. "Confined big game killing" shall mean an act in which an owner, operator or agent of a big game preserve obtains fees or other remuneration from another person for the killing or attempted killing of privately-owned big game species confined in or released from any man-made enclosure designed to prevent escape, but shall not include any act of a government employee or agent to control an animal population, to prevent or control diseases, or when government action is otherwise required or authorized by law.

c. "Livestock" as used in this Amendment, shall mean cattle, fully domesticated swine, fully domesticated sheep, fully domesticated goats, fully domesticated bison, fully domesticated ratite birds, fully domesticated rabbits, and fully domesticated horses, donkeys, mules, alpacas and llamas, where such fully domesticated animals are raised for human use or consumption and not for uses regulated by the Missouri Conservation Commission. Livestock shall also include semen or ova of any designated animal in this definition.

d. "Big game preserve" shall mean a facility confining privately-owned big game species via escape-resistant fencing which reduces the ability of such privately-owned big game species to evade or escape pursuit.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-139)

Subject

Initiative petition from Marc Ellinger regarding a proposed constitutional amendment to Article IV. (Received January 25, 2017)

Date

February 14, 2017

Description

This proposal would amend Article IV of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University, Truman State University,** the **Missouri Joint Municipal Electric Utility Commission,** and **Metropolitan Zoological Park and Museum District**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated the cost of this proposal is unknown but potentially significant to their department. The proposal takes away a portion of their statutory authority over animal movement and animal health. They lose their current authority over privately owned species under this proposal. It may prevent their department from meeting US Department of Agriculture criteria for an approved Chronic Wasting Disease program, which would eliminate FTE from the Division of Animal Health and have a negative economic impact on the Missouri economy.

The Agricultural and Food Policy Center at Texas A&M University conducted an economic impact study of the United States cervid farming industry in 2007 based on a survey of the deer farms in Texas and the elk producers located throughout the United States.

Based on the values provided by the Texas A&M study, and an estimated number of cervid producers (225) in Missouri, the industry has an estimated direct economic impact of approximately 98 million dollars. The number of individuals employed in the cervid industry is estimated to be approximately 1150 individuals. Based on the study and 2007 property tax rates, the cervid industry would pay approximately $700,000 in property taxes.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact. This initiative petition prohibits confined big game hunting in Missouri. There are no criminal penalties proposed for violating the Fair Chase Amendment.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this legislation will not have a fiscal impact on their department.

Officials from the **Department of Public Safety, Office of the Director** indicated they see no fiscal impact due to this petition.

Officials from the **Department of Public Safety, Division of Missouri State Highway Patrol** indicated no fiscal impact on their department.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal. Any cost savings in the form of staff time that would not have to be spent permitting and inspecting big game hunting preserves would be minimal, and staff would be reallocated to address other department needs.

Officials from the **Department of Transportation** indicated no impact.

Officials from the **Office of Administration** indicated the proposed amendment would authorize the Missouri Conservation Commission to regulate confined, privately owned big game species. It would also restrict or prohibit certain activities relating to such species. Budget and Planning defers to the Missouri Conservation Commission for an estimate of the proposal's fiscal impact on the Commission or the Missouri Department of Conservation (MDC). Budget and Planning also defers to the Missouri Department of Agriculture (MDA) for an estimate of the proposal's potential fiscal impact on MDA. Budget and Planning does not have sufficient information to estimate the potential fiscal impact the proposal may have on state or local government revenues derived from practices that would be regulated, restricted, or prohibited under the proposal.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated their local government estimates the fiscal impact of the above-referenced constitutional amendment for fiscal years 2018, 2019 and 2020 to be as follows:
(reminder: 2018 will likely be a portion of a fiscal year, depending on effective date of amendment)

Revenues: (explain amount per fiscal year and source or reason for increase)
This constitutional amendment will have no fiscal impact on their city.

Savings: (explain amount per fiscal year, reason for savings and area where savings will occur)

This constitutional amendment will have no fiscal impact on their city.

Costs:(explain what type of costs will be incurred, amount per fiscal year and reason)
This constitutional amendment will have no fiscal impact on their city.

Losses:(explain why revenue losses would be expected and amount per fiscal year)
This constitutional amendment will have no fiscal impact on their city.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from the **City of St. Joseph** indicated this initiative petition would not have a fiscal impact on their local government.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from the **Missouri State University** indicated in response to this initiative petition, no fiscal impact to their university.

Officials from the **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this will not have a fiscal impact on their university.

Officials from the **Metropolitan Zoological Park and Museum District** indicated if the proposed amendment is adopted, they do not believe they will be impacted fiscally.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Harris-Stowe State University, Lincoln University, Northwest Missouri State University, Southeast Missouri State University, Truman State University,** and the **Missouri Joint Municipal Electric Utility Commission.**

Fiscal Note Summary

State governmental impact is unknown. Local governmental entities expect no costs or savings.

RE: Petition approval request from Marc Ellinger regarding a proposed constitutional amendment to Article IV, version 2 (2018-138)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Marc Ellinger on January 25, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article IV is amended by adding one new section to be known as Section 40(c), to read as follows:

40(c). 1. The right to hunt shall be guaranteed to all Missourians and shall not be infringed by law, except as expressly authorized in this Constitution. Confined big game killing is not hunting for any purpose under this Constitution or any law. This section shall not be a basis to challenge any rule, regulation or permit requirements established by the Missouri Conservation Commission pursuant to its authority under Sections 40(a) through 46 of this Article, nor shall it authorize any person to hunt with any weapon such person may not legally possess, nor shall it authorize trespassing.

2. The provisions of Section 40(c) shall be known as the Fair Chase Amendment, and its purpose is to prohibit confined big game killing in Missouri. It shall be the public policy of this state to protect the health of Missouri's livestock and wildlife by changing the requirements related to captive big game species. Confined big game killing does not provide any food, energy, health benefits or security to Missouri and presents significant threats to the safety, health and welfare of wildlife across Missouri. Confined big game killing, or owning, confining, transporting or possessing big game species for any purpose shall not be construed as hunting, farming or ranching for any purpose under this Constitution or any law.

3. No person shall engage in confined big game killing, except: any person with a valid permit in effect on November 6, 2018. Such person may renew such permit up to and through November 7, 2021, at which time all such permits shall expire and thereafter all confined big game killing shall be prohibited without exception.

4. In addition to the authority vested in it by Section 40(a) of Article IV, the Missouri Conservation Commission shall have primary authority over the regulation of privately-owned big game species, but excluding bison not raised, bred or held for confined big game killing. The Missouri Conservation Commission may make such rules and regulations as may be deemed necessary for the enforcement of this Amendment.

5. At the expiration of any permit referred under subsection 3 of this section, big game species must be located only where they may be confined legally under all applicable laws and regulations in effect at that time.

6. Definitions.

a. "Big game species" shall not include any livestock as defined in this Amendment and shall include all of the following animals, either as live animals or embryos, ova, semen and genetic material intended for commercial breeding operations: (a) all cervids including but not limited to white-tailed deer, elk, mule deer, red deer, fallow deer, sika deer and moose; (b) mountain goats, bighorn sheep, Dall's sheep, pronghorn, peccary, and javelina; and (c) any ungulate (hooved animal) confined or bred primarily for confined big game killing.

b. "Confined big game killing" shall mean an act in which an owner, operator or agent of a big game preserve obtains fees or other remuneration from another person for the killing or attempted killing of privately-owned big game species confined in or released from any man-made enclosure designed to prevent escape, but shall not include any act of a government employee or agent to control an animal population, to prevent or control diseases, or when government action is otherwise required or authorized by law.

c. "Livestock" as used in this Amendment, shall mean cattle, fully domesticated swine, fully domesticated sheep, fully domesticated goats, fully domesticated bison, fully domesticated ratite birds, fully domesticated rabbits, and fully domesticated horses, donkeys, mules, alpacas and llamas, where such fully domesticated animals are raised for human use or consumption and not for uses regulated by the Missouri Conservation Commission. Livestock shall also include semen or ova of any designated animal in this definition.

d. "Big game preserve" shall mean a facility confining privately-owned big game species via escape-resistant fencing which reduces the ability of such privately-owned big game species to evade or escape pursuit.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-138)

Subject

Initiative petition from Marc Ellinger regarding a proposed constitutional amendment to Article IV. (Received January 25, 2017)

Date

February 14, 2017

Description

This proposal would amend Article IV of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University, Truman State University,** the **Missouri Joint Municipal Electric Utility Commission,** and **Metropolitan Zoological Park and Museum District**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated the cost of this proposal is unknown but potentially significant to their department. The proposal takes away a portion of their statutory authority over animal movement and animal health. They lose their current authority over privately owned species under this proposal. It may prevent their department from meeting US Department of Agriculture criteria for an approved Chronic Wasting Disease program, which would eliminate FTE from the Division of Animal Health and have a negative economic impact on the Missouri economy.

The Agricultural and Food Policy Center at Texas A&M University conducted an economic impact study of the United States cervid farming industry in 2007 based on a survey of the deer farms in Texas and the elk producers located throughout the United States.

Based on the values provided by the Texas A&M study, and an estimated number of cervid producers (225) in Missouri, the industry has an estimated direct economic impact of approximately 98 million dollars. The number of individuals employed in the cervid industry is estimated to be approximately 1150 individuals. Based on the study and 2007 property tax rates, the cervid industry would pay approximately $700,000 in property taxes.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact. This initiative petition prohibits confined big game hunting in Missouri. There are no criminal penalties proposed for violating the Fair Chase Amendment.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this legislation will not have a fiscal impact on their department.

Officials from the **Department of Public Safety, Office of the Director** indicated they see no fiscal impact due to this petition.

Officials from the **Department of Public Safety, Division of Missouri State Highway Patrol** indicated no fiscal impact on their department.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal. Any cost savings in the form of staff time that would not have to be spent permitting and inspecting big game hunting preserves would be minimal, and staff would be reallocated to address other department needs.

Officials from the **Department of Transportation** indicated no impact.

Officials from the **Office of Administration** indicated the proposed amendment would authorize the Missouri Conservation Commission to regulate confined, privately owned big game species. It would also restrict or prohibit certain activities relating to such species. Budget and Planning defers to the Missouri Conservation Commission for an estimate of the proposal's fiscal impact on the Commission or the Missouri Department of Conservation (MDC). Budget and Planning also defers to the Missouri Department of Agriculture (MDA) for an estimate of the proposal's potential fiscal impact on MDA. Budget and Planning does not have sufficient information to estimate the potential fiscal impact the proposal may have on state or local government revenues derived from practices that would be regulated, restricted, or prohibited under the proposal.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated their local government estimates the fiscal impact of the above-referenced constitutional amendment for fiscal years 2018, 2019 and 2020 to be as follows:
(reminder: 2018 will likely be a portion of a fiscal year, depending on effective date of amendment)

Revenues: (explain amount per fiscal year and source or reason for increase)
This constitutional amendment will have no fiscal impact on their city.

Savings: (explain amount per fiscal year, reason for savings and area where savings will occur)
This constitutional amendment will have no fiscal impact on their city.

Costs:(explain what type of costs will be incurred, amount per fiscal year and reason)
This constitutional amendment will have no fiscal impact on their city.

Losses:(explain why revenue losses would be expected and amount per fiscal year)
This constitutional amendment will have no fiscal impact on their city.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from the **City of St. Joseph** indicated this initiative petition should not have a fiscal impact on their local government.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from the **Missouri State University** indicated in response to this initiative petition, no fiscal impact to their university.

Officials from the **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this will not have a fiscal impact on their university.

Officials from the **Metropolitan Zoological Park and Museum District** indicated if the proposed amendment is adopted, they do not believe they will be impacted fiscally.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education,** the **Missouri Senate, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Harris-Stowe State University, Lincoln University, Northwest Missouri State University, Southeast Missouri State University, Truman State University,** and the **Missouri Joint Municipal Electric Utility Commission.**

Fiscal Note Summary

State governmental impact is unknown. Local governmental entities expect no costs or savings.

RE: Petition approval request from Marc Ellinger regarding a proposed constitutional amendment to Article IV, version 1 (2018-137)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Marc Ellinger on January 25, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article IV is amended by adding one new section to be known as Section 40(c), to read as follows:

40(c). 1. The right to hunt shall be guaranteed to all Missourians and shall not be infringed by law, except as expressly authorized in this Constitution. Confined big game killing is not hunting for any purpose under this Constitution or any law. This section shall not be a basis to challenge any rule, regulation or permit requirements established by the Missouri Conservation Commission pursuant to its authority under Sections 40(a) through 46 of this Article, nor shall it authorize any person to hunt with any weapon such person may not legally possess, nor shall it authorize trespassing.

2. The provisions of Section 40(c) shall be known as the Fair Chase Amendment, and its purpose is to prohibit confined big game killing in Missouri. It shall be the public policy of this state to protect the health of Missouri's livestock and wildlife by changing the requirements related to captive big game species. Confined big game killing does not provide any food, energy, health benefits or security to Missouri and presents significant threats to the safety, health and welfare of wildlife across Missouri. Confined big game killing, or owning, confining, transporting or possessing big game species for any purpose shall not be construed as hunting, farming or ranching for any purpose under this Constitution or any law.

3. No person shall engage in confined big game killing, except: any person with a valid permit in effect on November 6, 2018. Such person may renew such permit up to and through November 7, 2021, at which time all such permits shall expire and thereafter all confined big game killing shall be prohibited without exception.

4. In addition to the authority vested in it by Section 40(a) of Article IV, the Missouri Conservation Commission shall have primary authority over the regulation of privately-owned big game species, but excluding bison not raised, bred or held for confined big game killing. The Missouri Conservation Commission may make such rules and regulations as may be deemed necessary for the enforcement of this Amendment.

5. Captive privately-owned big game species shall not be imported into the state of Missouri unless such big game species are being transported to and will be under the supervision of 1) publicly owned zoos or wildlife or research organizations, or American Zoo and Aquariums Association accredited not-for-profit facilities, or 2) a nationally accredited university, college, or school, an incorporated city, state or federal agency for the sole purpose of scientific research. At the expiration of any permit under subsection 3 of this section, big game species must be located only where they may be confined legally under all applicable laws and regulations in effect at that time.

6. Definitions.

a. "Big game species" shall not include any livestock as defined in this Amendment and shall include all of the following animals, either as live animals or embryos, ova, semen and genetic material intended for commercial breeding operations: (a) all cervids including but not limited to white-tailed deer, elk, mule deer, red deer, fallow deer, sika deer and moose; (b) mountain goats, bighorn sheep, Dall's sheep, pronghorn, peccary, and javelina; and (c) any ungulate (hooved animal) confined or bred primarily for confined big game killing.

b. "Confined big game killing" shall mean an act in which an owner, operator or agent of a big game preserve obtains fees or other remuneration from another person for the killing or attempted killing of privately-owned big game species confined in or released from any man-made enclosure designed to prevent escape, but shall not include any act of a government employee or agent to control an animal population, to prevent or control diseases, or when government action is otherwise required or authorized by law.

c. "Livestock" as used in this Amendment, shall mean cattle, fully domesticated swine, fully domesticated sheep, fully domesticated goats, fully domesticated bison, fully domesticated ratite birds, fully domesticated rabbits, and fully domesticated horses, donkeys, mules, alpacas and llamas, where such fully domesticated animals are raised for human use or consumption and not for uses regulated by the Missouri Conservation Commission. Livestock shall also include semen or ova of any designated animal in this definition.

d. "Big game preserve" shall mean a facility confining privately-owned big game species via escape-resistant fencing which reduces the ability of such privately-owned big game species to evade or escape pursuit.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-137)

Subject

Initiative petition from Marc Ellinger regarding a proposed constitutional amendment to Article IV. (Received January 25, 2017)

Date

February 14, 2017

Description

This proposal would amend Article IV of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University, Truman State University,** the **Missouri Joint Municipal Electric Utility Commission,** and **Metropolitan Zoological Park and Museum District**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated the cost of this proposal is unknown but potentially significant to their department. The proposal takes away a portion of their statutory authority over animal movement and animal health. They lose their current authority over privately owned species under this proposal. It may prevent their department from meeting US Department of Agriculture criteria for an approved Chronic Wasting Disease program, which would eliminate FTE from the Division of Animal Health and have a negative economic impact on the Missouri economy.

The Agricultural and Food Policy Center at Texas A&M University conducted an economic impact study of the United States cervid farming industry in 2007 based on a survey of the deer farms in Texas and the elk producers located throughout the United States.

Based on the values provided by the Texas A&M study, and an estimated number of cervid producers (225) in Missouri, the industry has an estimated direct economic impact of approximately 98 million dollars. The number of individuals employed in the cervid industry is estimated to be approximately 1150 individuals. Based on the study and 2007 property tax rates, the cervid industry would pay approximately $700,000 in property taxes.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact. This initiative petition prohibits confined big game hunting in Missouri. There are no criminal penalties proposed for violating the Fair Chase Amendment.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this legislation will not have a fiscal impact on their department.

Officials from the **Department of Public Safety, Office of the Director** indicated they see no fiscal impact due to this petition.

Officials from the **Department of Public Safety, Division of Missouri State Highway Patrol** indicated no fiscal impact on their department.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal. Any cost savings in the form of staff time that would not have to be spent permitting and inspecting big game hunting preserves would be minimal, and staff would be reallocated to address other department needs.

Officials from the **Department of Transportation** indicated no impact.

Officials from the **Office of Administration** indicated the proposed amendment would authorize the Missouri Conservation Commission to regulate confined, privately owned big game species. It would also restrict or prohibit certain activities relating to such species. Budget and Planning defers to the Missouri Conservation Commission for an estimate of the proposal's fiscal impact on the Commission or the Missouri Department of Conservation (MDC). Budget and Planning also defers to the Missouri Department of Agriculture (MDA) for an estimate of the proposal's potential fiscal impact on MDA. Budget and Planning does not have sufficient information to estimate the potential fiscal impact the proposal may have on state or local government revenues derived from practices that would be regulated, restricted, or prohibited under the proposal.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated their local government estimates the fiscal impact of the above-referenced constitutional amendment for fiscal years 2018, 2019 and 2020 to be as follows:
(reminder: 2018 will likely be a portion of a fiscal year, depending on effective date of amendment)

Revenues: (explain amount per fiscal year and source or reason for increase)
This constitutional amendment will have no fiscal impact on their city.

Savings: (explain amount per fiscal year, reason for savings and area where savings will occur)
This constitutional amendment will have no fiscal impact on their city.

Costs:(explain what type of costs will be incurred, amount per fiscal year and reason)
This constitutional amendment will have no fiscal impact on their city.

Losses:(explain why revenue losses would be expected and amount per fiscal year)
This constitutional amendment will have no fiscal impact on their city.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from the **City of St. Joseph** indicated this initiative petition should not have a fiscal impact on their local government.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from the **Missouri State University** indicated in response to this initiative petition, no fiscal impact to their university.

Officials from the **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this will not have a fiscal impact on their university.

Officials from the **Metropolitan Zoological Park and Museum District** indicated if the proposed amendment is adopted, they do not believe they will be impacted fiscally.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education,** the **Missouri Senate, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Harris-Stowe State University, Lincoln University, Northwest Missouri State University, Southeast Missouri State University, Truman State University,** and the **Missouri Joint Municipal Electric Utility Commission.**

Fiscal Note Summary

State governmental impact is unknown. Local governmental entities expect no costs or savings.

RE: Petition approval request from Doug Burlison regarding a proposed constitutional amendment to Article IV (2018-136)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Doug Burlison on January 25, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

This measure amends the Missouri Constitution by adding Section 54 to Article IV. This amendment implicitly repeals, in part or in whole, and Amends various statutes and subsections including but not necessarily limited to RSMo 87.400.1(6), 87.400.1(7), 87.505.1(12), 87.505.1(13), 105.1108.1, 105.1112.1, 192.945.1, 195.010.1(17)(g), 195.010.1(l), 195.010.1(24), 195.010.1(40), 195.017.1(4)(w), 195.017.1(4)(ee), 195.017.2(4)(w), 195.017.2(ee), 195.140.2, 195.207.1, 195.211.1, 195.222.1(7), 195.223.1(7), 195.223.1(8), 261.265.1, 263.250.1, 261.265.1, 306.110.1(2), 579.015.1(2), 579.015.1(3), 579.015.1(4), 579.015.1(5), 579.020.1(2), 579.020.1(3), 579.020.1(4), 579.020.1(5), 577.024.1(2), 579.030.1, 579.055.1(3), 579.055.1(4), 579.068.1(7), 579.068.1(9)3.(7), 579.068.1(9)3.(8), 579.105.1.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

One new section is adopted to be known as Article IV, Section 54 and to read as follows:

1. Cannabis shall immediately be removed from the Missouri Revised Statutes list of controlled substances and shall no longer be listed among Missouri's drug schedules. Cannabis shall no longer be considered a controlled substance or a drug hence forth by Missouri law.

2. Definition of terms, as used in this Act:
(a) "Cannabis" and "Cannabis hemp" refer to the Cannabis, marihuana, marijuana, Cannabis sativa, Cannabis sativa L., Cannabis Americana, Cannabis Gigantea, Cannabis indica, Cannabis ruderalis, or any variety of Cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof.
(b) "Medical Cannabis" refers to Cannabis used to prevent or to treat a medical condition.
(c) "Personal use" refers to the personal use or consumption of Cannabis.
(d) "Cannabis accessories" means any equipment, products, or materials of any kind that are used, intended for use, or designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing Cannabis, or for ingesting, inhaling, vaporizing, smoking or otherwise introducing Cannabis into and/or onto the human body.
(e) "Establishment" refers to a Cannabis cultivation facility, a Cannabis testing facility, a Cannabis product manufacturing facility, or a retail store, Cannabis store or other entity that cultivates, prepares, manufactures, packages, transports or sells Cannabis, Cannabis products and/or Cannabis accessories.

3. The following acts are not unlawful and shall not be an offense under Missouri law:
(a) Possession of Cannabis for personal or medical use.
(b) Cultivating Cannabis for personal or medical use.
(c) Cultivation, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying or possessing Cannabis, Cannabis accessories, and Cannabis products for commercial purposes, provided the person has current applicable licensing to operate a commercial establishment. No special licensing will be required beyond that which is applicable for the cultivation, harvest, processing, manufacturing, packaging, distribution, transferal, display or possessing of any non-toxic food or food product.
(d) Providing Cannabis, Cannabis accessories, and Cannabis products for sale to consumers.
(e) Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs (a) through (d) of this subsection.
(f) No one shall be denied housing solely based on their use of Cannabis.
(g) No one shall be denied employment solely based on their use of Cannabis.
(h) The use and/or possession of Cannabis shall not be grounds for issuing a "Driving under the influence" (DUI) stop, charge, arrest or fines when operating a motor vehicle.

4. Medical Cannabis shall be available to patients without taxation who have a physician's recommendation for its use.
(a) All patients engaged in Cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through conventional therapeutic means, whether or not under the care of a physician.
(b) Licensed physicians shall not be penalized for, nor restricted from recommending Cannabis for medical purposes to any person under their care.
(c) Veterinarians shall not be penalized nor restricted from recommending Cannabis for medical purposes for any creature under their care.
(d) Opinions pertaining to, and willingness to recommend medical Cannabis therapy shall not be a criteria for the licensure of physicians; no physician shall be subject to any professional licensing review or hearing as a result of recommending or approving medical Cannabis therapy.
(e) Any individual who is a Cannabis patient in another state shall be granted the same rights and privileges as a legal Missouri Cannabis patient.
(f) Medical care, including organ transplants, shall not be restricted in any way based on a person's use of Cannabis.

5. Upon the passage of this Act, all persons incarcerated or under supervision of the Missouri Board of Probation and Parole for non-violent, Cannabis-only offenses which are no longer illegal in the State of Missouri under this Act shall be immediately released.
(a) The Court shall order the immediate expungement of civil and criminal records pertaining to all non-violent Cannabis only offenses which are no longer illegal in the State of Missouri under this Act.
(b) Within 60 days of the passage of this Act, a legal document shall be developed and made available to the public ordering the immediate destruction of all Cannabis-related non-violent civil and criminal records in Missouri and for any offense covered by this amendment which is no longer illegal in the State of Missouri under this Act. This document shall be distributed to all pertinent parties throughout the state.

6. No Missouri law enforcement personnel or state funds shall be used to assist or aid in the enforcement of federal Cannabis laws involving acts which are no longer illegal in the State of Missouri under this amendment.
(a) Asset Forfeiture shall no longer be justified or used by any Missouri law enforcement through association with Cannabis, Cannabis cultivation, it's use and/or possession.

7. Any person who willfully impedes the lawful exercise of these provisions is guilty of a Class A misdemeanor.

8. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirement, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor.

9. Pursuant to the Ninth and Tenth Amendments to the Constitution of the United States, the people of Missouri hereby repudiate and challenge federal Cannabis prohibitions that conflict with this Act.

10. If any rival or conflicting initiative regulating any matter addressed by this act receives the higher affirmative vote, then all non-conflicting parts shall become operative.

11. All provisions of this section are self-executing and severable, and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.

12. The dictates of this Initiative shall be implemented no later than January 31st,, following the election that placed this initiative before the people.

This measure amends the Missouri Constitution by adding Section 54 to Article IV. This amendment implicitly repeals in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105.1, 105.1108.1, 105.1112.1, 195.0010.1, 196.0100.1, 263.0250.1,577.0024.1, 579.0015.1, 579.0020.1, 579.0030.1, 579.0055.1, 579.0065.1, 579.0068.1, and 579.0105.1

Be it resolved by the people of the state of Missouri that the Constitution be amended:

One new section is adopted to be known as Article IV, Section 54 and to read as follows:

1.Cannabis aka marijuana and cannabis hemp shall immediately be removed from Missouri's list of controlled substances and shall no longer be listed among Missouri's drugs schedules.

2. Definitions of terms used in this Act: cannabis and cannabis hemp refer to cannabis marijuana, cannabis sativa, cannabis indica, cannabis ruderalis or any variety of cannabis including any derivative, concentrate, extract, flower leaf particle preparation resin root salt seed stalk stem or any product thereof.
a. Medical cannabis refers to Physician or Veterinarian written recommended use of cannabis or any form of cannabis derivative, concentrate, extract, flower, stem, stalk, root, leaf, or any Cannabis product thereof.
b. Personal aka recreational use refers to any cannabis products use not recommended by Physician's or Veterinarian's
c. Cannabis accessories means any equipment, products or materials of any kind that are used or intended for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging or storing of cannabis or hemp or for ingesting, inhaling, vaporizing smoking or otherwise introducing cannabis into or onto the human body with any vehicle or what could be construed as a dangerous device.
d. Establishment refers to cannabis cultivating facility, a cannabis manufacturing facility or retail store or other entity that cultivates, prepares manufactures packages transports or sells cannabis or hemp products or accessories.

3. Minors refers to anyone under the age of 21
a. Cannabis or its products shall not be sold to anyone under the age of 21.
b. Anyone under the age of 21 shall have legal access to cannabis through a physician's written recommendation, and parental supervision or a legal guardian for medical conditions or diseases that cannabis might help with.

4. The following acts are not unlawful and shall not be an offense under these revised Missouri law's
a. Possession or cultivation of cannabis for personal or medical use in an area sufficient to produce the quantity necessary to address one's personal or medical needs
b. Cultivating, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes, provided the person has current applicable licenses to run a business in Missouri. No special licensing will be required beyond that which is applicable for the cultivation, harvest, processing, manufacturing, packaging, distribution, transferal, display, or possessing of any non-toxic food or food product.
c. Providing cannabis, aka marijuana and or any part of the cannabis plant thereof to be sold to the public must be tested by an accredited testing facility and all packaging labeled accordingly to reflect said testing.
d. Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs a through d of this section

5. Patient's rights: cannabis shall be available to all patients regardless of age, race or gender without taxation when recommended by a physician as a medicine.
a. All patients engaged in cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through conventional therapeutic means.

6. All prisoners that have been found guilty in a Missouri Court off a nonviolent cannabis related crime shall immediately be released and all charges for non-violent cannabis crimes shall be expunged from their records.
a. Within 60 days of passage of this act, the attorney general's office shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis related nonviolent civil and criminal records in Missouri, to be distributed to all circuit court judges within the state.

7. No Missouri law enforcement personnel, state, county, city employee, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri constitution.
a. Any person who impedes the lawful exercise of these provisions is guilty of a class A misdemeanor and is subject to all penalties or fines thereof.

8. Cannabis farmers, manufacturer's processors and distributors shall not be subject to any special zoning requirements, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor of agricultural products.

9. Pursuant to the ninth and tenth amendments to the constitution of the United States, the people of Missouri hereby repudiate and challenge federal cannabis prohibitions that conflict with this act.
a. The state of Missouri will honor all legally obtained patients medical cards regardless of the state where issued and Missouri shall become reciprocity with all legal states where Cannabis is considered legalized by law for medical or recreational use.
b. Opinions pertaining to, and willingness to recommend medical cannabis therapy shall not be a criteria for the licensure of physicians or Veterinarian's; No physician or Veterinarian shall be subject to any professional license review or hearing as a result of recommending or approving medical cannabis therapy.
c. Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis, hemp or any derivatives or parts thereof.

10. All provisions of this section are self-executing and serviceable. Except where otherwise indicated in the text of this document this constitutional amendment shall supersede any and all conflicting city, county, state or federal statutory, local charter, ordinance or resolution and shall be implemented no later than January 31st, following the election that placed this initiative before the people of Missouri.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-135)

Subject

Initiative petition from Kristen Gilio regarding a proposed constitutional amendment to Article IV. (Received January 24, 2017)

Date

February 14, 2017

Description

This proposal would amend Article IV of the Constitution of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Missouri Veterans Commission, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Assumptions

Officials from the **Attorney General's office** indicated among other provisions, this proposal could require their office to develop and issue an order providing for the destruction of "all cannabis related nonviolent civil and criminal records in Missouri." Moreover, the proposal purports to supersede federal law.

They expect that the enactment of this proposal would result in increased litigation. They assume they could absorb costs associated with the increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** estimated increased operating costs of $0 in fiscal year 2018, unknown>$99,045 in fiscal year 2019, and unknown>$169,098 in fiscal year 2020.

Section 192.945, RSMo, allows their department to issue a hemp extract registration card for persons suffering from intractable epilepsy. The hemp extract registration card allows for the legal possession and use of cannabidiol (CBD) oil. This proposal allows for the legal use of marijuana for both medical and recreational purposes. Therefore, persons with intractable epilepsy would not need to apply for a hemp extract registration card in order to legally use the CBD oil.

They expect rental space for two staff located in Jefferson City would be required: 2 staff x 230 sq.ft./FTE x $21.00 = $9,660.

They indicated retail marijuana, cultivation facilities, products manufacturer, and testing facilities may be established as small businesses.

Division of Community and Public Health (DCPH)

This proposal does not require them to issue any licenses or conduct inspections to ensure the safety of marijuana infused food products. However, sections 196.010 through 196.298, RSMo, gives them responsibility for the regulation of food to include such duties as ensuring food safety, sanitation, and proper labeling, etc. Therefore, they would have responsibility to assure that facilities manufacturing foods containing marijuana and marijuana products are regulated the same as other food manufacturers.

Division of Community and Public Health (DCPH)

Due to the broad parameters of this proposal, it is difficult to determine how many food manufacturing facilities would be established. States which have legalized retail marijuana have seen a significant demand for edible marijuana products. For the purposes of this fiscal note, they estimate that at least 300 food manufacturing facilities would be established as a result of this proposal. In order to properly inspect these manufacturing facilities, DCPH would require a minimum of two Environmental Public Health Specialist IV staff (A27, $44,352, Step G). This law shall be implemented no later than January 31 following the November 2018 election. Therefore, DCPH assumes that the two Environmental Public Health Specialist IV positions would begin January 1, 2019.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated a fiscal impact of $7,178,073 in fiscal year 2019 (7 months), $7,511,746 in fiscal year 2020, $10,011,383 in fiscal year 2021, $10,741,186 in fiscal year 2022 and thereafter.

Legalizing the possession and use of marijuana would remove from the criminal statutes all controlled substance offenses for marijuana, including possession, distribution and trafficking. If the legislation that removed marijuana from the list of controlled substances was retrospective then there would be two reductions in the cost of incarceration: the release of offenders serving a marijuana offense and fewer admissions to prison. The legalization of marijuana will largely impact offenders who are only serving a marijuana offense. Offenders serving multiple concurrent sentences will continue to be required to serve the other sentences after legalization and no estimate is made for offenders serving multiple sentences.

The reduction in the offender population is the total of reductions from the expungement of sentences and fewer admissions and probations. The cost avoidance is based upon a direct prison cost per year in FY17 of $6,085 and an average cost of $2,234 per year for offenders on field supervision. In the first year after the enactment of the legislation that legalizes marijuana there is an estimated reduction of 633 offenders in prison and 3,676 offenders on field supervision. In the next year (FY20) there will no discharges from expungement but the reduction in the prison population will increase to 214. The field reduction will continue into FY21 because the marijuana offenders are estimated to serve 2.5 years on supervision.

The estimate is qualified by the use of an expansion factor that assumes that the drug distribution in the sentences where the drug is not known will be similar to that where the drug is known.

The estimated cost avoidance in the first year is $7,178,073 and will be $10,741,186 after the 4th year.

If marijuana usage becomes legal it could impact the safety and security of our prisons as it is not believed that there is a means for testing whether an employee is under the influence of marijuana. Impaired prison employees or visitors can impact the safe and secure operation of our prisons.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this petition will have no fiscal impact on their department.

Officials from the **Department of Public Safety, Office of the Director** indicated they see no fiscal impact due to this petition.

Officials from the **Department of Public Safety, Division of Missouri State Highway Patrol** indicated they expect increased operating costs of $426,236 for the first year implemented, $487,384 for the second year implemented, and $492,597 for the third year implemented.

The provisions of this petition would require their agency to rent office space for 4 FTE's to process the expungement requests.

The proposed legislation would order the immediate destruction of all cannabis-related non-violent civil and criminal records in Missouri.

Two different divisions within their agency will be impacted by this legislation. Here is a breakdown for each division:

Criminal Justice Information Services Division
The Criminal Justice Information Services Division (CJIS) states that there are currently 95,550 arrest charges in the Central Repository. The current expungement process, pursuant to Chapter 610, takes approximately 90 minutes to process. One FTE can handle 1,243 expungements per year. Conservatively, at least five FTE's would be required to initially handle the expungments created by this legislation. A significant processing backlog would occur if sufficient FTE's are not assigned to accommodate the number of expungements ordered.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 90 minutes. Therefore, one FTE can handle 1,243 expungements per year = 111,840 / 90.

These FTE's (CJIS Technicians, Range 16) would be necessary to process all expungement requests, review criminal history records, contact any agency associated with the arrests or convictions, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE at $55,495 and the ability of that employee to process 1,243 expungements per year, the cost alone per expungement is $55,495 \ 1,243 = $44.64. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories, as well as contacting of the various agencies associated with the arrests. In researching other states with similar expungement requirements, they all charge a fee to offset the cost of the time required to process the expungements. Their fees ranged from $50 to $450 per petition per arrest date.

These FTE will most likely be 2nd and 3rd shift employees so they would not require any equipment. However, there would be recurring costs of $650 per year per FTE for office supplies and phone charges. If any FTE were placed on the 1st shift, standard equipment would be required at a one-time cost of $6,094 per FTE.

5 CJIS Technicians ($1,232.50 x 24)	$147,900
Office Equipment/HW/SW	$6,094
RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

Patrol Records Divison

Currently, there are 86,600 records in the Patrol's Traffic Arrest System (TAS) pertaining to arrests completed by the Missouri Highway Patrol that could possibly meet the requirements of this proposed constitutional amendment. These are arrest and arrest/disposition records pertaining to individuals the age of 21 years and older with an NCIC modifier of 60-64 that relate to marijuana offenses. Given this, if only ten percent of the individuals who qualify to have his or her record expunged sought to do so, the Patrol Records Division (PRD) would require 4 FTE's. However, if a large number of these expungements were to be granted with even four FTE's, the backlog would compound greatly to the point it may take several years to catch up. If 100 percent of the individuals who qualify to have their record expunged sought to do so, the Patrol Records Division would require 35 FTE's to complete this task in approximately one year.

The addition of 35 FTE's would require additional supervisory personnel. However, due to the vague and uncertain nature of this proposed amendment, the Patrol Records Division has no true way to determine the actual effect or costs.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 45 minutes. Therefore, one FTE can handle 2,485 expungements per year = 111,840 / 45.

With the current estimate of 86,600 records that potentially meet the requirements of this proposed amendment and would potentially be eligible for expungement, the following percentages of persons actually requesting an expungement will directly relate to the number of PRD FTE's required:

10% = 86,600 x .10 = 8,660 / 2,485 = 4 FTE's
50% = 86,600 x .50 = 43,300 / 2,485 = 17 FTE's
100% = 86,600 / 2,485 = 35 FTE's

These FTE's (Quality Control Clerks, Range 10) would be necessary to process all expungement requests, review records, contact agencies, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE of $45,702 and the ability of that employee to process 2,485 expungements per year, the cost per expungement is $45,702 \ 2,485 = $18.39. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories.

Processing ten percent of the possible expungements would require additional workspace. The physical requirements would increase with the number of FTE's required to meet the demand for expungements. There will be recurring costs of $650 per year per FTE for office supplies and phone charges. Standard equipment and office furniture would be required at a one-time cost of $6,094 per FTE.

4 Quality Control Clerks ($1,015 x 24)	$97,440
Equipment/Office Furniture	$6,094

RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

The provisions of this petition would require the Highway Patrol to rent office space for 4 FTE's to process the expungement requests. The Office of Administration states that 920 square feet of office space would be required. The following costs apply per square foot:

Office Space	$14/Sq Ft
Janitorial/Trash Costs	$1.50/Sq Ft
Utility Costs	$2/Sq Ft

The agency provided the following additional comments:

It is suggested to add this additional language to provide for the collection of a fee to offset the costs of the expungements:

43.530. 1. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than nine dollars per request for criminal history record information not based on a fingerprint search. In each year beginning on or after January 1, 2010, the superintendent may increase the fee paid by requesting entities by an amount not to exceed one dollar per year, however, under no circumstance shall the fee paid by requesting entities exceed fifteen dollars per request.

2. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than twenty dollars per request for criminal history record information based on a fingerprint search, unless the request is required under the provisions of subdivision (6) of section 210.481, section 210.487, or section 571.101, in which case the fee shall be fourteen dollars.

3. A request made under subsections 1 and 2 of this section shall be limited to check and search on one individual. Each request shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. The highway patrol may establish procedures for receiving requests for criminal history record information for classification and search for fingerprints, from courts and other entities, and for the payment of such requests. There is hereby established by the treasurer of the state of Missouri a fund to be entitled as the "Criminal Record System Fund". Notwithstanding the provisions of section 33.080 to the contrary, if the moneys collected and deposited into this fund are not totally expended annually for the purposes set forth in sections 43.500 to 43.543, the unexpended moneys in such fund shall remain in the fund and the balance shall be kept in the fund to accumulate from year to year.

4. For all petitions for expungement under the provisions of Chapter 610, Section 577.054, or any other created expungement requirement under statute, excluding Section 610.122, the applicant shall pay a fee of seventy-five dollars per arrest date listed on the petition. Each petition shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. For expungements that require removal from the Traffic Arrest System twenty dollars of the seventy-five dollar fee will be deposited in the Highway Patrol Traffic Records Fund.

There are numerous uncertainties associated with this proposed constitutional amendment. The definition of a “non-violent cannabis-only offense” needs to be added. It is unclear if individuals with the aforementioned conviction records are required to abide by the expungement process mandated by various other state statutes. Does the individual just complete and file a document with a circuit clerk and the record is

expunged or does the "court," whomever that is, order the immediate expungement of all civil and criminal records pertaining to non-violent cannabis only offenses?

The Highway Patrol has concerns with number 7 which states, "No Missouri law enforcement personnel, state, county, city employee, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri constitution."

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's Office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no impact.

Officials from the **Office of Administration** (OA) indicated:

Under this proposal:

- Cannabis and cannabis hemp would be removed from the list of scheduled drugs
- Possessing, cultivating, harvesting and distributing cannabis for personal or medical use would be decriminalized. Anyone under age 21 may have access only for medical marijuana with a doctor's recommendation or parental/guardian supervision.
- Cannabis shall be available to all patients regardless of age, race or gender without taxation when recommended by a physician as a medicine.
- The use or possession of cannabis is not grounds alone for a Driving Under the Influence infraction.
- All prisoners who have been incarcerated for nonviolent cannabis-related crimes shall be immediately released and all charges for cannabis crimes expunged.
- No state or federal personnel or funds shall be used to enforce federal laws which are no longer illegal in Missouri under this amendment.
- Missouri will have reciprocity with any other states where cannabis is legalized by law for medical or recreational use.
- Language is included to state that the people of Missouri repudiate and challenge federal cannabis prohibitions that conflict with this proposal.
- Effective date is no later than January 31st following the election.
- Provisions are severable.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated:

The proposed initiative petition, 18-135, would create a new section of the Missouri Constitution to be known as Article IV, section 54. This section would allow citizens over the age of twenty-one to have the right to engage in the production, sale, distribution and consumption of marijuana and the manufacture of goods from hemp, subject to reasonable regulations adopted by the state pursuant to this section.

The average of all marijuana related charge codes from 2011 to 2015 for Circuit case types is 14,122 per year. The average of all marijuana related charge codes from 2011 to 2015 for Associate case types is 10,982. We are unable to determine what number of these charges were for someone over the age of twenty-one.

The following Criminal Court Costs would be affected by this petition:

Criminal Court Costs		
Felony Case Costs	**Amount of Cost**	**Disburse to State/County**
Basic Civil Legal Services Fund surcharge	$10.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$45.00	State of Missouri - General Revenue $36, County $9
County Fee	$75.00	County
Court Automation Fund Fee	$7.00	State of Missouri -Statewide Court Automation Fund
Court Reporter fee (All Circuit Division Cases)	$15.00	State of Missouri - General Revenue
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$30.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Head Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund

Peace Officer Standards & Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	State of Missouri - Prosecuting Attorney Training Fund
Sheriffs' Fee	$75.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement Fund
Spinal Cord Injury Fund surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$279.50**	
Misdemeanor Case Costs		
Basic Civil Legal Services Fund surcharge	$8.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$15.00	$12 State of Missouri / $3 County
County Fee	$25.00	County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$15.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Brain Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund

Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	$0.50 State of Missouri / $0.50 County
Sheriffs' fee	$10.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement fund
Spinal Cord Injury Fund Surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$102.50**	
Municipal Case (Filed in Associate Division) Costs		
Clerk Fee	$15.00	$12 State of Missouri / $3 County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Sheriffs' Retirement Fund surcharge	$3.00	Sheriffs' Retirement Fund
Total	**$33.50**	
Criminal Costs Not Included Above		
Drug Testing by a State Lab	$150.00	State of Missouri

Drug Testing by a Private Lab	Actual Costs	County Reimbursement
Law Enforcement Arrest Costs:		
Highway Patrol		Amt. Approved by the Court
Local (County)		Amt. Approved by the Court
Municipal		Amt. Approved by the Court

The decrease in the court fees, depending on the number of cases, will result in an unknown loss to the courts.

They also assume there will be an unknown decrease in caseload for the courts because the courts will no longer process these cases; however, at this time they are unable to calculate the decrease.

Any significant increase or decrease will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated if passed, this constitutional amendment would have a positive impact on the workload of the Missouri State Public Defender, since possession, manufacture, distribution, etc. of cannabis would no longer be unlawful, offenses that the Public Defender currently uses resources to defend and no longer would need to.

The exact positive impact is difficult to predict because they track their cases by statutory offense and most drug offenses are not limited to marijuana.

However, their best estimate, using FY2014 MSPD data, is that this would reduce their caseload by 3,523 cases (685 A/B felonies, 1,797 C/D felonies, 1,041 misdemeanors, and 1,140 probation violations).

In *The Missouri Project: A Study of the Missouri Public Defender System and Attorney Workload Standards*, prepared by RubinBrown on behalf of the American Bar Association's Standing Committee on Legal Aid and Indigent Defendants, the relevant workload standards are: A/B felonies, 47.6 hours per case; C/D felonies, 25.0 hours per case; misdemeanors, 11.7 hours per case; and probation violations, 9.8 hours per case). (The workload standards include only case related tasks over which an attorney has some control (they exclude, for example, in court and travel time) and thereby reflect a conservative estimate.)

Applying those workload standards to the 2,858 cases, those cases require 100,882.7 attorney hours. With 2,080 hours per attorney available each year, that represents the work of 48.5 attorneys.

While in theory they might also handle fewer appeals of guilty verdicts after trial, the fact is that only a very small percentage of their cases proceed to trial and it's likely that only a small percentage of those cases are appeals from marijuana convictions. Therefore this minimal positive impact is not being taken into account in this estimate.

However, the Missouri State Public Defender already is significantly understaffed by 333 attorneys under the workload standards developed in *The Missouri Project*. (The 333 attorneys is a conservative estimate of the under-staffing in that it assumes they contract all conflicts to private attorneys, which they are not able to do for budgetary reasons).

Therefore, despite the positive impact on the workload of the Missouri State Public Defender, because they are already understaffed that savings in attorney time would not allow the Public Defender to reduce its workforce and therefore would not translate into an actual cost savings. However it does reduce by the cost of 48.5 attorneys how much money needs to be added to their budget in order to meet *The Missouri Project*'s workload standards.

Officials from the **State Treasurer's office** indicated this proposal would have no fiscal impact on their office.

Officials from **Greene County** indicated there is anticipated costs for this initiative petition. Unfortunately there is not enough time given in the response to provide an actual estimated costs.

No on 64 Campaign and SAM Action

California voters are being told that they will see the crime rate go down if they vote to legalize marijuana commercially; this has not been the case in the state of Colorado or the city of Denver. Since the legalization of recreational marijuana in Colorado in 2013 traffic related marijuana deaths have increased 48%, marijuana related emergency room visits have increased 49%, and marijuana related calls to the poison center have increased 100%. According to the Colorado Bureau of Investigations in 2015 statewide homicides in Colorado rose 14.7 % over the previous year. Pueblo, Colorado had the highest homicide rate in the state with 11.1 killings per 100,000 residents. Aurora, Colorado's homicide rate more than doubled from 2014. Additionally more places in Colorado were robbed and more thefts occurred, especially cars, as 193,115 motor vehicles were reported stolen, up 27.7 % in 2015 from the previous year. In 2015, sexual assaults rose 10% in Colorado with Denver, Aurora, Lakewood, Westminster and Pueblo all reporting higher numbers as well.

In the city of Denver since the legalization of recreational marijuana the number of crimes in Denver has grown by about 44 %, according to annual figures the city reported to the National Incident Based Reporting System. In 2015 in Denver alone crime rose in every neighborhood in the city. The murder rate hit a decade high, 1059 more cars were broken into, there were 903 more auto thefts, 321 more aggravated assaults and 231 more homes were broken into compared to 2014.

California voters are also being told that legalizing recreational marijuana will free up law enforcement to work on other criminal activities. Again that has not been the case in Denver. Besides the overall increases in crime we have experience, the Denver police department is dealing with a 900% increase in the unlawful cultivation and manufacture of marihuana concentrate, and a 99% increase in the unlawful distribution of marijuana and marijuana concentrate. The quantity of illegal marijuana seized by the Denver police has increased 3,424% on average per case. The volume of marijuana seized per case has increased from an average of 162 pounds to 5724 pounds. In Denver unlawful public consumption of marijuana citations has increased over 300% per year since the legalization of recreational marijuana. The Denver police department is busier enforcing marijuana laws and investigating crimes directly related to marijuana, including murderers, robberies, and home invasions, than any other time in the history of the city.

Sincerely,

Mitchell R. Morrissey
Denver District Attorney

Officials from the **City of Kansas City** indicated their local government estimates the fiscal impact of the above-referenced constitutional amendment for fiscal years 2018, 2019 and 2020 to be as follows:
(reminder: 2018 will likely be a portion of a fiscal year, depending on effective date of amendment)

Revenues: (explain amount per fiscal year and source or reason for increase)
This constitutional amendment will have no fiscal impact on their city.

Savings: (explain amount per fiscal year, reason for savings and area where savings will occur)
This constitutional amendment will have no fiscal impact on their city.

Costs:(explain what type of costs will be incurred, amount per fiscal year and reason)
This constitutional amendment will have no fiscal impact on their city.

Losses:(explain why revenue losses would be expected and amount per fiscal year)
This constitutional amendment will have no fiscal impact on their city.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from the **City of St. Joseph** indicated this initiative petition should not have a fiscal impact on their local government.

Officials from the **Missouri Veterans Commission** indicated they defer fiscal impact to the Department of Revenue/Tax. They are pleased to receive any funding which appropriately comes to them to support the Veterans Programs currently administered by the Commission.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from the **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this will not have a fiscal impact on their university.

Officials from the **Missouri State University** indicated in response to this initiative petition, no fiscal impact to their university.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,**

the **City of Mexico,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, Harris-Stowe State University, Lincoln University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Fiscal Note Summary

This proposal is estimated to result in annual state savings of $11 million. Additional state operating costs resulting from this proposal are estimated at $700,000 annually. Local law enforcement costs could also increase.

Jefferson City, MO 65101

RE: Petition approval request from Kristen Gilio regarding a proposed constitutional amendment to Article IV, version 2 (2018-134)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Kristen Gilio on January 23, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

This measure amends the Missouri Constitution by adding Section 54 to Article IV. This amendment implicitly repeals in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105.1, 105.1108.1, 105.1112.1, 195.0010.1, 196.0100.1, 263.0250.1,577.0024.1, 579.0015.1, 579.0020.1, 579.0030.1, 579.0055.1, 579.0065.1, 579.0068.1, and 579.0105.1

Be it resolved by the people of the state of Missouri that the Constitution be amended:

One new section is adopted to be known as Article IV, Section 54 and to read as follows:

1.Cannabis aka marijuana and cannabis hemp shall immediately be removed from Missouri's list of controlled substances and shall no longer be listed among Missouri's drugs schedules.

2. Definitions of terms used in this Act: cannabis and cannabis hemp refer to cannabis marijuana, cannabis sativa, cannabis indica, cannabis ruderalis or any variety of cannabis including any derivative, concentrate, extract, flower leaf particle preparation resin root salt seed stalk stem or any product thereof.
a. Medical cannabis refers to Physician or Veterinarian written recommended use of cannabis or any form of cannabis derivative, concentrate, extract, flower, stem, stalk, root, leaf, or any Cannabis product thereof.
b. Personal aka recreational use refers to any cannabis products use not recommended by Physician's or Veterinarian's
c. Cannabis accessories means any equipment, products or materials of any kind that are used or intended for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging or storing of cannabis or hemp or for ingesting, inhaling, vaporizing smoking or otherwise introducing cannabis into or onto the human body with any vehicle or what could be construed as a dangerous device.
d. Establishment refers to cannabis cultivating facility, a cannabis manufacturing facility or retail store or other entity that cultivates, prepares manufactures packages transports or sells cannabis or hemp products or accessories.

3. Minors refers to anyone under the age of 21
a. Cannabis or its products shall not be sold to anyone under the age of 21.
b. Anyone under the age of 21 shall have legal access to cannabis through a physician's written recommendation, and parental supervision or a legal guardian for medical conditions or diseases that cannabis might help with.

4. The following acts are not unlawful and shall not be an offense under these revised Missouri law's
a. Possession or cultivation of cannabis for personal or medical use in an area sufficient to produce the quantity necessary to address one's personal or medical needs
b. Cultivating, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes, provided the person has current applicable licenses to run a business in Missouri. No special licensing will be required beyond that which is applicable for the cultivation, harvest, processing, manufacturing, packaging, distribution, transferal, display, or possessing of any non-toxic food or food product.
c. Providing cannabis, aka marijuana and or any part of the cannabis plant thereof to be sold to the public must be tested by an accredited testing facility and all packaging labeled accordingly to reflect said testing.
d. Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs a through e of this section
e. The use or possession of cannabis is not grounds alone for a "DUI" driving under the influence infraction

5. Patient's rights: cannabis shall be available to all patients regardless of age, race or gender without taxation when recommended by a physician as a medicine.
a. All patients engaged in cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through conventional therapeutic means.

6. All prisoners that have been found guilty in a Missouri Court off a nonviolent cannabis related crime shall immediately be released and all charges for non-violent cannabis crimes shall be expunged from their records.
a. Within 60 days of passage of this act, the attorney general's office shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis related nonviolent civil and criminal records in Missouri, to be distributed to all circuit court judges within the state.

7. No Missouri law enforcement personnel, state, county, city employee, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri constitution.
a. Any person who impedes the lawful exercise of these provisions is guilty of a class A misdemeanor and is subject to all penalties or fines thereof.

8. Cannabis farmers, manufacturer's processors and distributors shall not be subject to any special zoning requirements, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor of agricultural products.

9. Pursuant to the ninth and tenth amendments to the constitution of the United States, the people of Missouri hereby repudiate and challenge federal cannabis prohibitions that conflict with this act.
a. The state of Missouri will honor all legally obtained patients medical cards regardless of the state where issued and Missouri shall become reciprocity with all legal states where Cannabis is considered legalized by law for medical or recreational use.
b. Opinions pertaining to, and willingness to recommend medical cannabis therapy shall not be a criteria for the licensure of physicians or Veterinarian's; No physician or Veterinarian shall be subject to any professional license review or hearing as a result of recommending or approving medical cannabis therapy.
c. Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis, hemp or any derivatives or parts thereof.

10. All provisions of this section are self-executing and serviceable. Except where otherwise indicated in the text of this document this constitutional amendment shall supersede any and all conflicting city, county, state or federal statutory, local charter, ordinance or resolution and shall be implemented no later than January 31st, following the election that placed this initiative before the people of Missouri.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-134)

Subject

Initiative petition from Kristen Gilio regarding a proposed constitutional amendment to Article IV. (Received January 24, 2017)

Date

February 14, 2017

Description

This proposal would amend Article IV of the Constitution of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Missouri Veterans Commission, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Assumptions

Officials from the **Attorney General's office** indicated among other provisions, this proposal could require their office to develop and issue an order providing for the destruction of "all cannabis related nonviolent civil and criminal records in Missouri." Moreover, the proposal purports to supersede federal law.

They expect that the enactment of this proposal would result in increased litigation. They assume they could absorb costs associated with the increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** estimated increased operating costs of $0 in fiscal year 2018, unknown>$99,045 in fiscal year 2019, and unknown>$169,098 in fiscal year 2020.

Section 192.945, RSMo, allows their department to issue a hemp extract registration card for persons suffering from intractable epilepsy. The hemp extract registration card allows for the legal possession and use of cannabidiol (CBD) oil. This proposal allows for the legal use of marijuana for both medical and recreational purposes. Therefore, persons with intractable epilepsy would not need to apply for a hemp extract registration card in order to legally use the CBD oil.

They expect rental space for two staff located in Jefferson City would be required: 2 staff x 230 sq.ft./FTE x $21.00 = $9,660.

They indicated retail marijuana, cultivation facilities, products manufacturer, and testing facilities may be established as small businesses.

Division of Community and Public Health (DCPH)

This proposal does not require them to issue any licenses or conduct inspections to ensure the safety of marijuana infused food products. However, sections 196.010 through 196.298, RSMo, gives them responsibility for the regulation of food to include such duties as ensuring food safety, sanitation, and proper labeling, etc. Therefore, they would have responsibility to assure that facilities manufacturing foods containing marijuana and marijuana products are regulated the same as other food manufacturers.

Division of Community and Public Health (DCPH)

Due to the broad parameters of this proposal, it is difficult to determine how many food manufacturing facilities would be established. States which have legalized retail marijuana have seen a significant demand for edible marijuana products. For the purposes of this fiscal note, they estimate that at least 300 food manufacturing facilities would be established as a result of this proposal. In order to properly inspect these manufacturing facilities, DCPH would require a minimum of two Environmental Public Health Specialist IV staff (A27, $44,352, Step G). This law shall be implemented no later than January 31 following the November 2018 election. Therefore, DCPH assumes that the two Environmental Public Health Specialist IV positions would begin January 1, 2019.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated a fiscal impact of $7,178,073 in fiscal year 2019 (7 months), $7,511,746 in fiscal year 2020, $10,011,383 in fiscal year 2021, $10,741,186 in fiscal year 2022 and thereafter.

Legalizing the possession and use of marijuana would remove from the criminal statutes all controlled substance offenses for marijuana, including possession, distribution and trafficking. If the legislation that removed marijuana from the list of controlled substances was retrospective then there would be two reductions in the cost of incarceration: the release of offenders serving a marijuana offense and fewer admissions to prison. The legalization of marijuana will largely impact offenders who are only serving a marijuana offense. Offenders serving multiple concurrent sentences will continue to be required to serve the other sentences after legalization and no estimate is made for offenders serving multiple sentences.

The reduction in the offender population is the total of reductions from the expungement of sentences and fewer admissions and probations. The cost avoidance is based upon a direct prison cost per year in FY17 of $6,085 and an average cost of $2,234 per year for offenders on field supervision. In the first year after the enactment of the legislation that legalizes marijuana there is an estimated reduction of 633 offenders in prison and 3,676 offenders on field supervision. In the next year (FY20) there will no discharges from expungement but the reduction in the prison population will increase to 214. The field reduction will continue into FY21 because the marijuana offenders are estimated to serve 2.5 years on supervision.

The estimate is qualified by the use of an expansion factor that assumes that the drug distribution in the sentences where the drug is not known will be similar to that where the drug is known.

The estimated cost avoidance in the first year is $7,178,073 and will be $10,741,186 after the 4th year.

If marijuana usage becomes legal it could impact the safety and security of our prisons as it is not believed that there is a means for testing whether an employee is under the influence of marijuana. Impaired prison employees or visitors can impact the safe and secure operation of our prisons.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this petition will have no fiscal impact on their department.

Officials from the **Department of Public Safety, Office of the Director** indicated they see no fiscal impact due to this petition.

Officials from the **Department of Public Safety, Division of Missouri State Highway Patrol** indicated they expect increased operating costs of $426,236 for the first year implemented, $487,384 for the second year implemented, and $492,597 for the third year implemented.

The provisions of this petition would require their agency to rent office space for 4 FTE's to process the expungement requests.

The proposed legislation would order the immediate destruction of all cannabis-related non-violent civil and criminal records in Missouri.

Two different divisions within their agency will be impacted by this legislation. Here is a breakdown for each division:

Criminal Justice Information Services Division
The Criminal Justice Information Services Division (CJIS) states that there are currently 95,550 arrest charges in the Central Repository. The current expungement process, pursuant to Chapter 610, takes approximately 90 minutes to process. One FTE can handle 1,243 expungements per year. Conservatively, at least five FTE's would be required to initially handle the expungments created by this legislation. A significant processing backlog would occur if sufficient FTE's are not assigned to accommodate the number of expungements ordered.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 90 minutes. Therefore, one FTE can handle 1,243 expungements per year = 111,840 / 90.

These FTE's (CJIS Technicians, Range 16) would be necessary to process all expungement requests, review criminal history records, contact any agency associated with the arrests or convictions, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE at $55,495 and the ability of that employee to process 1,243 expungements per year, the cost alone per expungement is $55,495 \ 1,243 = $44.64. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories, as well as contacting of the various agencies associated with the arrests. In researching other states with similar expungement requirements, they all charge a fee to offset the cost of the time required to process the expungements. Their fees ranged from $50 to $450 per petition per arrest date.

These FTE will most likely be 2nd and 3rd shift employees so they would not require any equipment. However, there would be recurring costs of $650 per year per FTE for office supplies and phone charges. If any FTE were placed on the 1st shift, standard equipment would be required at a one-time cost of $6,094 per FTE.

5 CJIS Technicians ($1,232.50 x 24)	$147,900
Office Equipment/HW/SW	$6,094
RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

Patrol Records Divison

Currently, there are 86,600 records in the Patrol's Traffic Arrest System (TAS) pertaining to arrests completed by the Missouri Highway Patrol that could possibly meet the requirements of this proposed constitutional amendment. These are arrest and arrest/disposition records pertaining to individuals the age of 21 years and older with an NCIC modifier of 60-64 that relate to marijuana offenses. Given this, if only ten percent of the individuals who qualify to have his or her record expunged sought to do so, the Patrol Records Division (PRD) would require 4 FTE's. However, if a large number of these expungements were to be granted with even four FTE's, the backlog would compound greatly to the point it may take several years to catch up. If 100 percent of the individuals who qualify to have their record expunged sought to do so, the Patrol Records Division would require 35 FTE's to complete this task in approximately one year.

The addition of 35 FTE's would require additional supervisory personnel. However, due to the vague and uncertain nature of this proposed amendment, the Patrol Records Division has no true way to determine the actual effect or costs.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 45 minutes. Therefore, one FTE can handle 2,485 expungements per year = 111,840 / 45.

With the current estimate of 86,600 records that potentially meet the requirements of this proposed amendment and would potentially be eligible for expungement, the following percentages of persons actually requesting an expungement will directly relate to the number of PRD FTE's required:

10% = 86,600 x .10 = 8,660 / 2,485 = 4 FTE's
50% = 86,600 x .50 = 43,300 / 2,485 = 17 FTE's
100% = 86,600 / 2,485 = 35 FTE's

These FTE's (Quality Control Clerks, Range 10) would be necessary to process all expungement requests, review records, contact agencies, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE of $45,702 and the ability of that employee to process 2,485 expungements per year, the cost per expungement is $45,702 \ 2,485 = $18.39. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories.

Processing ten percent of the possible expungements would require additional workspace. The physical requirements would increase with the number of FTE's required to meet the demand for expungements. There will be recurring costs of $650 per year per FTE for office supplies and phone charges. Standard equipment and office furniture would be required at a one-time cost of $6,094 per FTE.

4 Quality Control Clerks ($1,015 x 24)	$97,440
Equipment/Office Furniture	$6,094

RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

The provisions of this petition would require the Highway Patrol to rent office space for 4 FTE's to process the expungement requests. The Office of Administration states that 920 square feet of office space would be required. The following costs apply per square foot:

Office Space	$14/Sq Ft
Janitorial/Trash Costs	$1.50/Sq Ft
Utility Costs	$2/Sq Ft

The agency provided the following additional comments:

It is suggested to add this additional language to provide for the collection of a fee to offset the costs of the expungements:

43.530. 1. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than nine dollars per request for criminal history record information not based on a fingerprint search. In each year beginning on or after January 1, 2010, the superintendent may increase the fee paid by requesting entities by an amount not to exceed one dollar per year, however, under no circumstance shall the fee paid by requesting entities exceed fifteen dollars per request.

2. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than twenty dollars per request for criminal history record information based on a fingerprint search, unless the request is required under the provisions of subdivision (6) of section 210.481, section 210.487, or section 571.101, in which case the fee shall be fourteen dollars.

3. A request made under subsections 1 and 2 of this section shall be limited to check and search on one individual. Each request shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. The highway patrol may establish procedures for receiving requests for criminal history record information for classification and search for fingerprints, from courts and other entities, and for the payment of such requests. There is hereby established by the treasurer of the state of Missouri a fund to be entitled as the "Criminal Record System Fund". Notwithstanding the provisions of section 33.080 to the contrary, if the moneys collected and deposited into this fund are not totally expended annually for the purposes set forth in sections 43.500 to 43.543, the unexpended moneys in such fund shall remain in the fund and the balance shall be kept in the fund to accumulate from year to year.

4. For all petitions for expungement under the provisions of Chapter 610, Section 577.054, or any other created expungement requirement under statute, excluding Section 610.122, the applicant shall pay a fee of seventy-five dollars per arrest date listed on the petition. Each petition shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. For expungements that require removal from the Traffic Arrest System twenty dollars of the seventy-five dollar fee will be deposited in the Highway Patrol Traffic Records Fund.

There are numerous uncertainties associated with this proposed constitutional amendment. The definition of a “non-violent cannabis-only offense” needs to be added. It is unclear if individuals with the aforementioned conviction records are required to abide by the expungement process mandated by various other state statutes. Does the individual just complete and file a document with a circuit clerk and the record is

expunged or does the "court," whomever that is, order the immediate expungement of all civil and criminal records pertaining to non-violent cannabis only offenses?

The Highway Patrol has concerns with number 7 which states, "No Missouri law enforcement personnel, state, county, city employee, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri constitution."

Officials from the **Governor's Office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated unknown fiscal impact.

Changes to Missouri's state driving laws could impact some federal commercial drivers' license laws.
Failure to comply with 49 C.F.R. 384.225 & 384.226 could result in a withholding of Missouri's federal-aid highway funds apportioned to it under each of Title 23, United States Code (U.S.C.), sections 104(b)(1), (b)(3), and (b)(4). The federal funds impacted consist of national highway performance program funds, highway safety improvement program funds and congestion mitigation and air quality improvement funds. The withholding amount would be 4 percent for the first year of non-compliance and 8 percent for the second and subsequent years.

Officials from the **Office of Administration** (OA) indicated:

Under this proposal:

- Cannabis and cannabis hemp would be removed from the list of scheduled drugs
- Possessing, cultivating, harvesting and distributing cannabis for personal or medical use would be decriminalized. Anyone under age 21 may have access only for medical marijuana with a doctor's recommendation or parental/guardian supervision.
- Cannabis shall be available to all patients regardless of age, race or gender without taxation when recommended by a physician as a medicine.
- The use or possession of cannabis is not grounds alone for a Driving Under the Influence infraction.
- All prisoners who have been incarcerated for nonviolent cannabis-related crimes shall be immediately released and all charges for cannabis crimes expunged.
- No state or federal personnel or funds shall be used to enforce federal laws which are no longer illegal in Missouri under this amendment.

- Missouri will have reciprocity with any other states where cannabis is legalized by law for medical or recreational use.
- Language is included to state that the people of Missouri repudiate and challenge federal cannabis prohibitions that conflict with this proposal.
- Effective date is no later than January 31st following the election.
- Provisions are severable.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated:

The proposed initiative petition, 18-134, would create a new section of the Missouri Constitution to be known as Article IV, section 54. This section would allow citizens over the age of twenty-one to have the right to engage in the production, sale, distribution and consumption of marijuana and the manufacture of goods from hemp, subject to reasonable regulations adopted by the state pursuant to this section.

The average of all marijuana related charge codes from 2011 to 2015 for Circuit case types is 14,122 per year. The average of all marijuana related charge codes from 2011 to 2015 for Associate case types is 10,982. We are unable to determine what number of these charges were for someone over the age of twenty-one.

The following Criminal Court Costs would be affected by this petition:

Criminal Court Costs		
Felony Case Costs	**Amount of Cost**	**Disburse to State/County**
Basic Civil Legal Services Fund surcharge	$10.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$45.00	State of Missouri - General Revenue $36, County $9
County Fee	$75.00	County
Court Automation Fund Fee	$7.00	State of Missouri -Statewide Court Automation Fund
Court Reporter fee (All Circuit Division Cases)	$15.00	State of Missouri - General Revenue
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$30.00	State of Missouri - DNA Profiling Analysis Fund

Brain Injury Fund surcharge	$2.00	State of Missouri - Head Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards & Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	State of Missouri - Prosecuting Attorney Training Fund
Sheriffs' Fee	$75.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement Fund
Spinal Cord Injury Fund surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$279.50**	
Misdemeanor Case Costs		
Basic Civil Legal Services Fund surcharge	$8.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$15.00	$12 State of Missouri / $3 County
County Fee	$25.00	County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$15.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Brain Injury Fund

Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	$0.50 State of Missouri / $0.50 County
Sheriffs' fee	$10.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement fund
Spinal Cord Injury Fund Surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$102.50**	
Municipal Case (Filed in Associate Division) Costs		
Clerk Fee	$15.00	$12 State of Missouri / $3 County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Sheriffs' Retirement Fund surcharge	$3.00	Sheriffs' Retirement Fund
Total	**$33.50**	

Criminal Costs Not Included Above		
Drug Testing by a State Lab	$150.00	State of Missouri
Drug Testing by a Private Lab	Actual Costs	County Reimbursement
Law Enforcement Arrest Costs:		
Highway Patrol		Amt. Approved by the Court
Local (County)		Amt. Approved by the Court
Municipal		Amt. Approved by the Court

The decrease in the court fees, depending on the number of cases, will result in an unknown loss to the courts.

They also assume there will be an unknown decrease in caseload for the courts because the courts will no longer process these cases; however, at this time they are unable to calculate the decrease.

Any significant increase or decrease will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated if passed, this constitutional amendment would have a positive impact on the workload of the Missouri State Public Defender, since possession, manufacture, distribution, etc. of cannabis would no longer be unlawful, offenses that the Public Defender currently uses resources to defend and no longer would need to.

The exact positive impact is difficult to predict because they track their cases by statutory offense and most drug offenses are not limited to marijuana.

However, their best estimate, using FY2014 MSPD data, is that this would reduce their caseload by 3,523 cases (685 A/B felonies, 1,797 C/D felonies, 1,041 misdemeanors, and 1,140 probation violations).

In *The Missouri Project: A Study of the Missouri Public Defender System and Attorney Workload Standards*, prepared by RubinBrown on behalf of the American Bar Association's Standing Committee on Legal Aid and Indigent Defendants, the relevant workload standards are: A/B felonies, 47.6 hours per case; C/D felonies, 25.0 hours per case; misdemeanors, 11.7 hours per case; and probation violations, 9.8 hours per case). (The workload standards include only case related tasks over which an attorney has some control (they exclude, for example, in court and travel time) and thereby reflect a conservative estimate.)

Applying those workload standards to the 2,858 cases, those cases require 100,882.7 attorney hours. With 2,080 hours per attorney available each year, that represents the work of 48.5 attorneys.

While in theory they might also handle fewer appeals of guilty verdicts after trial, the fact is that only a very small percentage of their cases proceed to trial and it's likely that only a small percentage of those cases are appeals from marijuana convictions. Therefore this minimal positive impact is not being taken into account in this estimate.

However, the Missouri State Public Defender already is significantly understaffed by 333 attorneys under the workload standards developed in *The Missouri Project*. (The 333 attorneys is a conservative estimate of the under-staffing in that it assumes they contract all conflicts to private attorneys, which they are not able to do for budgetary reasons).

Therefore, despite the positive impact on the workload of the Missouri State Public Defender, because they are already understaffed that savings in attorney time would not allow the Public Defender to reduce its workforce and therefore would not translate into an actual cost savings. However it does reduce by the cost of 48.5 attorneys how much money needs to be added to their budget in order to meet *The Missouri Project*'s workload standards.

Officials from the **State Treasurer's office** indicated this proposal would have no fiscal impact on their office.

Officials from **Greene County** indicated there is anticipated costs for this initiative petition. Unfortunately there is not enough time given in the response to provide an actual estimated costs.

County Prosecutor, Dan Patterson provided the following information:

No on 64 Campaign and SAM Action

California voters are being told that they will see the crime rate go down if they vote to legalize marijuana commercially; this has not been the case in the state of Colorado or the city of Denver. Since the legalization of recreational marijuana in Colorado in 2013 traffic related marijuana deaths have increased 48%, marijuana related emergency room visits have increased 49%, and marijuana related calls to the poison center have increased 100%. According to the Colorado Bureau of Investigations in 2015 statewide homicides in Colorado rose 14.7 % over the previous year. Pueblo, Colorado had the highest homicide rate in the state with 11.1 killings per 100,000 residents. Aurora, Colorado's homicide rate more than doubled from 2014. Additionally more places in Colorado were robbed and more thefts occurred, especially cars, as 193,115 motor vehicles were reported stolen, up 27.7 % in 2015 from the previous year. In 2015, sexual assaults rose 10% in Colorado with Denver, Aurora, Lakewood, Westminster and Pueblo all reporting higher numbers as well.

In the city of Denver since the legalization of recreational marijuana the number of crimes in Denver has grown by about 44 %, according to annual figures the city reported to the National Incident Based Reporting System. In 2015 in Denver alone crime rose in every neighborhood in the city. The murder rate hit a decade high, 1059 more cars were broken into, there were 903 more auto thefts, 321 more aggravated assaults and 231 more homes were broken into compared to 2014.

California voters are also being told that legalizing recreational marijuana will free up law enforcement to work on other criminal activities. Again that has not been the case in Denver. Besides the overall increases in crime we have experience, the Denver police department is dealing with a 900% increase in the unlawful cultivation and manufacture of marihuana concentrate, and a 99% increase in the unlawful distribution of marijuana and marijuana concentrate. The quantity of illegal marijuana seized by the Denver police has increased 3,424% on average per case. The volume of marijuana seized per case has increased from an average of 162 pounds to 5724 pounds. In Denver unlawful public consumption of marijuana citations has increased over 300% per year since the legalization of recreational marijuana. The Denver police department is busier enforcing marijuana laws and investigating crimes directly related to marijuana, including murderers, robberies, and home invasions, than any other time in the history of the city.

Sincerely,

Mitchell R. Morrissey
Denver District Attorney

Officials from the **City of Kansas City** indicated their local government estimates the fiscal impact of the above-referenced constitutional amendment for fiscal years 2018, 2019 and 2020 to be as follows:
(reminder: 2018 will likely be a portion of a fiscal year, depending on effective date of amendment)

Revenues: (explain amount per fiscal year and source or reason for increase)
This constitutional amendment will have no fiscal impact on their city.

Savings: (explain amount per fiscal year, reason for savings and area where savings will occur)
This constitutional amendment will have no fiscal impact on their city.

Costs:(explain what type of costs will be incurred, amount per fiscal year and reason)
This constitutional amendment will have no fiscal impact on their city.

Losses:(explain why revenue losses would be expected and amount per fiscal year)
This constitutional amendment will have no fiscal impact on their city.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from the **City of St. Joseph** indicated this initiative petition would not have a fiscal impact on their local government.

Officials from the **Missouri Veterans Commission** indicated they defer fiscal impact to the Department of Revenue/Tax. They are pleased to receive any funding which appropriately comes to them to support the Veterans Programs currently administered by the Commission.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from the **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this will not have a fiscal impact on their university.

Officials from the **Missouri State University** indicated in response to this initiative petition, no fiscal impact to their university.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,**

the **City of Mexico,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, Harris-Stowe State University, Lincoln University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Fiscal Note Summary

This proposal is estimated to result in annual state savings of $11 million. Additional state operating costs resulting from this proposal are estimated at $700,000 annually. Local law enforcement costs could also increase.

RE: Petition approval request from Kristen Gilio regarding a proposed constitutional amendment to Article IV, version 1 (2018-133)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Kristen Gilio on January 23, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2. RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

This measure amends the Missouri Constitution by adding Section 54 to Article IV. This amendment implicitly repeals in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105.1, 105.1108.1, 105.1112.1, 195.0010.1, 196.0100.1, 263.0250.1,577.0024.1, 579.0015.1, 579.0020.1, 579.0030.1, 579.0055.1, 579.0065.1, 579.0068.1, and 579.0105.1

Be it resolved by the people of the state of Missouri that the Constitution be amended:

One new section is adopted to be known as Article IV, Section 54 and to read as follows:

1.Cannabis aka marijuana and cannabis hemp shall immediately be removed from Missouri's list of controlled substances and shall no longer be listed among Missouri's drugs schedules.

2. Definitions of terms used in this Act: cannabis and cannabis hemp refer to cannabis marijuana, cannabis sativa, cannabis indica, cannabis ruderalis or any variety of cannabis including any derivative, concentrate, extract, flower leaf particle preparation resin root salt seed stalk stem or any product thereof.
a. Medical cannabis refers to Physician or Veterinarian written recommended use of cannabis or any form of cannabis derivative, concentrate, extract, flower, stem, stalk, root, leaf, or any Cannabis product thereof.
b. Personal aka recreational use refers to any cannabis products use not recommended by Physician's or Veterinarian's
c. Cannabis accessories means any equipment, products or materials of any kind that are used or intended for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging or storing of cannabis or hemp or for ingesting, inhaling, vaporizing smoking or otherwise introducing cannabis into or onto the human body with any vehicle or what could be construed as a dangerous device.
d. Establishment refers to cannabis cultivating facility, a cannabis manufacturing facility or retail store or other entity that cultivates, prepares manufactures packages transports or sells cannabis or hemp products or accessories.

3. Minors refers to anyone under the age of 21
a. Cannabis or its products shall not be sold to anyone under the age of 21.
b. Anyone under the age of 21 shall have legal access to cannabis through a physician's written recommendation, and parental supervision or a legal guardian for medical conditions or diseases that cannabis might help with.

4. The following acts are not unlawful and shall not be an offense under these revised Missouri law's
a. Possession or cultivation of cannabis for personal or medical use in an area sufficient to produce the quantity necessary to address one's personal or medical needs
b. Cultivating, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes, provided the person has current applicable licenses to run a business in Missouri. No special licensing will be required beyond that which is applicable for the cultivation, harvest, processing, manufacturing, packaging, distribution, transferal, display, or possessing of any non-toxic food or food product.
c. Providing cannabis, aka marijuana and or any part of the cannabis plant thereof to be sold to the public must be tested by an accredited testing facility and all packaging labeled accordingly to reflect said testing.
d. Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs a through d of this section

5. Patient's rights: cannabis shall be available to all patients regardless of age, race or gender without taxation when recommended by a physician as a medicine.
a. All patients engaged in cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through conventional therapeutic means.

6. All prisoners that have been found guilty in a Missouri Court off a nonviolent cannabis related crime shall immediately be released and all charges for non-violent cannabis crimes shall be expunged from their records.
a. Within 60 days of passage of this act, the attorney general's office shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis related nonviolent civil and criminal records in Missouri, to be distributed to all circuit court judges within the state.

7. No Missouri law enforcement personnel, state, county, city employee, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri constitution.
a. Any person who impedes the lawful exercise of these provisions is guilty of a class A misdemeanor and is subject to all penalties or fines thereof.
b. An additional 5% tax will be added to all personal / recreational sales of Cannabis not to include any Hemp or Hemp by products sold within the boundaries of Missouri in addition to any established state, county or city sales tax already set in place to be collected by the State of Missouri Sales Taxation Division. The 5% additional sales tax monies collected will be collected by the State of Missouri Sales Taxation Division, divided and distributed as directed in this paragraph on a quarterly basis as follows, 2.5% will go to Missouri Public Schools that teach Preschool or K through 12 grade or any combination of aforementioned . The remaining 2.5% will be directed to the Missouri Veterans Commission to help with housing, clothing, food and medical needs for our multitude of Missouri veterans.

8. Cannabis farmers, manufacturer's processors and distributors shall not be subject to any special zoning requirements, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor of agricultural products.

9. Pursuant to the ninth and tenth amendments to the constitution of the United States, the people of Missouri hereby repudiate and challenge federal cannabis prohibitions that conflict with this act.
a. The state of Missouri will honor all legally obtained patients medical cards regardless of the state where issued and Missouri shall become reciprocity with all legal states where Cannabis is considered legalized by law for medical or recreational use.
b. Opinions pertaining to, and willingness to recommend medical cannabis therapy shall not be a criteria for the licensure of physicians or Veterinarian's; No physician or Veterinarian shall be subject to any professional license review or hearing as a result of recommending or approving medical cannabis therapy.
c. Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis, hemp or any derivatives or parts thereof.

10. All provisions of this section are self-executing and serviceable. Except where otherwise indicated in the text of this document this constitutional amendment shall supersede any and all conflicting city, county, state or federal statutory, local charter, ordinance or resolution and shall be implemented no later than January 31st, following the election that placed this initiative before the people of Missouri.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-133)

Subject

Initiative petition from Kristen Gilio regarding a proposed constitutional amendment to Article IV. (Received January 24, 2017)

Date

February 14, 2017

Description

This proposal would amend Article IV of the Constitution of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Missouri Veterans Commission, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Assumptions

Officials from the **Attorney General's office** indicated among other provisions, this proposal could require their office to develop and issue an order providing for the destruction of "all cannabis related nonviolent civil and criminal records in Missouri." Moreover, the proposal purports to supersede federal law.

They expect that the enactment of this proposal would result in increased litigation. They assume they could absorb costs associated with the increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** estimated increased operating costs of $0 in fiscal year 2018, unknown>$99,045 in fiscal year 2019, and unknown>$169,098 in fiscal year 2020.

Section 192.945, RSMo, allows their department to issue a hemp extract registration card for persons suffering from intractable epilepsy. The hemp extract registration card allows for the legal possession and use of cannabidiol (CBD) oil. This proposal allows for the legal use of marijuana for both medical and recreational purposes. Therefore, persons with intractable epilepsy would not need to apply for a hemp extract registration card in order to legally use the CBD oil.

They expect rental space for two staff located in Jefferson City would be required: 2 staff x 230 sq.ft./FTE x $21.00 = $9,660.

They indicated retail marijuana, cultivation facilities, products manufacturer, and testing facilities may be established as small businesses.

A five percent tax will be added to all personal/recreational sales of cannabis. The tax will be collected the State of Missouri Sales Taxation Division. The tax collected is to be directed to Missouri Public Schools and to the Missouri Veterans Commission.

Division of Community and Public Health (DCPH)

This proposal does not require them to issue any licenses or conduct inspections to ensure the safety of marijuana infused food products. However, sections 196.010 through

196.298, RSMo, gives them responsibility for the regulation of food to include such duties as ensuring food safety, sanitation, and proper labeling, etc. Therefore, they would have responsibility to assure that facilities manufacturing foods containing marijuana and marijuana products are regulated the same as other food manufacturers.

Division of Community and Public Health (DCPH)

Due to the broad parameters of this proposal, it is difficult to determine how many food manufacturing facilities would be established. States which have legalized retail marijuana have seen a significant demand for edible marijuana products. For the purposes of this fiscal note, they estimate that at least 300 food manufacturing facilities would be established as a result of this proposal. In order to properly inspect these manufacturing facilities, DCPH would require a minimum of two Environmental Public Health Specialist IV staff (A27, $44,352, Step G). This law shall be implemented no later than January 31 following the November 2018 election. Therefore, DCPH assumes that the two Environmental Public Health Specialist IV positions would begin January 1, 2019.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated a fiscal impact of $7,178,073 in fiscal year 2019 (7 months), $7,511,746 in fiscal year 2020, $10,011,383 in fiscal year 2021, $10,741,186 in fiscal year 2022 and thereafter.

Legalizing the possession and use of marijuana would remove from the criminal statutes all controlled substance offenses for marijuana, including possession, distribution and trafficking. If the legislation that removed marijuana from the list of controlled substances was retrospective then there would be two reductions in the cost of incarceration: the release of offenders serving a marijuana offense and fewer admissions to prison. The legalization of marijuana will largely impact offenders who are only serving a marijuana offense. Offenders serving multiple concurrent sentences will continue to be required to serve the other sentences after legalization and no estimate is made for offenders serving multiple sentences.

The reduction in the offender population is the total of reductions from the expungement of sentences and fewer admissions and probations. The cost avoidance is based upon a direct prison cost per year in FY17 of $6,085 and an average cost of $2,234 per year for offenders on field supervision. In the first year after the enactment of the legislation that

legalizes marijuana there is an estimated reduction of 633 offenders in prison and 3,676 offenders on field supervision. In the next year (FY20) there will no discharges from expungement but the reduction in the prison population will increase to 214. The field reduction will continue into FY21 because the marijuana offenders are estimated to serve 2.5 years on supervision.

The estimate is qualified by the use of an expansion factor that assumes that the drug distribution in the sentences where the drug is not known will be similar to that where the drug is known.

The estimated cost avoidance in the first year is $7,178,073 and will be $10,741,186 after the 4th year.

If marijuana usage becomes legal it could impact the safety and security of our prisons as it is not believed that there is a means for testing whether an employee is under the influence of marijuana. Impaired prison employees or visitors can impact the safe and secure operation of our prisons.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated total fund costs for General Revenue will be $150,012 for fiscal year 2018, $30,752 for fiscal year 2019, and $31,521 for fiscal year 2020.

This petition opens up the possibility of additional business opportunities in cannabis farming, manufacturing, and distribution of products.

			Total	150,012	30,752	31,521

This would create an unknown positive impact on Total State Revenue.

This petition increases state revenues by an unknown amount.

The provisions of section 7b add an additional five percent tax to all personal/recreational sales of cannabis not including hemp or hemp by-products sold in Missouri. This tax is in addition to any state, county, or city sales taxes already in place. This section also requires the division and distribution of these collections on a quarterly basis to Missouri public schools and the Missouri Veterans' Administration.

This Article states that the tax is to be collected by the State of Missouri Sales Tax Division. There is no State of Missouri Sales Tax Division and their department assumes that the taxpayer will remit the tax to their department. Because there are no enforcement provisions, it may be difficult for their department to enforce the collection of the

additional tax under current sales tax statutes. Their department will not be able to make refunds to taxpayers as the article is currently drafted.

Administrative Impact:

Business Tax Processing:
Although the legislation bases the additional five percent tax on retail sales, it is in addition to and separate from state, county, or city sales tax, and must therefore be reported and deposited separately.

If this money needs to remain in a non-state account, either it would need to stay in the sales suspense holding account until distribution, or new bank accounts would need to be established for each.

Officials from the **Department of Public Safety, Office of the Director** indicated they see no fiscal impact due to this petition.

Officials from the **Department of Public Safety, Division of Missouri State Highway Patrol** indicated they expect increased operating costs of $426,236 for the first year implemented, $487,384 for the second year implemented, and $492,597 for the third year implemented.

The provisions of this petition would require their agency to rent office space for 4 FTE's to process the expungement requests.

The proposed legislation would order the immediate destruction of all cannabis-related non-violent civil and criminal records in Missouri.

Two different divisions within their agency will be impacted by this legislation. Here is a breakdown for each division:

Criminal Justice Information Services Division
The Criminal Justice Information Services Division (CJIS) states that there are currently 95,550 arrest charges in the Central Repository. The current expungement process, pursuant to Chapter 610, takes approximately 90 minutes to process. One FTE can handle 1,243 expungements per year. Conservatively, at least five FTE's would be required to initially handle the expungments created by this legislation. A significant processing backlog would occur if sufficient FTE's are not assigned to accommodate the number of expungements ordered.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 90 minutes. Therefore, one FTE can handle 1,243 expungements per year = 111,840 / 90.

These FTE's (CJIS Technicians, Range 16) would be necessary to process all expungement requests, review criminal history records, contact any agency associated with the arrests or convictions, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE at $55,495 and the ability of that employee to process 1,243 expungements per year, the cost alone per expungement is $55,495 \ 1,243 = $44.64. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories, as well as contacting of the various agencies associated with the arrests. In researching other states with similar expungement requirements, they all charge a fee to offset the cost of the time required to process the expungements. Their fees ranged from $50 to $450 per petition per arrest date.

These FTE will most likely be 2nd and 3rd shift employees so they would not require any equipment. However, there would be recurring costs of $650 per year per FTE for office supplies and phone charges. If any FTE were placed on the 1st shift, standard equipment would be required at a one-time cost of $6,094 per FTE.

5 CJIS Technicians ($1,232.50 x 24)	$147,900
Office Equipment/HW/SW	$6,094

RECURRING COSTS

Phone Charges per FTE	$350
Office Supplies per FTE	$300

Patrol Records Divison

Currently, there are 86,600 records in the Patrol's Traffic Arrest System (TAS) pertaining to arrests completed by the Missouri Highway Patrol that could possibly meet the requirements of this proposed constitutional amendment. These are arrest and arrest/disposition records pertaining to individuals the age of 21 years and older with an NCIC modifier of 60-64 that relate to marijuana offenses. Given this, if only ten percent of the individuals who qualify to have his or her record expunged sought to do so, the Patrol Records Division (PRD) would require 4 FTE's. However, if a large number of these expungements were to be granted with even four FTE's, the backlog would compound greatly to the point it may take several years to catch up. If 100 percent of the individuals who qualify to have their record expunged sought to do so, the Patrol Records Division would require 35 FTE's to complete this task in approximately one year.

The addition of 35 FTE's would require additional supervisory personnel. However, due to the vague and uncertain nature of this proposed amendment, the Patrol Records Division has no true way to determine the actual effect or costs.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 45 minutes. Therefore, one FTE can handle 2,485 expungements per year = 111,840 / 45.

With the current estimate of 86,600 records that potentially meet the requirements of this proposed amendment and would potentially be eligible for expungement, the following percentages of persons actually requesting an expungement will directly relate to the number of PRD FTE's required:

10% = 86,600 x .10 = 8,660 / 2,485 = 4 FTE's
50% = 86,600 x .50 = 43,300 / 2,485 = 17 FTE's
100% = 86,600 / 2,485 = 35 FTE's

These FTE's (Quality Control Clerks, Range 10) would be necessary to process all expungement requests, review records, contact agencies, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE of $45,702 and the ability of that employee to process 2,485 expungements per year, the cost per expungement is $45,702 \ 2,485 = $18.39. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories.

Processing ten percent of the possible expungements would require additional workspace. The physical requirements would increase with the number of FTE's required to meet the demand for expungements. There will be recurring costs of $650 per year per FTE for office supplies and phone charges. Standard equipment and office furniture would be required at a one-time cost of $6,094 per FTE.

4 Quality Control Clerks ($1,015 x 24)	$97,440
Equipment/Office Furniture	$6,094

RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

The provisions of this petition would require the Highway Patrol to rent office space for 4 FTE's to process the expungement requests. The Office of Administration states that 920 square feet of office space would be required. The following costs apply per square foot:

Office Space	$14/Sq Ft
Janitorial/Trash Costs	$1.50/Sq Ft
Utility Costs	$2/Sq Ft

The agency provided the following additional comments:

It is suggested to add this additional language to provide for the collection of a fee to offset the costs of the expungements:

43.530. 1. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than nine dollars per request for criminal history record information not based on a fingerprint search. In each year beginning on or after January 1, 2010, the superintendent may increase the fee paid by requesting entities by an amount not to exceed one dollar per year, however, under no circumstance shall the fee paid by requesting entities exceed fifteen dollars per request.

2. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than twenty dollars per request for criminal history record information based on a fingerprint search, unless the request is required under the provisions of subdivision (6) of section 210.481, section 210.487, or section 571.101, in which case the fee shall be fourteen dollars.

3. A request made under subsections 1 and 2 of this section shall be limited to check and search on one individual. Each request shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. The highway patrol may establish procedures for receiving requests for criminal history record information for classification and search for fingerprints, from courts and other entities, and for the payment of such requests. There is hereby established by the treasurer

of the state of Missouri a fund to be entitled as the "Criminal Record System Fund". Notwithstanding the provisions of section 33.080 to the contrary, if the moneys collected and deposited into this fund are not totally expended annually for the purposes set forth in sections 43.500 to 43.543, the unexpended moneys in such fund shall remain in the fund and the balance shall be kept in the fund to accumulate from year to year.

4. For all petitions for expungement under the provisions of Chapter 610, Section 577.054, or any other created expungement requirement under statute, excluding Section 610.122, the applicant shall pay a fee of seventy-five dollars per arrest date listed on the petition. Each petition shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. For expungements that require removal from the Traffic Arrest System twenty dollars of the seventy-five dollar fee will be deposited in the Highway Patrol Traffic Records Fund.

There are numerous uncertainties associated with this proposed constitutional amendment. The definition of a "non-violent cannabis-only offense" needs to be added. It is unclear if individuals with the aforementioned conviction records are required to abide by the expungement process mandated by various other state statutes. Does the individual just complete and file a document with a circuit clerk and the record is expunged or does the "court," whomever that is, order the immediate expungement of all civil and criminal records pertaining to non-violent cannabis only offenses?

The Highway Patrol has concerns with number 7 which states, "No Missouri law enforcement personnel, state, county, city employee, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri constitution."

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's Office** indicated there should be no added costs or savings to their office.
Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no impact.

Officials from the **Office of Administration** (OA) indicated:

Section 54 of Article IV would allow the medical and recreational use of marijuana and hemp, as well as the cultivation, production, transportation and retail sale of marijuana

and hemp and their related products. Subsection 3 allows the sale of marijuana to individuals under the age of 21 only with physician or parental permission. Subsection 6 requires that all prisoners that have been convicted in Missouri of a nonviolent cannabis related crime shall be immediately released and all related charges shall be expunged from their records. Subsection 7 creates an excise tax of five percent on all retail sales of marijuana, in addition to any established state or local sales taxes. The revenue shall be deposited to the credit of general revenue with the provision that 2.5 percent be distributed to elementary and secondary public education schools and 2.5 percent be distributed to the Missouri Veterans' Commission. Subsection 5, however, allows all medical marijuana users, with recommendation by a physician, to purchase cannabis without taxation. Subsection 10 provides that the provisions in the amendment take effect no later than January 31st, following the election that placed the initiative before the people of Missouri.

B&P estimates that subsection 7 of this initiative petition could increase TSR by as much as $17.2M and GR by as much as $16.5M once fully implemented in FY 2021. The Substance Abuse and Mental Health Services Administration (SAMHSA) reports that 9.95% of Missouri population age 18 and older use marijuana. For the purposes of this analysis, B&P assumes the same percentage for marijuana users over the age of 21. The U.S. Census (2010) reports the population of Missouri residents over the age of 21 as 4,300,988 people. Multiplying the percentage of Missouri residents who use marijuana by the population of Missouri residents over the age of 21 gives an estimate of the number of Missouri residents who use marijuana:

	4,300,988	(MO residents over the age of 21)
X	9.95%	(% of MO residents who use marijuana)
	427,948	(MO residents who use marijuana)

However, B&P estimates that of those who use marijuana, roughly 65,000 would be medical users. SAMHSA reports that the total number of U.S. population age 18 and older use marijuana is 27,169,000 people. B&P assumes dividing the number of MO residents who use marijuana by the U.S. population that uses marijuana will provide an estimate of the percentage of the U.S. market that is attributable to Missouri.

	427,948	(MO residents who use marijuana)
÷	27,169,000	(Number of U.S. marijuana users)
	1.58%	(% U.S. market that is attributable to MO)

Using the estimate above for medical users, of that 1.58 percent approximately 0.24% could be considered medical. Therefore, B&P estimates that the size of the U.S. market that is attributable to Missouri, less medical marijuana users, is 1.33 percent. Using an established estimate[1] for the U.S. market of $14.0B and multiplying by the percentage of the U.S. market that is attributable to Missouri, B&P estimates that Missouri's marijuana market, less medical marijuana use, could be worth $186.7M. Assuming Missouri's marijuana market is worth $186.7M, an excise tax of five percent could increase TSR and GR by as much as $9.3M once fully implemented. Table 1 shows a breakdown of revenue increases by tax type.

Table 1: Revenue Generated by Marijuana Taxes

Tax	FY 2020 (5 months)	Fully Implemented (FY 2021)
Sales Tax		
General Revenue	3,002,000	7,206,000
Education	233,000	559,000
Conservation	29,000	70,000
Parks, Soil, Water	23,000	56,000
Local	120,000	287,000
Marijuana Excise Tax		
General Revenue	3,890,000	9,337,000
Total General Revenue		

[1] http://scholar.harvard.edu/files/miron/files/budget_2010_final_0.pdf

	6,893,000	16,543,000
Education	233,000	559,000
Conservation	29,000	70,000
Parks, Soil, Water	23,000	56,000
Local	120,000	287,000
TSR	7,178,000	17,228,000

Officials from the **Office of State Courts Administrator** indicated:

The proposed initiative petition, 18-133, would create a new section of the Missouri Constitution to be known as Article IV, section 54. This section would allow citizens over the age of twenty-one to have the right to engage in the production, sale, distribution and consumption of marijuana and the manufacture of goods from hemp, subject to reasonable regulations adopted by the state pursuant to this section.

The average of all marijuana related charge codes from 2011 to 2015 for Circuit case types is 14,122 per year. The average of all marijuana related charge codes from 2011 to 2015 for Associate case types is 10,982. We are unable to determine what number of these charges were for someone over the age of twenty-one.

The following Criminal Court Costs would be affected by this petition:

Criminal Court Costs		
Felony Case Costs	**Amount of Cost**	**Disburse to State/County**
Basic Civil Legal Services Fund surcharge	$10.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$45.00	State of Missouri - General Revenue $36, County $9
County Fee	$75.00	County
Court Automation Fund Fee	$7.00	State of Missouri -Statewide Court Automation Fund
Court Reporter fee (All Circuit Division Cases)	$15.00	State of Missouri - General Revenue
Crime Victims' Compensation Fund	$7.50	State of Missouri - Crime Victims' Compensation Fund

surcharge		
DNA Profiling Analysis Fund surcharge	$30.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Head Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards & Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	State of Missouri - Prosecuting Attorney Training Fund
Sheriffs' Fee	$75.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement Fund
Spinal Cord Injury Fund surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$279.50**	
Misdemeanor Case Costs		
Basic Civil Legal Services Fund surcharge	$8.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$15.00	$12 State of Missouri / $3 County
County Fee	$25.00	County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund

DNA Profiling Analysis Fund surcharge	$15.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Brain Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund

Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund

Sheriffs' Retirement Fund surcharge	$3.00	Sheriffs' Retirement Fund
Total	**$33.50**	
Criminal Costs Not Included Above		
Drug Testing by a State Lab	$150.00	State of Missouri
Drug Testing by a Private Lab	Actual Costs	County Reimbursement
Law Enforcement Arrest Costs:		
Highway Patrol		Amt. Approved by the Court
Local (County)		Amt. Approved by the Court
Municipal		Amt. Approved by the Court

The decrease in the court fees, depending on the number of cases, will result in an unknown loss to the courts.

They also assume there will be an unknown decrease in caseload for the courts because the courts will no longer process these cases; however, at this time they are unable to calculate the decrease.

Any significant increase or decrease will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the

full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated if passed, this constitutional amendment would have a positive impact on the workload of the Missouri State Public Defender, since possession, manufacture, distribution, etc. of cannabis would no longer be unlawful, offenses that the Public Defender currently uses resources to defend and no longer would need to.

The exact positive impact is difficult to predict because they track their cases by statutory offense and most drug offenses are not limited to marijuana.

However, their best estimate, using FY2014 MSPD data, is that this would reduce their caseload by 3,523 cases (685 A/B felonies, 1,797 C/D felonies, 1,041 misdemeanors, and 1,140 probation violations).

In *The Missouri Project: A Study of the Missouri Public Defender System and Attorney Workload Standards*, prepared by RubinBrown on behalf of the American Bar Association's Standing Committee on Legal Aid and Indigent Defendants, the relevant workload standards are: A/B felonies, 47.6 hours per case; C/D felonies, 25.0 hours per case; misdemeanors, 11.7 hours per case; and probation violations, 9.8 hours per case). (The workload standards include only case related tasks over which an attorney has some control (they exclude, for example, in court and travel time) and thereby reflect a conservative estimate.)

Applying those workload standards to the 2,858 cases, those cases require 100,882.7 attorney hours. With 2,080 hours per attorney available each year, that represents the work of 48.5 attorneys.

While in theory they might also handle fewer appeals of guilty verdicts after trial, the fact is that only a very small percentage of their cases proceed to trial and it's likely that only a small percentage of those cases are appeals from marijuana convictions. Therefore this minimal positive impact is not being taken into account in this estimate.

However, the Missouri State Public Defender already is significantly understaffed by 333 attorneys under the workload standards developed in *The Missouri Project*. (The 333 attorneys is a conservative estimate of the under-staffing in that it assumes they contract all conflicts to private attorneys, which they are not able to do for budgetary reasons).

Therefore, despite the positive impact on the workload of the Missouri State Public Defender, because they are already understaffed that savings in attorney time would not allow the Public Defender to reduce its workforce and therefore would not translate into an actual cost savings. However it does reduce by the cost of 48.5 attorneys how much

money needs to be added to their budget in order to meet *The Missouri Project*'s workload standards.

Officials from the **State Treasurer's office** indicated this proposal would have no fiscal impact on their office.

Officials from **Greene County** indicated there is anticipated costs for this initiative petition. Unfortunately there is not enough time given in the response to provide an actual estimated costs.

County Prosecutor, Dan Patterson provided the following information:

No on 64 Campaign and SAM Action

California voters are being told that they will see the crime rate go down if they vote to legalize marijuana commercially; this has not been the case in the state of Colorado or the city of Denver. Since the legalization of recreational marijuana in Colorado in 2013 traffic related marijuana deaths have increased 48%, marijuana related emergency room visits have increased 49%, and marijuana related calls to the poison center have increased 100%. According to the Colorado Bureau of Investigations in 2015 statewide homicides in Colorado rose 14.7 % over the previous year. Pueblo, Colorado had the highest homicide rate in the state with 11.1 killings per 100,000 residents. Aurora, Colorado's homicide rate more than doubled from 2014. Additionally more places in Colorado were robbed and more thefts occurred, especially cars, as 193,115 motor vehicles were reported stolen, up 27.7 % in 2015 from the previous year. In 2015, sexual assaults rose 10% in Colorado with Denver, Aurora, Lakewood, Westminster and Pueblo all reporting higher numbers as well.

In the city of Denver since the legalization of recreational marijuana the number of crimes in Denver has grown by about 44 %, according to annual figures the city reported to the National Incident Based Reporting System. In 2015 in Denver alone crime rose in every neighborhood in the city. The murder rate hit a decade high, 1059 more cars were broken into, there were 903 more auto thefts, 321 more aggravated assaults and 231 more homes were broken into compared to 2014.

California voters are also being told that legalizing recreational marijuana will free up law enforcement to work on other criminal activities. Again that has not been the case in Denver. Besides the overall increases in crime we have experience, the Denver police department is dealing with a 900% increase in the unlawful cultivation and manufacture of marihuana concentrate, and a 99% increase in the unlawful distribution of marijuana and marijuana concentrate. The quantity of illegal marijuana seized by the Denver police has increased 3,424% on average per case. The volume of marijuana seized per case has increased from an average of 162 pounds to 5724 pounds. In Denver unlawful public consumption of marijuana citations has increased over 300% per year since the legalization of recreational marijuana. The Denver police department is busier enforcing marijuana laws and investigating crimes directly related to marijuana, including murderers, robberies, and home invasions, than any other time in the history of the city.

Sincerely,

Mitchell R. Morrissey
Denver District Attorney

Officials from the **City of Kansas City** indicated their local government estimates the fiscal impact of the above-referenced constitutional amendment for fiscal years 2018, 2019 and 2020 to be as follows:
(reminder: 2018 will likely be a portion of a fiscal year, depending on effective date of amendment)

Revenues: (explain amount per fiscal year and source or reason for increase)
This constitutional amendment will have no fiscal impact on their city.

Savings: (explain amount per fiscal year, reason for savings and area where savings will occur)
This constitutional amendment will have no fiscal impact on their city.

Costs:(explain what type of costs will be incurred, amount per fiscal year and reason)
This constitutional amendment will have no fiscal impact on their city.

Losses:(explain why revenue losses would be expected and amount per fiscal year)
This constitutional amendment will have no fiscal impact on their city.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from the **City of St. Joseph** indicated this initiative petition should not have a fiscal impact on their local government.

Officials from the **Missouri Veterans Commission** indicated they defer fiscal impact to the Department of Revenue/Tax. They are pleased to receive any funding which appropriately comes to them to support the Veterans Programs currently administered by the Commission.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from the **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this will not have a fiscal impact on their university.

Officials from the **Missouri State University** indicated in response to this initiative petition, no fiscal impact to their university.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,**

the **City of Mexico,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, Harris-Stowe State University, Lincoln University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Fiscal Note Summary

This proposal is estimated to increase annual state tax revenues by $17 million when fully implemented with additional estimated annual state savings of $11 million. State implementation costs are estimated at $150,000 with annual operating costs estimated at $700,000. Local law enforcement costs could increase.

RE: Petition approval request from Timothy Gilio regarding a proposed constitutional amendment to Article IV, version 5 (2018-132)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Timothy Gilio on January 23, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

This measure amends the Missouri Constitution by adding Section 54 to Article IV. This amendment implicitly repeals in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105.1, 105.1108.1, 105.1112.1, 195.0010.1, 196.0100.1, 263.0250.1,577.0024.1, 579.0015.1, 579.0020.1, 579.0030.1, 579.0055.1, 579.0065.1, 579.0068.1, and 579.0105.1

Be it resolved by the people of the state of Missouri that the Constitution be amended:

One new section is adopted to be known as Article IV, Section 54 and to read as follows:

1.Cannabis aka marijuana and cannabis hemp shall immediately be removed from Missouri's list of controlled substances and shall no longer be listed among Missouri's drugs schedules.

2. Definitions of terms used in this Act: cannabis and cannabis hemp refer to cannabis marijuana, cannabis sativa, cannabis indica, cannabis ruderalis or any variety of cannabis including any derivative, concentrate, extract, flower leaf particle preparation resin root salt seed stalk stem or any product thereof.
a. Medical cannabis refers to Physician or Veterinarian written recommended use of cannabis or any form of cannabis derivative, concentrate, extract, flower, stem, stalk, root, leaf, or any Cannabis product thereof.
b. Personal aka recreational use refers to any cannabis products use not recommended by Physician's or Veterinarian's
c. Cannabis accessories means any equipment, products or materials of any kind that are used or intended for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging or storing of cannabis or hemp or for ingesting, inhaling, vaporizing smoking or otherwise introducing cannabis into or onto the human body with any vehicle or what could be construed as a dangerous device.
d. Establishment refers to cannabis cultivating facility, a cannabis manufacturing facility or retail store or other entity that cultivates, prepares manufactures packages transports or sells cannabis or hemp products or accessories.

3. Minors refers to anyone under the age of 21
a. Cannabis or its products shall not be sold to anyone under the age of 21.
b. Anyone under the age of 21 shall have legal access to cannabis through a physician's written recommendation, or parental supervision or a legal guardian for medical conditions or diseases that cannabis might help with.

4. The following acts are not unlawful and shall not be an offense under these revised Missouri law's
a. Possession or cultivation of cannabis for personal or medical use in an area sufficient to produce the quantity necessary to address one's personal or medical needs
b. Cultivating, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes, provided the person has current applicable licenses to run a business in Missouri. No special licensing will be required beyond that which is applicable for the cultivation, harvest, processing, manufacturing, packaging, distribution, transferal, display, or possessing of any non-toxic food or food product.
c. Providing cannabis, aka marijuana and or any part of the cannabis plant thereof to be sold to the public must be tested by an accredited testing facility and all packaging labeled accordingly to reflect said testing.
d. Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs a through d of this section

5. Patient's rights: cannabis shall be available to all patients regardless of age, race or gender without taxation when recommended by a physician as a medicine.
a. All patients engaged in cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through conventional therapeutic means.

6. All prisoners that have been found guilty in a Missouri Court off a nonviolent cannabis related crime shall immediately be released and all charges for non-violent cannabis crimes shall be expunged from their records.
a. Within 60 days of passage of this act, the attorney general's office shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis related nonviolent civil and criminal records in Missouri, to be distributed to all circuit court judges within the state.

7. No Missouri law enforcement personnel, state, county, city employee, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri constitution.
a. Any person who impedes the lawful exercise of these provisions is guilty of a class A misdemeanor and is subject to all penalties or fines thereof.
b. An additional 5% tax will be added to all personal / recreational sales of Cannabis not to include any Hemp or Hemp by products sold within the boundaries of Missouri in addition to any established state, county or city sales tax already set in place to be collected by the State of Missouri Sales Taxation Division. The 5% additional sales tax monies collected will be collected by the State of Missouri Sales Taxation Division, divided and distributed as directed in this paragraph on a quarterly basis as follows, 2.5% will go to Missouri Public Schools that teach Preschool or K through 12 grade or any combination of aforementioned . The remaining 2.5% will be directed to the Missouri Veterans Commission to help with housing, clothing, food and medical needs for our multitude of Missouri veterans.

8. Cannabis farmers, manufacturer's processors and distributors shall not be subject to any special zoning requirements, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor of agricultural products.

9. Pursuant to the ninth and tenth amendments to the constitution of the United States, the people of Missouri hereby repudiate and challenge federal cannabis prohibitions that conflict with this act.
a. The state of Missouri will honor all legally obtained patients medical cards regardless of the state where issued and Missouri shall become reciprocity with all legal states where Cannabis is considered legalized by law for medical or recreational use.
b. Opinions pertaining to, and willingness to recommend medical cannabis therapy shall not be a criteria for the licensure of physicians or Veterinarian's; No physician or Veterinarian shall be subject to any professional license review or hearing as a result of recommending or approving medical cannabis therapy.
c. Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis, hemp or any derivatives or parts thereof.

10. All provisions of this section are self-executing and serviceable. Except where otherwise indicated in the text of this document this constitutional amendment shall supersede any and all conflicting city, county, state or federal statutory, local charter, ordinance or resolution and shall be implemented no later than January 31st, following the election that placed this initiative before the people of Missouri.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-132)

Subject

Initiative petition from Timothy Gilio regarding a proposed constitutional amendment to Article IV. (Received January 24, 2017)

Date

February 14, 2017

Description

This proposal would amend Article IV of the Constitution of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Missouri Veterans Commission, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Assumptions

Officials from the **Attorney General's office** indicated among other provisions, this proposal could require their office to develop and issue an order providing for the destruction of "all cannabis related nonviolent civil and criminal records in Missouri." Moreover, the proposal purports to supersede federal law.

They expect that the enactment of this proposal would result in increased litigation. They assume they could absorb costs associated with the increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** estimated increased operating costs of $0 in fiscal year 2018, unknown>$99,045 in fiscal year 2019, and unknown>$169,098 in fiscal year 2020.

Section 192.945, RSMo, allows their department to issue a hemp extract registration card for persons suffering from intractable epilepsy. The hemp extract registration card allows for the legal possession and use of cannabidiol (CBD) oil. This proposal allows for the legal use of marijuana for both medical and recreational purposes. Therefore, persons with intractable epilepsy would not need to apply for a hemp extract registration card in order to legally use the CBD oil.

They expect rental space for two staff located in Jefferson City would be required: 2 staff x 230 sq.ft./FTE x $21.00 = $9,660.

They indicated retail marijuana, cultivation facilities, products manufacturer, and testing facilities may be established as small businesses.

A five percent tax will be added to all personal/recreational sales of cannabis. The tax will be collected the State of Missouri Sales Taxation Division. The tax collected is to be directed to Missouri Public Schools and to the Missouri Veterans Commission.

Division of Community and Public Health (DCPH)

This proposal does not require them to issue any licenses or conduct inspections to ensure the safety of marijuana infused food products. However, sections 196.010 through

196.298, RSMo, gives them responsibility for the regulation of food to include such duties as ensuring food safety, sanitation, and proper labeling, etc. Therefore, they would have responsibility to assure that facilities manufacturing foods containing marijuana and marijuana products are regulated the same as other food manufacturers.

Division of Community and Public Health (DCPH)

Due to the broad parameters of this proposal, it is difficult to determine how many food manufacturing facilities would be established. States which have legalized retail marijuana have seen a significant demand for edible marijuana products. For the purposes of this fiscal note, they estimate that at least 300 food manufacturing facilities would be established as a result of this proposal. In order to properly inspect these manufacturing facilities, DCPH would require a minimum of two Environmental Public Health Specialist IV staff (A27, $44,352, Step G). This law shall be implemented no later than January 31 following the November 2018 election. Therefore, DCPH assumes that the two Environmental Public Health Specialist IV positions would begin January 1, 2019.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated a fiscal impact of $7,178,073 in fiscal year 2019 (7 months), $7,511,746 in fiscal year 2020, $10,011,383 in fiscal year 2021, $10,741,186 in fiscal year 2022 and thereafter.

Legalizing the possession and use of marijuana would remove from the criminal statutes all controlled substance offenses for marijuana, including possession, distribution and trafficking. If the legislation that removed marijuana from the list of controlled substances was retrospective then there would be two reductions in the cost of incarceration: the release of offenders serving a marijuana offense and fewer admissions to prison. The legalization of marijuana will largely impact offenders who are only serving a marijuana offense. Offenders serving multiple concurrent sentences will continue to be required to serve the other sentences after legalization and no estimate is made for offenders serving multiple sentences.

The reduction in the offender population is the total of reductions from the expungement of sentences and fewer admissions and probations. The cost avoidance is based upon a direct prison cost per year in FY17 of $6,085 and an average cost of $2,234 per year for offenders on field supervision. In the first year after the enactment of the legislation that

legalizes marijuana there is an estimated reduction of 633 offenders in prison and 3,676 offenders on field supervision. In the next year (FY20) there will no discharges from expungement but the reduction in the prison population will increase to 214. The field reduction will continue into FY21 because the marijuana offenders are estimated to serve 2.5 years on supervision.

The estimate is qualified by the use of an expansion factor that assumes that the drug distribution in the sentences where the drug is not known will be similar to that where the drug is known.

The estimated cost avoidance in the first year is $7,178,073 and will be $10,741,186 after the 4th year.

If marijuana usage becomes legal it could impact the safety and security of our prisons as it is not believed that there is a means for testing whether an employee is under the influence of marijuana. Impaired prison employees or visitors can impact the safe and secure operation of our prisons.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated total fund costs for General Revenue will be $150,012 for fiscal year 2018, $30,752 for fiscal year 2019, and $31,521 for fiscal year 2020.

This petition opens up the possibility of additional business opportunities in cannabis farming, manufacturing, and distribution of products.

		Federal		-	-	-
		Other		-	-	-
		Total		150,012	30,752	31,521

This would create an unknown positive impact on Total State Revenue.

This petition increases state revenues by an unknown amount.

The provisions of section 7b add an additional five percent tax to all personal/recreational sales of cannabis not including hemp or hemp by-products sold in Missouri. This tax is in addition to any state, county, or city sales taxes already in place. This section also requires the division and distribution of these collections on a quarterly basis to Missouri public schools and the Missouri Veterans' Administration.

This Article states that the tax is to be collected by the State of Missouri Sales Tax Division. There is no State of Missouri Sales Tax Division and their department assumes that the taxpayer will remit the tax to their department. Because there are no enforcement provisions, it may be difficult for their department to enforce the collection of the

additional tax under current sales tax statutes. Their department will not be able to make refunds to taxpayers as the article is currently drafted.

Administrative Impact:

Business Tax Processing:
Although the legislation bases the additional five percent tax on retail sales, it is in addition to and separate from state, county, or city sales tax, and must therefore be reported and deposited separately.

If this money needs to remain in a non-state account, either it would need to stay in the sales suspense holding account until distribution, or new bank accounts would need to be established for each.

Officials from the **Department of Public Safety, Office of the Director** indicated they see no fiscal impact due to this petition.

Officials from the **Department of Public Safety, Division of Missouri State Highway Patrol** indicated they expect increased operating costs of $426,236 for the first year implemented, $487,384 for the second year implemented, and $492,597 for the third year implemented.

The provisions of this petition would require their agency to rent office space for 4 FTE's to process the expungement requests.

The proposed legislation would order the immediate destruction of all cannabis-related non-violent civil and criminal records in Missouri.

Two different divisions within their agency will be impacted by this legislation. Here is a breakdown for each division:

Criminal Justice Information Services Division
The Criminal Justice Information Services Division (CJIS) states that there are currently 95,550 arrest charges in the Central Repository. The current expungement process, pursuant to Chapter 610, takes approximately 90 minutes to process. One FTE can handle 1,243 expungements per year. Conservatively, at least five FTE's would be required to initially handle the expungments created by this legislation. A significant processing backlog would occur if sufficient FTE's are not assigned to accommodate the number of expungements ordered.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 90 minutes. Therefore, one FTE can handle 1,243 expungements per year = 111,840 / 90.

These FTE's (CJIS Technicians, Range 16) would be necessary to process all expungement requests, review criminal history records, contact any agency associated with the arrests or convictions, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE at $55,495 and the ability of that employee to process 1,243 expungements per year, the cost alone per expungement is $55,495 \ 1,243 = $44.64. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories, as well as contacting of the various agencies associated with the arrests. In researching other states with similar expungement requirements, they all charge a fee to offset the cost of the time required to process the expungements. Their fees ranged from $50 to $450 per petition per arrest date.

These FTE will most likely be 2nd and 3rd shift employees so they would not require any equipment. However, there would be recurring costs of $650 per year per FTE for office supplies and phone charges. If any FTE were placed on the 1st shift, standard equipment would be required at a one-time cost of $6,094 per FTE.

5 CJIS Technicians ($1,232.50 x 24)	$147,900
Office Equipment/HW/SW	$6,094

RECURRING COSTS

Phone Charges per FTE	$350
Office Supplies per FTE	$300

Patrol Records Divison

Currently, there are 86,600 records in the Patrol's Traffic Arrest System (TAS) pertaining to arrests completed by the Missouri Highway Patrol that could possibly meet the requirements of this proposed constitutional amendment. These are arrest and arrest/disposition records pertaining to individuals the age of 21 years and older with an NCIC modifier of 60-64 that relate to marijuana offenses. Given this, if only ten percent of the individuals who qualify to have his or her record expunged sought to do so, the Patrol Records Division (PRD) would require 4 FTE's. However, if a large number of these expungements were to be granted with even four FTE's, the backlog would compound greatly to the point it may take several years to catch up. If 100 percent of the individuals who qualify to have their record expunged sought to do so, the Patrol Records Division would require 35 FTE's to complete this task in approximately one year.

The addition of 35 FTE's would require additional supervisory personnel. However, due to the vague and uncertain nature of this proposed amendment, the Patrol Records Division has no true way to determine the actual effect or costs.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 45 minutes. Therefore, one FTE can handle 2,485 expungements per year = 111,840 / 45.

With the current estimate of 86,600 records that potentially meet the requirements of this proposed amendment and would potentially be eligible for expungement, the following percentages of persons actually requesting an expungement will directly relate to the number of PRD FTE's required:

10% = 86,600 x .10 = 8,660 / 2,485 = 4 FTE's
50% = 86,600 x .50 = 43,300 / 2,485 = 17 FTE's
100% = 86,600 / 2,485 = 35 FTE's

These FTE's (Quality Control Clerks, Range 10) would be necessary to process all expungement requests, review records, contact agencies, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE of $45,702 and the ability of that employee to process 2,485 expungements per year, the cost per expungement is $45,702 \ 2,485 = $18.39. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories.

Processing ten percent of the possible expungements would require additional workspace. The physical requirements would increase with the number of FTE's required to meet the demand for expungements. There will be recurring costs of $650 per year per FTE for office supplies and phone charges. Standard equipment and office furniture would be required at a one-time cost of $6,094 per FTE.

4 Quality Control Clerks ($1,015 x 24)	$97,440
Equipment/Office Furniture	$6,094

RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

The provisions of this petition would require the Highway Patrol to rent office space for 4 FTE's to process the expungement requests. The Office of Administration states that 920 square feet of office space would be required. The following costs apply per square foot:

Office Space	$14/Sq Ft
Janitorial/Trash Costs	$1.50/Sq Ft
Utility Costs	$2/Sq Ft

The agency provided the following additional comments:

It is suggested to add this additional language to provide for the collection of a fee to offset the costs of the expungements:

43.530. 1. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than nine dollars per request for criminal history record information not based on a fingerprint search. In each year beginning on or after January 1, 2010, the superintendent may increase the fee paid by requesting entities by an amount not to exceed one dollar per year, however, under no circumstance shall the fee paid by requesting entities exceed fifteen dollars per request.

2. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than twenty dollars per request for criminal history record information based on a fingerprint search, unless the request is required under the provisions of subdivision (6) of section 210.481, section 210.487, or section 571.101, in which case the fee shall be fourteen dollars.

3. A request made under subsections 1 and 2 of this section shall be limited to check and search on one individual. Each request shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. The highway patrol may establish procedures for receiving requests for criminal history record information for classification and search for fingerprints, from courts and other entities, and for the payment of such requests. There is hereby established by the treasurer

of the state of Missouri a fund to be entitled as the "Criminal Record System Fund". Notwithstanding the provisions of section 33.080 to the contrary, if the moneys collected and deposited into this fund are not totally expended annually for the purposes set forth in sections 43.500 to 43.543, the unexpended moneys in such fund shall remain in the fund and the balance shall be kept in the fund to accumulate from year to year.

4. For all petitions for expungement under the provisions of Chapter 610, Section 577.054, or any other created expungement requirement under statute, excluding Section 610.122, the applicant shall pay a fee of seventy-five dollars per arrest date listed on the petition. Each petition shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. For expungements that require removal from the Traffic Arrest System twenty dollars of the seventy-five dollar fee will be deposited in the Highway Patrol Traffic Records Fund.

There are numerous uncertainties associated with this proposed constitutional amendment. The definition of a "non-violent cannabis-only offense" needs to be added. It is unclear if individuals with the aforementioned conviction records are required to abide by the expungement process mandated by various other state statutes. Does the individual just complete and file a document with a circuit clerk and the record is expunged or does the "court," whomever that is, order the immediate expungement of all civil and criminal records pertaining to non-violent cannabis only offenses?

The Highway Patrol has concerns with number 7 which states, "No Missouri law enforcement personnel, state, county, city employee, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri constitution."

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's Office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no impact.

Officials from the **Office of Administration** (OA) indicated:

Section 54 of Article IV would allow the medical and recreational use of marijuana and hemp, as well as the cultivation, production, transportation and retail sale of marijuana and hemp and their related products. Subsection 3 allows the sale of marijuana to individuals under the age of 21 only with physician or parental permission. Subsection 6 requires that all prisoners that have been convicted in Missouri of a nonviolent cannabis related crime shall be immediately released and all related charges shall be expunged from their records. Subsection 7 creates an excise tax of five percent on all retail sales of marijuana, in addition to any established state or local sales taxes. The revenue shall be deposited to the credit of general revenue with the provision that 2.5 percent be distributed to elementary and secondary public education schools and 2.5 percent be distributed to the Missouri Veterans' Commission. Subsection 5, however, allows all medical marijuana users, with recommendation by a physician, to purchase cannabis without taxation. Subsection 10 provides that the provisions in the amendment take effect no later than January 31st, following the election that placed the initiative before the people of Missouri.

B&P estimates that subsection 7 of this initiative petition could increase TSR by as much as $17.2M and GR by as much as $16.5M once fully implemented in FY 2021. The Substance Abuse and Mental Health Services Administration (SAMHSA) reports that 9.95% of Missouri population age 18 and older use marijuana. For the purposes of this analysis, B&P assumes the same percentage for marijuana users over the age of 21. The U.S. Census (2010) reports the population of Missouri residents over the age of 21 as 4,300,988 people. Multiplying the percentage of Missouri residents who use marijuana by the population of Missouri residents over the age of 21 gives an estimate of the number of Missouri residents who use marijuana:

	4,300,988	(MO residents over the age of 21)
X	9.95%	(% of MO residents who use marijuana)
	427,948	(MO residents who use marijuana)

However, B&P estimates that of those who use marijuana, roughly 65,000 would be medical users. SAMHSA reports that the total number of U.S. population age 18 and older use marijuana is 27,169,000 people. B&P assumes dividing the number of MO residents who use marijuana by the U.S. population that uses marijuana will provide an estimate of the percentage of the U.S. market that is attributable to Missouri.

	427,948	(MO residents who use marijuana)
÷	27,169,000	(Number of U.S. marijuana users)
	1.58%	(% U.S. market that is attributable to MO)

Using the estimate above for medical users, of that 1.58 percent approximately 0.24% could be considered medical. Therefore, B&P estimates that the size of the U.S. market that is attributable to Missouri, less medical marijuana users, is 1.33 percent. Using an established estimate[1] for the U.S. market of $14.0B and multiplying by the percentage of the U.S. market that is attributable to Missouri, B&P estimates that Missouri's marijuana market, less medical marijuana use, could be worth $186.7M. Assuming Missouri's marijuana market is worth $186.7M, an excise tax of five percent could increase TSR and GR by as much as $9.3M once fully implemented. Table 1 shows a breakdown of revenue increases by tax type.

Table 1: Revenue Generated by Marijuana Taxes

Tax	FY 2020 (5 months)	Fully Implemented (FY 2021)
Sales Tax		
General Revenue	3,002,000	7,206,000
Education	233,000	559,000
Conservation	29,000	70,000
Parks, Soil, Water	23,000	56,000
Local	120,000	287,000
Marijuana Excise Tax		
General Revenue	3,890,000	9,337,000
Total		
General Revenue	6,893,000	16,543,000
Education	233,000	559,000
Conservation	29,000	70,000
Parks, Soil, Water	23,000	56,000
Local	120,000	287,000
TSR	7,178,000	17,228,000

[1] http://scholar.harvard.edu/files/miron/files/budget_2010_final_0.pdf

Officials from the **Office of State Courts Administrator** indicated:

The proposed initiative petition, 18-132, would create a new section of the Missouri Constitution to be known as Article IV, section 54. This section would allow citizens over the age of twenty-one to have the right to engage in the production, sale, distribution and consumption of marijuana and the manufacture of goods from hemp, subject to reasonable regulations adopted by the state pursuant to this section.

The average of all marijuana related charge codes from 2011 to 2015 for Circuit case types is 14,122 per year. The average of all marijuana related charge codes from 2011 to 2015 for Associate case types is 10,982. We are unable to determine what number of these charges were for someone over the age of twenty-one.

The following Criminal Court Costs would be affected by this petition:

Criminal Court Costs		
Felony Case Costs	**Amount of Cost**	**Disburse to State/County**
Basic Civil Legal Services Fund surcharge	$10.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$45.00	State of Missouri - General Revenue $36, County $9
County Fee	$75.00	County
Court Automation Fund Fee	$7.00	State of Missouri -Statewide Court Automation Fund
Court Reporter fee (All Circuit Division Cases)	$15.00	State of Missouri - General Revenue
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$30.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Head Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund

Peace Officer Standards & Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	State of Missouri - Prosecuting Attorney Training Fund
Sheriffs' Fee	$75.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement Fund
Spinal Cord Injury Fund surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$279.50**	
Misdemeanor Case Costs		
Basic Civil Legal Services Fund surcharge	$8.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$15.00	$12 State of Missouri / $3 County
County Fee	$25.00	County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$15.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Brain Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund

Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	$0.50 State of Missouri / $0.50 County
Sheriffs' fee	$10.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement fund
Spinal Cord Injury Fund Surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$102.50**	
Municipal Case (Filed in Associate Division) Costs		
Clerk Fee	$15.00	$12 State of Missouri / $3 County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Sheriffs' Retirement Fund surcharge	$3.00	Sheriffs' Retirement Fund
Total	**$33.50**	
Criminal Costs Not Included Above		
Drug Testing by a State Lab	$150.00	State of Missouri

Drug Testing by a Private Lab	Actual Costs	County Reimbursement
Law Enforcement Arrest Costs:		
Highway Patrol		Amt. Approved by the Court
Local (County)		Amt. Approved by the Court
Municipal		Amt. Approved by the Court

The decrease in the court fees, depending on the number of cases, will result in an unknown loss to the courts.

They also assume there will be an unknown decrease in caseload for the courts because the courts will no longer process these cases; however, at this time they are unable to calculate the decrease.

Any significant increase or decrease will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated if passed, this constitutional amendment would have a positive impact on the workload of the Missouri State Public Defender, since possession, manufacture, distribution, etc. of cannabis would no longer be unlawful, offenses that the Public Defender currently uses resources to defend and no longer would need to.

The exact positive impact is difficult to predict because they track their cases by statutory offense and most drug offenses are not limited to marijuana.

However, their best estimate, using FY2014 MSPD data, is that this would reduce their caseload by 3,523 cases (685 A/B felonies, 1,797 C/D felonies, 1,041 misdemeanors, and 1,140 probation violations).

In *The Missouri Project: A Study of the Missouri Public Defender System and Attorney Workload Standards*, prepared by RubinBrown on behalf of the American Bar Association's Standing Committee on Legal Aid and Indigent Defendants, the relevant workload standards are: A/B felonies, 47.6 hours per case; C/D felonies, 25.0 hours per case; misdemeanors, 11.7 hours per case; and probation violations, 9.8 hours per case). (The workload standards include only case related tasks over which an attorney has some control (they exclude, for example, in court and travel time) and thereby reflect a conservative estimate.)

Applying those workload standards to the 2,858 cases, those cases require 100,882.7 attorney hours. With 2,080 hours per attorney available each year, that represents the work of 48.5 attorneys.

While in theory they might also handle fewer appeals of guilty verdicts after trial, the fact is that only a very small percentage of their cases proceed to trial and it's likely that only a small percentage of those cases are appeals from marijuana convictions. Therefore this minimal positive impact is not being taken into account in this estimate.

However, the Missouri State Public Defender already is significantly understaffed by 333 attorneys under the workload standards developed in *The Missouri Project*. (The 333 attorneys is a conservative estimate of the under-staffing in that it assumes they contract all conflicts to private attorneys, which they are not able to do for budgetary reasons).

Therefore, despite the positive impact on the workload of the Missouri State Public Defender, because they are already understaffed that savings in attorney time would not allow the Public Defender to reduce its workforce and therefore would not translate into an actual cost savings. However it does reduce by the cost of 48.5 attorneys how much money needs to be added to their budget in order to meet *The Missouri Project*'s workload standards.

Officials from the **State Treasurer's office** indicated this proposal would have no fiscal impact on their office.

Officials from **Greene County** indicated there is anticipated costs for this initiative petition. Unfortunately there is not enough time given in the response to provide an actual estimated costs.

County Prosecutor, Dan Patterson provided the following information:

October 12, 2016

No on 64 Campaign and SAM Action

California voters are being told that they will see the crime rate go down if they vote to legalize marijuana commercially; this has not been the case in the state of Colorado or the city of Denver. Since the legalization of recreational marijuana in Colorado in 2013 traffic related marijuana deaths have increased 48%, marijuana related emergency room visits have increased 49%, and marijuana related calls to the poison center have increased 100%. According to the Colorado Bureau of Investigations in 2015 statewide homicides in Colorado rose 14.7 % over the previous year. Pueblo, Colorado had the highest homicide rate in the state with 11.1 killings per 100,000 residents. Aurora, Colorado's homicide rate more than doubled from 2014. Additionally more places in Colorado were robbed and more thefts occurred, especially cars, as 193,115 motor vehicles were reported stolen, up 27.7 % in 2015 from the previous year. In 2015, sexual assaults rose 10% in Colorado with Denver, Aurora, Lakewood, Westminster and Pueblo all reporting higher numbers as well.

In the city of Denver since the legalization of recreational marijuana the number of crimes in Denver has grown by about 44 %, according to annual figures the city reported to the National Incident Based Reporting System. In 2015 in Denver alone crime rose in every neighborhood in the city. The murder rate hit a decade high, 1059 more cars were broken into, there were 903 more auto thefts, 321 more aggravated assaults and 231 more homes were broken into compared to 2014.

California voters are also being told that legalizing recreational marijuana will free up law enforcement to work on other criminal activities. Again that has not been the case in Denver. Besides the overall increases in crime we have experience, the Denver police department is dealing with a 900% increase in the unlawful cultivation and manufacture of marihuana concentrate, and a 99% increase in the unlawful distribution of marijuana and marijuana concentrate. The quantity of illegal marijuana seized by the Denver police has increased 3,424% on average per case. The volume of marijuana seized per case has increased from an average of 162 pounds to 5724 pounds. In Denver unlawful public consumption of marijuana citations has increased over 300% per year since the legalization of recreational marijuana. The Denver police department is busier enforcing marijuana laws and investigating crimes directly related to marijuana, including murderers, robberies, and home invasions, than any other time in the history of the city.

Sincerely,

Mitchell R. Morrissey
Denver District Attorney

Officials from the **City of Kansas City** indicated their local government estimates the fiscal impact of the above-referenced constitutional amendment for fiscal years 2018, 2019 and 2020 to be as follows:
(reminder: 2018 will likely be a portion of a fiscal year, depending on effective date of amendment)

Revenues: (explain amount per fiscal year and source or reason for increase)
This constitutional amendment will have no fiscal impact on their city.

Savings: (explain amount per fiscal year, reason for savings and area where savings will occur)
This constitutional amendment will have no fiscal impact on their city.

Costs:(explain what type of costs will be incurred, amount per fiscal year and reason)
This constitutional amendment will have no fiscal impact on their city.

Losses:(explain why revenue losses would be expected and amount per fiscal year)
This constitutional amendment will have no fiscal impact on their city.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from the **City of St. Joseph** indicated this initiative petition will not have a fiscal impact on their local government.

Officials from the **Missouri Veterans Commission** indicated they defer fiscal impact to the Department of Revenue/Tax. They are pleased to receive any funding which appropriately comes to them to support the Veterans Programs currently administered by the Commission.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from the **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this will not have a fiscal impact on their university.

Officials from the **Missouri State University** indicated in response to this initiative petition, no fiscal impact to their university.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,**

the **City of Mexico,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, Harris-Stowe State University, Lincoln University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Fiscal Note Summary

This proposal is estimated to increase annual state tax revenues by $17 million when fully implemented with additional estimated annual state savings of $11 million. State implementation costs are estimated at $150,000 with annual operating costs estimated at $700,000. Local law enforcement costs could increase.

JOHN R. ASHCROFT

JAN 24 2017
RECEIVED

RE: Petition approval request from Timothy Gilio regarding a proposed constitutional amendment to Article IV, version 4 (2018-131)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Timothy Gilio on January 23, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

This measure amends the Missouri Constitution by adding Section 54 to Article IV. This amendment implicitly repeals in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105.1, 105.1108.1, 105.1112.1, 195.0010.1, 196.0100.1, 263.0250.1,577.0024.1, 579.0015.1, 579.0020.1, 579.0030.1, 579.0055.1, 579.0065.1, 579.0068.1, and 579.0105.1

Be it resolved by the people of the state of Missouri that the Constitution be amended:

One new section is adopted to be known as Article IV, Section 54 and to read as follows:

1.Cannabis aka marijuana and cannabis hemp shall immediately be removed from Missouri's list of controlled substances and shall no longer be listed among Missouri's drugs schedules.

2. Definitions of terms used in this Act: cannabis and cannabis hemp refer to cannabis marijuana, cannabis sativa, cannabis indica, cannabis ruderalis or any variety of cannabis including any derivative, concentrate, extract, flower leaf particle preparation resin root salt seed stalk stem or any product thereof.
a. Medical cannabis refers to Physician or Veterinarian written recommended use of cannabis or any form of cannabis derivative, concentrate, extract, flower, stem, stalk, root, leaf, or any Cannabis product thereof.
b. Personal aka recreational use refers to any cannabis products use not recommended by Physician's or Veterinarian's
c. Cannabis accessories means any equipment, products or materials of any kind that are used or intended for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging or storing of cannabis or hemp or for ingesting, inhaling, vaporizing smoking or otherwise introducing cannabis into or onto the human body with any vehicle or what could be construed as a dangerous device.
d. Establishment refers to cannabis cultivating facility, a cannabis manufacturing facility or retail store or other entity that cultivates, prepares manufactures packages transports or sells cannabis or hemp products or accessories.

3. Minors refers to anyone under the age of 21
a. Cannabis or its products shall not be sold to anyone under the age of 21.
b. Anyone under the age of 21 shall have legal access to cannabis through a physician's written recommendation, or parental supervision or a legal guardian for medical conditions or diseases that cannabis might help with.

4. The following acts are not unlawful and shall not be an offense under these revised Missouri law's
a. Possession or cultivation of cannabis for personal or medical use in an area sufficient to produce the quantity necessary to address one's personal or medical needs
b. Cultivating, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes, provided the person has current applicable licenses to run a business in Missouri. No special licensing will be required beyond that which is applicable for the cultivation, harvest, processing, manufacturing, packaging, distribution, transferal, display, or possessing of any non-toxic food or food product.
c. Providing cannabis, aka marijuana and or any part of the cannabis plant thereof to be sold to the public must be tested by an accredited testing facility and all packaging labeled accordingly to reflect said testing.
d. Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs a through e of this section
e. The use or possession of cannabis is not grounds alone for a "DUI" driving under the influence infraction

5. Patient's rights: cannabis shall be available to all patients regardless of age, race or gender without taxation when recommended by a physician as a medicine.
a. All patients engaged in cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through conventional therapeutic means.

6. All prisoners that have been found guilty in a Missouri Court off a nonviolent cannabis related crime shall immediately be released and all charges for non-violent cannabis crimes shall be expunged from their records.
a. Within 60 days of passage of this act, the attorney general's office shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis related nonviolent civil and criminal records in Missouri, to be distributed to all circuit court judges within the state.

7. No Missouri law enforcement personnel, state, county, city employee, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri constitution.
a. Any person who impedes the lawful exercise of these provisions is guilty of a class A misdemeanor and is subject to all penalties or fines thereof.

8. Cannabis farmers, manufacturer's processors and distributors shall not be subject to any special zoning requirements, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor of agricultural products.

9. Pursuant to the ninth and tenth amendments to the constitution of the United States, the people of Missouri hereby repudiate and challenge federal cannabis prohibitions that conflict with this act.
a. The state of Missouri will honor all legally obtained patients medical cards regardless of the state where issued and Missouri shall become reciprocity with all legal states where Cannabis is considered legalized by law for medical or recreational use.
b. Opinions pertaining to, and willingness to recommend medical cannabis therapy shall not be a criteria for the licensure of physicians or Veterinarian's; No physician or Veterinarian shall be subject to any professional license review or hearing as a result of recommending or approving medical cannabis therapy.
c. Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis, hemp or any derivatives or parts thereof.

10. All provisions of this section are self-executing and serviceable. Except where otherwise indicated in the text of this document this constitutional amendment shall supersede any and all conflicting city, county, state or federal statutory, local charter, ordinance or resolution and shall be implemented no later than January 31st, following the election that placed this initiative before the people of Missouri.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-131)

Subject

Initiative petition from Timothy Gilio regarding a proposed constitutional amendment to Article IV. (Received January 24, 2017)

Date

February 14, 2017

Description

This proposal would amend Article IV of the Constitution of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Missouri Veterans Commission, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Assumptions

Officials from the **Attorney General's office** indicated among other provisions, this proposal could require their office to develop and issue an order providing for the destruction of "all cannabis related nonviolent civil and criminal records in Missouri." Moreover, the proposal purports to supersede federal law.

They expect that the enactment of this proposal would result in increased litigation. They assume they could absorb costs associated with the increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** estimated increased operating costs of $0 in fiscal year 2018, unknown>$99,045 in fiscal year 2019, and unknown>$169,098 in fiscal year 2020.

Section 192.945, RSMo, allows their department to issue a hemp extract registration card for persons suffering from intractable epilepsy. The hemp extract registration card allows for the legal possession and use of cannabidiol (CBD) oil. This proposal allows for the legal use of marijuana for both medical and recreational purposes. Therefore, persons with intractable epilepsy would not need to apply for a hemp extract registration card in order to legally use the CBD oil.

They expect rental space for two staff located in Jefferson City would be required: 2 staff x 230 sq.ft./FTE x $21.00 = $9,660.

They indicated retail marijuana, cultivation facilities, products manufacturer, and testing facilities may be established as small businesses.

Division of Community and Public Health (DCPH)

This proposal does not require them to issue any licenses or conduct inspections to ensure the safety of marijuana infused food products. However, sections 196.010 through 196.298, RSMo, gives them responsibility for the regulation of food to include such duties as ensuring food safety, sanitation, and proper labeling, etc. Therefore, they would have responsibility to assure that facilities manufacturing foods containing marijuana and marijuana products are regulated the same as other food manufacturers.

Division of Community and Public Health (DCPH)

Due to the broad parameters of this proposal, it is difficult to determine how many food manufacturing facilities would be established. States which have legalized retail marijuana have seen a significant demand for edible marijuana products. For the purposes of this fiscal note, they estimate that at least 300 food manufacturing facilities would be established as a result of this proposal. In order to properly inspect these manufacturing facilities, DCPH would require a minimum of two Environmental Public Health Specialist IV staff (A27, $44,352, Step G). This law shall be implemented no later than January 31 following the November 2018 election. Therefore, DCPH assumes that the two Environmental Public Health Specialist IV positions would begin January 1, 2019.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated a fiscal impact of $7,178,073 in fiscal year 2019 (7 months), $7,511,746 in fiscal year 2020, $10,011,383 in fiscal year 2021, $10,741,186 in fiscal year 2022 and thereafter.

Legalizing the possession and use of marijuana would remove from the criminal statutes all controlled substance offenses for marijuana, including possession, distribution and trafficking. If the legislation that removed marijuana from the list of controlled substances was retrospective then there would be two reductions in the cost of incarceration: the release of offenders serving a marijuana offense and fewer admissions to prison. The legalization of marijuana will largely impact offenders who are only serving a marijuana offense. Offenders serving multiple concurrent sentences will continue to be required to serve the other sentences after legalization and no estimate is made for offenders serving multiple sentences.

The reduction in the offender population is the total of reductions from the expungement of sentences and fewer admissions and probations. The cost avoidance is based upon a direct prison cost per year in FY17 of $6,085 and an average cost of $2,234 per year for offenders on field supervision. In the first year after the enactment of the legislation that legalizes marijuana there is an estimated reduction of 633 offenders in prison and 3,676 offenders on field supervision. In the next year (FY20) there will no discharges from expungement but the reduction in the prison population will increase to 214. The field reduction will continue into FY21 because the marijuana offenders are estimated to serve 2.5 years on supervision.

The estimate is qualified by the use of an expansion factor that assumes that the drug distribution in the sentences where the drug is not known will be similar to that where the drug is known.

The estimated cost avoidance in the first year is $7,178,073 and will be $10,741,186 after the 4th year.

If marijuana usage becomes legal it could impact the safety and security of our prisons as it is not believed that there is a means for testing whether an employee is under the influence of marijuana. Impaired prison employees or visitors can impact the safe and secure operation of our prisons.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this petition will have no fiscal impact on their department.

Officials from the **Department of Public Safety, Office of the Director** indicated they see no fiscal impact due to this petition.

Officials from the **Department of Public Safety, Division of Missouri State Highway Patrol** indicated they expect increased operating costs of $426,236 for the first year implemented, $487,384 for the second year implemented, and $492,597 for the third year implemented.

The provisions of this petition would require their agency to rent office space for 4 FTE's to process the expungement requests.

The proposed legislation would order the immediate destruction of all cannabis-related non-violent civil and criminal records in Missouri.

Two different divisions within their agency will be impacted by this legislation. Here is a breakdown for each division:

Criminal Justice Information Services Division
The Criminal Justice Information Services Division (CJIS) states that there are currently 95,550 arrest charges in the Central Repository. The current expungement process, pursuant to Chapter 610, takes approximately 90 minutes to process. One FTE can handle 1,243 expungements per year. Conservatively, at least five FTE's would be required to initially handle the expungments created by this legislation. A significant processing backlog would occur if sufficient FTE's are not assigned to accommodate the number of expungements ordered.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 90 minutes. Therefore, one FTE can handle 1,243 expungements per year = 111,840 / 90.

These FTE's (CJIS Technicians, Range 16) would be necessary to process all expungement requests, review criminal history records, contact any agency associated with the arrests or convictions, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE at $55,495 and the ability of that employee to process 1,243 expungements per year, the cost alone per expungement is $55,495 \ 1,243 = $44.64. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories, as well as contacting of the various agencies associated with the arrests. In researching other states with similar expungement requirements, they all charge a fee to offset the cost of the time required to process the expungements. Their fees ranged from $50 to $450 per petition per arrest date.

These FTE will most likely be 2nd and 3rd shift employees so they would not require any equipment. However, there would be recurring costs of $650 per year per FTE for office supplies and phone charges. If any FTE were placed on the 1st shift, standard equipment would be required at a one-time cost of $6,094 per FTE.

5 CJIS Technicians ($1,232.50 x 24)	$147,900
Office Equipment/HW/SW	$6,094
RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

Patrol Records Divison

Currently, there are 86,600 records in the Patrol's Traffic Arrest System (TAS) pertaining to arrests completed by the Missouri Highway Patrol that could possibly meet the requirements of this proposed constitutional amendment. These are arrest and arrest/disposition records pertaining to individuals the age of 21 years and older with an NCIC modifier of 60-64 that relate to marijuana offenses. Given this, if only ten percent of the individuals who qualify to have his or her record expunged sought to do so, the Patrol Records Division (PRD) would require 4 FTE's. However, if a large number of these expungements were to be granted with even four FTE's, the backlog would compound greatly to the point it may take several years to catch up. If 100 percent of the individuals who qualify to have their record expunged sought to do so, the Patrol Records Division would require 35 FTE's to complete this task in approximately one year.

The addition of 35 FTE's would require additional supervisory personnel. However, due to the vague and uncertain nature of this proposed amendment, the Patrol Records Division has no true way to determine the actual effect or costs.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 45 minutes. Therefore, one FTE can handle 2,485 expungements per year = 111,840 / 45.

With the current estimate of 86,600 records that potentially meet the requirements of this proposed amendment and would potentially be eligible for expungement, the following percentages of persons actually requesting an expungement will directly relate to the number of PRD FTE's required:

10% = 86,600 x .10 = 8,660 / 2,485 = 4 FTE's
50% = 86,600 x .50 = 43,300 / 2,485 = 17 FTE's
100% = 86,600 / 2,485 = 35 FTE's

These FTE's (Quality Control Clerks, Range 10) would be necessary to process all expungement requests, review records, contact agencies, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE of $45,702 and the ability of that employee to process 2,485 expungements per year, the cost per expungement is $45,702 \ 2,485 = $18.39. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories.

Processing ten percent of the possible expungements would require additional workspace. The physical requirements would increase with the number of FTE's required to meet the demand for expungements. There will be recurring costs of $650 per year per FTE for office supplies and phone charges. Standard equipment and office furniture would be required at a one-time cost of $6,094 per FTE.

4 Quality Control Clerks ($1,015 x 24)	$97,440
Equipment/Office Furniture	$6,094

RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

The provisions of this petition would require the Highway Patrol to rent office space for 4 FTE's to process the expungement requests. The Office of Administration states that 920 square feet of office space would be required. The following costs apply per square foot:

Office Space	$14/Sq Ft
Janitorial/Trash Costs	$1.50/Sq Ft
Utility Costs	$2/Sq Ft

The agency provided the following additional comments:

It is suggested to add this additional language to provide for the collection of a fee to offset the costs of the expungements:

43.530. 1. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than nine dollars per request for criminal history record information not based on a fingerprint search. In each year beginning on or after January 1, 2010, the superintendent may increase the fee paid by requesting entities by an amount not to exceed one dollar per year, however, under no circumstance shall the fee paid by requesting entities exceed fifteen dollars per request.

2. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than twenty dollars per request for criminal history record information based on a fingerprint search, unless the request is required under the provisions of subdivision (6) of section 210.481, section 210.487, or section 571.101, in which case the fee shall be fourteen dollars.

3. A request made under subsections 1 and 2 of this section shall be limited to check and search on one individual. Each request shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. The highway patrol may establish procedures for receiving requests for criminal history record information for classification and search for fingerprints, from courts and other entities, and for the payment of such requests. There is hereby established by the treasurer of the state of Missouri a fund to be entitled as the "Criminal Record System Fund". Notwithstanding the provisions of section 33.080 to the contrary, if the moneys collected and deposited into this fund are not totally expended annually for the purposes set forth in sections 43.500 to 43.543, the unexpended moneys in such fund shall remain in the fund and the balance shall be kept in the fund to accumulate from year to year.

4. For all petitions for expungement under the provisions of Chapter 610, Section 577.054, or any other created expungement requirement under statute, excluding Section 610.122, the applicant shall pay a fee of seventy-five dollars per arrest date listed on the petition. Each petition shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. For expungements that require removal from the Traffic Arrest System twenty dollars of the seventy-five dollar fee will be deposited in the Highway Patrol Traffic Records Fund.

There are numerous uncertainties associated with this proposed constitutional amendment. The definition of a “non-violent cannabis-only offense” needs to be added. It is unclear if individuals with the aforementioned conviction records are required to abide by the expungement process mandated by various other state statutes. Does the individual just complete and file a document with a circuit clerk and the record is

expunged or does the "court," whomever that is, order the immediate expungement of all civil and criminal records pertaining to non-violent cannabis only offenses?

The Highway Patrol has concerns with number 7 which states, "No Missouri law enforcement personnel, state, county, city employee, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri constitution."

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's Office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated unknown fiscal impact.

Changes to Missouri's state driving laws could impact some federal commercial drivers' license laws.

Failure to comply with 49 C.F.R. 384.225 & 384.226 could result in a withholding of Missouri's federal-aid highway funds apportioned to it under each of Title 23, United States Code (U.S.C.), sections 104(b)(1), (b)(3), and (b)(4). The federal funds impacted consist of national highway performance program funds, highway safety improvement program funds and congestion mitigation and air quality improvement funds. The withholding amount would be 4 percent for the first year of non-compliance and 8 percent for the second and subsequent years.

Officials from the **Office of Administration** (OA) indicated:

Under this proposal:

- Cannabis and cannabis hemp would be removed from the list of scheduled drugs
- Possessing, cultivating, harvesting and distributing cannabis for personal or medical use would be decriminalized. Anyone under age 21 may have access only for medical marijuana with a doctor's recommendation or parental/guardian supervision.
- Cannabis shall be available to all patients regardless of age, race or gender without taxation when recommended by a physician as a medicine.
- The use or possession of cannabis is not grounds alone for a Driving Under the Influence infraction.

- All prisoners who have been incarcerated for nonviolent cannabis-related crimes shall be immediately released and all charges for cannabis crimes expunged.
- No state or federal personnel or funds shall be used to enforce federal laws which are no longer illegal in Missouri under this amendment.
- Missouri will have reciprocity with any other states where cannabis is legalized by law for medical or recreational use.
- Language is included to state that the people of Missouri repudiate and challenge federal cannabis prohibitions that conflict with this proposal.
- Effective date is no later than January 31st following the election.
- Provisions are severable.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated:

The proposed initiative petition, 18-131, would create a new section of the Missouri Constitution to be known as Article IV, section 54. This section would allow citizens over the age of twenty-one to have the right to engage in the production, sale, distribution and consumption of marijuana and the manufacture of goods from hemp, subject to reasonable regulations adopted by the state pursuant to this section.

The average of all marijuana related charge codes from 2011 to 2015 for Circuit case types is 14,122 per year. The average of all marijuana related charge codes from 2011 to 2015 for Associate case types is 10,982. We are unable to determine what number of these charges were for someone over the age of twenty-one.

The following Criminal Court Costs would be affected by this petition:

Criminal Court Costs		
Felony Case Costs	**Amount of Cost**	**Disburse to State/County**
Basic Civil Legal Services Fund surcharge	$10.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$45.00	State of Missouri - General Revenue $36, County $9
County Fee	$75.00	County
Court Automation Fund Fee	$7.00	State of Missouri -Statewide Court Automation Fund
Court Reporter fee (All Circuit Division Cases)	$15.00	State of Missouri - General Revenue
Crime Victims' Compensation Fund	$7.50	State of Missouri - Crime Victims' Compensation Fund

surcharge		
DNA Profiling Analysis Fund surcharge	$30.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Head Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards & Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	State of Missouri - Prosecuting Attorney Training Fund
Sheriffs' Fee	$75.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement Fund
Spinal Cord Injury Fund surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$279.50**	
Misdemeanor Case Costs		
Basic Civil Legal Services Fund surcharge	$8.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$15.00	$12 State of Missouri / $3 County
County Fee	$25.00	County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund

DNA Profiling Analysis Fund surcharge	$15.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Brain Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	$0.50 State of Missouri / $0.50 County
Sheriffs' fee	$10.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement fund
Spinal Cord Injury Fund Surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$102.50**	
Municipal Case (Filed in Associate Division) Costs		
Clerk Fee	$15.00	$12 State of Missouri / $3 County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund

Sheriffs' Retirement Fund surcharge	$3.00	Sheriffs' Retirement Fund
Total	**$33.50**	
Criminal Costs Not Included Above		
Drug Testing by a State Lab	$150.00	State of Missouri
Drug Testing by a Private Lab	Actual Costs	County Reimbursement
Law Enforcement Arrest Costs:		
Highway Patrol		Amt. Approved by the Court
Local (County)		Amt. Approved by the Court
Municipal		Amt. Approved by the Court

The decrease in the court fees, depending on the number of cases, will result in an unknown loss to the courts.

They also assume there will be an unknown decrease in caseload for the courts because the courts will no longer process these cases; however, at this time they are unable to calculate the decrease.

Any significant increase or decrease will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the

full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated if passed, this constitutional amendment would have a positive impact on the workload of the Missouri State Public Defender, since possession, manufacture, distribution, etc. of cannabis would no longer be unlawful, offenses that the Public Defender currently uses resources to defend and no longer would need to.

The exact positive impact is difficult to predict because they track their cases by statutory offense and most drug offenses are not limited to marijuana.

However, their best estimate, using FY2014 MSPD data, is that this would reduce their caseload by 3,523 cases (685 A/B felonies, 1,797 C/D felonies, 1,041 misdemeanors, and 1,140 probation violations).

In *The Missouri Project: A Study of the Missouri Public Defender System and Attorney Workload Standards*, prepared by RubinBrown on behalf of the American Bar Association's Standing Committee on Legal Aid and Indigent Defendants, the relevant workload standards are: A/B felonies, 47.6 hours per case; C/D felonies, 25.0 hours per case; misdemeanors, 11.7 hours per case; and probation violations, 9.8 hours per case). (The workload standards include only case related tasks over which an attorney has some control (they exclude, for example, in court and travel time) and thereby reflect a conservative estimate.)

Applying those workload standards to the 2,858 cases, those cases require 100,882.7 attorney hours. With 2,080 hours per attorney available each year, that represents the work of 48.5 attorneys.

While in theory they might also handle fewer appeals of guilty verdicts after trial, the fact is that only a very small percentage of their cases proceed to trial and it's likely that only a small percentage of those cases are appeals from marijuana convictions. Therefore this minimal positive impact is not being taken into account in this estimate.

However, the Missouri State Public Defender already is significantly understaffed by 333 attorneys under the workload standards developed in *The Missouri Project*. (The 333 attorneys is a conservative estimate of the under-staffing in that it assumes they contract all conflicts to private attorneys, which they are not able to do for budgetary reasons).

Therefore, despite the positive impact on the workload of the Missouri State Public Defender, because they are already understaffed that savings in attorney time would not allow the Public Defender to reduce its workforce and therefore would not translate into an actual cost savings. However it does reduce by the cost of 48.5 attorneys how much

money needs to be added to their budget in order to meet *The Missouri Project*'s workload standards.

Officials from the **State Treasurer's office** indicated this proposal would have no fiscal impact on their office.

Officials from **Greene County** indicated there is anticipated costs for this initiative petition. Unfortunately there is not enough time given in the response to provide an actual estimated costs.

County Prosecutor, Dan Patterson provided the following information:

No on 64 Campaign and SAM Action

California voters are being told that they will see the crime rate go down if they vote to legalize marijuana commercially; this has not been the case in the state of Colorado or the city of Denver. Since the legalization of recreational marijuana in Colorado in 2013 traffic related marijuana deaths have increased 48%, marijuana related emergency room visits have increased 49%, and marijuana related calls to the poison center have increased 100%. According to the Colorado Bureau of Investigations in 2015 statewide homicides in Colorado rose 14.7 % over the previous year. Pueblo, Colorado had the highest homicide rate in the state with 11.1 killings per 100,000 residents. Aurora, Colorado's homicide rate more than doubled from 2014. Additionally more places in Colorado were robbed and more thefts occurred, especially cars, as 193,115 motor vehicles were reported stolen, up 27.7 % in 2015 from the previous year. In 2015, sexual assaults rose 10% in Colorado with Denver, Aurora, Lakewood, Westminster and Pueblo all reporting higher numbers as well.

In the city of Denver since the legalization of recreational marijuana the number of crimes in Denver has grown by about 44 %, according to annual figures the city reported to the National Incident Based Reporting System. In 2015 in Denver alone crime rose in every neighborhood in the city. The murder rate hit a decade high, 1059 more cars were broken into, there were 903 more auto thefts, 321 more aggravated assaults and 231 more homes were broken into compared to 2014.

California voters are also being told that legalizing recreational marijuana will free up law enforcement to work on other criminal activities. Again that has not been the case in Denver. Besides the overall increases in crime we have experience, the Denver police department is dealing with a 900% increase in the unlawful cultivation and manufacture of marihuana concentrate, and a 99% increase in the unlawful distribution of marijuana and marijuana concentrate. The quantity of illegal marijuana seized by the Denver police has increased 3,424% on average per case. The volume of marijuana seized per case has increased from an average of 162 pounds to 5724 pounds. In Denver unlawful public consumption of marijuana citations has increased over 300% per year since the legalization of recreational marijuana. The Denver police department is busier enforcing marijuana laws and investigating crimes directly related to marijuana, including murderers, robberies, and home invasions, than any other time in the history of the city.

Sincerely,

Mitchell R. Morrissey
Denver District Attorney

Officials from the **City of Kansas City** indicated their local government estimates the fiscal impact of the above-referenced constitutional amendment for fiscal years 2018, 2019 and 2020 to be as follows:
(reminder: 2018 will likely be a portion of a fiscal year, depending on effective date of amendment)

Revenues: (explain amount per fiscal year and source or reason for increase)
This constitutional amendment will have no fiscal impact on their city.

Savings: (explain amount per fiscal year, reason for savings and area where savings will occur)
This constitutional amendment will have no fiscal impact on their city.

Costs:(explain what type of costs will be incurred, amount per fiscal year and reason)
This constitutional amendment will have no fiscal impact on their city.

Losses:(explain why revenue losses would be expected and amount per fiscal year)
This constitutional amendment will have no fiscal impact on their city.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from the **City of St. Joseph** indicated this initiative petition should not have a fiscal impact on their local government.

Officials from the **Missouri Veterans Commission** indicated they defer fiscal impact to the Department of Revenue/Tax. They are pleased to receive any funding which appropriately comes to them to support the Veterans Programs currently administered by the Commission.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from the **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this will not have a fiscal impact on their university.

Officials from the **Missouri State University** indicated in response to this initiative petition, no fiscal impact to their university.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,**

the **City of Mexico,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, Harris-Stowe State University, Lincoln University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Fiscal Note Summary

This proposal is estimated to result in annual state savings of $11 million. Additional state operating costs resulting from this proposal are estimated at $700,000 annually. Local law enforcement costs could also increase.

Jefferson City, MO 65101

RE: Petition approval request from Timothy Gilio regarding a proposed constitutional amendment to Article IV, version 3 (2018-130)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Timothy Gilio on January 23, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

This measure amends the Missouri Constitution by adding Section 54 to Article IV. This amendment implicitly repeals in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105.1, 105.1108.1, 105.1112.1, 195.0010.1, 196.0100.1, 263.0250.1,577.0024.1, 579.0015.1, 579.0020.1, 579.0030.1, 579.0055.1, 579.0065.1, 579.0068.1, and 579.0105.1

Be it resolved by the people of the state of Missouri that the Constitution be amended:

One new section is adopted to be known as Article IV, Section 54 and to read as follows:

1.Cannabis aka marijuana and cannabis hemp shall immediately be removed from Missouri's list of controlled substances and shall no longer be listed among Missouri's drugs schedules.

2. Definitions of terms used in this Act: cannabis and cannabis hemp refer to cannabis marijuana, cannabis sativa, cannabis indica, cannabis ruderalis or any variety of cannabis including any derivative, concentrate, extract, flower leaf particle preparation resin root salt seed stalk stem or any product thereof.
a. Medical cannabis refers to Physician or Veterinarian written recommended use of cannabis or any form of cannabis derivative, concentrate, extract, flower, stem, stalk, root, leaf, or any Cannabis product thereof.
b. Personal aka recreational use refers to any cannabis products use not recommended by Physician's or Veterinarian's
c. Cannabis accessories means any equipment, products or materials of any kind that are used or intended for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging or storing of cannabis or hemp or for ingesting, inhaling, vaporizing smoking or otherwise introducing cannabis into or onto the human body with any vehicle or what could be construed as a dangerous device.
d. Establishment refers to cannabis cultivating facility, a cannabis manufacturing facility or retail store or other entity that cultivates, prepares manufactures packages transports or sells cannabis or hemp products or accessories.

3. Minors refers to anyone under the age of 21
a. Cannabis or its products shall not be sold to anyone under the age of 21.
b. Anyone under the age of 21 shall have legal access to cannabis through a physician's written recommendation, or parental supervision or a legal guardian for medical conditions or diseases that cannabis might help with.

4. The following acts are not unlawful and shall not be an offense under these revised Missouri law's
a. Possession or cultivation of cannabis for personal or medical use in an area sufficient to produce the quantity necessary to address one's personal or medical needs
b. Cultivating, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes, provided the person has current applicable licenses to run a business in Missouri. No special licensing will be required beyond that which is applicable for the cultivation, harvest, processing, manufacturing, packaging, distribution, transferal, display, or possessing of any non-toxic food or food product.
c. Providing cannabis, aka marijuana and or any part of the cannabis plant thereof to be sold to the public must be tested by an accredited testing facility and all packaging labeled accordingly to reflect said testing.
d. Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs a through e of this section
e. The use or possession of cannabis is not grounds alone for a "DUI" driving under the influence infraction

5. Patient's rights: cannabis shall be available to all patients regardless of age, race or gender without taxation when recommended by a physician as a medicine.
a. All patients engaged in cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through conventional therapeutic means.

6. All prisoners that have been found guilty in a Missouri Court off a nonviolent cannabis related crime shall immediately be released and all charges for non-violent cannabis crimes shall be expunged from their records.
a. Within 60 days of passage of this act, the attorney general's office shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis related nonviolent civil and criminal records in Missouri, to be distributed to all circuit court judges within the state.

7. No Missouri law enforcement personnel, state, county, city employee, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri constitution.
a. Any person who impedes the lawful exercise of these provisions is guilty of a class A misdemeanor and is subject to all penalties or fines thereof.
b. An additional 5% tax will be added to all personal / recreational sales of Cannabis not to include any Hemp or Hemp by products sold within the boundaries of Missouri in addition to any established state, county or city sales tax already set in place to be collected by the State of Missouri Sales Taxation Division. The 5% additional sales tax monies collected will be collected by the State of Missouri Sales Taxation Division, divided and distributed as directed in this paragraph on a quarterly basis as follows, 2.5% will go to Missouri Public Schools that teach Preschool or K through 12 grade or any combination of aforementioned . The remaining 2.5% will be directed to the Missouri Veterans Commission to help with housing, clothing, food and medical needs for our multitude of Missouri veterans.

8. Cannabis farmers, manufacturer's processors and distributors shall not be subject to any special zoning requirements, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor of agricultural products.

9. Pursuant to the ninth and tenth amendments to the constitution of the United States, the people of Missouri hereby repudiate and challenge federal cannabis prohibitions that conflict with this act.
a. The state of Missouri will honor all legally obtained patients medical cards regardless of the state where issued and Missouri shall become reciprocity with all legal states where Cannabis is considered legalized by law for medical or recreational use.
b. Opinions pertaining to, and willingness to recommend medical cannabis therapy shall not be a criteria for the licensure of physicians or Veterinarian's; No physician or Veterinarian shall be subject to any professional license review or hearing as a result of recommending or approving medical cannabis therapy.
c. Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis, hemp or any derivatives or parts thereof.

10. All provisions of this section are self-executing and serviceable. Except where otherwise indicated in the text of this document this constitutional amendment shall supersede any and all conflicting city, county, state or federal statutory, local charter, ordinance or resolution and shall be implemented no later than January 31st, following the election that placed this initiative before the people of Missouri.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-130)

Subject

Initiative petition from Timothy Gilio regarding a proposed constitutional amendment to Article IV. (Received January 24, 2017)

Date

February 14, 2017

Description

This proposal would amend Article IV of the Constitution of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Missouri Veterans Commission, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Assumptions

Officials from the **Attorney General's office** indicated among other provisions, this proposal could require their office to develop and issue an order providing for the destruction of "all cannabis related nonviolent civil and criminal records in Missouri." Moreover, the proposal purports to supersede federal law.

They expect that the enactment of this proposal would result in increased litigation. They assume they could absorb costs associated with the increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** estimated increased operating costs of $0 in fiscal year 2018, unknown>$99,045 in fiscal year 2019, and unknown>$169,098 in fiscal year 2020.

Section 192.945, RSMo, allows their department to issue a hemp extract registration card for persons suffering from intractable epilepsy. The hemp extract registration card allows for the legal possession and use of cannabidiol (CBD) oil. This proposal allows for the legal use of marijuana for both medical and recreational purposes. Therefore, persons with intractable epilepsy would not need to apply for a hemp extract registration card in order to legally use the CBD oil.

They expect rental space for two staff located in Jefferson City would be required: 2 staff x 230 sq.ft./FTE x $21.00 = $9,660.

They indicated retail marijuana, cultivation facilities, products manufacturer, and testing facilities may be established as small businesses.

A five percent tax will be added to all personal/recreational sales of cannabis. The tax will be collected the State of Missouri Sales Taxation Division. The tax collected is to be directed to Missouri Public Schools and to the Missouri Veterans Commission.

Division of Community and Public Health (DCPH)

This proposal does not require them to issue any licenses or conduct inspections to ensure the safety of marijuana infused food products. However, sections 196.010 through

196.298, RSMo, gives them responsibility for the regulation of food to include such duties as ensuring food safety, sanitation, and proper labeling, etc. Therefore, they would have responsibility to assure that facilities manufacturing foods containing marijuana and marijuana products are regulated the same as other food manufacturers.

Division of Community and Public Health (DCPH)

Due to the broad parameters of this proposal, it is difficult to determine how many food manufacturing facilities would be established. States which have legalized retail marijuana have seen a significant demand for edible marijuana products. For the purposes of this fiscal note, they estimate that at least 300 food manufacturing facilities would be established as a result of this proposal. In order to properly inspect these manufacturing facilities, DCPH would require a minimum of two Environmental Public Health Specialist IV staff (A27, $44,352, Step G). This law shall be implemented no later than January 31 following the November 2018 election. Therefore, DCPH assumes that the two Environmental Public Health Specialist IV positions would begin January 1, 2019.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated a fiscal impact of $7,178,073 in fiscal year 2019 (7 months), $7,511,746 in fiscal year 2020, $10,011,383 in fiscal year 2021, $10,741,186 in fiscal year 2022 and thereafter.

Legalizing the possession and use of marijuana would remove from the criminal statutes all controlled substance offenses for marijuana, including possession, distribution and trafficking. If the legislation that removed marijuana from the list of controlled substances was retrospective then there would be two reductions in the cost of incarceration: the release of offenders serving a marijuana offense and fewer admissions to prison. The legalization of marijuana will largely impact offenders who are only serving a marijuana offense. Offenders serving multiple concurrent sentences will continue to be required to serve the other sentences after legalization and no estimate is made for offenders serving multiple sentences.

The reduction in the offender population is the total of reductions from the expungement of sentences and fewer admissions and probations. The cost avoidance is based upon a direct prison cost per year in FY17 of $6,085 and an average cost of $2,234 per year for offenders on field supervision. In the first year after the enactment of the legislation that

legalizes marijuana there is an estimated reduction of 633 offenders in prison and 3,676 offenders on field supervision. In the next year (FY20) there will no discharges from expungement but the reduction in the prison population will increase to 214. The field reduction will continue into FY21 because the marijuana offenders are estimated to serve 2.5 years on supervision.

The estimate is qualified by the use of an expansion factor that assumes that the drug distribution in the sentences where the drug is not known will be similar to that where the drug is known.

The estimated cost avoidance in the first year is $7,178,073 and will be $10,741,186 after the 4th year.

If marijuana usage becomes legal it could impact the safety and security of our prisons as it is not believed that there is a means for testing whether an employee is under the influence of marijuana. Impaired prison employees or visitors can impact the safe and secure operation of our prisons.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated total fund costs for General Revenue will be $150,012 for fiscal year 2018, $30,752 for fiscal year 2019, and $31,521 for fiscal year 2020.

This petition opens up the possibility of additional business opportunities in cannabis farming, manufacturing, and distribution of products.

Fiscal Note	IP 18-130			ITSD - DOR	
Bill Number	IP 18-130				
Will a new system be required?			X Yes		No
Indicate fiscal year when fully implemented				FY 2018

			Federal	-	-	-
			Other	-	-	-
			Total	150,012	30,752	31,521

This would create an unknown positive impact on Total State Revenue.

This petition increases state revenues by an unknown amount.

The provisions of section 7b add an additional five percent tax to all personal/recreational sales of cannabis not including hemp or hemp by-products sold in Missouri. This tax is in addition to any state, county, or city sales taxes already in place. This section also requires the division and distribution of these collections on a quarterly basis to Missouri public schools and the Missouri Veterans' Administration.

This Article states that the tax is to be collected by the State of Missouri Sales Tax Division. There is no State of Missouri Sales Tax Division and their department assumes that the taxpayer will remit the tax to their department. Because there are no enforcement provisions, it may be difficult for their department to enforce the collection of the

additional tax under current sales tax statutes. Their department will not be able to make refunds to taxpayers as the article is currently drafted.

Administrative Impact:

Business Tax Processing:
Although the legislation bases the additional five percent tax on retail sales, it is in addition to and separate from state, county, or city sales tax, and must therefore be reported and deposited separately.

If this money needs to remain in a non-state account, either it would need to stay in the sales suspense holding account until distribution, or new bank accounts would need to be established for each.

Officials from the **Department of Public Safety, Office of the Director** indicated they see no fiscal impact due to this petition.

Officials from the **Department of Public Safety, Division of Missouri State Highway Patrol** indicated they expect increased operating costs of $426,236 for the first year implemented, $487,384 for the second year implemented, and $492,597 for the third year implemented.

The provisions of this petition would require their agency to rent office space for 4 FTE's to process the expungement requests.

The proposed legislation would order the immediate destruction of all cannabis-related non-violent civil and criminal records in Missouri.

Two different divisions within their agency will be impacted by this legislation. Here is a breakdown for each division:

Criminal Justice Information Services Division
The Criminal Justice Information Services Division (CJIS) states that there are currently 95,550 arrest charges in the Central Repository. The current expungement process, pursuant to Chapter 610, takes approximately 90 minutes to process. One FTE can handle 1,243 expungements per year. Conservatively, at least five FTE's would be required to initially handle the expungments created by this legislation. A significant processing backlog would occur if sufficient FTE's are not assigned to accommodate the number of expungements ordered.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 90 minutes. Therefore, one FTE can handle 1,243 expungements per year = 111,840 / 90.

These FTE's (CJIS Technicians, Range 16) would be necessary to process all expungement requests, review criminal history records, contact any agency associated with the arrests or convictions, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE at $55,495 and the ability of that employee to process 1,243 expungements per year, the cost alone per expungement is $55,495 \ 1,243 = $44.64. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories, as well as contacting of the various agencies associated with the arrests. In researching other states with similar expungement requirements, they all charge a fee to offset the cost of the time required to process the expungements. Their fees ranged from $50 to $450 per petition per arrest date.

These FTE will most likely be 2nd and 3rd shift employees so they would not require any equipment. However, there would be recurring costs of $650 per year per FTE for office supplies and phone charges. If any FTE were placed on the 1st shift, standard equipment would be required at a one-time cost of $6,094 per FTE.

5 CJIS Technicians ($1,232.50 x 24)	$147,900
Office Equipment/HW/SW	$6,094

RECURRING COSTS

Phone Charges per FTE	$350
Office Supplies per FTE	$300

Patrol Records Divison

Currently, there are 86,600 records in the Patrol's Traffic Arrest System (TAS) pertaining to arrests completed by the Missouri Highway Patrol that could possibly meet the requirements of this proposed constitutional amendment. These are arrest and arrest/disposition records pertaining to individuals the age of 21 years and older with an NCIC modifier of 60-64 that relate to marijuana offenses. Given this, if only ten percent of the individuals who qualify to have his or her record expunged sought to do so, the Patrol Records Division (PRD) would require 4 FTE's. However, if a large number of these expungements were to be granted with even four FTE's, the backlog would compound greatly to the point it may take several years to catch up. If 100 percent of the individuals who qualify to have their record expunged sought to do so, the Patrol Records Division would require 35 FTE's to complete this task in approximately one year.

The addition of 35 FTE's would require additional supervisory personnel. However, due to the vague and uncertain nature of this proposed amendment, the Patrol Records Division has no true way to determine the actual effect or costs.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 45 minutes. Therefore, one FTE can handle 2,485 expungements per year = 111,840 / 45.

With the current estimate of 86,600 records that potentially meet the requirements of this proposed amendment and would potentially be eligible for expungement, the following percentages of persons actually requesting an expungement will directly relate to the number of PRD FTE's required:

10% = 86,600 x .10 = 8,660 / 2,485 = 4 FTE's
50% = 86,600 x .50 = 43,300 / 2,485 = 17 FTE's
100% = 86,600 / 2,485 = 35 FTE's

These FTE's (Quality Control Clerks, Range 10) would be necessary to process all expungement requests, review records, contact agencies, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE of $45,702 and the ability of that employee to process 2,485 expungements per year, the cost per expungement is $45,702 \ 2,485 = $18.39. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories.

Processing ten percent of the possible expungements would require additional workspace. The physical requirements would increase with the number of FTE's required to meet the demand for expungements. There will be recurring costs of $650 per year per FTE for office supplies and phone charges. Standard equipment and office furniture would be required at a one-time cost of $6,094 per FTE.

4 Quality Control Clerks ($1,015 x 24)	$97,440
Equipment/Office Furniture	$6,094
RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

The provisions of this petition would require the Highway Patrol to rent office space for 4 FTE's to process the expungement requests. The Office of Administration states that 920 square feet of office space would be required. The following costs apply per square foot:

Office Space	$14/Sq Ft
Janitorial/Trash Costs	$1.50/Sq Ft
Utility Costs	$2/Sq Ft

The agency provided the following additional comments:

It is suggested to add this additional language to provide for the collection of a fee to offset the costs of the expungements:

43.530. 1. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than nine dollars per request for criminal history record information not based on a fingerprint search. In each year beginning on or after January 1, 2010, the superintendent may increase the fee paid by requesting entities by an amount not to exceed one dollar per year, however, under no circumstance shall the fee paid by requesting entities exceed fifteen dollars per request.

2. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than twenty dollars per request for criminal history record information based on a fingerprint search, unless the request is required under the provisions of subdivision (6) of section 210.481, section 210.487, or section 571.101, in which case the fee shall be fourteen dollars.

3. A request made under subsections 1 and 2 of this section shall be limited to check and search on one individual. Each request shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. The highway patrol may establish procedures for receiving requests for criminal history record information for classification and search for fingerprints, from courts and other entities, and for the payment of such requests. There is hereby established by the treasurer of the state of Missouri a fund to be entitled as the "Criminal Record System Fund".

Notwithstanding the provisions of section 33.080 to the contrary, if the moneys collected and deposited into this fund are not totally expended annually for the purposes set forth in sections 43.500 to 43.543, the unexpended moneys in such fund shall remain in the fund and the balance shall be kept in the fund to accumulate from year to year.

4. For all petitions for expungement under the provisions of Chapter 610, Section 577.054, or any other created expungement requirement under statute, excluding Section 610.122, the applicant shall pay a fee of seventy-five dollars per arrest date listed on the petition. Each petition shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. For expungements that require removal from the Traffic Arrest System twenty dollars of the seventy-five dollar fee will be deposited in the Highway Patrol Traffic Records Fund.

There are numerous uncertainties associated with this proposed constitutional amendment. The definition of a "non-violent cannabis-only offense" needs to be added. It is unclear if individuals with the aforementioned conviction records are required to abide by the expungement process mandated by various other state statutes. Does the individual just complete and file a document with a circuit clerk and the record is expunged or does the "court," whomever that is, order the immediate expungement of all civil and criminal records pertaining to non-violent cannabis only offenses?

The Highway Patrol has concerns with number 7 which states, "No Missouri law enforcement personnel, state, county, city employee, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri constitution."

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's Office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated unknown fiscal impact.

Changes to Missouri's state driving laws could impact some federal commercial drivers' license laws.

Failure to comply with 49 C.F.R. 384.225 & 384.226 could result in a withholding of Missouri's federal-aid highway funds apportioned to it under each of Title 23, United States Code (U.S.C.), sections 104(b)(1), (b)(3), and (b)(4). The federal funds impacted consist of national highway performance program funds, highway safety improvement program funds and congestion mitigation and air quality improvement funds. The withholding amount would be 4 percent for the first year of non-compliance and 8 percent for the second and subsequent years.

Officials from the **Office of Administration** (OA) indicated:

Section 54 of Article IV would allow the medical and recreational use of marijuana and hemp, as well as the cultivation, production, transportation and retail sale of marijuana and hemp and their related products. Subsection 3 allows the sale of marijuana to individuals under the age of 21 only with physician or parental permission. Subsection 6 requires that all prisoners that have been convicted in Missouri of a nonviolent cannabis related crime shall be immediately released and all related charges shall be expunged from their records. Subsection 7 creates an excise tax of five percent on all retail sales of marijuana, in addition to any established state or local sales taxes. The revenue shall be deposited to the credit of general revenue with the provision that 2.5 percent be distributed to elementary and secondary public education schools and 2.5 percent be distributed to the Missouri Commission. Subsection 5, however, allows all medical marijuana users, with recommendation by a physician, to purchase cannabis without taxation. Subsection 10 provides that the provisions in the amendment take effect no later than January 31st, following the election that placed the initiative before the people of Missouri.

B&P estimates that subsection 7 of this initiative petition could increase TSR by as much as $17.2M and GR by as much as $16.5M once fully implemented in FY 2021. The Substance Abuse and Mental Health Services Administration (SAMHSA) reports that 9.95% of Missouri population age 18 and older use marijuana. For the purposes of this analysis, B&P assumes the same percentage for marijuana users over the age of 21. The U.S. Census (2010) reports the population of Missouri residents over the age of 21 as 4,300,988 people. Multiplying the percentage of Missouri residents who use marijuana by the population of Missouri residents over the age of 21 gives an estimate of the number of Missouri residents who use marijuana:

	4,300,988	(MO residents over the age of 21)
X	9.95%	(% of MO residents who use marijuana)
	427,948	(MO residents who use marijuana)

However, B&P estimates that of those who use marijuana, roughly 65,000 would be medical users. SAMHSA reports that the total number of U.S. population age 18 and older use marijuana is 27,169,000 people. B&P assumes dividing the number of MO residents who use marijuana by the U.S. population that uses marijuana will provide an estimate of the percentage of the U.S. market that is attributable to Missouri.

	427,948	(MO residents who use marijuana)
÷	27,169,000	(Number of U.S. marijuana users)
	1.58%	(% U.S. market that is attributable to MO)

Using the estimate above for medical users, of that 1.58 percent approximately 0.24% could be considered medical. Therefore, B&P estimates that the size of the U.S. market that is attributable to Missouri, less medical marijuana users, is 1.33 percent. Using an established estimate[1] for the U.S. market of $14.0B and multiplying by the percentage of the U.S. market that is attributable to Missouri, B&P estimates that Missouri's marijuana market, less medical marijuana use, could be worth $186.7M. Assuming Missouri's marijuana market is worth $186.7M, an excise tax of five percent could increase TSR and GR by as much as $9.3M once fully implemented. Table 1 shows a breakdown of revenue increases by tax type.

Table 1: Revenue Generated by Marijuana Taxes

Tax	FY 2020 (5 months)	Fully Implemented (FY 2021)
Sales Tax		
General Revenue	3,002,000	7,206,000
Education	233,000	559,000
Conservation	29,000	70,000
Parks, Soil, Water	23,000	56,000
Local	120,000	287,000
Marijuana Excise Tax		
General Revenue	3,890,000	9,337,000

[1] http://scholar.harvard.edu/files/miron/files/budget_2010_final_0.pdf

Total		
General Revenue	6,893,000	16,543,000
Education	233,000	559,000
Conservation	29,000	70,000
Parks, Soil, Water	23,000	56,000
Local	120,000	287,000
TSR	7,178,000	17,228,000

Officials from the **Office of State Courts Administrator** indicated:

The proposed Initiative Petition, 18-130, would create a new section of the Missouri Constitution to be known as Article IV, section 54. This section would allow citizens over the age of twenty-one to have the right to engage in the production, sale, distribution and consumption of marijuana and the manufacture of goods from hemp, subject to reasonable regulations adopted by the state pursuant to this section.

The average of all marijuana related charge codes from 2011 to 2015 for Circuit case types is 14,122 per year. The average of all marijuana related charge codes from 2011 to 2015 for Associate case types is 10,982. We are unable to determine what number of these charges were for someone over the age of twenty-one.

The following Criminal Court Costs would be affected by this petition:

Criminal Court Costs		
Felony Case Costs	**Amount of Cost**	**Disburse to State/County**
Basic Civil Legal Services Fund surcharge	$10.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$45.00	State of Missouri - General Revenue $36, County $9
County Fee	$75.00	County
Court Automation Fund Fee	$7.00	State of Missouri -Statewide Court Automation Fund
Court Reporter fee (All Circuit Division Cases)	$15.00	State of Missouri - General Revenue

Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$30.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Head Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards & Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	State of Missouri - Prosecuting Attorney Training Fund
Sheriffs' Fee	$75.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement Fund
Spinal Cord Injury Fund surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$279.50**	
Misdemeanor Case Costs		
Basic Civil Legal Services Fund surcharge	$8.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$15.00	$12 State of Missouri / $3 County
County Fee	$25.00	County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund	$7.50	State of Missouri - Crime Victims' Compensation Fund

surcharge		
DNA Profiling Analysis Fund surcharge	$15.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Brain Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	$0.50 State of Missouri / $0.50 County
Sheriffs' fee	$10.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement fund
Spinal Cord Injury Fund Surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$102.50**	
Municipal Case (Filed in Associate Division) Costs		
Clerk Fee	$15.00	$12 State of Missouri / $3 County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
Peace Officer Standards and Training (POST) Commission	$1.00	State of Missouri - Peace Officer Standards & Training Fund

surcharge		
Sheriffs' Retirement Fund surcharge	$3.00	Sheriffs' Retirement Fund
Total	**$33.50**	
Criminal Costs Not Included Above		
Drug Testing by a State Lab	$150.00	State of Missouri
Drug Testing by a Private Lab	Actual Costs	County Reimbursement
Law Enforcement Arrest Costs:		
Highway Patrol		Amt. Approved by the Court
Local (County)		Amt. Approved by the Court
Municipal		Amt. Approved by the Court

The decrease in the court fees, depending on the number of cases, will result in an unknown loss to the courts.

They also assume there will be an unknown decrease in caseload for the courts because the courts will no longer process these cases; however, at this time they are unable to calculate the decrease.

Any significant increase or decrease will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated

$2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated if passed, this constitutional amendment would have a positive impact on the workload of the Missouri State Public Defender, since possession, manufacture, distribution, etc. of cannabis would no longer be unlawful, offenses that the Public Defender currently uses resources to defend and no longer would need to.

The exact positive impact is difficult to predict because they track their cases by statutory offense and most drug offenses are not limited to marijuana.

However, their best estimate, using FY2014 MSPD data, is that this would reduce their caseload by 3,523 cases (685 A/B felonies, 1,797 C/D felonies, 1,041 misdemeanors, and 1,140 probation violations).

In *The Missouri Project: A Study of the Missouri Public Defender System and Attorney Workload Standards,* prepared by RubinBrown on behalf of the American Bar Association's Standing Committee on Legal Aid and Indigent Defendants, the relevant workload standards are: A/B felonies, 47.6 hours per case; C/D felonies, 25.0 hours per case; misdemeanors, 11.7 hours per case; and probation violations, 9.8 hours per case). (The workload standards include only case related tasks over which an attorney has some control (they exclude, for example, in court and travel time) and thereby reflect a conservative estimate.)

Applying those workload standards to the 2,858 cases, those cases require 100,882.7 attorney hours. With 2,080 hours per attorney available each year, that represents the work of 48.5 attorneys.

While in theory they might also handle fewer appeals of guilty verdicts after trial, the fact is that only a very small percentage of their cases proceed to trial and it's likely that only a small percentage of those cases are appeals from marijuana convictions. Therefore this minimal positive impact is not being taken into account in this estimate.

However, the Missouri State Public Defender already is significantly understaffed by 333 attorneys under the workload standards developed in *The Missouri Project*. (The 333 attorneys is a conservative estimate of the under-staffing in that it assumes they contract all conflicts to private attorneys, which they are not able to do for budgetary reasons).

Therefore, despite the positive impact on the workload of the Missouri State Public Defender, because they are already understaffed that savings in attorney time would not allow the Public Defender to reduce its workforce and therefore would not translate into an actual cost savings. However it does reduce by the cost of 48.5 attorneys how much money needs to be added to their budget in order to meet *The Missouri Project*'s workload standards.

Officials from the **State Treasurer's office** indicated this proposal would have no fiscal impact on their office.

Officials from **Greene County** indicated there is anticipated costs for this initiative petition. Unfortunately there is not enough time given in the response to provide an actual estimated costs.

County Prosecutor, Dan Patterson provided the following information:

DenverDA
Mitchell R. Morrissey, District Attorney - Second Judicial District
201 W. Colfax Avenue, Dept. 801, Denver, CO 80202

Fax: 720-913-903

October 12, 2016

No on 64 Campaign and SAM Action

California voters are being told that they will see the crime rate go down if they vote to legalize marijuana commercially; this has not been the case in the state of Colorado or the city of Denver. Since the legalization of recreational marijuana in Colorado in 2013 traffic related marijuana deaths have increased 48%, marijuana related emergency room visits have increased 49%, and marijuana related calls to the poison center have increased 100%. According to the Colorado Bureau of Investigations in 2015 statewide homicides in Colorado rose 14.7 % over the previous year. Pueblo, Colorado had the highest homicide rate in the state with 11.1 killings per 100,000 residents. Aurora, Colorado's homicide rate more than doubled from 2014. Additionally more places in Colorado were robbed and more thefts occurred, especially cars, as 193,115 motor vehicles were reported stolen, up 27.7 % in 2015 from the previous year. In 2015, sexual assaults rose 10% in Colorado with Denver, Aurora, Lakewood, Westminster and Pueblo all reporting higher numbers as well.

In the city of Denver since the legalization of recreational marijuana the number of crimes in Denver has grown by about 44 %, according to annual figures the city reported to the National Incident Based Reporting System. In 2015 in Denver alone crime rose in every neighborhood in the city. The murder rate hit a decade high, 1059 more cars were broken into, there were 903 more auto thefts, 321 more aggravated assaults and 231 more homes were broken into compared to 2014.

California voters are also being told that legalizing recreational marijuana will free up law enforcement to work on other criminal activities. Again that has not been the case in Denver. Besides the overall increases in crime we have experience, the Denver police department is dealing with a 900% increase in the unlawful cultivation and manufacture of marihuana concentrate, and a 99% increase in the unlawful distribution of marijuana and marijuana concentrate. The quantity of illegal marijuana seized by the Denver police has increased 3,424% on average per case. The volume of marijuana seized per case has increased from an average of 162 pounds to 5724 pounds. In Denver unlawful public consumption of marijuana citations has increased over 300% per year since the legalization of recreational marijuana. The Denver police department is busier enforcing marijuana laws and investigating crimes directly related to marijuana, including murderers, robberies, and home invasions, than any other time in the history of the city.

Sincerely,

Mitchell R. Morrissey
Denver District Attorney

Officials from the **City of Kansas City** indicated their local government estimates the fiscal impact of the above-referenced constitutional amendment for fiscal years 2018, 2019 and 2020 to be as follows:
(reminder: 2018 will likely be a portion of a fiscal year, depending on effective date of amendment)

Revenues: (explain amount per fiscal year and source or reason for increase)
This constitutional amendment will have no fiscal impact on their city.

Savings: (explain amount per fiscal year, reason for savings and area where savings will occur)
This constitutional amendment will have no fiscal impact on their city.

Costs:(explain what type of costs will be incurred, amount per fiscal year and reason)
This constitutional amendment will have no fiscal impact on their city.

Losses:(explain why revenue losses would be expected and amount per fiscal year)
This constitutional amendment will have no fiscal impact on their city.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from the **City of St. Joseph** indicated this initiative petition should not have a fiscal impact on their local government.

Officials from the **Missouri Veterans Commission** indicated they defer fiscal impact to the Department of Revenue/Tax. They are pleased to receive any funding which appropriately comes to them to support the Veterans Programs currently administered by the Commission.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from the **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this will not have a fiscal impact on their university.

Officials from the **Missouri State University** indicated in response to this initiative petition, no fiscal impact to their university.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,**

the **City of Mexico,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, Harris-Stowe State University, Lincoln University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Fiscal Note Summary

This proposal is estimated to increase annual state tax revenues by $17 million when fully implemented with additional estimated annual state savings of $11 million. State implementation costs are estimated at $150,000 with annual operating costs estimated at $700,000. Local law enforcement costs could increase.

JOHN R. ASHCROFT

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Timothy Gilio regarding a proposed constitutional amendment to Article IV, version 2 (2018-129)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Timothy Gilio on January 23, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

This measure amends the Missouri Constitution by adding Section 54 to Article IV. This amendment implicitly repeals in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105.1, 105.1108.1, 105.1112.1, 195.0010.1, 196.0100.1, 263.0250.1,577.0024.1, 579.0015.1, 579.0020.1, 579.0030.1, 579.0055.1, 579.0065.1, 579.0068.1, and 579.0105.1

Be it resolved by the people of the state of Missouri that the Constitution be amended:

One new section is adopted to be known as Article IV, Section 54 and to read as follows:

1.Cannabis aka marijuana and cannabis hemp shall immediately be removed from Missouri's list of controlled substances and shall no longer be listed among Missouri's drugs schedules.

2. Definitions of terms used in this Act: cannabis and cannabis hemp refer to cannabis marijuana, cannabis sativa, cannabis indica, cannabis ruderalis or any variety of cannabis including any derivative, concentrate, extract, flower leaf particle preparation resin root salt seed stalk stem or any product thereof.
a. Medical cannabis refers to Physician or Veterinarian written recommended use of cannabis or any form of cannabis derivative, concentrate, extract, flower, stem, stalk, root, leaf, or any Cannabis product thereof.
b. Personal aka recreational use refers to any cannabis products use not recommended by Physician's or Veterinarian's
c. Cannabis accessories means any equipment, products or materials of any kind that are used or intended for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging or storing of cannabis or hemp or for ingesting, inhaling, vaporizing smoking or otherwise introducing cannabis into or onto the human body with any vehicle or what could be construed as a dangerous device.
d. Establishment refers to cannabis cultivating facility, a cannabis manufacturing facility or retail store or other entity that cultivates, prepares manufactures packages transports or sells cannabis or hemp products or accessories.

3. Minors refers to anyone under the age of 21
a. Cannabis or its products shall not be sold to anyone under the age of 21.
b. Anyone under the age of 21 shall have legal access to cannabis through a physician's written recommendation, and parental supervision or a legal guardian for medical conditions or diseases that cannabis might help with.

4. The following acts are not unlawful and shall not be an offense under these revised Missouri law's
a. Possession or cultivation of cannabis for personal or medical use in an area sufficient to produce the quantity necessary to address one's personal or medical needs
b. Cultivating, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes, provided the person has current applicable licenses to run a business in Missouri. No special licensing will be required beyond that which is applicable for the cultivation, harvest, processing, manufacturing, packaging, distribution, transferal, display, or possessing of any non-toxic food or food product.
c. Providing cannabis, aka marijuana and or any part of the cannabis plant thereof to be sold to the public must be tested by an accredited testing facility and all packaging labeled accordingly to reflect said testing.
d. Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs a through e of this section
e. The use or possession of cannabis is not grounds alone for a "DUI" driving under the influence infraction

5. Patient's rights: cannabis shall be available to all patients regardless of age, race or gender without taxation when recommended by a physician as a medicine.
a. All patients engaged in cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through conventional therapeutic means.

6. All prisoners that have been found guilty in a Missouri Court off a nonviolent cannabis related crime shall immediately be released and all charges for non-violent cannabis crimes shall be expunged from their records.
a. Within 60 days of passage of this act, the attorney general's office shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis related nonviolent civil and criminal records in Missouri, to be distributed to all circuit court judges within the state.

7. No Missouri law enforcement personnel, state, county, city employee, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri constitution.
a. Any person who impedes the lawful exercise of these provisions is guilty of a class A misdemeanor and is subject to all penalties or fines thereof.
b. An additional 5% tax will be added to all personal / recreational sales of Cannabis not to include any Hemp or Hemp by products sold within the boundaries of Missouri in addition to any established state, county or city sales tax already set in place to be collected by the State of Missouri Sales Taxation Division. The 5% additional sales tax monies collected will be collected by the State of Missouri Sales Taxation Division, divided and distributed as directed in this paragraph on a quarterly basis as follows, 2.5% will go to Missouri Public Schools that teach Preschool or K through 12th grade or any combination of aforementioned . The remaining 2.5% will be directed to the Missouri Veterans Commission to help with housing, clothing, food and medical needs for our multitude of Missouri veterans.

8. Cannabis farmers, manufacturer's processors and distributors shall not be subject to any special zoning requirements, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor of agricultural products.

9. Pursuant to the ninth and tenth amendments to the constitution of the United States, the people of Missouri hereby repudiate and challenge federal cannabis prohibitions that conflict with this act.
a. The state of Missouri will honor all legally obtained patients medical cards regardless of the state where issued and Missouri shall become reciprocity with all legal states where Cannabis is considered legalized by law for medical or recreational use.
b. Opinions pertaining to, and willingness to recommend medical cannabis therapy shall not be a criteria for the licensure of physicians or Veterinarian's; No physician or Veterinarian shall be subject to any professional license review or hearing as a result of recommending or approving medical cannabis therapy.
c. Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis, hemp or any derivatives or parts thereof.

10. All provisions of this section are self-executing and serviceable. Except where otherwise indicated in the text of this document this constitutional amendment shall supersede any and all conflicting city, county, state or federal statutory, local charter, ordinance or resolution and shall be implemented no later than January 31st, following the election that placed this initiative before the people of Missouri.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-129)

Subject

Initiative petition from Timothy Gilio regarding a proposed constitutional amendment to Article IV. (Received January 24, 2017)

Date

February 14, 2017

Description

This proposal would amend Article IV of the Constitution of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Missouri Veterans Commission, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Assumptions

Officials from the **Attorney General's office** indicated among other provisions, this proposal could require their office to develop and issue an order providing for the destruction of "all cannabis related nonviolent civil and criminal records in Missouri." Moreover, the proposal purports to supersede federal law.

They expect that the enactment of this proposal would result in increased litigation. They assume they could absorb costs associated with the increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** estimated increased operating costs of $0 in fiscal year 2018, unknown>$99,045 in fiscal year 2019, and unknown>$169,098 in fiscal year 2020.

Section 192.945, RSMo, allows their department to issue a hemp extract registration card for persons suffering from intractable epilepsy. The hemp extract registration card allows for the legal possession and use of cannabidiol (CBD) oil. This proposal allows for the legal use of marijuana for both medical and recreational purposes. Therefore, persons with intractable epilepsy would not need to apply for a hemp extract registration card in order to legally use the CBD oil.

They expect rental space for two staff located in Jefferson City would be required: 2 staff x 230 sq.ft./FTE x $21.00 = $9,660.

They indicated retail marijuana, cultivation facilities, products manufacturer, and testing facilities may be established as small businesses.

A five percent tax will be added to all personal/recreational sales of cannabis. The tax will be collected the State of Missouri Sales Taxation Division. The tax collected is to be directed to Missouri Public Schools and to the Missouri Veterans Commission.

Division of Community and Public Health (DCPH)

This proposal does not require them to issue any licenses or conduct inspections to ensure the safety of marijuana infused food products. However, sections 196.010 through

196.298, RSMo, gives them responsibility for the regulation of food to include such duties as ensuring food safety, sanitation, and proper labeling, etc. Therefore, they would have responsibility to assure that facilities manufacturing foods containing marijuana and marijuana products are regulated the same as other food manufacturers.

Division of Community and Public Health (DCPH)

Due to the broad parameters of this proposal, it is difficult to determine how many food manufacturing facilities would be established. States which have legalized retail marijuana have seen a significant demand for edible marijuana products. For the purposes of this fiscal note, they estimate that at least 300 food manufacturing facilities would be established as a result of this proposal. In order to properly inspect these manufacturing facilities, DCPH would require a minimum of two Environmental Public Health Specialist IV staff (A27, $44,352, Step G). This law shall be implemented no later than January 31 following the November 2018 election. Therefore, DCPH assumes that the two Environmental Public Health Specialist IV positions would begin January 1, 2019.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated a fiscal impact of $7,178,073 in fiscal year 2019 (7 months), $7,511,746 in fiscal year 2020, $10,011,383 in fiscal year 2021, $10,741,186 in fiscal year 2022 and thereafter.

Legalizing the possession and use of marijuana would remove from the criminal statutes all controlled substance offenses for marijuana, including possession, distribution and trafficking. If the legislation that removed marijuana from the list of controlled substances was retrospective then there would be two reductions in the cost of incarceration: the release of offenders serving a marijuana offense and fewer admissions to prison. The legalization of marijuana will largely impact offenders who are only serving a marijuana offense. Offenders serving multiple concurrent sentences will continue to be required to serve the other sentences after legalization and no estimate is made for offenders serving multiple sentences.

The reduction in the offender population is the total of reductions from the expungement of sentences and fewer admissions and probations. The cost avoidance is based upon a direct prison cost per year in FY17 of $6,085 and an average cost of $2,234 per year for offenders on field supervision. In the first year after the enactment of the legislation that

legalizes marijuana there is an estimated reduction of 633 offenders in prison and 3,676 offenders on field supervision. In the next year (FY20) there will no discharges from expungement but the reduction in the prison population will increase to 214. The field reduction will continue into FY21 because the marijuana offenders are estimated to serve 2.5 years on supervision.

The estimate is qualified by the use of an expansion factor that assumes that the drug distribution in the sentences where the drug is not known will be similar to that where the drug is known.

The estimated cost avoidance in the first year is $7,178,073 and will be $10,741,186 after the 4th year.

If marijuana usage becomes legal it could impact the safety and security of our prisons as it is not believed that there is a means for testing whether an employee is under the influence of marijuana. Impaired prison employees or visitors can impact the safe and secure operation of our prisons.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated total fund costs for General Revenue will be $150,012 for fiscal year 2018, $30,752 for fiscal year 2019, and $31,521 for fiscal year 2020.

This petition opens up the possibility of additional business opportunities in cannabis farming, manufacturing, and distribution of products.

Fiscal Note	IP 18-129			ITSD - DOR

	Federal		-	-	-
	Other		-	-	-
	Total		150,012	30,752	31,521

This would create an unknown positive impact on Total State Revenue.

This petition increases state revenues by an unknown amount.

The provisions of section 7b add an additional five percent tax to all personal/recreational sales of cannabis not including hemp or hemp by-products sold in Missouri. This tax is in addition to any state, county, or city sales taxes already in place. This section also requires the division and distribution of these collections on a quarterly basis to Missouri public schools and the Missouri Veterans' Administration.

This Article states that the tax is to be collected by the State of Missouri Sales Tax Division. There is no State of Missouri Sales Tax Division and their department assumes that the taxpayer will remit the tax to their department. Because there are no enforcement provisions, it may be difficult for their department to enforce the collection of the

additional tax under current sales tax statutes. Their department will not be able to make refunds to taxpayers as the article is currently drafted.

Administrative Impact:

Business Tax Processing:
Although the legislation bases the additional five percent tax on retail sales, it is in addition to and separate from state, county, or city sales tax, and must therefore be reported and deposited separately.

If this money needs to remain in a non-state account, either it would need to stay in the sales suspense holding account until distribution, or new bank accounts would need to be established for each.

Officials from the **Department of Public Safety, Office of the Director** indicated they see no fiscal impact due to this petition.

Officials from the **Department of Public Safety, Division of Missouri State Highway Patrol** indicated they expect increased operating costs of $426,236 for the first year implemented, $487,384 for the second year implemented, and $492,597 for the third year implemented.

The provisions of this petition would require their agency to rent office space for 4 FTE's to process the expungement requests.

The proposed legislation would order the immediate destruction of all cannabis-related non-violent civil and criminal records in Missouri.

Two different divisions within their agency will be impacted by this legislation. Here is a breakdown for each division:

Criminal Justice Information Services Division
The Criminal Justice Information Services Division (CJIS) states that there are currently 95,550 arrest charges in the Central Repository. The current expungement process, pursuant to Chapter 610, takes approximately 90 minutes to process. One FTE can handle 1,243 expungements per year. Conservatively, at least five FTE's would be required to initially handle the expungments created by this legislation. A significant processing backlog would occur if sufficient FTE's are not assigned to accommodate the number of expungements ordered.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 90 minutes. Therefore, one FTE can handle 1,243 expungements per year = 111,840 / 90.

These FTE's (CJIS Technicians, Range 16) would be necessary to process all expungement requests, review criminal history records, contact any agency associated with the arrests or convictions, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE at $55,495 and the ability of that employee to process 1,243 expungements per year, the cost alone per expungement is $55,495 \ 1,243 = $44.64. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories, as well as contacting of the various agencies associated with the arrests. In researching other states with similar expungement requirements, they all charge a fee to offset the cost of the time required to process the expungements. Their fees ranged from $50 to $450 per petition per arrest date.

These FTE will most likely be 2nd and 3rd shift employees so they would not require any equipment. However, there would be recurring costs of $650 per year per FTE for office supplies and phone charges. If any FTE were placed on the 1st shift, standard equipment would be required at a one-time cost of $6,094 per FTE.

5 CJIS Technicians ($1,232.50 x 24)	$147,900
Office Equipment/HW/SW	$6,094

RECURRING COSTS

Phone Charges per FTE	$350
Office Supplies per FTE	$300

Patrol Records Divison

Currently, there are 86,600 records in the Patrol's Traffic Arrest System (TAS) pertaining to arrests completed by the Missouri Highway Patrol that could possibly meet the requirements of this proposed constitutional amendment. These are arrest and arrest/disposition records pertaining to individuals the age of 21 years and older with an NCIC modifier of 60-64 that relate to marijuana offenses. Given this, if only ten percent of the individuals who qualify to have his or her record expunged sought to do so, the Patrol Records Division (PRD) would require 4 FTE's. However, if a large number of these expungements were to be granted with even four FTE's, the backlog would compound greatly to the point it may take several years to catch up. If 100 percent of the individuals who qualify to have their record expunged sought to do so, the Patrol Records Division would require 35 FTE's to complete this task in approximately one year.

The addition of 35 FTE's would require additional supervisory personnel. However, due to the vague and uncertain nature of this proposed amendment, the Patrol Records Division has no true way to determine the actual effect or costs.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 45 minutes. Therefore, one FTE can handle 2,485 expungements per year = 111,840 / 45.

With the current estimate of 86,600 records that potentially meet the requirements of this proposed amendment and would potentially be eligible for expungement, the following percentages of persons actually requesting an expungement will directly relate to the number of PRD FTE's required:

10% = 86,600 x .10 = 8,660 / 2,485 = 4 FTE's
50% = 86,600 x .50 = 43,300 / 2,485 = 17 FTE's
100% = 86,600 / 2,485 = 35 FTE's

These FTE's (Quality Control Clerks, Range 10) would be necessary to process all expungement requests, review records, contact agencies, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE of $45,702 and the ability of that employee to process 2,485 expungements per year, the cost per expungement is $45,702 \ 2,485 = $18.39. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories.

Processing ten percent of the possible expungements would require additional workspace. The physical requirements would increase with the number of FTE's required to meet the demand for expungements. There will be recurring costs of $650 per year per FTE for office supplies and phone charges. Standard equipment and office furniture would be required at a one-time cost of $6,094 per FTE.

4 Quality Control Clerks ($1,015 x 24)	$97,440
Equipment/Office Furniture	$6,094
RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

The provisions of this petition would require the Highway Patrol to rent office space for 4 FTE's to process the expungement requests. The Office of Administration states that 920 square feet of office space would be required. The following costs apply per square foot:

Office Space	$14/Sq Ft
Janitorial/Trash Costs	$1.50/Sq Ft
Utility Costs	$2/Sq Ft

The agency provided the following additional comments:

It is suggested to add this additional language to provide for the collection of a fee to offset the costs of the expungements:

43.530. 1. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than nine dollars per request for criminal history record information not based on a fingerprint search. In each year beginning on or after January 1, 2010, the superintendent may increase the fee paid by requesting entities by an amount not to exceed one dollar per year, however, under no circumstance shall the fee paid by requesting entities exceed fifteen dollars per request.

2. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than twenty dollars per request for criminal history record information based on a fingerprint search, unless the request is required under the provisions of subdivision (6) of section 210.481, section 210.487, or section 571.101, in which case the fee shall be fourteen dollars.

3. A request made under subsections 1 and 2 of this section shall be limited to check and search on one individual. Each request shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. The highway patrol may establish procedures for receiving requests for criminal history record information for classification and search for fingerprints, from courts and other entities, and for the payment of such requests. There is hereby established by the treasurer of the state of Missouri a fund to be entitled as the "Criminal Record System Fund".

Notwithstanding the provisions of section 33.080 to the contrary, if the moneys collected and deposited into this fund are not totally expended annually for the purposes set forth in sections 43.500 to 43.543, the unexpended moneys in such fund shall remain in the fund and the balance shall be kept in the fund to accumulate from year to year.

4. For all petitions for expungement under the provisions of Chapter 610, Section 577.054, or any other created expungement requirement under statute, excluding Section 610.122, the applicant shall pay a fee of seventy-five dollars per arrest date listed on the petition. Each petition shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. For expungements that require removal from the Traffic Arrest System twenty dollars of the seventy-five dollar fee will be deposited in the Highway Patrol Traffic Records Fund.

There are numerous uncertainties associated with this proposed constitutional amendment. The definition of a "non-violent cannabis-only offense" needs to be added. It is unclear if individuals with the aforementioned conviction records are required to abide by the expungement process mandated by various other state statutes. Does the individual just complete and file a document with a circuit clerk and the record is expunged or does the "court," whomever that is, order the immediate expungement of all civil and criminal records pertaining to non-violent cannabis only offenses?

The Highway Patrol has concerns with number 7 which states, "No Missouri law enforcement personnel, state, county, city employee, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri constitution."

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's Office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated unknown fiscal impact.

Changes to Missouri's state driving laws could impact some federal commercial drivers' license laws.

Failure to comply with 49 C.F.R. 384.225 & 384.226 could result in a withholding of Missouri's federal-aid highway funds apportioned to it under each of Title 23, United States Code (U.S.C.), sections 104(b)(1), (b)(3), and (b)(4). The federal funds impacted consist of national highway performance program funds, highway safety improvement program funds and congestion mitigation and air quality improvement funds. The withholding amount would be 4 percent for the first year of non-compliance and 8 percent for the second and subsequent years.

Officials from the **Office of Administration** (OA) indicated:

Section 54 of Article IV would allow the medical and recreational use of marijuana and hemp, as well as the cultivation, production, transportation and retail sale of marijuana and hemp and their related products. Subsection 3 allows the sale of marijuana to individuals under the age of 21 only with physician or parental permission. Subsection 6 requires that all prisoners that have been convicted in Missouri of a nonviolent cannabis related crime shall be immediately released and all related charges shall be expunged from their records. Subsection 7 creates an excise tax of five percent on all retail sales of marijuana, in addition to any established state or local sales taxes. The revenue shall be deposited to the credit of general revenue with the provision that 2.5 percent be distributed to elementary and secondary public education schools and 2.5 percent be distributed to the Missouri Commission. Subsection 5, however, allows all medical marijuana users, with recommendation by a physician, to purchase cannabis without taxation. Subsection 10 provides that the provisions in the amendment take effect no later than January 31st, following the election that placed the initiative before the people of Missouri.

B&P estimates that subsection 7 of this initiative petition could increase TSR by as much as $17.2M and GR by as much as $16.5M once fully implemented in FY 2021. The Substance Abuse and Mental Health Services Administration (SAMHSA) reports that 9.95% of Missouri population age 18 and older use marijuana. For the purposes of this analysis, B&P assumes the same percentage for marijuana users over the age of 21. The U.S. Census (2010) reports the population of Missouri residents over the age of 21 as 4,300,988 people. Multiplying the percentage of Missouri residents who use marijuana by the population of Missouri residents over the age of 21 gives an estimate of the number of Missouri residents who use marijuana:

	4,300,988	(MO residents over the age of 21)
X	9.95%	(% of MO residents who use marijuana)
	427,948	(MO residents who use marijuana)

However, B&P estimates that of those who use marijuana, roughly 65,000 would be medical users. SAMHSA reports that the total number of U.S. population age 18 and older use marijuana is 27,169,000 people. B&P assumes dividing the number of MO residents who use marijuana by the U.S. population that uses marijuana will provide an estimate of the percentage of the U.S. market that is attributable to Missouri.

	427,948	(MO residents who use marijuana)
÷	27,169,000	(Number of U.S. marijuana users)
	1.58%	(% U.S. market that is attributable to MO)

Using the estimate above for medical users, of that 1.58 percent approximately 0.24% could be considered medical. Therefore, B&P estimates that the size of the U.S. market that is attributable to Missouri, less medical marijuana users, is 1.33 percent. Using an established estimate[1] for the U.S. market of $14.0B and multiplying by the percentage of the U.S. market that is attributable to Missouri, B&P estimates that Missouri's marijuana market, less medical marijuana use, could be worth $186.7M. Assuming Missouri's marijuana market is worth $186.7M, an excise tax of five percent could increase TSR and GR by as much as $9.3M once fully implemented. Table 1 shows a breakdown of revenue increases by tax type.

Table 1: Revenue Generated by Marijuana Taxes

Tax	**FY 2020 (5 months)**	**Fully Implemented (FY 2021)**
Sales Tax		
General Revenue	3,002,000	7,206,000
Education	233,000	559,000
Conservation	29,000	70,000
Parks, Soil, Water	23,000	56,000
Local	120,000	287,000
Marijuana Excise Tax		
General Revenue	3,890,000	9,337,000

[1] http://scholar.harvard.edu/files/miron/files/budget_2010_final_0.pdf

Total		
General Revenue	6,893,000	16,543,000
Education	233,000	559,000
Conservation	29,000	70,000
Parks, Soil, Water	23,000	56,000
Local	120,000	287,000
TSR	7,178,000	17,228,000

Officials from the **Office of State Courts Administrator** indicated:

The proposed Initiative Petition, 18-129, would create a new section of the Missouri Constitution to be known as Article IV, section 54. This section would allow citizens over the age of twenty-one to have the right to engage in the production, sale, distribution and consumption of marijuana and the manufacture of goods from hemp, subject to reasonable regulations adopted by the state pursuant to this section.

The average of all marijuana related charge codes from 2011 to 2015 for Circuit case types is 14,122 per year. The average of all marijuana related charge codes from 2011 to 2015 for Associate case types is 10,982. We are unable to determine what number of these charges were for someone over the age of twenty-one.

The following Criminal Court Costs would be affected by this petition:

Criminal Court Costs		
Felony Case Costs	**Amount of Cost**	**Disburse to State/County**
Basic Civil Legal Services Fund surcharge	$10.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$45.00	State of Missouri - General Revenue $36, County $9
County Fee	$75.00	County
Court Automation Fund Fee	$7.00	State of Missouri -Statewide Court Automation Fund
Court Reporter fee (All Circuit Division Cases)	$15.00	State of Missouri - General Revenue

Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$30.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Head Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards & Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	State of Missouri - Prosecuting Attorney Training Fund
Sheriffs' Fee	$75.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement Fund
Spinal Cord Injury Fund surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$279.50**	
Misdemeanor Case Costs		
Basic Civil Legal Services Fund surcharge	$8.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$15.00	$12 State of Missouri / $3 County
County Fee	$25.00	County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund	$7.50	State of Missouri - Crime Victims' Compensation Fund

surcharge		
DNA Profiling Analysis Fund surcharge	$15.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Brain Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	$0.50 State of Missouri / $0.50 County
Sheriffs' fee	$10.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement fund
Spinal Cord Injury Fund Surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$102.50**	
Municipal Case (Filed in Associate Division) Costs		
Clerk Fee	$15.00	$12 State of Missouri / $3 County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
Peace Officer Standards and Training (POST) Commission	$1.00	State of Missouri - Peace Officer Standards & Training Fund

surcharge		
Sheriffs' Retirement Fund surcharge	$3.00	Sheriffs' Retirement Fund
Total	**$33.50**	
Criminal Costs Not Included Above		
Drug Testing by a State Lab	$150.00	State of Missouri
Drug Testing by a Private Lab	Actual Costs	County Reimbursement
Law Enforcement Arrest Costs:		
Highway Patrol		Amt. Approved by the Court
Local (County)		Amt. Approved by the Court
Municipal		Amt. Approved by the Court

The decrease in the court fees, depending on the number of cases, will result in an unknown loss to the courts.

They also assume there will be an unknown decrease in caseload for the courts because the courts will no longer process these cases; however, at this time they are unable to calculate the decrease.

Any significant increase or decrease will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated

$2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated if passed, this constitutional amendment would have a positive impact on the workload of the Missouri State Public Defender, since possession, manufacture, distribution, etc. of cannabis would no longer be unlawful, offenses that the Public Defender currently uses resources to defend and no longer would need to.

The exact positive impact is difficult to predict because they track their cases by statutory offense and most drug offenses are not limited to marijuana.

However, their best estimate, using FY2014 MSPD data, is that this would reduce their caseload by 3,523 cases (685 A/B felonies, 1,797 C/D felonies, 1,041 misdemeanors, and 1,140 probation violations).

In *The Missouri Project: A Study of the Missouri Public Defender System and Attorney Workload Standards,* prepared by RubinBrown on behalf of the American Bar Association's Standing Committee on Legal Aid and Indigent Defendants, the relevant workload standards are: A/B felonies, 47.6 hours per case; C/D felonies, 25.0 hours per case; misdemeanors, 11.7 hours per case; and probation violations, 9.8 hours per case). (The workload standards include only case related tasks over which an attorney has some control (they exclude, for example, in court and travel time) and thereby reflect a conservative estimate.)

Applying those workload standards to the 2,858 cases, those cases require 100,882.7 attorney hours. With 2,080 hours per attorney available each year, that represents the work of 48.5 attorneys.

While in theory they might also handle fewer appeals of guilty verdicts after trial, the fact is that only a very small percentage of their cases proceed to trial and it's likely that only a small percentage of those cases are appeals from marijuana convictions. Therefore this minimal positive impact is not being taken into account in this estimate.

However, the Missouri State Public Defender already is significantly understaffed by 333 attorneys under the workload standards developed in *The Missouri Project*. (The 333 attorneys is a conservative estimate of the under-staffing in that it assumes they contract all conflicts to private attorneys, which they are not able to do for budgetary reasons).

Therefore, despite the positive impact on the workload of the Missouri State Public Defender, because they are already understaffed that savings in attorney time would not allow the Public Defender to reduce its workforce and therefore would not translate into an actual cost savings. However it does reduce by the cost of 48.5 attorneys how much money needs to be added to their budget in order to meet *The Missouri Project*'s workload standards.

Officials from the **State Treasurer's office** indicated this proposal would have no fiscal impact on their office.

Officials from **Greene County** indicated there is anticipated costs for this initiative petition. Unfortunately there is not enough time given in the response to provide an actual estimated costs.

County Prosecutor, Dan Patterson provided the following information:

No on 64 Campaign and SAM Action

California voters are being told that they will see the crime rate go down if they vote to legalize marijuana commercially; this has not been the case in the state of Colorado or the city of Denver. Since the legalization of recreational marijuana in Colorado in 2013 traffic related marijuana deaths have increased 48%, marijuana related emergency room visits have increased 49%, and marijuana related calls to the poison center have increased 100%. According to the Colorado Bureau of Investigations in 2015 statewide homicides in Colorado rose 14.7 % over the previous year. Pueblo, Colorado had the highest homicide rate in the state with 11.1 killings per 100,000 residents. Aurora, Colorado's homicide rate more than doubled from 2014. Additionally more places in Colorado were robbed and more thefts occurred, especially cars, as 193,115 motor vehicles were reported stolen, up 27.7 % in 2015 from the previous year. In 2015, sexual assaults rose 10% in Colorado with Denver, Aurora, Lakewood, Westminster and Pueblo all reporting higher numbers as well.

In the city of Denver since the legalization of recreational marijuana the number of crimes in Denver has grown by about 44 %, according to annual figures the city reported to the National Incident Based Reporting System. In 2015 in Denver alone crime rose in every neighborhood in the city. The murder rate hit a decade high, 1059 more cars were broken into, there were 903 more auto thefts, 321 more aggravated assaults and 231 more homes were broken into compared to 2014.

California voters are also being told that legalizing recreational marijuana will free up law enforcement to work on other criminal activities. Again that has not been the case in Denver. Besides the overall increases in crime we have experience, the Denver police department is dealing with a 900% increase in the unlawful cultivation and manufacture of marihuana concentrate, and a 99% increase in the unlawful distribution of marijuana and marijuana concentrate. The quantity of illegal marijuana seized by the Denver police has increased 3,424% on average per case. The volume of marijuana seized per case has increased from an average of 162 pounds to 5724 pounds. In Denver unlawful public consumption of marijuana citations has increased over 300% per year since the legalization of recreational marijuana. The Denver police department is busier enforcing marijuana laws and investigating crimes directly related to marijuana, including murderers, robberies, and home invasions, than any other time in the history of the city.

Sincerely,

Mitchell R. Morrissey
Denver District Attorney

Officials from the **City of Kansas City** indicated their local government estimates the fiscal impact of the above-referenced constitutional amendment for fiscal years 2018, 2019 and 2020 to be as follows:
(reminder: 2018 will likely be a portion of a fiscal year, depending on effective date of amendment)

Revenues: (explain amount per fiscal year and source or reason for increase)
This constitutional amendment will have no fiscal impact on their city.

Savings: (explain amount per fiscal year, reason for savings and area where savings will occur)
This constitutional amendment will have no fiscal impact on their city.

Costs:(explain what type of costs will be incurred, amount per fiscal year and reason)
This constitutional amendment will have no fiscal impact on their city.

Losses:(explain why revenue losses would be expected and amount per fiscal year)
This constitutional amendment will have no fiscal impact on their city.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from the **City of St. Joseph** indicated this initiative petition will not have a fiscal impact on their local government.

Officials from the **Missouri Veterans Commission** indicated they defer fiscal impact to the Department of Revenue/Tax. They are pleased to receive any funding which appropriately comes to them to support the Veterans Programs currently administered by the Commission.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from the **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this will not have a fiscal impact on their university.

Officials from the **Missouri State University** indicated in response to this initiative petition, no fiscal impact to their university.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,**

the **City of Mexico,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, Harris-Stowe State University, Lincoln University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Fiscal Note Summary

This proposal is estimated to increase annual state tax revenues by $17 million when fully implemented with additional estimated annual state savings of $11 million. State implementation costs are estimated at $150,000 with annual operating costs estimated at $700,000. Local law enforcement costs could increase.

Jefferson City, MO 65101

RE: Petition approval request from Timothy Gilio regarding a proposed constitutional amendment to Article IV, version 1 (2018-128)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Timothy Gilio on January 23, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

This measure amends the Missouri Constitution by adding Section 54 to Article IV. This amendment implicitly repeals in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105.1, 105.1108.1, 105.1112.1, 195.0010.1, 196.0100.1, 263.0250.1,577.0024.1, 579.0015.1, 579.0020.1, 579.0030.1, 579.0055.1, 579.0065.1, 579.0068.1, and 579.0105.1

Be it resolved by the people of the state of Missouri that the Constitution be amended:

One new section is adopted to be known as Article IV, Section 54 and to read as follows:

1.Cannabis aka marijuana and cannabis hemp shall immediately be removed from Missouri's list of controlled substances and shall no longer be listed among Missouri's drugs schedules.

2. Definitions of terms used in this Act: cannabis and cannabis hemp refer to cannabis marijuana, cannabis sativa, cannabis indica, cannabis ruderalis or any variety of cannabis including any derivative, concentrate, extract, flower leaf particle preparation resin root salt seed stalk stem or any product thereof.
a. Medical cannabis refers to Physician or Veterinarian written recommended use of cannabis or any form of cannabis derivative, concentrate, extract, flower, stem, stalk, root, leaf, or any Cannabis product thereof.
b. Personal aka recreational use refers to any cannabis products use not recommended by Physician's or Veterinarian's
c. Cannabis accessories means any equipment, products or materials of any kind that are used or intended for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging or storing of cannabis or hemp or for ingesting, inhaling, vaporizing smoking or otherwise introducing cannabis into or onto the human body with any vehicle or what could be construed as a dangerous device.
d. Establishment refers to cannabis cultivating facility, a cannabis manufacturing facility or retail store or other entity that cultivates, prepares manufactures packages transports or sells cannabis or hemp products or accessories.

3. Minors refers to anyone under the age of 21
a. Cannabis or its products shall not be sold to anyone under the age of 21.
b. Anyone under the age of 21 shall have legal access to cannabis through a physician's written recommendation, or parental supervision or a legal guardian for medical conditions or diseases that cannabis might help with.

4. The following acts are not unlawful and shall not be an offense under these revised Missouri law's
a. Possession or cultivation of cannabis for personal or medical use in an area sufficient to produce the quantity necessary to address one's personal or medical needs
b. Cultivating, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes, provided the person has current applicable licenses to run a business in Missouri. No special licensing will be required beyond that which is applicable for the cultivation, harvest, processing, manufacturing, packaging, distribution, transferal, display, or possessing of any non-toxic food or food product.
c. Providing cannabis, aka marijuana and or any part of the cannabis plant thereof to be sold to the public must be tested by an accredited testing facility and all packaging labeled accordingly to reflect said testing.
d. Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs a through d of this section

5. Patient's rights: cannabis shall be available to all patients regardless of age, race or gender without taxation when recommended by a physician as a medicine.
a. All patients engaged in cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through conventional therapeutic means.

6. All prisoners that have been found guilty in a Missouri Court off a nonviolent cannabis related crime shall immediately be released and all charges for non-violent cannabis crimes shall be expunged from their records.
a. Within 60 days of passage of this act, the attorney general's office shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis related nonviolent civil and criminal records in Missouri, to be distributed to all circuit court judges within the state.

7. No Missouri law enforcement personnel, state, county, city employee, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri constitution.
a. Any person who impedes the lawful exercise of these provisions is guilty of a class A misdemeanor and is subject to all penalties or fines thereof.

8. Cannabis farmers, manufacturer's processors and distributors shall not be subject to any special zoning requirements, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor of agricultural products.

9. Pursuant to the ninth and tenth amendments to the constitution of the United States, the people of Missouri hereby repudiate and challenge federal cannabis prohibitions that conflict with this act.
a. The state of Missouri will honor all legally obtained patients medical cards regardless of the state where issued and Missouri shall become reciprocity with all legal states where Cannabis is considered legalized by law for medical or recreational use.
b. Opinions pertaining to, and willingness to recommend medical cannabis therapy shall not be a criteria for the licensure of physicians or Veterinarian's; No physician or Veterinarian shall be subject to any professional license review or hearing as a result of recommending or approving medical cannabis therapy.
c. Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis, hemp or any derivatives or parts thereof.

10. All provisions of this section are self-executing and serviceable. Except where otherwise indicated in the text of this document this constitutional amendment shall supersede any and all conflicting city, county, state or federal statutory, local charter, ordinance or resolution and shall be implemented no later than January 31st, following the election that placed this initiative before the people of Missouri.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-128)

Subject

Initiative petition from Timothy Gilio regarding a proposed constitutional amendment to Article IV. (Received January 24, 2017)

Date

February 14, 2017

Description

This proposal would amend Article IV of the Constitution of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Missouri Veterans Commission, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Assumptions

Officials from the **Attorney General's office** indicated among other provisions, this proposal could require their office to develop and issue an order providing for the destruction of "all cannabis related nonviolent civil and criminal records in Missouri." Moreover, the proposal purports to supersede federal law.

They expect that the enactment of this proposal would result in increased litigation. They assume they could absorb costs associated with the increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** estimated increased operating costs of $0 in fiscal year 2018, unknown>$99,045 in fiscal year 2019, and unknown>$169,098 in fiscal year 2020.

Section 192.945, RSMo, allows their department to issue a hemp extract registration card for persons suffering from intractable epilepsy. The hemp extract registration card allows for the legal possession and use of cannabidiol (CBD) oil. This proposal allows for the legal use of marijuana for both medical and recreational purposes. Therefore, persons with intractable epilepsy would not need to apply for a hemp extract registration card in order to legally use the CBD oil.

They expect rental space for two staff located in Jefferson City would be required: 2 staff x 230 sq.ft./FTE x $21.00 = $9,660.

They indicated retail marijuana, cultivation facilities, products manufacturer, and testing facilities may be established as small businesses.

Division of Community and Public Health (DCPH)

This proposal does not require them to issue any licenses or conduct inspections to ensure the safety of marijuana infused food products. However, sections 196.010 through 196.298, RSMo, gives them responsibility for the regulation of food to include such duties as ensuring food safety, sanitation, and proper labeling, etc. Therefore, they would have responsibility to assure that facilities manufacturing foods containing marijuana and marijuana products are regulated the same as other food manufacturers.

Division of Community and Public Health (DCPH)

Due to the broad parameters of this proposal, it is difficult to determine how many food manufacturing facilities would be established. States which have legalized retail marijuana have seen a significant demand for edible marijuana products. For the purposes of this fiscal note, they estimate that at least 300 food manufacturing facilities would be established as a result of this proposal. In order to properly inspect these manufacturing facilities, DCPH would require a minimum of two Environmental Public Health Specialist IV staff (A27, $44,352, Step G). This law shall be implemented no later than January 31 following the November 2018 election. Therefore, DCPH assumes that the two Environmental Public Health Specialist IV positions would begin January 1, 2019.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated a fiscal impact of $7,178,073 in fiscal year 2019 (7 months), $7,511,746 in fiscal year 2020, $10,011,383 in fiscal year 2021, $10,741,186 in fiscal year 2022 and thereafter.

Legalizing the possession and use of marijuana would remove from the criminal statutes all controlled substance offenses for marijuana, including possession, distribution and trafficking. If the legislation that removed marijuana from the list of controlled substances was retrospective then there would be two reductions in the cost of incarceration: the release of offenders serving a marijuana offense and fewer admissions to prison. The legalization of marijuana will largely impact offenders who are only serving a marijuana offense. Offenders serving multiple concurrent sentences will continue to be required to serve the other sentences after legalization and no estimate is made for offenders serving multiple sentences.

The reduction in the offender population is the total of reductions from the expungement of sentences and fewer admissions and probations. The cost avoidance is based upon a direct prison cost per year in FY17 of $6,085 and an average cost of $2,234 per year for offenders on field supervision. In the first year after the enactment of the legislation that legalizes marijuana there is an estimated reduction of 633 offenders in prison and 3,676 offenders on field supervision. In the next year (FY20) there will no discharges from expungement but the reduction in the prison population will increase to 214. The field reduction will continue into FY21 because the marijuana offenders are estimated to serve 2.5 years on supervision.

The estimate is qualified by the use of an expansion factor that assumes that the drug distribution in the sentences where the drug is not known will be similar to that where the drug is known.

The estimated cost avoidance in the first year is $7,178,073 and will be $10,741,186 after the 4th year.

If marijuana usage becomes legal it could impact the safety and security of our prisons as it is not believed that there is a means for testing whether an employee is under the influence of marijuana. Impaired prison employees or visitors can impact the safe and secure operation of our prisons.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this petition will have no fiscal impact on their department.

Officials from the **Department of Public Safety, Office of the Director** indicated they see no fiscal impact due to this petition.

Officials from the **Department of Public Safety, Division of Missouri State Highway Patrol** indicated they expect increased operating costs of $426,236 for the first year implemented, $487,384 for the second year implemented, and $492,597 for the third year implemented.

The provisions of this petition would require their agency to rent office space for 4 FTE's to process the expungement requests.

The proposed legislation would order the immediate destruction of all cannabis-related non-violent civil and criminal records in Missouri.

Two different divisions within their agency will be impacted by this legislation. Here is a breakdown for each division:

Criminal Justice Information Services Division
The Criminal Justice Information Services Division (CJIS) states that there are currently 95,550 arrest charges in the Central Repository. The current expungement process, pursuant to Chapter 610, takes approximately 90 minutes to process. One FTE can handle 1,243 expungements per year. Conservatively, at least five FTE's would be required to initially handle the expungments created by this legislation. A significant processing backlog would occur if sufficient FTE's are not assigned to accommodate the number of expungements ordered.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 90 minutes. Therefore, one FTE can handle 1,243 expungements per year = 111,840 / 90.

These FTE's (CJIS Technicians, Range 16) would be necessary to process all expungement requests, review criminal history records, contact any agency associated with the arrests or convictions, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE at $55,495 and the ability of that employee to process 1,243 expungements per year, the cost alone per expungement is $55,495 \ 1,243 = $44.64. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories, as well as contacting of the various agencies associated with the arrests. In researching other states with similar expungement requirements, they all charge a fee to offset the cost of the time required to process the expungements. Their fees ranged from $50 to $450 per petition per arrest date.

These FTE will most likely be 2nd and 3rd shift employees so they would not require any equipment. However, there would be recurring costs of $650 per year per FTE for office supplies and phone charges. If any FTE were placed on the 1st shift, standard equipment would be required at a one-time cost of $6,094 per FTE.

5 CJIS Technicians ($1,232.50 x 24)	$147,900
Office Equipment/HW/SW	$6,094
RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

Patrol Records Divison

Currently, there are 86,600 records in the Patrol's Traffic Arrest System (TAS) pertaining to arrests completed by the Missouri Highway Patrol that could possibly meet the requirements of this proposed constitutional amendment. These are arrest and arrest/disposition records pertaining to individuals the age of 21 years and older with an NCIC modifier of 60-64 that relate to marijuana offenses. Given this, if only ten percent of the individuals who qualify to have his or her record expunged sought to do so, the Patrol Records Division (PRD) would require 4 FTE's. However, if a large number of these expungements were to be granted with even four FTE's, the backlog would compound greatly to the point it may take several years to catch up. If 100 percent of the individuals who qualify to have their record expunged sought to do so, the Patrol Records Division would require 35 FTE's to complete this task in approximately one year.

The addition of 35 FTE's would require additional supervisory personnel. However, due to the vague and uncertain nature of this proposed amendment, the Patrol Records Division has no true way to determine the actual effect or costs.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 45 minutes. Therefore, one FTE can handle 2,485 expungements per year = 111,840 / 45.

With the current estimate of 86,600 records that potentially meet the requirements of this proposed amendment and would potentially be eligible for expungement, the following percentages of persons actually requesting an expungement will directly relate to the number of PRD FTE's required:

10% = 86,600 x .10 = 8,660 / 2,485 = 4 FTE's
50% = 86,600 x .50 = 43,300 / 2,485 = 17 FTE's
100% = 86,600 / 2,485 = 35 FTE's

These FTE's (Quality Control Clerks, Range 10) would be necessary to process all expungement requests, review records, contact agencies, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE of $45,702 and the ability of that employee to process 2,485 expungements per year, the cost per expungement is $45,702 \ 2,485 = $18.39. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories.

Processing ten percent of the possible expungements would require additional workspace. The physical requirements would increase with the number of FTE's required to meet the demand for expungements. There will be recurring costs of $650 per year per FTE for office supplies and phone charges. Standard equipment and office furniture would be required at a one-time cost of $6,094 per FTE.

4 Quality Control Clerks ($1,015 x 24)	$97,440
Equipment/Office Furniture	$6,094
RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

The provisions of this petition would require the Highway Patrol to rent office space for 4 FTE's to process the expungement requests. The Office of Administration states that 920 square feet of office space would be required. The following costs apply per square foot:

Office Space	$14/Sq Ft
Janitorial/Trash Costs	$1.50/Sq Ft
Utility Costs	$2/Sq Ft

The agency provided the following additional comments:

It is suggested to add this additional language to provide for the collection of a fee to offset the costs of the expungements:

43.530. 1. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than nine dollars per request for criminal history record information not based on a fingerprint search. In each year beginning on or after January 1, 2010, the superintendent may increase the fee paid by requesting entities by an amount not to exceed one dollar per year, however, under no circumstance shall the fee paid by requesting entities exceed fifteen dollars per request.

2. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than twenty dollars per request for criminal history record information based on a fingerprint search, unless the request is required under the provisions of subdivision (6) of section 210.481, section 210.487, or section 571.101, in which case the fee shall be fourteen dollars.

3. A request made under subsections 1 and 2 of this section shall be limited to check and search on one individual. Each request shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. The highway patrol may establish procedures for receiving requests for criminal history record information for classification and search for fingerprints, from courts and other entities, and for the payment of such requests. There is hereby established by the treasurer of the state of Missouri a fund to be entitled as the "Criminal Record System Fund". Notwithstanding the provisions of section 33.080 to the contrary, if the moneys collected and deposited into this fund are not totally expended annually for the purposes set forth in sections 43.500 to 43.543, the unexpended moneys in such fund shall remain in the fund and the balance shall be kept in the fund to accumulate from year to year.

4. For all petitions for expungement under the provisions of Chapter 610, Section 577.054, or any other created expungement requirement under statute, excluding Section 610.122, the applicant shall pay a fee of seventy-five dollars per arrest date listed on the petition. Each petition shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. For expungements that require removal from the Traffic Arrest System twenty dollars of the seventy-five dollar fee will be deposited in the Highway Patrol Traffic Records Fund.

There are numerous uncertainties associated with this proposed constitutional amendment. The definition of a “non-violent cannabis-only offense” needs to be added. It is unclear if individuals with the aforementioned conviction records are required to abide by the expungement process mandated by various other state statutes. Does the individual just complete and file a document with a circuit clerk and the record is

expunged or does the "court," whomever that is, order the immediate expungement of all civil and criminal records pertaining to non-violent cannabis only offenses?

The Highway Patrol has concerns with number 7 which states, "No Missouri law enforcement personnel, state, county, city employee, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri constitution."

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's Office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no impact.

Officials from the **Office of Administration** (OA) indicated:

Under this proposal:

- Cannabis and cannabis hemp would be removed from the list of scheduled drugs
- Possessing, cultivating, harvesting and distributing cannabis for personal or medical use would be decriminalized. Anyone under age 21 may have access only for medical marijuana with a doctor's recommendation or parental/guardian supervision.
- Cannabis shall be available to all patients regardless of age, race or gender without taxation when recommended by a physician as a medicine.
- All prisoners who have been incarcerated for nonviolent cannabis-related crimes shall be immediately released and all charges for cannabis crimes expunged.
- No state or federal personnel or funds shall be used to enforce federal laws which are no longer illegal in Missouri under this amendment.
- Missouri will have reciprocity with any other states where cannabis is legalized by law for medical or recreational use.
- Language is included to state that the people of Missouri repudiate and challenge federal cannabis prohibitions that conflict with this proposal.
- Effective date is no later than January 31st following the election.
- Provisions are severable.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated:

The proposed Initiative Petition, 18-128, would create a new section of the Missouri Constitution to be known as Article IV, section 54. This section would allow citizens over the age of twenty-one to have the right to engage in the production, sale, distribution and consumption of marijuana and the manufacture of goods from hemp, subject to reasonable regulations adopted by the state pursuant to this section.

The average of all marijuana related charge codes from 2011 to 2015 for Circuit case types is 14,122 per year. The average of all marijuana related charge codes from 2011 to 2015 for Associate case types is 10,982. We are unable to determine what number of these charges were for someone over the age of twenty-one.

The following Criminal Court Costs would be affected by this petition:

Criminal Court Costs		
Felony Case Costs	**Amount of Cost**	**Disburse to State/County**
Basic Civil Legal Services Fund surcharge	$10.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$45.00	State of Missouri - General Revenue $36, County $9
County Fee	$75.00	County
Court Automation Fund Fee	$7.00	State of Missouri -Statewide Court Automation Fund
Court Reporter fee (All Circuit Division Cases)	$15.00	State of Missouri - General Revenue
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$30.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Head Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund

Peace Officer Standards & Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	State of Missouri - Prosecuting Attorney Training Fund
Sheriffs' Fee	$75.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement Fund
Spinal Cord Injury Fund surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$279.50**	
Misdemeanor Case Costs		
Basic Civil Legal Services Fund surcharge	$8.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$15.00	$12 State of Missouri / $3 County
County Fee	$25.00	County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$15.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Brain Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund

Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	$0.50 State of Missouri / $0.50 County
Sheriffs' fee	$10.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement fund
Spinal Cord Injury Fund Surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$102.50**	
Municipal Case (Filed in Associate Division) Costs		
Clerk Fee	$15.00	$12 State of Missouri / $3 County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Sheriffs' Retirement Fund surcharge	$3.00	Sheriffs' Retirement Fund
Total	**$33.50**	
Criminal Costs Not Included Above		
Drug Testing by a State Lab	$150.00	State of Missouri

Drug Testing by a Private Lab	Actual Costs	County Reimbursement
Law Enforcement Arrest Costs:		
Highway Patrol		Amt. Approved by the Court
Local (County)		Amt. Approved by the Court
Municipal		Amt. Approved by the Court

The decrease in the court fees, depending on the number of cases, will result in an unknown loss to the courts.

They also assume there will be an unknown decrease in caseload for the courts because the courts will no longer process these cases; however, at this time they are unable to calculate the decrease.

Any significant increase or decrease will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated if passed, this constitutional amendment would have a positive impact on the workload of the Missouri State Public Defender, since possession, manufacture, distribution, etc. of cannabis would no longer be unlawful, offenses that the Public Defender currently uses resources to defend and no longer would need to.

The exact positive impact is difficult to predict because they track their cases by statutory offense and most drug offenses are not limited to marijuana.

However, their best estimate, using FY2014 MSPD data, is that this would reduce their caseload by 3,523 cases (685 A/B felonies, 1,797 C/D felonies, 1,041 misdemeanors, and 1,140 probation violations).

In *The Missouri Project: A Study of the Missouri Public Defender System and Attorney Workload Standards*, prepared by RubinBrown on behalf of the American Bar Association's Standing Committee on Legal Aid and Indigent Defendants, the relevant workload standards are: A/B felonies, 47.6 hours per case; C/D felonies, 25.0 hours per case; misdemeanors, 11.7 hours per case; and probation violations, 9.8 hours per case). (The workload standards include only case related tasks over which an attorney has some control (they exclude, for example, in court and travel time) and thereby reflect a conservative estimate.)

Applying those workload standards to the 2,858 cases, those cases require 100,882.7 attorney hours. With 2,080 hours per attorney available each year, that represents the work of 48.5 attorneys.

While in theory they might also handle fewer appeals of guilty verdicts after trial, the fact is that only a very small percentage of their cases proceed to trial and it's likely that only a small percentage of those cases are appeals from marijuana convictions. Therefore this minimal positive impact is not being taken into account in this estimate.

However, the Missouri State Public Defender already is significantly understaffed by 333 attorneys under the workload standards developed in *The Missouri Project*. (The 333 attorneys is a conservative estimate of the under-staffing in that it assumes they contract all conflicts to private attorneys, which they are not able to do for budgetary reasons).

Therefore, despite the positive impact on the workload of the Missouri State Public Defender, because they are already understaffed that savings in attorney time would not allow the Public Defender to reduce its workforce and therefore would not translate into an actual cost savings. However it does reduce by the cost of 48.5 attorneys how much money needs to be added to their budget in order to meet *The Missouri Project*'s workload standards.

Officials from the **State Treasurer's office** indicated this proposal would have no fiscal impact on their office.

Officials from **Greene County** indicated there is anticipated costs for this initiative petition. Unfortunately there is not enough time given in the response to provide an actual estimated costs.

County Prosecutor, Dan Patterson provided the following information:

October 12, 2016

No on 64 Campaign and SAM Action

California voters are being told that they will see the crime rate go down if they vote to legalize marijuana commercially; this has not been the case in the state of Colorado or the city of Denver. Since the legalization of recreational marijuana in Colorado in 2013 traffic related marijuana deaths have increased 48%, marijuana related emergency room visits have increased 49%, and marijuana related calls to the poison center have increased 100%. According to the Colorado Bureau of Investigations in 2015 statewide homicides in Colorado rose 14.7 % over the previous year. Pueblo, Colorado had the highest homicide rate in the state with 11.1 killings per 100,000 residents. Aurora, Colorado's homicide rate more than doubled from 2014. Additionally more places in Colorado were robbed and more thefts occurred, especially cars, as 193,115 motor vehicles were reported stolen, up 27.7 % in 2015 from the previous year. In 2015, sexual assaults rose 10% in Colorado with Denver, Aurora, Lakewood, Westminster and Pueblo all reporting higher numbers as well.

In the city of Denver since the legalization of recreational marijuana the number of crimes in Denver has grown by about 44 %, according to annual figures the city reported to the National Incident Based Reporting System. In 2015 in Denver alone crime rose in every neighborhood in the city. The murder rate hit a decade high, 1059 more cars were broken into, there were 903 more auto thefts, 321 more aggravated assaults and 231 more homes were broken into compared to 2014.

California voters are also being told that legalizing recreational marijuana will free up law enforcement to work on other criminal activities. Again that has not been the case in Denver. Besides the overall increases in crime we have experience, the Denver police department is dealing with a 900% increase in the unlawful cultivation and manufacture of marihuana concentrate, and a 99% increase in the unlawful distribution of marijuana and marijuana concentrate. The quantity of illegal marijuana seized by the Denver police has increased 3,424% on average per case. The volume of marijuana seized per case has increased from an average of 162 pounds to 5724 pounds. In Denver unlawful public consumption of marijuana citations has increased over 300% per year since the legalization of recreational marijuana. The Denver police department is busier enforcing marijuana laws and investigating crimes directly related to marijuana, including murderers, robberies, and home invasions, than any other time in the history of the city.

Sincerely,

Mitchell R. Morrissey
Denver District Attorney

Officials from the **City of Kansas City** indicated their local government estimates the fiscal impact of the above-referenced constitutional amendment for fiscal years 2018, 2019 and 2020 to be as follows:
(reminder: 2018 will likely be a portion of a fiscal year, depending on effective date of amendment)

Revenues: (explain amount per fiscal year and source or reason for increase)
This constitutional amendment will have no fiscal impact on their city.

Savings: (explain amount per fiscal year, reason for savings and area where savings will occur)
This constitutional amendment will have no fiscal impact on their city.

Costs:(explain what type of costs will be incurred, amount per fiscal year and reason)
This constitutional amendment will have no fiscal impact on their city.

Losses:(explain why revenue losses would be expected and amount per fiscal year)
This constitutional amendment will have no fiscal impact on their city.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from the **City of St. Joseph** indicated this initiative petition will not have a fiscal impact on their local government.

Officials from the **Missouri Veterans Commission** indicated they defer fiscal impact to the Department of Revenue/Tax. They are pleased to receive any funding which appropriately comes to them to support the Veterans Programs currently administered by the Commission.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from the **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this will not have a fiscal impact on their university.

Officials from the **Missouri State University** indicated in response to this initiative petition, no fiscal impact to their university.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,**

the **City of Mexico,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, Harris-Stowe State University, Lincoln University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Fiscal Note Summary

This proposal is estimated to result in annual state savings of $11 million. Additional state operating costs resulting from this proposal are estimated at $700,000 annually. Local law enforcement costs could also increase.

RE: Petition approval request from Natalie Meyer regarding a proposed statutory amendment to Chapter 191 (2018-127)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Natalie Meyer on January 23, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

BE IT ENACTED BY THE PEOPLE OF THE STATE OF MISSOURI:

The proposed initiative will amend Chapter 191 of Missouri Revised Statutes by adding twenty-two new sections.

These twenty-two sections shall be known and cited as the "Missouri Death with Dignity Act".

Section 1.

In said sections, the following terms shall mean:

(1) "Adult", any individual who is eighteen years of age or older.

(2) "Attending physician", the physician who has primary responsibility for the care of the patient and treatment of the patient's terminal disease.

(3) "Capable", in the opinion of a court or in the opinion of the patient's attending physician or consulting physician, psychiatrist or psychologist, a patient has the ability to make and communicate health care decisions to health care providers, including communication through persons familiar with the patient's manner of communicating if those persons are available.

(4) "Consulting physician", a physician who is qualified by specialty or experience to make a professional diagnosis and prognosis regarding the patient's disease.

(5) "Counseling", one or more consultations as necessary between a state licensed psychiatrist or psychologist and a patient for the purpose of determining that the patient is capable and not suffering from a psychiatric or psychological disorder or depression causing impaired judgment.

(6) "Health care provider", a person licensed, certified or otherwise authorized or permitted by the law of this state to administer health care or dispense medication in the ordinary course of business or practice of a profession, and includes a health care facility.

(7) "Informed decision", a decision by a qualified patient, to request and obtain a prescription to end his or her life in a humane and dignified manner, that is based on an appreciation of the relevant facts and after being fully informed by the attending physician of:

a. His or her medical diagnosis;

b. His or her prognosis;

c. The potential risks associated with taking the medication to be prescribed;

d. The probable result of taking the medication to be prescribed; and

e. The feasible alternatives, including, but not limited to, comfort care, hospice care and pain control.

(8) "Medically confirmed", the medical opinion of the attending physician has been confirmed by a consulting physician who has examined the patient and the patient's relevant medical records.

(9) "Patient", a person who is under the care of a physician.

(10) "Physician", a doctor of medicine or osteopathy licensed to practice medicine in the state of Missouri

(11) "qualified patient", a capable adult who is a resident of this state and has satisfied the requirements of this initiative in order to obtain a prescription for medication to end his or her life in a humane and dignified manner.

(12) "Terminal disease", an incurable and irreversible disease that has been medically confirmed and shall, within reasonable medical judgment, produce death within six months.

Section 2.

1. An adult who:
   a. Is capable;
   b. Is a residence of this state;
   c. Has been determined by the attending physician and consulting physician to be suffering from a terminal disease; and
   d. Has voluntarily expressed his or her wish to die;

may make a written request for medication for the purpose of ending his or her life in a humane and dignified manner in accordance with this initiative.

2. No person shall qualify under this initiative solely because of age or disability.

Section 3.

1. A valid request for medication under this initiative shall be in substantially the form described in section 20, signed and dated by the patient, and witnessed by at least two individuals who, in the presence of the patient, attest that to the best of their knowledge and belief the patient is capable, acting voluntarily, and is not being coerced to sign the request.
2. One of the witnesses shall be a person who is not:
   a. A relative of the patient by blood, marriage, or adoption;
   b. A person, who at the time the request is signed, would be entitled to any portion of the estate of the qualified patient upon death under any will or by operation of law; or
   c. An owner, operator, or employee of a health care facility where the qualified patient is receiving medical treatment or is a resident
3. The patient's attending physician at the time the request is signed shall not be a witness.

If the patient is in a long-term care facility at the time the written request is made, one of the witnesses shall be an individual designated by the facility and having the qualifications specified by the department of health and senior services by rule.

Section 4

1. The attending physician shall:
   A. Make the initial determination of whether a patient has a terminal disease, is capable, and has made the request voluntarily;
   B. Request that the patient demonstrate Missouri state residency under section 13;
   C. To ensure that the patient is making an informed decision, inform the patient of:
      a. His or her medical diagnosis;
      b. His or her prognosis;
      c. The potential risks associated with taking the medication to be prescribed;
      d. The probable result of taking the medication to be prescribed; and
      e. The feasible alternatives including, but not limited to, comfort care, hospice care, and pain control;
   D. Refer the patient to a consulting physician for medical confirmation of the diagnosis and for a determination that the patient is capable and acting voluntarily;
   E. Refer the patient for counseling if appropriate under section 6;
   F. Recommend that the patient notify next of kin;
   G. Counsel the patient about the importance of having another person present when the patient takes the medication prescribed under this legislation and of not taking the medication in a public place;
   H. Inform the patient that he or she has an opportunity to rescind the request at any time and in any manner, and offer the patient an opportunity to rescind at the end of the fifteen-day waiting period under section 9;
   I. Verify, immediately before writing the prescription for medication under this initiative, that the patient is making an informed decision;
   J. Fulfill the medical record documentation requirements of section 12;
   K. Ensure that all appropriate steps are carried out in accordance with this initiative prior to writing a prescription for medication to enable a qualified patient to end his or her life in a humane and dignified manner; and
   L. I. Dispense medications directly, including ancillary medications intended to facilitate the desired effect to minimize the patient's discomfort, provided that the attending physician is authorized under state law and rule to dispense, has a current drug enforcement administration certificate, and complies with any applicable administrative rule; or
   II. With the patient's written consent:
      a. Contact a pharmacist and inform the pharmacist of the prescription; and
      b. Deliver the written prescription personally, by mail, or facsimile to the pharmacist, who shall dispense the medications to either the patient, the attending physician, or an expressly identified agent of the patient.

2. Notwithstanding any other provision of law, the attending physician may sign the patient's death certificate.

Section 5

Before a patient is qualified under this initiative, a consulting physician shall examine the patient and his or her relevant medical records and confirm in writing the attending physician's diagnosis that the patient is suffering from a terminal disease and verify that the patient is capable, is acting voluntarily, and has made an informed decision.

Section 6

If, in the opinion of the attending physician or the consulting physician, a patient may be suffering from a psychiatric or psychological disorder or depression causing impaired judgment, either physician shall refer the patient for counseling. No medication to end a patient's life in a humane and dignified manner shall be prescribed until the person performing the counseling determines that the patient is not suffering from a psychiatric or psychological disorder or depression causing impaired judgment.

Section 7

No person shall receive a prescription for medication to end his or her life in a humane and dignified manner unless he or she has made an informed decision, as defined in section 1. Immediately prior to writing a prescription for medication under this initiative, the attending physician shall verify that the qualified patient is making an informed decision.

Section 8

The attending physician shall recommend that the patient notify the next of kin of his or her request for medication under this initiative. A patient who declines or is unable to notify next of kin shall not have his or her request denied for that reason.

Section 9

In order to receive a prescription for medication to end his or her life in a humane and dignified manner, a qualified patient shall have made an oral request and a written request and reiterate the oral request to his or her attending physician at least fifteen days after making the initial oral request. At the time the qualified patient makes his or her second oral request, the attending physician shall offer the qualified patient an opportunity to rescind the request.

Section 10

A patient may rescind his or her request at any time and in any manner without regard to his or her mental state. No prescription for medication under this initiative shall be written without the attending physician offering the qualified patient an opportunity to rescind the request.

Section 11

No less than fifteen days shall elapse between the patient's initial oral request and the writing of a prescription under this initiative. No less than forty-eight hours shall elapse between the date of the patient's written request and the writing of a prescription under this initiative.

Section 12

The following shall be documented or filed in the patient's medical record:

(1) All oral requests made by the patient for medication to end his or her life in a humane and dignified manner;

(2) All written requests made by the patient for medication to end his or her life in a humane and dignified manner;

(3) The attending physician's diagnosis and prognosis and determination that the patient is capable, is acting voluntarily, and has made an informed decision;

(4) The consulting physician's diagnosis and prognosis and verification that the patient is capable, is acting voluntarily, and has made an informed decision;

(5) A report of the outcome and determinations made during counseling, if performed;

(6) The attending physician's offer to the patient to rescind his or her request at the time of the patient's second oral request under section 9; and

(7) A note by the attending physician indicating that all requirements under this initiative have been met and indicating the steps taken to carry out the request including a notation of the medication prescribed.

Section 13

Only requests made by Missouri residents under this initiative shall be granted. Factors demonstrating Missouri residency include, but are not limited to:

(1) Possession of a Missouri driver's license;

(2) Registration to vote in Missouri;

(3) Evidence that the person owns or leases property in Missouri; or

(4) Filing of a Missouri tax return for the most recent tax year.

Section 14

1. a. The department of health and senior services shall annually review all records maintained under this initiative.
   b. The department of health and senior services shall require any health care provider upon dispensing medication under this initiative to file a copy of the dispensing record with the department.

2. The department of health and senior services shall adopt rules to facilitate the collection of information regarding compliance with this initiative. Except as otherwise required by law, the information collected shall not be a public record and shall not be made available for inspection by the public.

3. The department of health and senior services shall generate and make available to the public an annual statistical report of information collected under subsection 2 of this section.

Section 15

1. No provision in a contract, will, or other agreement, whether written or oral, to the extent the provision would affect whether a person may make or rescind a request for medication to end his or her life in a humane and dignified manner, shall be valid.

2. No obligation owing under any currently existing contract shall be conditioned or affected by the making or rescinding of a request by a person for medication to end his or her life in a humane and dignified manner.

Section 16

The sale, procurement, or issuance of any life, health, or accident insurance or annuity policy or the rate charged for any policy shall not be conditioned upon or affected by the making or rescinding of a request by a person for medication to end his or her life in a humane and dignified manner. A qualified patient's act of ingesting medication to end his or her life in a humane and dignified manner shall not have an effect upon a life, health, or accident insurance or annuity policy.

Section 17

Nothing is this initiative shall be construed to authorize a physician or any other person to end a patient's life by lethal injection, mercy killing, or active euthanasia. Actions taken in accordance with this initiative shall not for any purpose constitute suicide, assisted suicide, mercy killing, or homicide under the law.

Section 18

1. Except as provided in subsection 2 of this section and section 20:
   a. No person shall be subject to civil or criminal liability or professional disciplinary action for participating in good faith compliance with this initiative including being present when a qualified patient takes the prescribed medication to end his or her life in a humane and dignified manner;
   b. No professional organization or association or health care provider shall subject a person to censure, discipline, suspension, loss of license, loss of privileges, loss of membership, or other penalty for participating or refusing to participate in good faith compliance with this initiative;
   c. No request by a patient for or provision by an attending physician of medication in good faith compliance with this initiative shall constitute neglect for any purpose of law or provide the sole basis for the appointment of a guardian or conservator; and
   d. No health care provider shall be under any duty, whether by contract, statute, or any other legal requirement to participate in the provision to a qualified patient of medication to end his or her life in a humane and dignified manner. If a health care provider is unable or unwilling to carry out a patient's request under this initiative and the patient transfers his or her care to a new health care provider, the prior health care provider shall, upon request, transfer a copy of the patient's relevant medical records to the new health care provider.

2. (1) Notwithstanding any other provision of law, a health care provider may prohibit another health care provider from participating under the Missouri death with dignity act on the premises of the prohibiting provider if the prohibiting provider has notified the health care provider of the prohibiting provider's policy regarding participation in the Missouri death with dignity act. Nothing in this subdivision shall prevent a health care provider from providing health care services to a patient that do not constitute participation in the Missouri death with dignity act.
   (2) Notwithstanding the provisions of subsection 1 of this section, a health care provider may subject another health care provider to the following sanctions if the sanctioning health care provider has notified the sanctioning provider prior to participation under this initiative that it prohibits participation in the Missouri death with dignity act:
   (a) Loss of privileges, loss of membership, or other sanctions provided under the medical staff bylaws, policies, and procedures of the sanctioning health care provider if the sanctioned provider is a member of the sanctioning provider's medical staff and participates under the Missouri death with dignity act while on the health care facility premises of the sanctioning health care provider, but not including the private medical office of a physician or other provider;
   (b) Termination of a lease or other property contract or other nonmonetary remedies provided by a lease contract, not including loss or restriction of medical staff privileges or exclusion from a provider panel, if the sanctioned provider participates under the Missouri death with dignity act while on the premises of the sanctioning health care provider or on property that is owned by or under the direct control of the sanctioning health care provider; or

(c) Termination of a contract or other nonmonetary remedies provided by contract if the sanctioned provider participates under the Missouri death with dignity act while acting in the course and scope of the sanctioned provider's capacity as an employee or independent contractor of the sanctioning health care provider. Nothing in this paragraph shall be construed to prevent:

a. A health care provider from participating under the Missouri death with dignity act while acting outside the course and scope of the provider's capacity as an employee or independent contractor; or

b. A patient from contracting with his or her attending physician and consulting physician to act outside the course and scope of the provider's capacity as an employee or independent contractor of the sanctioning health care provider.

(3) A health care provider that imposes sanctions under subdivision (2) of this subsection shall follow all due process and other procedures the sanctioning health care provider may have that are related to the imposition of sanctions on another health care provider.

(4) For the purposes of this subsection, the following terms shall mean:

(a) "Notify", a separate statement in writing to the health care provider specifically informing the health care provider before the provider's participation under the Missouri death with dignity act of the sanctioning health care provider's policy about participation in activities covered by the Missouri death with dignity act;

(b) "Participate under the Missouri death with dignity act", to perform the duties of an attending physician under section 5, the consulting physician function under section 5, or the counseling function under section 6. Participate under the Missouri death with dignity act does not include:

a. Making an initial determination that a patient has a terminal disease and informing the patient of the medical prognosis;

b. Providing information about the Missouri death with dignity act to a patient upon the request of the patient;

c. Providing a patient, upon the request of the patient, with a referral to another physician; or

d. A patient contracting with his or her attending physician and consulting physician to act outside of the course and scope of the provider's capacity as an employee or independent contractor of the sanctioning health care provider.

3. Suspension or termination of staff membership or privileges under subsection 2 of this section is not reportable to the department or state board of registration for the healing arts. Action taken under sections 3 to 6 shall not be the sole basis for a report of unprofessional conduct.

4. No provision of this initiative shall be construed to allow a lower standard of care for patients in the community where the patient is treated or a similar community.

Section 19

1. A person, who without authorization of the patient, willfully alters or forges a request for medication or conceals or destroys a rescission of that request with the intent or effect of causing the patient's death is guilty of a class A felony.

2. A person who coerces or exerts undue influence on a patient to request medication to end the patient's life or to destroy a rescission of a request is guilty of a class A felony.

3. Nothing in this initiative shall limit further liability for civil damages resulting from other negligent conduct or intentional misconduct by any person.

4. The penalties in this initiative do not preclude criminal penalties applicable under other law for conduct that is inconsistent with this initiative.

Section 20

Any governmental entity that incurs costs resulting from a person terminating his or her life under this initiative in a public place has a claim against the estate of the person to recover such costs and reasonable attorneys' fees related to enforcing the claim.

Section 21

A request for a medication as authorized by this initiative shall be in substantially the following form:

REQUEST FOR MEDICATION TO END MY LIFE

IN A HUMANE AND DIGNIFIED MANNER

I, ..., am an adult of sound mind.

I am suffering from ....., which my attending physician has determined is a terminal disease and which has been medically confirmed by a consulting physician. I have been fully informed of my diagnosis, prognosis, the nature of medication to be prescribed and potential associated risks, the expected result, and the feasible

alternatives, including comfort care, hospice care, and pain control. I request that my attending physician prescribe medication that will end my life in a humane and dignified manner.

INITIAL ONE:

..... I have informed my family of my decision and taken their opinions into consideration.

..... I have decided not to inform my family of my decision.

..... I have no family to inform of my decision.

I understand that I have the right to rescind this request at any time.

I understand the full import of this request and I expect to die when I take the medication to be prescribed. I further understand that although most deaths occur within three hours, my death may take longer, and my physician has counseled me about this possibility.

I make this request voluntarily and without reservation, and I accept full moral responsibility for my actions.

Signed: .....

Dated: .....

DECLARATION OF WITNESSES

We declare that the person making and signing the above request:

(1) Is personally known to us or has provided proof of identity;

(2) Signed this request in our presence on the date of the person's signature;

(3) Appears to be of sound mind and not under duress, fraud, or undue influence;

and

(4) Is not a patient for whom either of us is the attending physician.

..... Witness 1/Date

..... Witness 2/Date

NOTE: One witness shall not be a relative (by blood, marriage, or adoption) of the person signing this request, shall not be entitled to any portion of the person's estate upon death, and shall not own, operate, or be employed at a health care facility where the person is a patient or resident. If the patient is an inpatient at a health care facility, one of the witnesses shall be an individual designated by the facility.

Section 22

1. Any person who, without authorization of the principal, willfully alters, forges, conceals, or destroys an instrument, the reinstatement or revocation of an instrument, or any other evidence or document reflecting the principal's desires and interests with the intent and effect of causing a withholding or withdrawal of life-sustaining procedures or of artificially administered nutrition and hydration which hastens the death of the principal is guilty of a class A felony.

2. Except as provided in subsection 1 of this section, any person who, without authorization of the principal, willfully alters, forges, conceals, or destroys an instrument, the reinstatement or revocation of an instrument, or any other evidence or document reflecting the principal's desires and interests with the intent and effect of affecting a health care decision is guilty of a class A misdemeanor.

RE: Petition approval request from Charles Jones regarding a proposed constitutional amendment to Article IV (2018-126)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Charles Jones on January 17, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

This measure amends the Missouri Constitution by adding Section 54 to Article IV. This amendment implicitly repeals, in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105.1, 105.1108.1, 105.1112.1, 195.0010.1, 196.0100.1, 263.0250.1, 577.0024.1, 579.0015.1, 579.0020.1, 579.0030.1, 579.0055.1, 579.0065.1, 579.0068.1, and 579.0105.1.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

One new section is adopted to be known as Article IV, Section 54 and to read as follows:

1. Cannabis shall immediately be removed from the Missouri list of controlled substances and shall no longer be listed among Missouri's drug schedules.

2. Definitions: cannabis and cannabis hemp refer to Cannabis, Marijuana, Cannabis Sativa, Cannabis Indica, Cannabis Ruderalis or any variety of cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof.
a. Medical cannabis refers to physician recommended use.
b. Personal use refers to any use not recommended by physician.
c. Cannabis accessories means any equipment, products or materials of any kind that are used or intended for use planting, propagating, cultivating, growing, harvesting, manufacturing, compounding , converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing cannabis or for ingesting, inhaling, vaporizing, smoking or otherwise introducing cannabis into or onto the human body.
d. Establishment refers to a cannabis cultivation facility, a cannabis manufacturing facility or retail store or other entity that cultivates, prepares, manufactures, packages, transports, or sells cannabis products or accessories.
e. Minor refers to anyone under the age 18.

3. Cannabis or its products shall not be sold to anyone under the age 18. Anyone under the age of 18 shall have access to cannabis through physician recommendation or consent from parent/legal guardian.
a. No minor shall be criminally prosecuted for possession of cannabis or its products.

4. The following acts are not unlawful and shall not be an offense under Missouri law
a. Possession of cannabis for personal or medical use.
b. Cultivating cannabis for personal or medical use, to obey zoning restrictions.
c. Cultivating, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes, provided the person has current applicable licenses to run a business in Missouri.
d. Providing cannabis, cannabis accessories and products for sale to consumers. Any product to be sold to public must be tested for purity and weight.
e. Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs (a) through (e) of this section.
f. The possession of cannabis is not to be the sole reason for issuing a D.U.I. (driving under the influence), arrest or fines when operating a motor vehicle.

5. Patient rights: Cannabis shall be available to all patients regardless of age, without taxation when physician recommended.

6. All prisoners that have been incarcerated for nonviolent cannabis related crimes shall immediately be released and all charges for cannabis crimes expunged.
a. Within 60 days of passage of this act, the attorney general's office shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis related non-violent civil and criminal records in Missouri, to be distributed to all circuit court judges within the state.

7. No state or federal funds shall be used to enforce federal laws which are no longer illegal in the state of Missouri.
a. Any person who willfully impedes the lawful exercise of these provisions is guilty of a class A misdemeanor.

8. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirements, licensing fee that is discriminant, prohibitive, or in any way contrary to that which is relative to any other commercial or agriculture farmer, manufacturer, processor or distributor.

9. Pursuant to the ninth and tenth amendments to the Constitution of the United States, the people of Missouri hereby repudiate and challenge federal cannabis prohibitions that conflict with this act.

10. All provisions of this section are self-executing and severable and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance or resolution.

11. If any rival or conflicting initiative regulating any matter addressed by this act receives the higher affirmative vote, then all non-conflicting parts shall become operative.

12. The dictates of this Initiative shall be implemented no later than April 20th following the election that placed this initiative before the people.

RE: Petition approval request from Damien Johnson regarding a proposed constitutional amendment to Article I (2018-125)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Damien Johnson on January 11, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

This measure amends Article X section 26 of the Missouri Constitution by deleting all matters within the enclosed brackets and adding all the underlined matters as required pursuant to Section 116.050 RSMo.

Prohibition on new or local sales, use, or other similar transaction-based tax not [subject to such tax as of January 1, 2015]approved by voters. Mandate voter approval before funding or financing sport facilities.

Section 26.

A. In order to prohibit an increase in the tax burden on the citizens of Missouri without voter approval, state and local sales and use taxes (or any similar transaction-based tax) shall not be expanded to impose taxes on any service or transaction that was [not subject to sales, use or similar transaction-based tax on January 1, 2015.] approved by voters.

B. Prohibit funding of sports and entertainment stadiums, centers recreation center or facilities without voter approval.

C. Prohibit expansion, extending, modifying, or amending current or future bonds, tax credits, without voter approval.

D. All provisions of this section are self-executing and severable, and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.

All provisions shall take effect immediately upon passage.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-124)

Subject

Initiative petition from Damien Johnson regarding a proposed constitutional amendment to Article X. (Received January 11, 2017)

Date

January 31, 2017

Description

This proposal would amend Article X of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb

the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department. They also indicated that they think Section 26 A is supposed to say "that was **not** approved by voters."

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this petition will have no fiscal impact on their department.

Officials from the **Department of Public Safety** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their agency.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no fiscal impact.

Officials from the **Office of Administration (OA)** indicated this proposal amends Article X, Section 26 by mandating voter approval before funding or financing sports facilities and before imposing taxes on any service or transaction.

- Subsection A prohibits the imposition of state and local taxes on any services or transactions that were approved by voters instead of the current language which prohibits taxes on any service or transaction that was not subject to sales, use or similar transaction-based tax on January 1, 2015. Budget and Planning does not have enough information to estimate the fiscal impact of this provision, however, it could have a significant negative fiscal impact on the state and local taxing authorities.

- Subsection C prohibits expansion, extension modification or amending current or future bonds, or tax credits without voter approval. The intent of this provision is unclear. A broad interpretation would be that provision C would not allow refunding transactions (which save tax payer money by reducing debt service without substantive changes to principal payments or dates) on any bonds (not just sports stadiums) without voter approval (which would be unlikely to obtain in a timely manner to execute the transaction before the markets changes). An even broader but reasonable interpretation would be that no changes to any existing bond documents could be made regardless of how trivial. This could present challenges in managing the state's current debt and could result in higher debt service costs for the state. In regards to the reference to tax credits, this could be interpreted to mean that the state could not take any action on any existing tax credit program without a vote of the people. This means the program could not be extended or ended, caps could not be lowered or raised, and other program changes such as limiting the transferability of credits could not be implemented by the General Assembly without a vote of the people.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had

historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **University of Missouri** indicated this initiative petition will have a fiscal impact on their university of under $100,000.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia**, the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College,** and **St. Louis Community College**.

Fiscal Note Summary

The proposal could have a significant negative fiscal impact on the state and local governmental entities. The amount of the impact is unknown.

RE: Petition approval request from Damien Johnson regarding a proposed constitutional amendment to Article I (2018-121)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Damien Johnson on January 10, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

35 of Article I of the Constitution of Missouri is amended by modifying section 35. The existing section 35 is set forth hereinafter with the new matter bold and deleted matter in brackets,

Definitions of terms, as used in this Act:

a) Cannabis: refers to the cannabis, marihuana, marijuana, cannabis, sativa, cannabis indica, cannabis ruderalis, or any variety of cannabis, including but not limited to, derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof

b) Hemp: The fiber of this plant, extracted from the stem and used to make rope, fabrics, fiberboard, clothing, and paper. The sister plant of cannabis

That agriculture which provides food, energy, health benefits, and security is the foundation and stabilizing force of Missouri's economy. To protect this vital sector of Missouri's economy, the right of farmers and ranchers to engage in farming and ranching practices, including but not limited to the right to grow cannabis and hemp, shall be forever guaranteed in this state, subject to duly authorized powers, if any, conferred by article VI of the Constitution of Missouri.

BE IT ENACTED BY THE PEOPLE OF THE STATE OF MISSOURI:

The proposed initiative will amend Chapter 191 of Missouri Revised Statutes by adding twenty-two new sections.

These twenty-two sections shall be known and cited as the "Missouri Death with Dignity Act".

Section 1.

In said sections, the following terms shall mean:

(1) "Adult", any individual who is eighteen years of age or older.

(2) "Attending physician", the physician who has primary responsibility for the care of the patient and treatment of the patient's terminal disease.

(3) "Capable", in the opinion of a court or in the opinion of the patient's attending physician or consulting physician, psychiatrist or psychologist, a patient has the ability to make and communicate health care decisions to health care providers, including communication through persons familiar with the patient's manner of communicating if those persons are available.

(4) "Consulting physician", a physician who is qualified by specialty or experience to make a professional diagnosis and prognosis regarding the patient's disease.

(5) "Counseling", one or more consultations as necessary between a state licensed psychiatrist or psychologist and a patient for the purpose of determining that the patient is capable and not suffering from a psychiatric or psychological disorder or depression causing impaired judgment.

(6) "Health care provider", a person licensed, certified or otherwise authorized or permitted by the law of this state to administer health care or dispense medication in the ordinary course of business or practice of a profession, and includes a health care facility.

(7) "Informed decision", a decision by a qualified patient, to request and obtain a prescription to end his or her life in a humane and dignified manner, that is based on an appreciation of the relevant facts and after being fully informed by the attending physician of:

a. His or her medical diagnosis;

b. His or her prognosis;

c. The potential risks associated with taking the medication to be prescribed;

d. The probable result of taking the medication to be prescribed; and

e. The feasible alternatives, including, but not limited to, comfort care, hospice care and pain control.

(8) "Medically confirmed", the medical opinion of the attending physician has been confirmed by a consulting physician who has examined the patient and the patient's relevant medical records.

(9) "Patient", a person who is under the care of a physician.

(10) "Physician", a doctor of medicine or osteopathy licensed to practice medicine in the state of Missouri

(11) "qualified patient", a capable adult who is a resident of this state and has satisfied the requirements of this initiative in order to obtain a prescription for medication to end his or her life in a humane and dignified manner.

(12) "Terminal disease", an incurable and irreversible disease that has been medically confirmed and shall, within reasonable medical judgment, produce death within six months.

Section 2.

1. An adult who:
   a. Is capable;
   b. Is a residence of this state;
   c. Has been determined by the attending physician and consulting physician to be suffering from a terminal disease; and
   d. Has voluntarily expressed his or her wish to die;

may make a written request for medication for the purpose of ending his or her life in a humane and dignified manner in accordance with this initiative.

2. No person shall qualify under this initiative solely because of age or disability.

Section 3.

1. A valid request for medication under this initiative shall be in substantially the form described in section 20, signed and dated by the patient, and witnessed by at least two individuals who, in the presence of the patient, attest that to the best of their knowledge and belief the patient is capable, acting voluntarily, and is not being coerced to sign the request.
2. One of the witnesses shall be a person who is not:
   a. A relative of the patient by blood, marriage, or adoption;
   b. A person, who at the time the request is signed, would be entitled to any portion of the estate of the qualified patient upon death under any will or by operation of law; or
   c. An owner, operator, or employee of a health care facility where the qualified patient is receiving medical treatment or is a resident
3. The patient's attending physician at the time the request is signed shall not be a witness.

If the patient is in a long-term care facility at the time the written request is made, one of the witnesses shall be an individual designated by the facility and having the qualifications specified by the department of health and senior services by rule.

Section 4

1. The attending physician shall:
   A. Make the initial determination of whether a patient has a terminal disease, is capable, and has made the request voluntarily;
   B. Request that the patient demonstrate Missouri state residency under section 13;
   C. To ensure that the patient is making an informed decision, inform the patient of:
      a. His or her medical diagnosis;
      b. His or her prognosis;
      c. The potential risks associated with taking the medication to be prescribed;
      d. The probable result of taking the medication to be prescribed; and
      e. The feasible alternatives including, but not limited to, comfort care, hospice care, and pain control;
   D. Refer the patient to a consulting physician for medical confirmation of the diagnosis and for a determination that the patient is capable and acting voluntarily;
   E. Refer the patient for counseling if appropriate under section 6;
   F. Recommend that the patient notify next of kin;
   G. Counsel the patient about the importance of having another person present when the patient takes the medication prescribed under this legislation and of not taking the medication in a public place;
   H. Inform the patient that he or she has an opportunity to rescind the request at any time and in any manner, and offer the patient an opportunity to rescind at the end of the fifteen-day waiting period under section 9;
   I. Verify, immediately before writing the prescription for medication under this initiative, that the patient is making an informed decision;
   J. Fulfill the medical record documentation requirements of section 12;
   K. Ensure that all appropriate steps are carried out in accordance with this initiative prior to writing a prescription for medication to enable a qualified patient to end his or her life in a humane and dignified manner; and
   L. I. Dispense medications directly, including ancillary medications intended to facilitate the desired effect to minimize the patient's discomfort, provided that the attending physician is authorized under state law and rule to dispense, has a current drug enforcement administration certificate, and complies with any applicable administrative rule; or

      II. With the patient's written consent:

      a. Contact a pharmacist and inform the pharmacist of the prescription; and

      b. Deliver the written prescription personally, by mail, or facsimile to the pharmacist, who shall dispense the medications to either the patient, the attending physician, or an expressly identified agent of the patient.

2. Notwithstanding any other provision of law, the attending physician may sign the patient's death certificate.

Section 5

Before a patient is qualified under this initiative, a consulting physician shall examine the patient and his or her relevant medical records and confirm in writing the attending physician's diagnosis that the patient is suffering from a terminal disease and verify that the patient is capable, is acting voluntarily, and has made an informed decision.

Section 6

If, in the opinion of the attending physician or the consulting physician, a patient may be suffering from a psychiatric or psychological disorder or depression causing impaired judgment, either physician shall refer the patient for counseling. No medication to end a patient's life in a humane and dignified manner shall be prescribed until the person performing the counseling determines that the patient is not suffering from a psychiatric or psychological disorder or depression causing impaired judgment.

Section 7

No person shall receive a prescription for medication to end his or her life in a humane and dignified manner unless he or she has made an informed decision, as defined in section 1. Immediately prior to writing a prescription for medication under this initiative, the attending physician shall verify that the qualified patient is making an informed decision.

Section 8

The attending physician shall recommend that the patient notify the next of kin of his or her request for medication under this initiative. A patient who declines or is unable to notify next of kin shall not have his or her request denied for that reason.

Section 9

In order to receive a prescription for medication to end his or her life in a humane and dignified manner, a qualified patient shall have made an oral request and a written request and reiterate the oral request to his or her attending physician at least fifteen days after making the initial oral request. At the time the qualified patient makes his or her second oral request, the attending physician shall offer the qualified patient an opportunity to rescind the request.

Section 10

A patient may rescind his or her request at any time and in any manner without regard to his or her mental state. No prescription for medication under this initiative shall be written without the attending physician offering the qualified patient an opportunity to rescind the request.

Section 11

No less than fifteen days shall elapse between the patient's initial oral request and the writing of a prescription under this initiative. No less than forty-eight hours shall elapse between the date of the patient's written request and the writing of a prescription under this initiative.

Section 12

The following shall be documented or filed in the patient's medical record:

(1) All oral requests made by the patient for medication to end his or her life in a humane and dignified manner;

(2) All written requests made by the patient for medication to end his or her life in a humane and dignified manner;

(3) The attending physician's diagnosis and prognosis and determination that the patient is capable, is acting voluntarily, and has made an informed decision;

(4) The consulting physician's diagnosis and prognosis and verification that the patient is capable, is acting voluntarily, and has made an informed decision;

(5) A report of the outcome and determinations made during counseling, if performed;

(6) The attending physician's offer to the patient to rescind his or her request at the time of the patient's second oral request under section 9; and

(7) A note by the attending physician indicating that all requirements under this initiative have been met and indicating the steps taken to carry out the request including a notation of the medication prescribed.

Section 13

Only requests made by Missouri residents under this initiative shall be granted. Factors demonstrating Missouri residency include, but are not limited to:

(1) Possession of a Missouri driver's license;

(2) Registration to vote in Missouri;

(3) Evidence that the person owns or leases property in Missouri; or

(4) Filing of a Missouri tax return for the most recent tax year.

Section 14

1. a. The department of health and senior services shall annually review all records maintained under this initiative.
   b. The department of health and senior services shall require any health care provider upon dispensing medication under this initiative to file a copy of the dispensing record with the department.

2. The department of health and senior services shall adopt rules to facilitate the collection of information regarding compliance with this initiative. Except as otherwise required by law, the information collected shall not be a public record and shall not be made available for inspection by the public.

3. The department of health and senior services shall generate and make available to the public an annual statistical report of information collected under subsection 2 of this section.

Section 15

1. No provision in a contract, will, or other agreement, whether written or oral, to the extent the provision would affect whether a person may make or rescind a request for medication to end his or her life in a humane and dignified manner, shall be valid.

2. No obligation owing under any currently existing contract shall be conditioned or affected by the making or rescinding of a request by a person for medication to end his or her life in a humane and dignified manner.

Section 16

The sale, procurement, or issuance of any life, health, or accident insurance or annuity policy or the rate charged for any policy shall not be conditioned upon or affected by the making or rescinding of a request by a person for medication to end his or her life in a humane and dignified manner. A qualified patient's act of ingesting medication to end his or her life in a humane and dignified manner shall not have an effect upon a life, health, or accident insurance or annuity policy.

Section 17

Nothing is this initiative shall be construed to authorize a physician or any other person to end a patient's life by lethal injection, mercy killing, or active euthanasia. Actions taken in accordance with this initiative shall not for any purpose constitute suicide, assisted suicide, mercy killing, or homicide under the law.

Section 18

1. Except as provided in subsection 2 of this section and section 20:
   a. No person shall be subject to civil or criminal liability or professional disciplinary action for participating in good faith compliance with this initiative including being present when a qualified patient takes the prescribed medication to end his or her life in a humane and dignified manner;
   b. No professional organization or association or health care provider shall subject a person to censure, discipline, suspension, loss of license, loss of privileges, loss of membership, or other penalty for participating or refusing to participate in good faith compliance with this initiative;
   c. No request by a patient for or provision by an attending physician of medication in good faith compliance with this initiative shall constitute neglect for any purpose of law or provide the sole basis for the appointment of a guardian or conservator; and
   d. No health care provider shall be under any duty, whether by contract, statute, or any other legal requirement to participate in the provision to a qualified patient of medication to end his or her life in a humane and dignified manner. If a health care provider is unable or unwilling to carry out a patient's request under this initiative and the patient transfers his or her care to a new health care provider, the prior health care provider shall, upon request, transfer a copy of the patient's relevant medical records to the new health care provider.

2. (1) Notwithstanding any other provision of law, a health care provider may prohibit another health care provider from participating under the Missouri death with dignity act on the premises of the prohibiting provider if the prohibiting provider has notified the health care provider of the prohibiting provider's policy regarding participation in the Missouri death with dignity act. Nothing in this subdivision shall prevent a health care provider from providing health care services to a patient that do not constitute participation in the Missouri death with dignity act.
   (2) Notwithstanding the provisions of subsection 1 of this section, a health care provider may subject another health care provider to the following sanctions if the sanctioning health care provider has notified the sanctioning provider prior to participation under this initiative that it prohibits participation in the Missouri death with dignity act:
   (a) Loss of privileges, loss of membership, or other sanctions provided under the medical staff bylaws, policies, and procedures of the sanctioning health care provider if the sanctioned provider is a member of the sanctioning provider's medical staff and participates under the Missouri death with dignity act while on the health care facility premises of the sanctioning health care provider, but not including the private medical office of a physician or other provider;
   (b) Termination of a lease or other property contract or other nonmonetary remedies provided by a lease contract, not including loss or restriction of medical staff privileges or exclusion from a provider panel, if the sanctioned provider participates under the Missouri death with dignity act while on the premises of the sanctioning health care provider or on property that is owned by or under the direct control of the sanctioning health care provider; or

(c) Termination of a contract or other nonmonetary remedies provided by contract if the sanctioned provider participates under the Missouri death with dignity act while acting in the course and scope of the sanctioned provider's capacity as an employee or independent contractor of the sanctioning health care provider. Nothing in this paragraph shall be construed to prevent:

a. A health care provider from participating under the Missouri death with dignity act while acting outside the course and scope of the provider's capacity as an employee or independent contractor; or

b. A patient from contracting with his or her attending physician and consulting physician to act outside the course and scope of the provider's capacity as an employee or independent contractor of the sanctioning health care provider.

(3) A health care provider that imposes sanctions under subdivision (2) of this subsection shall follow all due process and other procedures the sanctioning health care provider may have that are related to the imposition of sanctions on another health care provider.

(4) For the purposes of this subsection, the following terms shall mean:

(a) "Notify", a separate statement in writing to the health care provider specifically informing the health care provider before the provider's participation under the Missouri death with dignity act of the sanctioning health care provider's policy about participation in activities covered by the Missouri death with dignity act;

(b) "Participate under the Missouri death with dignity act", to perform the duties of an attending physician under section 5, the consulting physician function under section 5, or the counseling function under section 6. Participate under the Missouri death with dignity act does not include:

a. Making an initial determination that a patient has a terminal disease and informing the patient of the medical prognosis;

b. Providing information about the Missouri death with dignity act to a patient upon the request of the patient;

c. Providing a patient, upon the request of the patient, with a referral to another physician; or

d. A patient contracting with his or her attending physician and consulting physician to act outside of the course and scope of the provider's capacity as an employee or independent contractor of the sanctioning health care provider.

3. Suspension or termination of staff membership or privileges under subsection 2 of this section is not reportable to the department or state board of registration for the healing arts. Action taken under sections 3 to 6 shall not be the sole basis for a report of unprofessional conduct.

4. No provision of this initiative shall be construed to allow a lower standard of care for patients in the community where the patient is treated or a similar community.

Section 19

1. A person, who without authorization of the patient, willfully alters or forges a request for medication or conceals or destroys a rescission of that request with the intent or effect of causing the patient's death is guilty of a class A felony.

2. A person who coerces or exerts undue influence on a patient to request medication to end the patient's life or to destroy a rescission of a request is guilty of a class A felony.

3. Nothing in this initiative shall limit further liability for civil damages resulting from other negligent conduct or intentional misconduct by any person.

4. The penalties in this initiative do not preclude criminal penalties applicable under other law for conduct that is inconsistent with this initiative.

Section 20

Any governmental entity that incurs costs resulting from a person terminating his or her life under this initiative in a public place has a claim against the estate of the person to recover such costs and reasonable attorneys' fees related to enforcing the claim.

Section 21

A request for a medication as authorized by this initiative shall be in substantially the following form:

REQUEST FOR MEDICATION TO END MY LIFE

IN A HUMANE AND DIGNIFIED MANNER

I, ..., am an adult of sound mind.

I am suffering from ....., which my attending physician has determined is a terminal disease and which has been medically confirmed by a consulting physician. I have been fully informed of my diagnosis, prognosis, the nature of medication to be prescribed and potential associated risks, the expected result, and the feasible

alternatives, including comfort care, hospice care, and pain control. I request that my attending physician prescribe medication that will end my life in a humane and dignified manner.

INITIAL ONE:

..... I have informed my family of my decision and taken their opinions into consideration.

..... I have decided not to inform my family of my decision.

..... I have no family to inform of my decision.

I understand that I have the right to rescind this request at any time.

I understand the full import of this request and I expect to die when I take the medication to be prescribed. I further understand that although most deaths occur within three hours, my death may take longer, and my physician has counseled me about this possibility.

I make this request voluntarily and without reservation, and I accept full moral responsibility for my actions.

Signed: .....

Dated: .....

DECLARATION OF WITNESSES

We declare that the person making and signing the above request:

(1) Is personally known to us or has provided proof of identity;

(2) Signed this request in our presence on the date of the person's signature;

(3) Appears to be of sound mind and not under duress, fraud, or undue influence;

and

(4) Is not a patient for whom either of us is the attending physician.

..... Witness 1/Date

..... Witness 2/Date

NOTE: One witness shall not be a relative (by blood, marriage, or adoption) of the person signing this request, shall not be entitled to any portion of the person's estate upon death, and shall not own, operate, or be employed at a health care facility where the person is a patient or resident. If the patient is an inpatient at a health care facility, one of the witnesses shall be an individual designated by the facility.

Section 22

1. Any person who, without authorization of the principal, willfully alters, forges, conceals, or destroys an instrument, the reinstatement or revocation of an instrument, or any other evidence or document reflecting the principal's desires and interests with the intent and effect of causing a withholding or withdrawal of life-sustaining procedures or of artificially administered nutrition and hydration which hastens the death of the principal is guilty of a class A felony.

2. Except as provided in subsection 1 of this section, any person who, without authorization of the principal, willfully alters, forges, conceals, or destroys an instrument, the reinstatement or revocation of an instrument, or any other evidence or document reflecting the principal's desires and interests with the intent and effect of affecting a health care decision is guilty of a class A misdemeanor.

RE: Petition approval request from Natalie Meyer regarding a proposed statutory amendment to Chapter 191 (2018-119)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Natalie Meyer on January 3, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

My commission expires _____.

BE IT ENACTED BY THE PEOPLE OF THE STATE OF MISSOURI:

The proposed initiative will amend Chapter 191 of Missouri Revised Statutes by adding twenty-two new sections.

These twenty-two sections shall be known and cited as the "Missouri Death with Dignity Act".

Section 1.

In said sections, the following terms shall mean:

(1) "Adult", any individual who is eighteen years of age or older.

(2) "Attending physician", the physician who has primary responsibility for the care of the patient and treatment of the patient's terminal disease.

(3) "Capable", in the opinion of a court or in the opinion of the patient's attending physician or consulting physician, psychiatrist or psychologist, a patient has the ability to make and communicate health care decisions to health care providers, including communication through persons familiar with the patient's manner of communicating if those persons are available.

(4) "Consulting physician", a physician who is qualified by specialty or experience to make a professional diagnosis and prognosis regarding the patient's disease.

(5) "Counseling", one or more consultations as necessary between a state licensed psychiatrist or psychologist and a patient for the purpose of determining that the patient is capable and not suffering from a psychiatric or psychological disorder or depression causing impaired judgment.

(6) "Health care provider", a person licensed, certified or otherwise authorized or permitted by the law of this state to administer health care or dispense medication in the ordinary course of business or practice of a profession, and includes a health care facility.

(7) "Informed decision", a decision by a qualified patient, to request and obtain a prescription to end his or her life in a humane and dignified manner, that is based on an appreciation of the relevant facts and after being fully informed by the attending physician of:

a. His or her medical diagnosis;

b. His or her prognosis;

c. The potential risks associated with taking the medication to be prescribed;

d. The probable result of taking the medication to be prescribed; and

e. The feasible alternatives, including, but not limited to, comfort care, hospice care and pain control.

(8) "Medically confirmed", the medical opinion of the attending physician has been confirmed by a consulting physician who has examined the patient and the patient's relevant medical records.

(9) "Patient", a person who is under the care of a physician.

(10) "Physician", a doctor of medicine or osteopathy licensed to practice medicine in the state of Missouri

(11) "qualified patient", a capable adult who is a resident of this state and has satisfied the requirements of this initiative in order to obtain a prescription for medication to end his or her life in a humane and dignified manner.

(12) "Terminal disease", an incurable and irreversible disease that has been medically confirmed and shall, within reasonable medical judgment, produce death within six months.

Section 2.

1. An adult who:
   a. Is capable;
   b. Is a residence of this state;
   c. Has been determined by the attending physician and consulting physician to be suffering from a terminal disease; and
   d. Has voluntarily expressed his or her wish to die;

may make a written request for medication for the purpose of ending his or her life in a humane and dignified manner in accordance with this initiative.

2. No person shall qualify under this initiative solely because of age or disability.

Section 3.

1. A valid request for medication under this initiative shall be in substantially the form described in section 20, signed and dated by the patient, and witnessed by at least two individuals who, in the presence of the patient, attest that to the best of their knowledge and belief the patient is capable, acting voluntarily, and is not being coerced to sign the request.
2. One of the witnesses shall be a person who is not:
   a. A relative of the patient by blood, marriage, or adoption;
   b. A person, who at the time the request is signed, would be entitled to any portion of the estate of the qualified patient upon death under any will or by operation of law; or
   c. An owner, operator, or employee of a health care facility where the qualified patient is receiving medical treatment or is a resident
3. The patient's attending physician at the time the request is signed shall not be a witness.

If the patient is in a long-term care facility at the time the written request is made, one of the witnesses shall be an individual designated by the facility and having the qualifications specified by the department of health and senior services by rule.

Section 4

1. The attending physician shall:
   A. Make the initial determination of whether a patient has a terminal disease, is capable, and has made the request voluntarily;
   B. Request that the patient demonstrate Missouri state residency under section 13;
   C. To ensure that the patient is making an informed decision, inform the patient of:
      a. His or her medical diagnosis;
      b. His or her prognosis;
      c. The potential risks associated with taking the medication to be prescribed;
      d. The probable result of taking the medication to be prescribed; and
      e. The feasible alternatives including, but not limited to, comfort care, hospice care, and pain control;
   D. Refer the patient to a consulting physician for medical confirmation of the diagnosis and for a determination that the patient is capable and acting voluntarily;
   E. Refer the patient for counseling if appropriate under section 6;
   F. Recommend that the patient notify next of kin;
   G. Counsel the patient about the importance of having another person present when the patient takes the medication prescribed under this legislation and of not taking the medication in a public place;
   H. Inform the patient that he or she has an opportunity to rescind the request at any time and in any manner, and offer the patient an opportunity to rescind at the end of the fifteen-day waiting period under section 9;
   I. Verify, immediately before writing the prescription for medication under this initiative, that the patient is making an informed decision;
   J. Fulfill the medical record documentation requirements of section 12;
   K. Ensure that all appropriate steps are carried out in accordance with this initiative prior to writing a prescription for medication to enable a qualified patient to end his or her life in a humane and dignified manner; and
   L. I. Dispense medications directly, including ancillary medications intended to facilitate the desired effect to minimize the patient's discomfort, provided that the attending physician is authorized under state law and rule to dispense, has a current drug enforcement administration certificate, and complies with any applicable administrative rule; or
   II. With the patient's written consent:
      a. Contact a pharmacist and inform the pharmacist of the prescription; and
      b. Deliver the written prescription personally, by mail, or facsimile to the pharmacist, who shall dispense the medications to either the patient, the attending physician, or an expressly identified agent of the patient.

2. Notwithstanding any other provision of law, the attending physician may sign the patient's death certificate.

Section 5

Before a patient is qualified under this initiative, a consulting physician shall examine the patient and his or her relevant medical records and confirm in writing the attending physician's diagnosis that the patient is suffering from a terminal disease and verify that the patient is capable, is acting voluntarily, and has made an informed decision.

Section 6

If, in the opinion of the attending physician or the consulting physician, a patient may be suffering from a psychiatric or psychological disorder or depression causing impaired judgment, either physician shall refer the patient for counseling. No medication to end a patient's life in a humane and dignified manner shall be prescribed until the person performing the counseling determines that the patient is not suffering from a psychiatric or psychological disorder or depression causing impaired judgment.

Section 7

No person shall receive a prescription for medication to end his or her life in a humane and dignified manner unless he or she has made an informed decision, as defined in section 1. Immediately prior to writing a prescription for medication under this initiative, the attending physician shall verify that the qualified patient is making an informed decision.

Section 8

The attending physician shall recommend that the patient notify the next of kin of his or her request for medication under this initiative. A patient who declines or is unable to notify next of kin shall not have his or her request denied for that reason.

Section 9

In order to receive a prescription for medication to end his or her life in a humane and dignified manner, a qualified patient shall have made an oral request and a written request and reiterate the oral request to his or her attending physician at least fifteen days after making the initial oral request. At the time the qualified patient makes his or her second oral request, the attending physician shall offer the qualified patient an opportunity to rescind the request.

Section 10

A patient may rescind his or her request at any time and in any manner without regard to his or her mental state. No prescription for medication under this initiative shall be written without the attending physician offering the qualified patient an opportunity to rescind the request.

Section 11

No less than fifteen days shall elapse between the patient's initial oral request and the writing of a prescription under this initiative. No less than forty-eight hours shall elapse between the date of the patient's written request and the writing of a prescription under this initiative.

Section 12

The following shall be documented or filed in the patient's medical record:

(1) All oral requests made by the patient for medication to end his or her life in a humane and dignified manner;

(2) All written requests made by the patient for medication to end his or her life in a humane and dignified manner;

(3) The attending physician's diagnosis and prognosis and determination that the patient is capable, is acting voluntarily, and has made an informed decision;

(4) The consulting physician's diagnosis and prognosis and verification that the patient is capable, is acting voluntarily, and has made an informed decision;

(5) A report of the outcome and determinations made during counseling, if performed;

(6) The attending physician's offer to the patient to rescind his or her request at the time of the patient's second oral request under section 9; and

(7) A note by the attending physician indicating that all requirements under this initiative have been met and indicating the steps taken to carry out the request including a notation of the medication prescribed.

Section 13

Only requests made by Missouri residents under this initiative shall be granted. Factors demonstrating Missouri residency include, but are not limited to:

(1) Possession of a Missouri driver's license;

(2) Registration to vote in Missouri;

(3) Evidence that the person owns or leases property in Missouri; or

(4) Filing of a Missouri tax return for the most recent tax year.

Section 14

1. a. The department of health and senior services shall annually review all records maintained under this initiative.
   b. The department of health and senior services shall require any health care provider upon dispensing medication under this initiative to file a copy of the dispensing record with the department.

2. The department of health and senior services shall adopt rules to facilitate the collection of information regarding compliance with this initiative. Except as otherwise required by law, the information collected shall not be a public record and shall not be made available for inspection by the public.

3. The department of health and senior services shall generate and make available to the public an annual statistical report of information collected under subsection 2 of this section.

Section 15

1. No provision in a contract, will, or other agreement, whether written or oral, to the extent the provision would affect whether a person may make or rescind a request for medication to end his or her life in a humane and dignified manner, shall be valid.

2. No obligation owing under any currently existing contract shall be conditioned or affected by the making or rescinding of a request by a person for medication to end his or her life in a humane and dignified manner.

Section 16

The sale, procurement, or issuance of any life, health, or accident insurance or annuity policy or the rate charged for any policy shall not be conditioned upon or affected by the making or rescinding of a request by a person for medication to end his or her life in a humane and dignified manner. A qualified patient's act of ingesting medication to end his or her life in a humane and dignified manner shall not have an effect upon a life, health, or accident insurance or annuity policy.

Section 17

Nothing is this initiative shall be construed to authorize a physician or any other person to end a patient's life by lethal injection, mercy killing, or active euthanasia. Actions taken in accordance with this initiative shall not for any purpose constitute suicide, assisted suicide, mercy killing, or homicide under the law.

Section 18

1. Except as provided in subsection 2 of this section and section 20:
   a. No person shall be subject to civil or criminal liability or professional disciplinary action for participating in good faith compliance with this initiative including being present when a qualified patient takes the prescribed medication to end his or her life in a humane and dignified manner;
   b. No professional organization or association or health care provider shall subject a person to censure, discipline, suspension, loss of license, loss of privileges, loss of membership, or other penalty for participating or refusing to participate in good faith compliance with this initiative;
   c. No request by a patient for or provision by an attending physician of medication in good faith compliance with this initiative shall constitute neglect for any purpose of law or provide the sole basis for the appointment of a guardian or conservator; and
   d. No health care provider shall be under any duty, whether by contract, statute, or any other legal requirement to participate in the provision to a qualified patient of medication to end his or her life in a humane and dignified manner. If a health care provider is unable or unwilling to carry out a patient's request under this initiative and the patient transfers his or her care to a new health care provider, the prior health care provider shall, upon request, transfer a copy of the patient's relevant medical records to the new health care provider.

2. (1) Notwithstanding any other provision of law, a health care provider may prohibit another health care provider from participating under the Missouri death with dignity act on the premises of the prohibiting provider if the prohibiting provider has notified the health care provider of the prohibiting provider's policy regarding participation in the Missouri death with dignity act. Nothing in this subdivision shall prevent a health care provider from providing health care services to a patient that do not constitute participation in the Missouri death with dignity act.
   (2) Notwithstanding the provisions of subsection 1 of this section, a health care provider may subject another health care provider to the following sanctions if the sanctioning health care provider has notified the sanctioning provider prior to participation under this initiative that it prohibits participation in the Missouri death with dignity act:
   (a) Loss of privileges, loss of membership, or other sanctions provided under the medical staff bylaws, policies, and procedures of the sanctioning health care provider if the sanctioned provider is a member of the sanctioning provider's medical staff and participates under the Missouri death with dignity act while on the health care facility premises of the sanctioning health care provider, but not including the private medical office of a physician or other provider;
   (b) Termination of a lease or other property contract or other nonmonetary remedies provided by a lease contract, not including loss or restriction of medical staff privileges or exclusion from a provider panel, if the sanctioned provider participates under the Missouri death with dignity act while on the premises of the sanctioning health care provider or on property that is owned by or under the direct control of the sanctioning health care provider; or

(c) Termination of a contract or other nonmonetary remedies provided by contract if the sanctioned provider participates under the Missouri death with dignity act while acting in the course and scope of the sanctioned provider's capacity as an employee or independent contractor of the sanctioning health care provider. Nothing in this paragraph shall be construed to prevent:

a. A health care provider from participating under the Missouri death with dignity act while acting outside the course and scope of the provider's capacity as an employee or independent contractor; or

b. A patient from contracting with his or her attending physician and consulting physician to act outside the course and scope of the provider's capacity as an employee or independent contractor of the sanctioning health care provider.

(3) A health care provider that imposes sanctions under subdivision (2) of this subsection shall follow all due process and other procedures the sanctioning health care provider may have that are related to the imposition of sanctions on another health care provider.

(4) For the purposes of this subsection, the following terms shall mean:

(a) "Notify", a separate statement in writing to the health care provider specifically informing the health care provider before the provider's participation under the Missouri death with dignity act of the sanctioning health care provider's policy about participation in activities covered by the Missouri death with dignity act;

(b) "Participate under the Missouri death with dignity act", to perform the duties of an attending physician under section 5, the consulting physician function under section 5, or the counseling function under section 6. Participate under the Missouri death with dignity act does not include:

a. Making an initial determination that a patient has a terminal disease and informing the patient of the medical prognosis;

b. Providing information about the Missouri death with dignity act to a patient upon the request of the patient;

c. Providing a patient, upon the request of the patient, with a referral to another physician; or

d. A patient contracting with his or her attending physician and consulting physician to act outside of the course and scope of the provider's capacity as an employee or independent contractor of the sanctioning health care provider.

3. Suspension or termination of staff membership or privileges under subsection 2 of this section is not reportable to the department or state board of registration for the healing arts. Action taken under sections 3 to 6 shall not be the sole basis for a report of unprofessional conduct.

4. No provision of this initiative shall be construed to allow a lower standard of care for patients in the community where the patient is treated or a similar community.

Section 19

1. A person, who without authorization of the patient, willfully alters or forges a request for medication or conceals or destroys a rescission of that request with the intent or effect of causing the patient's death is guilty of a class A felony.

2. A person who coerces or exerts undue influence on a patient to request medication to end the patient's life or to destroy a rescission of a request is guilty of a class A felony.

3. Nothing in this initiative shall limit further liability for civil damages resulting from other negligent conduct or intentional misconduct by any person.

4. The penalties in this initiative do not preclude criminal penalties applicable under other law for conduct that is inconsistent with this initiative.

Section 20

Any governmental entity that incurs costs resulting from a person terminating his or her life under this initiative in a public place has a claim against the estate of the person to recover such costs and reasonable attorneys' fees related to enforcing the claim.

Section 21

A request for a medication as authorized by this initiative shall be in substantially the following form:

REQUEST FOR MEDICATION TO END MY LIFE

IN A HUMANE AND DIGNIFIED MANNER

I, ... , am an adult of sound mind.

I am suffering from ....., which my attending physician has determined is a terminal disease and which has been medically confirmed by a consulting physician. I have been fully informed of my diagnosis, prognosis, the nature of medication to be prescribed and potential associated risks, the expected result, and the feasible

alternatives, including comfort care, hospice care, and pain control. I request that my attending physician prescribe medication that will end my life in a humane and dignified manner.

INITIAL ONE:

..... I have informed my family of my decision and taken their opinions into consideration.

..... I have decided not to inform my family of my decision.

..... I have no family to inform of my decision.

I understand that I have the right to rescind this request at any time.

I understand the full import of this request and I expect to die when I take the medication to be prescribed. I further understand that although most deaths occur within three hours, my death may take longer, and my physician has counseled me about this possibility.

I make this request voluntarily and without reservation, and I accept full moral responsibility for my actions.

Signed: .....

Dated: .....

DECLARATION OF WITNESSES

We declare that the person making and signing the above request:

(1) Is personally known to us or has provided proof of identity;

(2) Signed this request in our presence on the date of the person's signature;

(3) Appears to be of sound mind and not under duress, fraud, or undue influence;

and

(4) Is not a patient for whom either of us is the attending physician.

..... Witness 1/Date

..... Witness 2/Date

NOTE: One witness shall not be a relative (by blood, marriage, or adoption) of the person signing this request, shall not be entitled to any portion of the person's estate upon death, and shall not own, operate, or be employed at a health care facility where the person is a patient or resident. If the patient is an inpatient at a health care facility, one of the witnesses shall be an individual designated by the facility.

Section 22

1. Any person who, without authorization of the principal, willfully alters, forges, conceals, or destroys an instrument, the reinstatement or revocation of an instrument, or any other evidence or document reflecting the principal's desires and interests with the intent and effect of causing a withholding or withdrawal of life-sustaining procedures or of artificially administered nutrition and hydration which hastens the death of the principal is guilty of a class A felony.

2. Except as provided in subsection 1 of this section, any person who, without authorization of the principal, willfully alters, forges, conceals, or destroys an instrument, the reinstatement or revocation of an instrument, or any other evidence or document reflecting the principal's desires and interests with the intent and effect of affecting a health care decision is guilty of a class A misdemeanor.

RE: Petition approval request from Damien Johnson regarding a proposed constitutional amendment to Article IV (2018-118)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Damien Johnson on January 3, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

Be it resolved by the people of the state of Missouri that the Constitution be amended:

This measure amends the Missouri Constitution by adding Section 54 to Article 4. This amendment implicitly repeals, in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105, 105.1108, 105.1112, 195.010.(10)(b)c,195.010.(10)(d), 195.010.(17)(m)(b), 195.010.(17)(g), 195.010.(17)(l),195.010(24), 195.015.4, 195.017.2(4)(r), 195.017.2(4)(z), 195.017.2(4)(ii),195.140.2(2), 195.202.2, 195.202.3, 195.211.2, 195.211.3, 195.211.4, 195.222.7,195.223.7, 195.223.8, 263.250.1.

1.The following shall be called the Cannabis Treatment Amendment

2. Definition of terms, as used in this Act:

a) "cannabis" and "cannabis hemp" refer to the cannabis, marihuana, marijuana, cannabis sativa, cannabis indica, cannabis ruderalis, or any variety of cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof. This Amendment shall apply to all rsmo mentioning marijuana.

b) "hemp": the fiber of this plant, extracted from the stem and used to make rope, stout fabrics, fiberboard, and paper. the sister plant of cannabis

c) "medical cannabis" refers to the medical use of cannabis.

d) "personal use" refers to the non-medical consumption of cannabis.

e) "Expungeable marijuana offense" are any convictions committed prior to this amendment.

f) "cannabis accessories" means any equipment, products, or materials of any kind that are used, intended for use, or designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing cannabis, or for ingesting, inhaling, vaporizing, smoking or otherwise introducing cannabis into and/or onto the human body.

g) "establishment" refers to a cannabis cultivation facility, a cannabis testing facility, a cannabis product manufacturing facility, or a retail cannabis store or other entity that cultivates, prepares, manufactures, packages, transports or sells cannabis, cannabis products and/or cannabis accessories.

3.The following acts are not unlawful and shall not be an offense under Missouri law or be a basis for seizer or forfeiture.

a) Possession, production, cultivation and distribution of hemp, marijuana and cannabis.

b) Cultivation, harvesting processing, manufacturing, packaging, distributing, transferring, displaying or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes provided the person has current applicable licensing to operate a commercial establishment. No special licensing will be required beyond that which is applicable for the cultivation, harvest, processing, manufacturing, packaging, distribution, transferal, display or possessing of any non-toxic food or food product.

4. The Missouri legislature may pass laws that doesn't conflict with this amendment. Medical cannabis, commonly known as marijuana, shall be available to patients who with a doctor's recommendation and Missouri Controlled Substance relating to marijuana schedule list shall change to reflect that cannabis as defined in Section two; clause a of this amendment, shall be available with a doctor's recommendation. The following acts are not unlawful and shall not be an offense under Missouri law or be a basis for seizure or forfeiture:

a) All Missouri patients engaged in cannabis treatment shall be afforded the same rights and privileges afforded to any patient treated through other pharmaceutical means.

b) Cannabis acquisition, possession, and consumption shall be permitted to patients under the age of 18 with the consent of a parent or legal guardian and through the supervision of a parent or legal custodian and a licensed physician.

c) Licensed physicians shall not be penalized for nor restricted from recommending cannabis for medical purposes to any person.

d) Opinions pertaining to, and willingness to recommend medical cannabis treatment shall not be a criteria for the licensure of physicians; no physician shall be subject to any professional licensing review or hearing as a result of recommending or approving medical cannabis therapy.

e) Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis.

f) Primary caregiver shall not be subjected to criminal or civil charges for providing cannabis to patients who been given a doctor's a medical professional.

5. Nothing in this section shall:

a) Require an employer to retain an employee who is impaired on the job by his use of cannabis.

b) Permit operation of a motor vehicle, watercraft, aircraft, train, or any transportation device of vehicle by anyone who is impaired by marijuana, cannabis or any other controlled substance.

c) Permit the transfer or sale of cannabis intended for medical treatment to a person engaged in personal use.

6. Medical dispensaries shall verify the following:

a) The patient has a notarized letter from medical professional recommendation cannabis for medical treatment.

b) If, primary caregiver, the dispensary verifies the patient and the primary caregiver.

c) The patient's 9 digit random alphabet. Dispensaries my issue a random alphabet after verifying the Doctor's Recommendation.

d) Retail cannabis products for medical use shall contain appropriate labeling, which outlines the weight and estimated potency of the product, lists all pesticides used in production, and summarizes the safe and effective use of cannabis. Labels shall not be false or misleading, and should be based on data derived from scientific study and prevailing human experience

7. The Department of Health and Human Services shall issue 9 digit random alphabet out to patients and keep records of the alphabet on a state wide registry. The registry is to verify it's a patient and it shall not be subjected to Sunshine request under rsmo chapter 610. No law enforcement agency my access the list without a warrant. Law enforcement agencies my only view a printed list but not electronically. Dispensaries shall the Register with the the Department of Health and Human Services for:

a) licensing and regulations

b) paying fees of no more than $100.00

c) to assist with the 9 digit random alphabet registry.

8. Upon the passage of this Act, all persons incarcerated or under supervision of the Missouri Board of Probation and Parole for non-violent, cannabis-only offenses which are no longer illegal for medical treatment in the State of Missouri under this Act and been convicted prior to this Act shall be immediately released and their civil and criminal records shall be expunge by the Court.

9. Any person who willfully impedes the lawful exercise of these provisions is guilty of a Class A misdemeanor.

10. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirement, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer.

manufacturer, processor or distributor. Patients are are allowed to grow cannabis for medical treatment for self. Primary caregiver are allowed to grow for their patients.
11. All provisions of this section are self-executing and severable, and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.This shall
12. become effective on December 6th 2018.

In the November general of 2020, voters shall vote to repeal the above sections 1 through 12 & replace it with the below section 13 through 25. A yes vote approve the repeal above sections 1 through 12 and replace with below sections 13 through 25. If voters fail shall to vote yes, the above sections 1 though 12 remains and voters shall vote again every four years until voters vote yes.

13.The following shall be called the Cannabis Legalization Amendment

14.Definition of terms, as used in this Act:

a) "cannabis" and "cannabis hemp" refer to the cannabis, marihuana, marijuana, cannabis sativa, cannabis indica, cannabis ruderalis, or any variety of cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof.

b) "hemp": the fiber of this plant, extracted from the stem and used to make rope, stout fabrics, fiberboard, and paper. the sister plant of cannabis

c) "medical cannabis" refers to the medical use of cannabis.

d) "personal use" refers to the non-medical consumption of cannabis.

e) "Expungeable marijuana offense" are any convictions committed prior to this amendment.

f) "cannabis accessories" means any equipment, products, or materials of any kind that are used, intended for use, or designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing cannabis, or for ingesting, inhaling, vaporizing, smoking or otherwise introducing cannabis into and/or onto the human body.

g) "establishment" refers to a cannabis cultivation facility, a cannabis testing facility, a cannabis product manufacturing facility, or a retail cannabis store or other entity that cultivates, prepares, manufactures, packages, transports or sells cannabis, cannabis products and/or cannabis accessories.

15. The Missouri legislature my pass laws that doesn't conflict with this amendment. Marijuana shall shall not be listed in Missouri Controlled Substance to reflect the change that cannabis as defined in section 14; clause a, are permitted for personal use for persons 21 of age or older and shall be available with a doctor's recommendation without an age limit. The following acts are not unlawful and shall not be an offense under Missouri law or be a basis for seizure or forfeiture.

a) Adult Possession of cannabis for personal at 21 years or older.

b) Possession, production, cultivation and distribution of hemp, marijuana and cannabis.

c) Providing cannabis, cannabis accessories, and products for sale to consumers. Retail cannabis products for medical or personal use shall contain appropriate labeling, which outlines the weight and estimated potency of the product, lists all pesticides used in production, and summarizes the safe and effective use of cannabis. Labels shall not be false or misleading, and should be based on data derived from scientific study and prevailing human experience

16. Medical cannabis shall be available to patients who have a physician's recommendation.

a) All patients engaged in cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through other pharmaceutical means.

b) Cannabis acquisition, possession, and consumption shall be permitted to patients under the age of twenty-one with the consent of a parent or legal guardian and through the supervision of a parent or legal custodian and a licensed physician.

c) Licensed physicians shall not be penalized for, nor restricted from recommending cannabis for medical purposes to any person.

d) Opinions pertaining to, and willingness to recommend medical cannabis therapy shall not be a criteria for the licensure of physicians; no physician shall be subject to any professional licensing review or hearing as a result of recommending or approving medical cannabis therapy.

e) Any individual who is a legal cannabis patient in another state shall be granted the same rights and privileges as a legal Missouri cannabis patient.

Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis.

17. Nothing in this section shall:

a) Require an employer to retain an employee who is impaired on the job by his use of cannabis.

b) Permit operation of a motor vehicle, watercraft, aircraft, train, or any transportation device of vehicle by anyone who is impaired by marijuana, cannabis or any other controlled substance.

c) Permit the transfer or sale of cannabis intended for adult use to a person younger than twenty-one years of age.

18. Forbid any individual, corporate property owner, elementary education institutions, and secondary education institutions from prohibiting the distribution, sale or cultivation of cannabis within their dwelling for medical treatment

19. The dictates of this Initiative shall be implemented no later than January 1, following the election that placed this Initiative before the people.

20. Upon the passage of this Act, all persons incarcerated or under supervision of the Missouri Board of Probation and Parole for nonviolent, cannabis-only offenses which are no longer illegal in the State of Missouri under this Act shall be immediately released.

(a) The Court shall order the immediate expungement of civil and criminal records pertaining to all non-violent cannabis only offenses which are no longer illegal in the State of Missouri under this Act.

(b) Within 60 days of the passage of this Act, The Attorney General shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis-related nonviolent civil and criminal records in Missouri and for any offense covered by this amendment. This document shall be distributed to all Circuit Court clerks within the State.

21. No Missouri law enforcement personnel or state funds shall be used to assist or aid in the enforcement of federal cannabis laws involving acts which are no longer illegal in the State of Missouri under this amendment.

22. Any person who willfully impedes the lawful exercise of these provisions is guilty of a Class A misdemeanor.

23. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirement, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor.

24. Taxes and regulations not conflicting with sections may be imposed on the production, distribution, cultivation and possession of cannabis, marijuana and hemp shall be subjected to duly authorized powers, if any, conferred by article III and VI of the Constitution of Missouri:

25. All provisions of this section are self-executing and severable, and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.

RE: Petition approval request from Charles Jones regarding a proposed constitutional amendment to Article IV (2018-117)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Charles Jones on December 30, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

Missouri Constitution Article IV

BE IT RESOLVED *by the people of the state of Missouri that the Constitution be amended:*

One new section is adopted by adding one new section to be known as section 54 of Article IV. This amendment shall implicitly repeal the following RSMo sections: [RSMo sections 105.1105; 105.1108; 105.1112; 195.010(10)(b)c; 195.010(10)(d); 195.010(17)(g); 195.010(17)(l); 195.010(24); 195.017.2(4)(r); 195.017.2(4)(w); 195.017.2(4)(ee); 195.207; 196.100; 263.250; 577.024.1(2); 579.015; 579.020; 579.030; 579.055; 579.065; 579.068; 579.105]

One new section is adopted by adding one new section to be known as section 54 of Article IV to read as follows:

Section 54.1. This section shall be known as the "Missouri Legalization and Regulation of Cannabis and Cannabis Hemp Initiative."

2. Cannabis shall immediately be removed from the Missouri list of controlled substances and shal no longer be listed among Missouri's drug schedules.

3. The following definitions shall be applied to the terms used in this section:
(1) "Cannabis" and "cannabis hemp" refer to Cannabis, Marijuana, Cannabis Sativa, Cannabis Indica, Cannabis Ruderalis or any variety of cannabis, including any derivative, concentrate, extract, flower, leaf, particle preparation, resin, root, salt, seed, stalk, stem, stem, or any product thereof.

(2). "Medical cannabis" refers to physician recommended use .

(3) "Cannabis accessories" means any equipment, products or materials of any kind that are used or intended for use, planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing cannabis or for ingesting, inhaling, vaporizing, smoking, or otherwise introducing cannabis into or onto the human body.

(4) "Establishment" refers to a cannabis cultivation facility, a cannabis manufacturing facility or retail store or other entity that cultivates, prepares, manufactures, packages, transports, or sells cannabis products or accessories.

(5) "Minor" refers to anyone under 18 years of age.

4. Cannabis or its products shall not be sold to anyone under 18 years of age. Anyone under 18 years of age shall have access to cannabis through physician recommendation or consent from parent/legal guardian.
(1) No minor shall be criminally prosecuted for possession of cannabis or its products.

5. The following acts are not unlawful and shall not be an offense under Missouri law:
(1) Possession of cannabis for personal or medical use;

(2) Cultivating cannabis for personal or medical use that obey current agricultural zoning restrictions;

(3) Cultivating, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes, provided the person has current applicable licenses to run a business in Missouri;

(4) Providing cannabis, cannabis accessories and products for sale to consumers. Any product to be sold to the public must be tested for purity and weight;

(5) Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs (1) through (5) of this subsection;

(6) The possession of cannabis is not to be the sole reason for issuing a D.U.I. (Driving under the influence), arrest or fines when operating a motor vehicle.

6. Patient rights: Cannabis shall be available to all patients regardless of age, without taxation when physician recommended.

7. Anyone currently incarcerated for nonviolent cannabis related crimes shall immediately be released and all charges for cannabis crimes expunged.
(1) Within 60 days of passage of this act, the attorney general's office shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis related non-violent civil and criminal records in Missouri, to be distributed to all circuit court judges within the state.

8. No state or federal funds shall be used to enforce federal laws which are no longer illegal in the state of Missouri.
(1) Any person who willfully impedes the lawful exercise of these provisions is guilty of a class A misdemeanor.

9. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirements or licensing fee that is discriminative, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor.

10. Pursuant to the ninth and tenth amendments to the Constitution of the United States, the people of Missouri hereby repudiate and challenge federal cannabis prohibitions that conflict with this act.

11. All provisions of this section are self-executing and severable and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state, or federal statutory, local charter, ordinance or resolution. If any provision of this section is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions of this section shall be and remain valid.

12. If any rival or conflicting initiative regulating any matter addressed by this act receives the higher affirmative vote, then all non-conflicting parts shall become operative.

13. The dictates of this initiative shall be implemented no later than April 20th following the election that placed this initiative before the people.

BE IT ENACTED BY THE PEOPLE OF THE STATE OF MISSOURI:

The proposed initiative will amend Chapter 191 of Missouri Revised Statutes by adding twenty-two new sections.

These twenty-two sections shall be known and cited as the "Missouri Death with Dignity Act".

Section 1.

In said sections, the following terms shall mean:

(1) "Adult", any individual who is eighteen years of age or older.

(2) "Attending physician", the physician who has primary responsibility for the care of the patient and treatment of the patient's terminal disease.

(3) "Capable", in the opinion of a court or in the opinion of the patient's attending physician or consulting physician, psychiatrist or psychologist, a patient has the ability to make and communicate health care decisions to health care providers, including communication through persons familiar with the patient's manner of communicating if those persons are available.

(4) "Consulting physician", a physician who is qualified by specialty or experience to make a professional diagnosis and prognosis regarding the patient's disease.

(5) "Counseling", one or more consultations as necessary between a state licensed psychiatrist or psychologist and a patient for the purpose of determining that the patient is capable and not suffering from a psychiatric or psychological disorder or depression causing impaired judgment.

(6) "Health care provider", a person licensed, certified or otherwise authorized or permitted by the law of this state to administer health care or dispense medication in the ordinary course of business or practice of a profession, and includes a health care facility.

(7) "Informed decision", a decision by a qualified patient, to request and obtain a prescription to end his or her life in a humane and dignified manner, that is based on an appreciation of the relevant facts and after being fully informed by the attending physician of:

a. His or her medical diagnosis;

b. His or her prognosis;

c. The potential risks associated with taking the medication to be prescribed;

d. The probable result of taking the medication to be prescribed; and

e. The feasible alternatives, including, but not limited to, comfort care, hospice care and pain control.

(8) "Medically confirmed", the medical opinion of the attending physician has been confirmed by a consulting physician who has examined the patient and the patient's relevant medical records.

(9) "Patient", a person who is under the care of a physician.

(10) "Physician", a doctor of medicine or osteopathy licensed to practice medicine in the state of Missouri

(11) "qualified patient", a capable adult who is a resident of this state and has satisfied the requirements of this initiative in order to obtain a prescription for medication to end his or her life in a humane and dignified manner.

(12) "Terminal disease", an incurable and irreversible disease that has been medically confirmed and shall, within reasonable medical judgment, produce death within six months.

Section 2.

1. An adult who:
   a. Is capable;
   b. Is a residence of this state;
   c. Has been determined by the attending physician and consulting physician to be suffering from a terminal disease; and
   d. Has voluntarily expressed his or her wish to die;

may make a written request for medication for the purpose of ending his or her life in a humane and dignified manner in accordance with this initiative.

2. No person shall qualify under this initiative solely because of age or disability.

Section 3.

1. A valid request for medication under this initiative shall be in substantially the form described in section 20, signed and dated by the patient, and witnessed by at least two individuals who, in the presence of the patient, attest that to the best of their knowledge and belief the patient is capable, acting voluntarily, and is not being coerced to sign the request.
2. One of the witnesses shall be a person who is not:
   a. A relative of the patient by blood, marriage, or adoption;
   b. A person, who at the time the request is signed, would be entitled to any portion of the estate of the qualified patient upon death under any will or by operation of law; or
   c. An owner, operator, or employee of a health care facility where the qualified patient is receiving medical treatment or is a resident
3. The patient's attending physician at the time the request is signed shall not be a witness.

If the patient is in a long-term care facility at the time the written request is made, one of the witnesses shall be an individual designated by the facility and having the qualifications specified by the department of health and senior services by rule.

Section 4

1. The attending physician shall:
   A. Make the initial determination of whether a patient has a terminal disease, is capable, and has made the request voluntarily;
   B. Request that the patient demonstrate Missouri state residency under section 13;
   C. To ensure that the patient is making an informed decision, inform the patient of:
      a. His or her medical diagnosis;
      b. His or her prognosis;
      c. The potential risks associated with taking the medication to be prescribed;
      d. The probable result of taking the medication to be prescribed; and
      e. The feasible alternatives including, but not limited to, comfort care, hospice care, and pain control;
   D. Refer the patient to a consulting physician for medical confirmation of the diagnosis and for a determination that the patient is capable and acting voluntarily;
   E. Refer the patient for counseling if appropriate under section 6;
   F. Recommend that the patient notify next of kin;
   G. Counsel the patient about the importance of having another person present when the patient takes the medication prescribed under this legislation and of not taking the medication in a public place;
   H. Inform the patient that he or she has an opportunity to rescind the request at any time and in any manner, and offer the patient an opportunity to rescind at the end of the fifteen-day waiting period under section 9;
   I. Verify, immediately before writing the prescription for medication under this initiative, that the patient is making an informed decision;
   J. Fulfill the medical record documentation requirements of section 12;
   K. Ensure that all appropriate steps are carried out in accordance with this initiative prior to writing a prescription for medication to enable a qualified patient to end his or her life in a humane and dignified manner; and
   L. I. Dispense medications directly, including ancillary medications intended to facilitate the desired effect to minimize the patient's discomfort, provided that the attending physician is authorized under state law and rule to dispense, has a current drug enforcement administration certificate, and complies with any applicable administrative rule; or
   II. With the patient's written consent:
      a. Contact a pharmacist and inform the pharmacist of the prescription; and
      b. Deliver the written prescription personally, by mail, or facsimile to the pharmacist, who shall dispense the medications to either the patient, the attending physician, or an expressly identified agent of the patient.

2. Notwithstanding any other provision of law, the attending physician may sign the patient's death certificate.

Section 5

Before a patient is qualified under this initiative, a consulting physician shall examine the patient and his or her relevant medical records and confirm in writing the attending physician's diagnosis that the patient is suffering from a terminal disease and verify that the patient is capable, is acting voluntarily, and has made an informed decision.

Section 6

If, in the opinion of the attending physician or the consulting physician, a patient may be suffering from a psychiatric or psychological disorder or depression causing impaired judgment, either physician shall refer the patient for counseling. No medication to end a patient's life in a humane and dignified manner shall be prescribed until the person performing the counseling determines that the patient is not suffering from a psychiatric or psychological disorder or depression causing impaired judgment.

Section 7

No person shall receive a prescription for medication to end his or her life in a humane and dignified manner unless he or she has made an informed decision, as defined in section 1. Immediately prior to writing a prescription for medication under this initiative, the attending physician shall verify that the qualified patient is making an informed decision.

Section 8

The attending physician shall recommend that the patient notify the next of kin of his or her request for medication under this initiative. A patient who declines or is unable to notify next of kin shall not have his or her request denied for that reason.

Section 9

In order to receive a prescription for medication to end his or her life in a humane and dignified manner, a qualified patient shall have made an oral request and a written request and reiterate the oral request to his or her attending physician at least fifteen days after making the initial oral request. At the time the qualified patient makes his or her second oral request, the attending physician shall offer the qualified patient an opportunity to rescind the request.

Section 10

A patient may rescind his or her request at any time and in any manner without regard to his or her mental state. No prescription for medication under this initiative shall be written without the attending physician offering the qualified patient an opportunity to rescind the request.

Section 11

No less than fifteen days shall elapse between the patient's initial oral request and the writing of a prescription under this initiative. No less than forty-eight hours shall elapse between the date of the patient's written request and the writing of a prescription under this initiative.

Section 12

The following shall be documented or filed in the patient's medical record:

(1) All oral requests made by the patient for medication to end his or her life in a humane and dignified manner;

(2) All written requests made by the patient for medication to end his or her life in a humane and dignified manner;

(3) The attending physician's diagnosis and prognosis and determination that the patient is capable, is acting voluntarily, and has made an informed decision;

(4) The consulting physician's diagnosis and prognosis and verification that the patient is capable, is acting voluntarily, and has made an informed decision;

(5) A report of the outcome and determinations made during counseling, if performed;

(6) The attending physician's offer to the patient to rescind his or her request at the time of the patient's second oral request under section 9; and

(7) A note by the attending physician indicating that all requirements under this initiative have been met and indicating the steps taken to carry out the request including a notation of the medication prescribed.

Section 13

Only requests made by Missouri residents under this initiative shall be granted. Factors demonstrating Missouri residency include, but are not limited to:

(1) Possession of a Missouri driver's license;

(2) Registration to vote in Missouri;

(3) Evidence that the person owns or leases property in Missouri; or

(4) Filing of a Missouri tax return for the most recent tax year.

Section 14

1. a. The department of health and senior services shall annually review all records maintained under this initiative.
   b. The department of health and senior services shall require any health care provider upon dispensing medication under this initiative to file a copy of the dispensing record with the department.

2. The department of health and senior services shall adopt rules to facilitate the collection of information regarding compliance with this initiative. Except as otherwise required by law, the information collected shall not be a public record and shall not be made available for inspection by the public.

3. The department of health and senior services shall generate and make available to the public an annual statistical report of information collected under subsection 2 of this section.

Section 15

1. No provision in a contract, will, or other agreement, whether written or oral, to the extent the provision would affect whether a person may make or rescind a request for medication to end his or her life in a humane and dignified manner, shall be valid.

2. No obligation owing under any currently existing contract shall be conditioned or affected by the making or rescinding of a request by a person for medication to end his or her life in a humane and dignified manner.

Section 16

The sale, procurement, or issuance of any life, health, or accident insurance or annuity policy or the rate charged for any policy shall not be conditioned upon or affected by the making or rescinding of a request by a person for medication to end his or her life in a humane and dignified manner. A qualified patient's act of ingesting medication to end his or her life in a humane and dignified manner shall not have an effect upon a life, health, or accident insurance or annuity policy.

Section 17

Nothing is this initiative shall be construed to authorize a physician or any other person to end a patient's life by lethal injection, mercy killing, or active euthanasia. Actions taken in accordance with this initiative shall not for any purpose constitute suicide, assisted suicide, mercy killing, or homicide under the law.

Section 18

1. Except as provided in subsection 2 of this section and section 20:
   a. No person shall be subject to civil or criminal liability or professional disciplinary action for participating in good faith compliance with this initiative including being present when a qualified patient takes the prescribed medication to end his or her life in a humane and dignified manner;
   b. No professional organization or association or health care provider shall subject a person to censure, discipline, suspension, loss of license, loss of privileges, loss of membership, or other penalty for participating or refusing to participate in good faith compliance with this initiative;
   c. No request by a patient for or provision by an attending physician of medication in good faith compliance with this initiative shall constitute neglect for any purpose of law or provide the sole basis for the appointment of a guardian or conservator; and
   d. No health care provider shall be under any duty, whether by contract, statute, or any other legal requirement to participate in the provision to a qualified patient of medication to end his or her life in a humane and dignified manner. If a health care provider is unable or unwilling to carry out a patient's request under this initiative and the patient transfers his or her care to a new health care provider, the prior health care provider shall, upon request, transfer a copy of the patient's relevant medical records to the new health care provider.

2. (1) Notwithstanding any other provision of law, a health care provider may prohibit another health care provider from participating under the Missouri death with dignity act on the premises of the prohibiting provider if the prohibiting provider has notified the health care provider of the prohibiting provider's policy regarding participation in the Missouri death with dignity act. Nothing in this subdivision shall prevent a health care provider from providing health care services to a patient that do not constitute participation in the Missouri death with dignity act.
   (2) Notwithstanding the provisions of subsection 1 of this section, a health care provider may subject another health care provider to the following sanctions if the sanctioning health care provider has notified the sanctioning provider prior to participation under this initiative that it prohibits participation in the Missouri death with dignity act:
   (a) Loss of privileges, loss of membership, or other sanctions provided under the medical staff bylaws, policies, and procedures of the sanctioning health care provider if the sanctioned provider is a member of the sanctioning provider's medical staff and participates under the Missouri death with dignity act while on the health care facility premises of the sanctioning health care provider, but not including the private medical office of a physician or other provider;
   (b) Termination of a lease or other property contract or other nonmonetary remedies provided by a lease contract, not including loss or restriction of medical staff privileges or exclusion from a provider panel, if the sanctioned provider participates under the Missouri death with dignity act while on the premises of the sanctioning health care provider or on property that is owned by or under the direct control of the sanctioning health care provider; or

(c) Termination of a contract or other nonmonetary remedies provided by contract if the sanctioned provider participates under the Missouri death with dignity act while acting in the course and scope of the sanctioned provider's capacity as an employee or independent contractor of the sanctioning health care provider. Nothing in this paragraph shall be construed to prevent:

a. A health care provider from participating under the Missouri death with dignity act while acting outside the course and scope of the provider's capacity as an employee or independent contractor; or

b. A patient from contracting with his or her attending physician and consulting physician to act outside the course and scope of the provider's capacity as an employee or independent contractor of the sanctioning health care provider.

(3) A health care provider that imposes sanctions under subdivision (2) of this subsection shall follow all due process and other procedures the sanctioning health care provider may have that are related to the imposition of sanctions on another health care provider.

(4) For the purposes of this subsection, the following terms shall mean:

(a) "Notify", a separate statement in writing to the health care provider specifically informing the health care provider before the provider's participation under the Missouri death with dignity act of the sanctioning health care provider's policy about participation in activities covered by the Missouri death with dignity act;

(b) "Participate under the Missouri death with dignity act", to perform the duties of an attending physician under section 5, the consulting physician function under section 5, or the counseling function under section 6. Participate under the Missouri death with dignity act does not include:

a. Making an initial determination that a patient has a terminal disease and informing the patient of the medical prognosis;

b. Providing information about the Missouri death with dignity act to a patient upon the request of the patient;

c. Providing a patient, upon the request of the patient, with a referral to another physician; or

d. A patient contracting with his or her attending physician and consulting physician to act outside of the course and scope of the provider's capacity as an employee or independent contractor of the sanctioning health care provider.

3. Suspension or termination of staff membership or privileges under subsection 2 of this section is not reportable to the department or state board of registration for the healing arts. Action taken under sections 3 to 6 shall not be the sole basis for a report of unprofessional conduct.

4. No provision of this initiative shall be construed to allow a lower standard of care for patients in the community where the patient is treated or a similar community.

Section 19

1. A person, who without authorization of the patient, willfully alters or forges a request for medication or conceals or destroys a rescission of that request with the intent or effect of causing the patient's death is guilty of a class A felony.

2. A person who coerces or exerts undue influence on a patient to request medication to end the patient's life or to destroy a rescission of a request is guilty of a class A felony.

3. Nothing in this initiative shall limit further liability for civil damages resulting from other negligent conduct or intentional misconduct by any person.

4. The penalties in this initiative do not preclude criminal penalties applicable under other law for conduct that is inconsistent with this initiative.

Section 20

Any governmental entity that incurs costs resulting from a person terminating his or her life under this initiative in a public place has a claim against the estate of the person to recover such costs and reasonable attorneys' fees related to enforcing the claim.

Section 21

A request for a medication as authorized by this initiative shall be in substantially the following form:

REQUEST FOR MEDICATION TO END MY LIFE

IN A HUMANE AND DIGNIFIED MANNER

I, ... , am an adult of sound mind.

I am suffering from ..... which my attending physician has determined is a terminal disease and which has been medically confirmed by a consulting physician. I have been fully informed of my diagnosis, prognosis, the nature of medication to be prescribed and potential associated risks, the expected result, and the feasible

alternatives, including comfort care, hospice care, and pain control. I request that my attending physician prescribe medication that will end my life in a humane and dignified manner.

INITIAL ONE:

..... I have informed my family of my decision and taken their opinions into consideration.

..... I have decided not to inform my family of my decision.

..... I have no family to inform of my decision.

I understand that I have the right to rescind this request at any time.

I understand the full import of this request and I expect to die when I take the medication to be prescribed. I further understand that although most deaths occur within three hours, my death may take longer, and my physician has counseled me about this possibility.

I make this request voluntarily and without reservation, and I accept full moral responsibility for my actions.

Signed: .....

Dated: .....

DECLARATION OF WITNESSES

We declare that the person making and signing the above request:

(1) Is personally known to us or has provided proof of identity;

(2) Signed this request in our presence on the date of the person's signature;

(3) Appears to be of sound mind and not under duress, fraud, or undue influence;

and

(4) Is not a patient for whom either of us is the attending physician.

..... Witness 1/Date

..... Witness 2/Date

NOTE: One witness shall not be a relative (by blood, marriage, or adoption) of the person signing this request, shall not be entitled to any portion of the person's estate upon death, and shall not own, operate, or be employed at a health care facility where the person is a patient or resident. If the patient is an inpatient at a health care facility, one of the witnesses shall be an individual designated by the facility.

Section 22

1. Any person who, without authorization of the principal, willfully alters, forges, conceals, or destroys an instrument, the reinstatement or revocation of an instrument, or any other evidence or document reflecting the principal's desires and interests with the intent and effect of causing a withholding or withdrawal of life-sustaining procedures or of artificially administered nutrition and hydration which hastens the death of the principal is guilty of a class A felony.

2. Except as provided in subsection 1 of this section, any person who, without authorization of the principal, willfully alters, forges, conceals, or destroys an instrument, the reinstatement or revocation of an instrument, or any other evidence or document reflecting the principal's desires and interests with the intent and effect of affecting a health care decision is guilty of a class A misdemeanor.

RE: Petition approval request from Damien Johnson regarding a proposed constitutional amendment to Article IV (2018-115)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Damien Johnson on December 22, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

Be it resolved by the people of the state of Missouri that the Constitution be amended:

This measure amends the Missouri Constitution by adding Section 54 to Article 4. This amendment implicitly repeals, in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105, 105.1108, 105.1112, 195.010.(10)(b)c,195.010.(10)(d), 195.010.(17)(m)(b), 195.010.(17)(g), 195.010.(17)(l),195.010(24), 195.015.4, 195.017.2(4)(r), 195.017.2(4)(z), 195.017.2(4)(ii),195.140.2(2), 195.202.2, 195.202.3, 195.211.2, 195.211.3, 195.211.4, 195.222.7,195.223.7, 195.223.8, 263.250.1.

1.The following shall be called the Johnson Amendment II

2.Definition of terms, as used in this Amendment:

a) "cannabis" and "cannabis hemp" refer to the cannabis, marihuana, marijuana, cannabis sativa, cannabis indica, cannabis ruderalis, or any variety of cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof.

b) "hemp": the fiber of this plant, extracted from the stem and used to make rope, stout fabrics, fiberboard, and paper. the sister plant of cannabis

c) "medical cannabis" refers to the medical use of cannabis.

d) "personal use" refers to the non-medical consumption of cannabis.

e) "Expungeable marijuana offense" are any convictions committed prior to this amendment.

f) "cannabis accessories" means any equipment, products, or materials of any kind that are used, intended for use, or designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing cannabis, or for ingesting, inhaling, vaporizing, smoking or otherwise introducing cannabis into and/or onto the human body.

g) "establishment" refers to a cannabis cultivation facility, a cannabis testing facility, a cannabis product manufacturing facility, or a retail cannabis store or other entity that cultivates, prepares, manufactures, packages, transports or sells cannabis, cannabis products and/or cannabis accessories.

3. The Missouri legislature may pass laws that doesn't conflict with this amendment. Marijuana shall not be listed in Missouri Controlled Substance schedule in order to reflect change that cannabis as defined in Section two; clause a, are permitted for personal use for persons 18 of age or older and shall be available with a doctor's recommendation without an age limit. The following acts are not unlawful and shall not be an offense under Missouri law or be a basis for seizure or forfeiture.

a) Adult Possession of cannabis for personal at 18 years or older.

b) Possession, production, cultivation and distribution of hemp, marijuana and cannabis.

c) Providing cannabis, cannabis accessories, and products for sale to consumers. Retail cannabis products for medical or personal use shall contain appropriate labeling, which outlines the weight and estimated potency of the product, lists all pesticides used in production, and summarizes the safe and effective use of cannabis. Labels shall not be false or misleading, and should be based on data derived from scientific study and prevailing human experience

4. Medical cannabis shall be available to patients who have a physician's recommendation.

a) All patients engaged in cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through other pharmaceutical means. Parents or legal guardians shall not be prosecuted for providing cannabis related medical treatment to patients under the age of 18.

b) Cannabis acquisition, possession, and consumption shall be permitted to patients under the age of twenty-one with the consent of a parent or legal guardian and through the supervision of a parent or legal custodian and a licensed physician.

c) Licensed physicians shall not be penalized for, nor restricted from recommending cannabis for medical purposes to any person.

d) Opinions pertaining to, and willingness to recommend medical cannabis therapy shall not be a criteria for the licensure of physicians; no physician shall be subject to any professional licensing review or hearing as a result of recommending or approving medical cannabis therapy.

e) Any individual who is a legal cannabis patient in another state shall be granted the same rights and privileges as a legal Missouri cannabis patient.

Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis.

5. Nothing in this section shall:

a) Require an employer to retain an employee who is impaired on the job by his use of cannabis.

b) Permit operation of a motor vehicle, watercraft, aircraft, train, or any transportation device of vehicle by anyone who is impaired by marijuana, cannabis or any other controlled substance.

c) Permit the transfer or sale of cannabis intended for adult use to a person younger than twenty-one years of age.

6. Forbid any individual, corporate property owner, elementary education institutions, and secondary education institutions from prohibiting the distribution, sale or cultivation of cannabis within their dwelling for medical treatment

7. The dictates of this Initiative shall be implemented no later than January 1, following the election that placed this Initiative before the people.

8. Upon the passage of this Act, all persons incarcerated or under supervision of the Missouri Board of Probation and Parole for nonviolent, cannabis-only offenses which are no longer illegal in the State of Missouri under this Act shall be immediately released.

(a) The Court shall order the immediate expungement of civil and criminal records pertaining to all non-violent cannabis only offenses which are no longer illegal in the State of Missouri under this Act.

(b) Within 60 days of the passage of this Act, The Attorney General shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis-related nonviolent civil and criminal records in Missouri and for any offense covered by this amendment. This document shall be distributed to all Circuit Court clerks within the State.

9. No Missouri law enforcement personnel or state funds shall be used to assist or aid in the enforcement of federal cannabis laws involving acts which are no longer illegal in the State of Missouri under this amendment.

10. Any person who willfully impedes the lawful exercise of these provisions is guilty of a Class A misdemeanor.

11. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirement, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor.

12. Taxes and regulations not conflicting with sections may be imposed on the production, distribution, cultivation and possession of cannabis, marijuana and hemp shall be subjected to duly authorized powers, if any, conferred by article III and VI of the Constitution of Missouri;

13. All provisions of this section are self-executing and severable, and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-115)

Subject

Initiative petition from Damien Johnson regarding a proposed constitutional amendment to Article IV. (Received December 23, 2016)

Date

January 10, 2017

Description

This proposal would amend Article IV of the Constitution of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Damien Johnson provided information as a proponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated this proposal authorizes the Attorney General to develop and make available a form for the destruction of all cannabis-related nonviolent civil and criminal records in Missouri which shall be distributed to all circuit courts within the State. They assume they would need 1 Paralegal to assist with research and development of the form and destruction of relevant records, resulting in increased operating expenses of $60,853 for FY2018; $64,558 for FY2019; and $65,245 for FY2020.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated a fiscal impact of $6,887,491 in fiscal year 2019, $7,338,556 in fiscal year 2020, $10,452,183 in fiscal year 2021 and thereafter.

Legalizing the possession and use of marijuana for persons 18 years or older would remove from the criminal statutes all controlled substance offenses for marijuana, including possession, distribution and trafficking. If the legislation that removed marijuana from the list of controlled substances was retrospective then there would be two reductions in the cost of incarceration: the release of offenders serving a marijuana offense and fewer admissions to prison. The legalization of marijuana will largely impact offenders who are only serving a marijuana offense. Offenders serving multiple

concurrent sentences will continue to be required to serve the other sentences after legalization and no estimate is made for offenders serving multiple sentences.

The reduction in the offender population is the total of reductions from the expungement of sentences and fewer admissions and probations. The cost avoidance is based upon a direct prison cost per year in FY17 of $6,085 and an average cost of $2,234 per year for offenders on field supervision. In the first year after the enactment of the legislation that legalizes marijuana there is an estimated reduction of 633 offenders in prison and 3,676 offenders on field supervision. In the next year (FY20) there will be no discharges from expungement but the reduction in the prison population will increase to 214. The field reduction will continue into FY21 because the marijuana offenders are estimated to serve 2.5 years on supervision.

The estimate is qualified by the use of an expansion factor that assumes that the drug distribution in the sentences where the drug is not known will be similar to that where the drug is known.

The estimated cost avoidance in the first year is $6,887,491 and will be $10,452,183 after the 5th year.

If marijuana usage becomes legal it could impact the safety and security of our prisons as it is not believed that there is a means for testing whether an employee is under the influence of marijuana. Impaired prison employees or visitors can impact the safe and secure operation of our prisons.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this legislation will have no fiscal impact on their department but may increase state revenues if marijuana is subject to state sales tax.

Officials from the **Department of Public Safety** indicate they see no fiscal impact due to this initiative petition. They forwarded this to the Missouri State Highway Patrol for their response.

Officials from the **Missouri State Highway Patrol** indicated they expect increased operating costs of $426,236 for the first year implemented, $487,384 for the second year implemented, and $492,597 for the third year implemented.

The provisions of this petition would require their agency to rent office space for 4 FTE's to process the expungement requests.

The proposed legislation would order the immediate destruction of all cannabis-related non-violent civil and criminal records in Missouri.

Two different divisions within their agency will be impacted by this legislation. Here is a breakdown for each division:

Criminal Justice Information Services Division

The Criminal Justice Information Services Division (CJIS) states that there are currently 95,550 arrest charges in the Central Repository. The current expungement process, pursuant to Chapter 610, takes approximately 90 minutes to process. One FTE can handle 1,243 expungements per year. Conservatively, at least five FTE's would be required to initially handle the expungments created by this legislation. A significant processing backlog would occur if sufficient FTE's are not assigned to accommodate the number of expungements ordered.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 90 minutes. Therefore, one FTE can handle 1,243 expungements per year = 111,840 / 90.

These FTE's (CJIS Technicians, Range 16) would be necessary to process all expungement requests, review criminal history records, contact any agency associated with the arrests or convictions, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE at $55,495 and the ability of that employee to process 1,243 expungements per year, the cost alone per expungement is $55,495 \ 1,243 = $44.64. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories, as well as contacting of the various agencies associated with the arrests. In researching other states with similar expungement requirements, they all charge a fee to offset the cost of the time required to process the expungements. Their fees ranged from $50 to $450 per petition per arrest date.

These FTE will most likely be 2nd and 3rd shift employees so they would not require any equipment. However, there would be recurring costs of $650 per year per FTE for office supplies and phone charges. If any FTE were placed on the 1st shift, standard equipment would be required at a one-time cost of $6,094 per FTE.

5 CJIS Technicians ($1,232.50 x 24)	$147,900
Office Equipment/HW/SW	$6,094
RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

Patrol Records Divison

Currently, there are 29,904 records in the Patrol's Traffic Arrest System (TAS) pertaining to arrests completed by the Missouri Highway Patrol that could possibly meet the requirements of this proposed constitutional amendment. These are arrest records with a court conviction pertaining to individuals the age of 18 years and older with an NCIC modifier of 60-64 that relate to marijuana offenses. Given this, if only 30 percent of the individuals who qualify to have his or her record expunged sought to do so, the Patrol Records Division (PRD) would require four FTE's. However, if a large number of these expungements were to be granted with even four FTE's, the backlog would compound greatly to the point it may take several years to catch up. If 100 percent of the individuals who qualify to have their record expunged sought to do so, the Patrol Records Division would require 12 FTE's to complete this task in approximately one year.

The addition of 12 FTE's would require additional supervisory personnel. However, due to the vague and uncertain nature of this proposed amendment, the Patrol Records Division has no true way to determine the actual effect or costs.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 45 minutes. Therefore, one FTE can handle 2,485 expungements per year = 111,840 / 45.

With the current estimate of 29,904 records that potentially meet the requirements of this proposed amendment and would potentially be eligible for expungement, the following percentages of persons actually requesting an expungement will directly relate to the number of PRD FTE's required:

30% = 29,904 x .30 = 8,971 / 2,485 = 4 FTE's
50% = 29,904 x .50 = 14,952 / 2,485 = 6 FTE's
100% = 29,904 / 2,485 = 12 FTE's

These FTE's (Quality Control Clerks, Range 10) would be necessary to process all expungement requests, review records, contact agencies, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE of $45,702 and the ability of that employee to process 2,485 expungements per year, the cost per expungement is $45,702 \ 2,485 = $18.39. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories.

Processing 30 percent of the possible expungements would require additional workspace. The physical requirements would increase with the number of FTE's required to meet the demand for expungements. There will be recurring costs of $650 per year per FTE for

office supplies and phone charges. Standard equipment and office furniture would be required at a one-time cost of $6,094 per FTE.

4 Quality Control Clerks ($1,015 x 24)	$97,440
Equipment/Office Furniture	$6,094

RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

The provisions of this petition would require their agency to rent office space for 4 FTE's to process the expungement requests. The Office of Administration states that 920 square feet of office space would be required. The following costs apply per square foot:

Office Space	$14/Sq Ft
Janitorial/Trash Costs	$1.50/Sq Ft
Utility Costs	$2/Sq Ft

The agency provided the following additional comments:

It is suggested to add this additional language to provide for the collection of a fee to offset the costs of the expungements:

43.530. 1. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than nine dollars per request for criminal history record information not based on a fingerprint search. In each year beginning on or after January 1, 2010, the superintendent may increase the fee paid by requesting entities by an amount not to exceed one dollar per year, however, under no circumstance shall the fee paid by requesting entities exceed fifteen dollars per request.

2. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than twenty dollars per request for criminal history record information based on a fingerprint search, unless the request is required under the provisions of subdivision (6) of section 210.481, section 210.487, or section 571.101, in which case the fee shall be fourteen dollars.

3. A request made under subsections 1 and 2 of this section shall be limited to check and search on one individual. Each request shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. The highway patrol may establish procedures for receiving requests for criminal history record information for classification and search for fingerprints, from courts and other entities, and for the payment of such requests. There is hereby established by the treasurer of the state of Missouri a fund to be entitled as the "Criminal Record System Fund". Notwithstanding the provisions of section 33.080 to the contrary, if the moneys collected and deposited into this fund are not totally expended annually for the purposes set forth in

sections 43.500 to 43.543, the unexpended moneys in such fund shall remain in the fund and the balance shall be kept in the fund to accumulate from year to year.

4. For all petitions for expungement under the provisions of Chapter 610, Section 577.054, or any other created expungement requirement under statute, excluding Section 610.122, the applicant shall pay a fee of seventy-five dollars per arrest date listed on the petition. Each petition shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. For expungements that require removal from the Traffic Arrest System twenty dollars of the seventy-five dollar fee will be deposited in the Highway Patrol Traffic Records Fund.

There are numerous uncertainties associated with this proposed constitutional amendment. The definition of a "non-violent cannabis-only offense" needs to be added. It is unclear if individuals with the aforementioned conviction records are required to abide by the expungement process mandated by various other state statutes. Does the individual just complete and file a document with a circuit clerk and the record is expunged or does the "court," whomever that is, order the immediate expungement of all civil and criminal records pertaining to non-violent cannabis only offenses?

Their agency requests clarification of number 9 which states that no Missouri law enforcement personnel or state funds shall be used to assist or aid in the enforcement of federal cannabis laws involving acts which are no longer illegal in the state of Missouri under this amendment. Does this mean that the Highway Patrol could no longer participate in federal operations when requested?

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's Office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated Expungment: Title 49 Code of Federal Regulations (C.F.R.) 384.226 states that a "State must not mask, defer imposition of judgment, or allow an individual to enter into a diversion program that would prevent a CLP or CDL holder's conviction for any violation, in any type of motor vehicle, of a state or local traffic control law (other than parking, vehicle weight, or vehicle defect violations) from appearing on the CDL driver record, whether the driver was convicted for an offense committed in the State where the driver is licensed or another State." Additionally, 49 C.F.R. 384.225 lays out specific record keeping

requirements regarding the posting and maintaining of commercial driver's license (CDL) holders' records that states must meet in order to be in substantial compliance with Federal Motor Carrier Safety Regulations. These records include all convictions, disqualifications, and other licensing action for violations of any state or local law relating to motor vehicle traffic control (other than parking, vehicle weight, or vehicle defect violations) committed in any type of vehicle.

Fiscal Impact: Failure to comply with 49 C.F.R. 384.225 & 384.226 would result in a withholding of Missouri's federal-aid highway funds apportioned to it under each of Title 23, United States Code (U.S.C.), sections 104(b)(1), (b)(3), and (b)(4). The federal funds impacted consist of national highway performance program funds, highway safety improvement program funds and congestion mitigation and air quality improvement funds. The withholding amount would be 4% for the first year of non-compliance and 8% for the second and subsequent years.

Officials from the **Office of Administration** (OA) indicated:

This proposal adds Section 54 to Article IV of the Missouri Constitution.

The proposal:

- Removes marijuana from the list of controlled substances.
- Allows possession (for those 18 or older), production, cultivation and distribution of hemp, marijuana and cannabis.
- Allows the use of medical cannabis for patients with a physician's recommendation.
- Clarifies that certain crimes such as operating a motor vehicle under the influence of marijuana remain crimes.
- Upon passage of the proposal, requires the release of all persons incarcerated or on parole for non-violent, cannabis-only offenses which would no longer be illegal to be immediately released and their civil and criminal records expunged and destroyed.
- Prohibits Missouri law enforcement personnel or state funds from being used to enforce federal cannabis laws involving acts that would no longer be illegal upon passage of this proposal.
- Provides protection for cannabis farmers, manufacturers, processors and distributors from special zoning requirements, excessive licensing fees, etc. relative to other commercial or agricultural farmers, manufacturers, processors or distributors.
- Allows taxes to be imposed on the production, distribution, cultivation and possession of cannabis, marijuana and hemp.

This proposal should not impact their office.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Office of State Courts Administrator** indicated:

The proposed initiative petition would create a new section of the Missouri Constitution to be known as Article IV. This section would allow citizens at eighteen years or older to have the right to engage in the production, sale, distribution and consumption of marijuana and the manufacture of goods from hemp, subject to reasonable regulations adopted by the state pursuant to this section.

The average of all marijuana related charge codes from 2011 to 2015 for Circuit case types is 14,122 per year. The average of all marijuana related charge codes from 2011 to 2015 for Associate case types is 10,982. They are unable to determine what number of these charges were for someone over the age of eighteen.

The following Criminal Court Costs would be affected by this petition:

Criminal Court Costs		
Felony Case Costs	**Amount of Cost**	**Disburse to State/County**
Basic Civil Legal Services Fund surcharge	$10.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$45.00	State of Missouri - General Revenue $36, County $9
County Fee	$75.00	County
Court Automation Fund Fee	$7.00	State of Missouri -Statewide Court Automation Fund
Court Reporter fee (All Circuit Division Cases)	$15.00	State of Missouri - General Revenue
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$30.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Head Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund

Peace Officer Standards & Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	State of Missouri - Prosecuting Attorney Training Fund
Sheriffs' Fee	$75.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement Fund
Spinal Cord Injury Fund surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$279.50**	
Misdemeanor Case Costs		
Basic Civil Legal Services Fund surcharge	$8.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$15.00	$12 State of Missouri / $3 County
County Fee	$25.00	County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$15.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Brain Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund

Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	$0.50 State of Missouri / $0.50 County
Sheriffs' fee	$10.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement fund
Spinal Cord Injury Fund Surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$102.50**	
Municipal Case (Filed in Associate Division) Costs		
Clerk Fee	$15.00	$12 State of Missouri / $3 County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Sheriffs' Retirement Fund surcharge	$3.00	Sheriffs' Retirement Fund
Total	**$33.50**	
Criminal Costs Not Included Above		
Drug Testing by a State Lab	$150.00	State of Missouri

Drug Testing by a Private Lab	Actual Costs	County Reimbursement
Law Enforcement Arrest Costs:		
Highway Patrol		Amt. Approved by the Court
Local (County)		Amt. Approved by the Court
Municipal		Amt. Approved by the Court

The decrease in the court fees, depending on the number of cases, will result in an unknown loss to the courts.

They also assume there will be an unknown decrease in caseload for the courts because the courts will no longer process these cases; however, at this time they are unable to calculate the decrease.

Any significant increase or decrease will be reflected in future budget requests.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated if passed, this constitutional amendment would have a positive impact on the workload of the Missouri State Public Defender, since possession, manufacture, distribution, etc. of cannabis would no longer be unlawful, offenses that the Public Defender currently uses resources to defend and no longer would need to.

The exact positive impact is difficult to predict because they track cases by statutory offense and most drug offenses are not limited to marijuana.

However, their best estimate, using FY2014 MSPD data, is that this would reduce their caseload by 3,523 cases (685 A/B felonies, 1,797 C/D felonies, 1,041 misdemeanors, and 1,140 probation violations).

In *The Missouri Project: A Study of the Missouri Public Defender System and Attorney Workload Standards*, prepared by RubinBrown on behalf of the American Bar Association's Standing Committee on Legal Aid and Indigent Defendants, the relevant workload standards are: A/B felonies, 47.6 hours per case; C/D felonies, 25.0 hours per case; misdemeanors, 11.7 hours per case; and probation violations, 9.8 hours per case). (The workload standards include only case related tasks over which an attorney has some control (they exclude, for example, in court and travel time) and thereby reflect a conservative estimate.)

Applying those workload standards to the 2,858 cases, those cases require 100,882.7 attorney hours. With 2,080 hours per attorney available each year, that represents the work of 48.5 attorneys.

While in theory they might also handle fewer appeals of guilty verdicts after trial, the fact is that only a very small percentage of their cases proceed to trial and it's likely that only a small percentage of those cases are appeals from marijuana convictions. Therefore this minimal positive impact is not being taken into account in this estimate.

However, the Missouri State Public Defender already is significantly understaffed by 333 attorneys under the workload standards developed in *The Missouri Project*. (The 333 attorneys is a conservative estimate of the under-staffing in that it assumes we contract all conflicts to private attorneys, which we are not able to do for budgetary reasons).

Therefore, despite the positive impact on the workload of the Missouri State Public Defender, because they are already understaffed that savings in attorney time would not allow the Public Defender to reduce its workforce and therefore would not translate into an actual cost savings. However it does reduce by the cost of 48.5 attorneys how much money needs to be added to their budget in order to meet *The Missouri Project*'s workload standards.

Officials from the **State Treasurer's office** indicated this would have no fiscal impact on their office.

Officials from **Greene County** indicated there is anticipated costs for this initiative petition. Unfortunately there is not enough time given in the response to provide an actual estimated costs.

County Prosecutor, Dan Patterson provided the following information:

DenverDA
Mitchell R. Morrissey, District Attorney - Second Judicial District
201 W. Colfax Avenue, Dept. 801, Denver, CO 80202

Fax: 720-913-903

October 12, 2016

No on 64 Campaign and SAM Action

California voters are being told that they will see the crime rate go down if they vote to legalize marijuana commercially; this has not been the case in the state of Colorado or the city of Denver. Since the legalization of recreational marijuana in Colorado in 2013 traffic related marijuana deaths have increased 48%, marijuana related emergency room visits have increased 49%, and marijuana related calls to the poison center have increased 100%. According to the Colorado Bureau of Investigations in 2015 statewide homicides in Colorado rose 14.7 % over the previous year. Pueblo, Colorado had the highest homicide rate in the state with 11.1 killings per 100,000 residents. Aurora, Colorado's homicide rate more than doubled from 2014. Additionally more places in Colorado were robbed and more thefts occurred, especially cars, as 193,115 motor vehicles were reported stolen, up 27.7 % in 2015 from the previous year. In 2015, sexual assaults rose 10% in Colorado with Denver, Aurora, Lakewood, Westminster and Pueblo all reporting higher numbers as well.

In the city of Denver since the legalization of recreational marijuana the number of crimes in Denver has grown by about 44 %, according to annual figures the city reported to the National Incident Based Reporting System. In 2015 in Denver alone crime rose in every neighborhood in the city. The murder rate hit a decade high, 1059 more cars were broken into, there were 903 more auto thefts, 321 more aggravated assaults and 231 more homes were broken into compared to 2014.

California voters are also being told that legalizing recreational marijuana will free up law enforcement to work on other criminal activities. Again that has not been the case in Denver. Besides the overall increases in crime we have experience, the Denver police department is dealing with a 900% increase in the unlawful cultivation and manufacture of marihuana concentrate, and a 99% increase in the unlawful distribution of marijuana and marijuana concentrate. The quantity of illegal marijuana seized by the Denver police has increased 3,424% on average per case. The volume of marijuana seized per case has increased from an average of 162 pounds to 5724 pounds. In Denver unlawful public consumption of marijuana citations has increased over 300% per year since the legalization of recreational marijuana. The Denver police department is busier enforcing marijuana laws and investigating crimes directly related to marijuana, including murderers, robberies, and home invasions, than any other time in the history of the city.

Sincerely,

Mitchell R. Morrissey
Denver District Attorney

Officials from the **City of Kansas City** indicated their city would receive less fine money, but that would be more than offset by no longer incurring the costs of prosecution/some expense will be required to expunge records. Sales taxes could be collected. No amount can be reasonably estimated. .

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from the **University of Central Missouri** indicated this petition would neither provide any fiscal savings, nor additional costs, for their university.

Damien Johnson provided the following information as a proponent of this initiative petition.

Annual state government operating costs would increase by at least $1 million with the total increase being unknown. Those costs would be offset by an unknown increase in fee and tax revenues. The fiscal impact to local governmental entities is unknown with some increase in revenue possible.

The net fiscal impact to state and local government is unknown based on the revenue generated by taxes and fees that could offset the operating cost.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, St. Louis Community College, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Fiscal Note Summary

This proposal is estimated to result in annual state cost savings of $10 million. Annual state operating costs are estimated to increase by $600,000 to $1 million. Local law enforcement costs could increase.

State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Damien Johnson regarding a proposed constitutional amendment to Article VIII (2018-114)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Damien Johnson on December 21, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

Be it resolved by the people of the state of Missouri that the Constitution be amended:

This amendment repeals, in part or in whole, and amends various statutes and subsections relating to political parties. Including but not necessarily limited to RSMO 115.121, 115.122, 115.307, 115.309, 115.31, 115.315, 115.319, 115.321, 115.603, 115.605, 115.607 to 115.627,

Article VIII of the Missouri Constitution by creating a new section known as section 23 of Article VIII to read as follows:

a) Candidates running for United States Senate, United States Congress, Governor, Lt. Governor, Treasurer, Attorney General, Secretary of State, State Senate and State Representative shall be listed as a non-partisan candidate and no Party affiliation shall be listed next to a candidate.

b) Unless running in a special election or a runoff, all candidates shall run in a November election without running in a primary and required to win 50% plus one of the votes cast. If no candidates win 50% plus one of the votes cast, then there shall be a runoff between the top two candidates no later than 60 days after the November election.

c) Candidates shall not be charged more than $100 nor be required to collect signatures.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-114)

Subject

Initiative petition from Damien Johnson regarding a proposed constitutional amendment to Article VIII (Received December 21, 2016)

Date

January 10, 2017

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners.**

Damien Johnson provided information as a proponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they assume that any costs resulting from the proposal could be absorbed with existing resources.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated this petition does not pertain to their department so, they will not be responding.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this legislation will not have a fiscal impact on their department.

Officials from the **Department of Public Safety** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no fiscal impact.

Officials from the **Office of Administration** indicated this proposal enacts one new section in Article VIII, Section 23 to require non-partisan elections. This proposal should not have a fiscal impact for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated this measure changes the way primary and general elections are conducted. If passed, this measure is likely to have a significant effect on the costs of holding elections. There is potential for increased costs to produce ballots for both in-person and absentee voting. The language of this measure also potentially creates the possibility of three separate elections each cycle for state candidates: 1) an August primary for judges, 2) a November general election for all candidates, and 3) a possible run-off election following the November general election. It is also unclear how this measure will impact special elections. Many of the state's voting systems could potentially need to be replaced or upgraded at a quite significant cost under this measure. At this time the projected costs of this measure are unknown, but significant costs are likely to be incurred by both the state and local election authorities.

Additionally:

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an

estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this would have no fiscal impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated no fiscal impact is anticipated if this proposal is adopted.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from **University of Missouri** indicated this initiative petition will not have a fiscal impact on their university.

Officials from the **Kansas City Board of Election Commissioners** indicated the financial impact with this amendment would be roughly $450,000, the cost of having a January election in our jurisdiction. Another issue would be the disenfranchising of Military and Absentee voters with a shorter election cycle (60 day). We would also worry about recruiting enough election workers to work the polls in the month of January. These are our concerns regarding this amendment.

Officials from the **Platte County Board of Elections** indicated their local government estimates the fiscal impact of this bill for fiscal years 2017, 2018, and 2019 to be as follows:

Revenues: None

Cost: Their office estimates the cost of this initiative to be $78,000 in even numbered years.

Technical notes:

The proposal leaves in-tact the primary contest for local candidates and the August election date. Under this proposal with a 50% +1 requirement 3 elections through the fall and winter of even years are all but guaranteed. Currently certification of an election cannot happen until the Friday after the election and the deadline is 2 weeks after the election. The “no more than 60 day rule” when combined with current absentee rules would have final certification and absentee voting beginning on the same day. Ballots will not be ready for six weeks of absentee voting. Additionally, the timeline sets the runoff election in the week between Christmas and New Year’s in most years.

Damien Johnson provided the following information as a proponent of this initiative petition.

The potential savings to governmental entities are unknown, but not likely to lead to a cost increase.

"But not likely" This initiative removes primaries and requires runoffs if no candidates in the race get a majority. Runoffs are required if no candidate gets a majority of the votes cast. Thus, since US congressional seats are what analysis consider safe seats, the state should expect cost savings of not having a primary nor runoff. Clay should win his seat with a majority. There should be some races that would have runoffs.

Hypothetically speaking, had this initiative been in effect for the US senate race last election, Roy Blunt and Jason Kander and all the less financed candidates would run in the general election. Then Blunt and Kander will be the only two candidates facing each other in a runoff. The cost of the race will shift from a primary to a runoff. Being that Blunt was the only statewide candidate who won by plurality statewide he'll be the only candidate running statewide in my hypothetical scenario.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, St. Louis Community College, St. Louis County Board of Elections, Board of Election Commissioners City of St. Louis, Jackson County Election Board,** and **Clay County Board of Election Commissioners**.

Fiscal Note Summary

Local election authorities and the state will likely incur increased election-related costs estimated to be $528,000 per election cycle with the total costs being unknown, but likely significant.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

35 of Article I of the Constitution of Missouri is amended by modifying section 35. The existing section 35 is set forth hereinafter with the new matter bold and deleted matter in brackets,

Definitions of terms, as used in this Act:

a) Cannabis: refers to the cannabis, marihuana, marijuana, cannabis, sativa, cannabis indica, cannabis ruderalis, or any variety of cannabis, including but not limited to, derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof

b) Hemp: The fiber of this plant, extracted from the stem and used to make rope, fabrics, fiberboard, clothing, and paper. The sister plant of cannabis

That agriculture which provides food, energy, health benefits, and security is the foundation and stabilizing force of Missouri's economy. This section shall protect the right to grow cannabis and hemp. To protect this vital sector of Missouri's economy, the right of farmers and ranchers to engage in farming and ranching practices shall be forever guaranteed in this state, subject to duly authorized powers, if any, conferred by article VI of the Constitution of Missouri.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

This measure amends the Missouri Constitution by adding Section 54 to Article 4. This amendment implicitly repeals, in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105, 105.1108, 105.1112, 195.010.(10)(b)c,195.010.(10)(d), 195.010.(17)(m)(b), 195.010.(17)(g), 195.010.(17)(l),195.010(24), 195.015.4, 195.017.2(4)(r), 195.017.2(4)(z), 195.017.2(4)(ii),195.140.2(2), 195.202.2, 195.202.3, 195.211.2, 195.211.3, 195.211.4, 195.222.7,195.223.7, 195.223.8, 263.250.1.

1.The following shall be called the Cannabis Treatment Amendment

2. Definition of terms, as used in this Amendment:

a) "cannabis" and "cannabis hemp" refer to the cannabis, marihuana, marijuana, cannabis sativa, cannabis indica, cannabis ruderalis, or any variety of cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof. This Amendment shall apply to all rsmo mentioning marijuana.

b) "hemp": the fiber of this plant, extracted from the stem and used to make rope, stout fabrics, fiberboard, and paper. the sister plant of cannabis

b) "medical cannabis" refers to the medical use of cannabis.

d) "personal use" refers to the non-medical consumption of cannabis.

e) "Expungeable marijuana offense" are any convictions committed prior to this amendment.

f) "cannabis accessories" means any equipment, products, or materials of any kind that are used, intended for use, or designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing cannabis, or for ingesting, inhaling, vaporizing, smoking or otherwise introducing cannabis into and/or onto the human body.

g) "establishment" refers to a cannabis cultivation facility, a cannabis testing facility, a cannabis product manufacturing facility, or a retail cannabis store or other entity that cultivates, prepares, manufactures, packages, transports or sells cannabis, cannabis products and/or cannabis accessories.

3.The following acts are not unlawful and shall not be an offense under Missouri law or be a basis for seizer or forfeiture.

a) Possession, production, cultivation and distribution of hemp, marijuana and cannabis.

b) Cultivation, harvesting processing, manufacturing, packaging, distributing, transferring, displaying or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes provided the person has current applicable licensing to operate a commercial establishment. No special licensing will be required beyond that which is applicable for the cultivation, harvest, processing, manufacturing, packaging, distribution, transferal, display or possessing of any non-toxic food or food product.

4. Medical cannabis, commonly known as marijuana, shall be available to patients who with a doctor's recommendation and Missouri Controlled Substance relating to marijuana schedule list shall change to reflect that cannabis as defined in Section two; clause a of this amendment, shall be available with a doctor's recommendation. The following acts are not unlawful and shall not be an offense under Missouri law or be a basis for seizure or forfeiture:

a) All Missouri patients engaged in cannabis treatment shall be afforded the same rights and privileges afforded to any patient treated through other pharmaceutical means.

b) Cannabis acquisition, possession, and consumption shall be permitted to patients under the age of 18 with the consent of a parent or legal guardian and through the supervision of a parent or legal custodian and a licensed physician.

c) Licensed physicians shall not be penalized for nor restricted from recommending cannabis for medical purposes to any person.

d) Opinions pertaining to, and willingness to recommend medical cannabis treatment shall not be a criteria for the licensure of physicians; no physician shall be subject to any professional licensing review or hearing as a result of recommending or approving medical cannabis therapy.

e) Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis.

f) Primary caregiver shall not be subjected to criminal or civil charges for providing cannabis to patients who been given a doctor's a medical professional.

5. Nothing in this section shall:

a) Require an employer to retain an employee who is impaired on the job by his use of cannabis.

b) Permit operation of a motor vehicle, watercraft, aircraft, train, or any transportation device of vehicle by anyone who is impaired by marijuana, cannabis or any other controlled substance.

b) If, primary caregiver, the dispensary verifies the patient and the primary caregiver.

c) The patient's 9 digit random alphabet. Dispensaries my issue a random alphabet after verifying residency.

d) Retail cannabis products for medical treatment use shall contain appropriate labeling, which outlines the weight and estimated potency of the product, lists all pesticides used in production, and summarizes the safe and effective use of cannabis. Labels my be promotional, but shall not be false or misleading, and should be based on data derived from scientific study and prevailing human experience.

7. The Department of Health and Human Services shall issue 9 digit random alphabet out to patients and keep records of the alphabet on a state wide registry. The registry is to verify it's a Missouri patient and it shall not be subjected to Sunshine request under rsmo chapter 610. No law enforcement agency my access the list without a warrant. Law enforcement agencies my only view a printed list but not electronically. Dispensaries shall the Register with the the Department of Health and Human Services for:

a) licensing and regulations

b) paying fees of no more than $100.00

c) to assist with the 9 digit random alphabet registry.

8. Upon the passage of this Act, all persons incarcerated or under supervision of the Missouri Board of Probation and Parole for non-violent, cannabis-only offenses which are no longer illegal for medical treatment in the State of Missouri under this Act and been convicted prior to this Act shall be immediately released and their civil and criminal records shall be expunge by the Court.

9. Any person who willfully impedes the lawful exercise of these provisions is guilty of a Class A misdemeanor.

10. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirement, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor. Patients are are allowed to grow cannabis for medical treatment for self. Primary caregiver are allowed to grow for their patients.
11. All provisions of this section are self-executing and severable, and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.

13. This shall become effective on December 6th 2018.

In the November general of 2020, voters shall vote to repeal the above Amendment & replace it with the below Amendment. A yes vote approve the repeal above Amendment and replace with below Amendment. If voters fail shall to vote yes, the above Amendment remains and voters shall vote again every four years until voters vote yes.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

This measure amends the Missouri Constitution by adding Section 54 to Article 4. This amendment implicitly repeals, in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105, 105.1108, 105.1112, 195.010.(10)(b)c,195.010.(10)(d), 195.010.(17)(m)(b), 195.010.(17)(g), 195.010.(17)(l),195.010(24), 195.015.4, 195.017.2(4)(r), 195.017.2(4)(z), 195.017.2(4)(ii),195.140.2(2), 195.202.2, 195.202.3, 195.211.2, 195.211.3, 195.211.4, 195.222.7,195.223.7, 195.223.8, 263.250.1.

1.The following shall be called the Cannabis legalization Amendment

2.Definition of terms, as used in this Act:

a) "cannabis" and "cannabis hemp" refer to the cannabis, marihuana, marijuana, cannabis sativa, cannabis indica, cannabis ruderalis, or any variety of cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof.

b) "hemp": the fiber of this plant, extracted from the stem and used to make rope, stout fabrics, fiberboard, and paper. the sister plant of cannabis

c) "medical cannabis" refers to the medical use of cannabis.

d) "personal use" refers to the non-medical consumption of cannabis.

e) "Expungeable marijuana offense" are any convictions committed prior to this amendment.

f) "cannabis accessories" means any equipment, products, or materials of any kind that are used, intended for use, or designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing cannabis, or for ingesting, inhaling, vaporizing, smoking or otherwise introducing cannabis into and/or onto the human body.

g) "establishment" refers to a cannabis cultivation facility, a cannabis testing facility, a cannabis product manufacturing facility, or a retail cannabis store or other entity that cultivates, prepares, manufactures, packages, transports or sells cannabis, cannabis products and/or cannabis accessories.

3. Missouri Controlled Substance relating to marijuana schedule list shall change to reflect that cannabis as defined in Section two; clause a, are permitted for personal use for persons 21 of age or older and shall be available for medical treatment with a doctor's recommendation without an age limit. The following acts are not unlawful and shall not be an offense under Missouri law or be a basis for seizure or forfeiture.

a) Adult Possession of cannabis for personal at 21 years or older.

b) Possession, production, cultivation and distribution of hemp, marijuana and cannabis.

c) Providing cannabis, cannabis accessories and products for sale to consumers. Retail cannabis products for medical treatment or personal use shall contain appropriate labeling, which outlines the weight and estimated potency of the product, lists all pesticides used in production, and summarizes the safe and effective use of cannabis. Labels by be promotional, but shall not be false or misleading, and should be based on data derived from scientific study and prevailing human experience.

4. Medical cannabis shall be available to patients who have a physician's recommendation.

a) All patients engaged in cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through other pharmaceutical means.

b) Cannabis acquisition, possession, and consumption shall be permitted to patients under the age of twenty-one with the consent of a parent or legal guardian and through the supervision of a parent or legal custodian and a licensed physician.

c) Licensed physicians shall not be penalized for, nor restricted from recommending cannabis for medical purposes to any person.

d) Opinions pertaining to, and willingness to recommend medical cannabis therapy shall not be a criteria for the licensure of physicians; no physician shall be subject to any professional licensing review or hearing as a result of recommending or approving medical cannabis therapy.

e) Any individual who is a legal cannabis patient in another state shall be granted the same rights and privileges as a legal Missouri cannabis patient.

Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis.

5. Nothing in this section shall:

a) Require an employer to retain an employee who is impaired on the job by his use of cannabis.

b) Permit operation of a motor vehicle, watercraft, aircraft, train, or any transportation device of vehicle by anyone who is impaired by marijuana, cannabis or any other controlled substance.

c) Permit the transfer or sale of cannabis intended for adult use to a person younger than twenty-one years of age.

6. Forbid any individual, corporate property owner, elementary education institutions, and secondary education institutions from prohibiting the distribution, sale or cultivation of cannabis within their dwelling for medical treatment

7. The dictates of this Initiative shall be implemented no later than January 1, following the election that placed this Initiative before the people.

8. Upon the passage of this Act, all persons incarcerated or under supervision of the Missouri Board of Probation and Parole for nonviolent, cannabis-only offenses which are no longer illegal in the State of Missouri under this Act shall be immediately released.

(a) The Court shall order the immediate expungement of civil and criminal records pertaining to all non-violent cannabis only offenses which are no longer illegal in the State of Missouri under this Act.

(b) Within 60 days of the passage of this Act, The Attorney General shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis-related nonviolent civil and criminal records in Missouri and for any offense covered by this amendment. This document shall be distributed to all Circuit Court clerks within the State.

9. No Missouri law enforcement personnel or state funds shall be used to assist or aid in the enforcement of federal cannabis laws involving acts which are no longer illegal in the State of Missouri under this amendment.

10. Any person who willfully impedes the lawful exercise of these provisions is guilty of a Class A misdemeanor.

11. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirement, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor.

12. Taxes and regulations not conflicting with sections may be imposed on the production, distribution, cultivation and possession of cannabis, marijuana and hemp shall be subjected to duly authorized powers, if any, conferred by article III and VI of the Constitution of Missouri:

13. All provisions of this section are self-executing and severable, and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.

RE: Petition approval request from Damien Johnson regarding a proposed constitutional amendment to Article IV, version 1 (2018-110)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Damien Johnson on December 21, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

Be it resolved by the people of the state of Missouri that the Constitution be amended:

This measure amends the Missouri Constitution by adding Section 54 to Article 4. This amendment implicitly repeals, in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105, 105.1108, 105.1112, 195.010.(10)(b)c,195.010.(10)(d), 195.010.(17)(m)(b), 195.010.(17)(g), 195.010.(17)(l),195.010(24), 195.015.4, 195.017.2(4)(r), 195.017.2(4)(z), 195.017.2(4)(ii),195.140.2(2), 195.202.2, 195.202.3, 195.211.2, 195.211.3, 195.211.4, 195.222.7,195.223.7, 195.223.8, 263.250.1.

1.The following shall be called the Cannabis legalization Amendment

2.Definition of terms, as used in this Act:

a) "cannabis" and "cannabis hemp" refer to the cannabis, marihuana, marijuana, cannabis sativa, cannabis indica, cannabis ruderalis, or any variety of cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof.

b) "hemp": the fiber of this plant, extracted from the stem and used to make rope, stout fabrics, fiberboard, and paper. the sister plant of cannabis

c) "medical cannabis" refers to the medical use of cannabis.

d) "personal use" refers to the non-medical consumption of cannabis.

e) "Expungeable marijuana offense" are any convictions committed prior to this amendment.

f) "cannabis accessories" means any equipment, products, or materials of any kind that are used, intended for use, or designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing cannabis, or for ingesting, inhaling, vaporizing, smoking or otherwise introducing cannabis into and/or onto the human body.

g) "establishment" refers to a cannabis cultivation facility, a cannabis testing facility, a cannabis product manufacturing facility, or a retail cannabis store or other entity that cultivates, prepares, manufactures, packages, transports or sells cannabis, cannabis products and/or cannabis accessories.

3.Marijuana shall not be listed in Missouri's Controlled Substance schedule in order to the change that reflect that cannabis as defined in Section two; clause a, are permitted for personal use for persons 18 of age or older and shall be available for medical treatment with a doctor's recommendation without an age limit. The following acts are not unlawful and shall not be an offense under Missouri law or be a basis for seizure or forfeiture.

a) Adult Possession of cannabis for personal at 18 years or older.

b) Possession, production, cultivation and distribution of hemp, marijuana and cannabis.

c) Providing cannabis, cannabis accessories and products for sale to consumers. Retail cannabis products for medical treatment or personal use shall contain appropriate labeling, which outlines the weight and estimated potency of the product, lists all pesticides used in production, and summarizes the safe and effective use of cannabis. Labels by be promotional, but shall not be false or misleading, and should be based on data derived from scientific study and prevailing human experience.

4. Medical cannabis shall be available to patients who have a physician's recommendation.

a) All patients engaged in cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through other pharmaceutical means.

b) Cannabis acquisition, possession, and consumption shall be permitted to patients under the age of twenty-one with the consent of a parent or legal guardian and through the supervision of a parent or legal custodian and a licensed physician.

c) Licensed physicians shall not be penalized for, nor restricted from recommending cannabis for medical purposes to any person.

d) Opinions pertaining to, and willingness to recommend medical cannabis therapy shall not be a criteria for the licensure of physicians; no physician shall be subject to any professional licensing review or hearing as a result of recommending or approving medical cannabis therapy.

e) Any individual who is a legal cannabis patient in another state shall be granted the same rights and privileges as a legal Missouri cannabis patient.

Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis.

5. Nothing in this section shall:

a) Require an employer to retain an employee who is impaired on the job by his use of cannabis.

b) Permit operation of a motor vehicle, watercraft, aircraft, train, or any transportation device of vehicle by anyone who is impaired by marijuana, cannabis or any other controlled substance.

c) Permit the transfer or sale of cannabis intended for adult use to a person younger than twenty-one years of age.

6. Forbid any individual, corporate property owner, elementary education institutions, and secondary education institutions from prohibiting the distribution, sale or cultivation of cannabis within their dwelling for medical treatment

7. The dictates of this Initiative shall be implemented no later than January 1, following the election that placed this Initiative before the people.

8. Upon the passage of this Act, all persons incarcerated or under supervision of the Missouri Board of Probation and Parole for nonviolent, cannabis-only offenses which are no longer illegal in the State of Missouri under this Act shall be immediately released.

(a) The Court shall order the immediate expungement of civil and criminal records pertaining to all non-violent cannabis only offenses which are no longer illegal in the State of Missouri under this Act.

(b) Within 60 days of the passage of this Act, The Attorney General shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis-related nonviolent civil and criminal records in Missouri and for any offense covered by this amendment. This document shall be distributed to all Circuit Court clerks within the State.

9. No Missouri law enforcement personnel or state funds shall be used to assist or aid in the enforcement of federal cannabis laws involving acts which are no longer illegal in the State of Missouri under this amendment.

10. Any person who willfully impedes the lawful exercise of these provisions is guilty of a Class A misdemeanor.

11. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirement, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor.

12. Taxes and regulations not conflicting with sections may be imposed on the production, distribution, cultivation and possession of cannabis, marijuana and hemp shall be subjected to duly authorized powers, if any, conferred by article III and VI of the Constitution of Missouri:

13. All provisions of this section are self-executing and severable, and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-110)

Subject

Initiative petition from Damien Johnson regarding a proposed constitutional amendment to Article IV. (Received December 21, 2016)

Date

January 10, 2017

Description

This proposal would amend Article IV of the Constitution of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Damien Johnson provided information as a proponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated this proposal authorizes the Attorney General to develop and make available a form for the destruction of all cannabis-related nonviolent civil and criminal records in Missouri which shall be distributed to all circuit courts within the State. They assume they would need 1 Paralegal to assist with research and development of the form and destruction of relevant records, resulting in increased operating expenses of $60,853 for FY2018; $64,558 for FY2019; and $65,245 for FY2020.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated a fiscal impact of $6,887,491 in fiscal year 2019, $7,338,556 in fiscal year 2020, $10,452,183 in fiscal year 2021 and thereafter.

Legalizing the possession and use of marijuana for persons 18 years or older would remove from the criminal statutes all controlled substance offenses for marijuana, including possession, distribution and trafficking. If the legislation that removed marijuana from the list of controlled substances was retrospective then there would be two reductions in the cost of incarceration: the release of offenders serving a marijuana offense and fewer admissions to prison. The legalization of marijuana will largely impact offenders who are only serving a marijuana offense. Offenders serving multiple

concurrent sentences will continue to be required to serve the other sentences after legalization and no estimate is made for offenders serving multiple sentences.

The reduction in the offender population is the total of reductions from the expungement of sentences and fewer admissions and probations. The cost avoidance is based upon a direct prison cost per year in FY17 of $6,085 and an average cost of $2,234 per year for offenders on field supervision. In the first year after the enactment of the legislation that legalizes marijuana there is an estimated reduction of 633 offenders in prison and 3,676 offenders on field supervision. In the next year (FY20) there will be no discharges from expungement but the reduction in the prison population will increase to 214. The field reduction will continue into FY21 because the marijuana offenders are estimated to serve 2.5 years on supervision.

The estimate is qualified by the use of an expansion factor that assumes that the drug distribution in the sentences where the drug is not known will be similar to that where the drug is known.

The estimated cost avoidance in the first year is $6,887,491 and will be $10,452,183 after the 5th year.

If marijuana usage becomes legal it could impact the safety and security of our prisons as it is not believed that there is a means for testing whether an employee is under the influence of marijuana. Impaired prison employees or visitors can impact the safe and secure operation of our prisons.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this legislation will have no fiscal impact on their department but may increase state revenues if marijuana is subject to state sales tax.

Officials from the **Department of Public Safety** indicate they see no fiscal impact due to this initiative petition. They forwarded this to the Missouri State Highway Patrol for their response.

Officials from the **Missouri State Highway Patrol** indicated they expect increased operating costs of $426,236 for the first year implemented, $487,384 for the second year implemented, and $492,597 for the third year implemented.

The provisions of this petition would require their agency to rent office space for 4 FTE's to process the expungement requests.

The proposed legislation would order the immediate destruction of all cannabis-related non-violent civil and criminal records in Missouri.

Two different divisions within their agency will be impacted by this legislation. Here is a breakdown for each division:

Criminal Justice Information Services Division

The Criminal Justice Information Services Division (CJIS) states that there are currently 95,550 arrest charges in the Central Repository. The current expungement process, pursuant to Chapter 610, takes approximately 90 minutes to process. One FTE can handle 1,243 expungements per year. Conservatively, at least five FTE's would be required to initially handle the expungments created by this legislation. A significant processing backlog would occur if sufficient FTE's are not assigned to accommodate the number of expungements ordered.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 90 minutes. Therefore, one FTE can handle 1,243 expungements per year = 111,840 / 90.

These FTE's (CJIS Technicians, Range 16) would be necessary to process all expungement requests, review criminal history records, contact any agency associated with the arrests or convictions, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE at $55,495 and the ability of that employee to process 1,243 expungements per year, the cost alone per expungement is $55,495 \ 1,243 = $44.64. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories, as well as contacting of the various agencies associated with the arrests. In researching other states with similar expungement requirements, they all charge a fee to offset the cost of the time required to process the expungements. Their fees ranged from $50 to $450 per petition per arrest date.

These FTE will most likely be 2nd and 3rd shift employees so they would not require any equipment. However, there would be recurring costs of $650 per year per FTE for office supplies and phone charges. If any FTE were placed on the 1st shift, standard equipment would be required at a one-time cost of $6,094 per FTE.

5 CJIS Technicians ($1,232.50 x 24)	$147,900
Office Equipment/HW/SW	$6,094
RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

Patrol Records Divison

Currently, there are 29,904 records in the Patrol's Traffic Arrest System (TAS) pertaining to arrests completed by the Missouri Highway Patrol that could possibly meet the requirements of this proposed constitutional amendment. These are arrest records with a court conviction pertaining to individuals the age of 18 years and older with an NCIC modifier of 60-64 that relate to marijuana offenses. Given this, if only 30 percent of the individuals who qualify to have his or her record expunged sought to do so, the Patrol Records Division (PRD) would require four FTE's. However, if a large number of these expungements were to be granted with even four FTE's, the backlog would compound greatly to the point it may take several years to catch up. If 100 percent of the individuals who qualify to have their record expunged sought to do so, the Patrol Records Division would require 12 FTE's to complete this task in approximately one year.

The addition of 12 FTE's would require additional supervisory personnel. However, due to the vague and uncertain nature of this proposed amendment, the Patrol Records Division has no true way to determine the actual effect or costs.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 45 minutes. Therefore, one FTE can handle 2,485 expungements per year = 111,840 / 45.

With the current estimate of 29,904 records that potentially meet the requirements of this proposed amendment and would potentially be eligible for expungement, the following percentages of persons actually requesting an expungement will directly relate to the number of PRD FTE's required:

30% = 29,904 x .30 = 8,971 / 2,485 = 4 FTE's
50% = 29,904 x .50 = 14,952 / 2,485 = 6 FTE's
100% = 29,904 / 2,485 = 12 FTE's

These FTE's (Quality Control Clerks, Range 10) would be necessary to process all expungement requests, review records, contact agencies, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE of $45,702 and the ability of that employee to process 2,485 expungements per year, the cost per expungement is $45,702 \ 2,485 = $18.39. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories.

Processing 30 percent of the possible expungements would require additional workspace. The physical requirements would increase with the number of FTE's required to meet the demand for expungements. There will be recurring costs of $650 per year per FTE for

office supplies and phone charges. Standard equipment and office furniture would be required at a one-time cost of $6,094 per FTE.

4 Quality Control Clerks ($1,015 x 24)	$97,440
Equipment/Office Furniture	$6,094

RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

The provisions of this petition would require their agency to rent office space for 4 FTE's to process the expungement requests. The Office of Administration states that 920 square feet of office space would be required. The following costs apply per square foot:

Office Space	$14/Sq Ft
Janitorial/Trash Costs	$1.50/Sq Ft
Utility Costs	$2/Sq Ft

The agency provided the following additional comments:

It is suggested to add this additional language to provide for the collection of a fee to offset the costs of the expungements:

43.530. 1. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than nine dollars per request for criminal history record information not based on a fingerprint search. In each year beginning on or after January 1, 2010, the superintendent may increase the fee paid by requesting entities by an amount not to exceed one dollar per year, however, under no circumstance shall the fee paid by requesting entities exceed fifteen dollars per request.

2. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than twenty dollars per request for criminal history record information based on a fingerprint search, unless the request is required under the provisions of subdivision (6) of section 210.481, section 210.487, or section 571.101, in which case the fee shall be fourteen dollars.

3. A request made under subsections 1 and 2 of this section shall be limited to check and search on one individual. Each request shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. The highway patrol may establish procedures for receiving requests for criminal history record information for classification and search for fingerprints, from courts and other entities, and for the payment of such requests. There is hereby established by the treasurer of the state of Missouri a fund to be entitled as the "Criminal Record System Fund". Notwithstanding the provisions of section 33.080 to the contrary, if the moneys collected and deposited into this fund are not totally expended annually for the purposes set forth in

sections 43.500 to 43.543, the unexpended moneys in such fund shall remain in the fund and the balance shall be kept in the fund to accumulate from year to year.

4. For all petitions for expungement under the provisions of Chapter 610, Section 577.054, or any other created expungement requirement under statute, excluding Section 610.122, the applicant shall pay a fee of seventy-five dollars per arrest date listed on the petition. Each petition shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. For expungements that require removal from the Traffic Arrest System twenty dollars of the seventy-five dollar fee will be deposited in the Highway Patrol Traffic Records Fund.

There are numerous uncertainties associated with this proposed constitutional amendment. The definition of a "non-violent cannabis-only offense" needs to be added. It is unclear if individuals with the aforementioned conviction records are required to abide by the expungement process mandated by various other state statutes. Does the individual just complete and file a document with a circuit clerk and the record is expunged or does the "court," whomever that is, order the immediate expungement of all civil and criminal records pertaining to non-violent cannabis only offenses?
Their agency requests clarification of number 9 which states that no Missouri law enforcement personnel or state funds shall be used to assist or aid in the enforcement of federal cannabis laws involving acts which are no longer illegal in the state of Missouri under this amendment. Does this mean that the Highway Patrol could no longer participate in federal operations when requested?

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's Office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated Expungment: Title 49 Code of Federal Regulations (C.F.R.) 384.226 states that a "State must not mask, defer imposition of judgment, or allow an individual to enter into a diversion program that would prevent a CLP or CDL holder's conviction for any violation, in any type of motor vehicle, of a state or local traffic control law (other than parking, vehicle weight, or vehicle defect violations) from appearing on the CDL driver record, whether the driver was convicted for an offense committed in the State where the driver is licensed or another State." Additionally, 49 C.F.R. 384.225 lays out specific record keeping requirements regarding the posting and maintaining of commercial driver's license

(CDL) holders' records that states must meet in order to be in substantial compliance with Federal Motor Carrier Safety Regulations. These records include all convictions, disqualifications, and other licensing action for violations of any state or local law relating to motor vehicle traffic control (other than parking, vehicle weight, or vehicle defect violations) committed in any type of vehicle.

Fiscal Impact: Failure to comply with 49 C.F.R. 384.225 & 384.226 would result in a withholding of Missouri's federal-aid highway funds apportioned to it under each of Title 23, United States Code (U.S.C.), sections 104(b)(1), (b)(3), and (b)(4). The federal funds impacted consist of national highway performance program funds, highway safety improvement program funds and congestion mitigation and air quality improvement funds. The withholding amount would be 4% for the first year of non-compliance and 8% for the second and subsequent years.

Officials from the **Office of Administration** (OA) indicated:

This proposal adds Section 54 to Article IV of the Missouri Constitution.

The proposal:

- Removes marijuana from the list of controlled substances.
- Allows possession (for those 18 or older), production, cultivation and distribution of hemp, marijuana and cannabis.
- Allows the use of medical cannabis for patients with a physician's recommendation.
- Clarifies that certain crimes such as operating a motor vehicle under the influence of marijuana remain crimes.
- Upon passage of the proposal, requires the release of all persons incarcerated or on parole for non-violent, cannabis-only offenses which would no longer be illegal to be immediately released and their civil and criminal records expunged and destroyed.
- Prohibits Missouri law enforcement personnel or state funds from being used to enforce federal cannabis laws involving acts that would no longer be illegal upon passage of this proposal.
- Provides protection for cannabis farmers, manufacturers, processors and distributors from special zoning requirements, excessive licensing fees, etc. relative to other commercial or agricultural farmers, manufacturers, processors or distributors.
- Allows taxes to be imposed on the production, distribution, cultivation and possession of cannabis, marijuana and hemp.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated:

The proposed initiative petition would create a new section of the Missouri Constitution to be known as Article IV, section 54. This section would allow citizens at eighteen years or older to have the right to engage in the production, sale, distribution and consumption of marijuana and the manufacture of goods from hemp, subject to reasonable regulations adopted by the state pursuant to this section.

The average of all marijuana related charge codes from 2011 to 2015 for Circuit case types is 14,122 per year. The average of all marijuana related charge codes from 2011 to 2015 for Associate case types is 10,982. They are unable to determine what number of these charges were for someone over the age of eighteen.

The following Criminal Court Costs would be affected by this petition:

Criminal Court Costs		
Felony Case Costs	**Amount of Cost**	**Disburse to State/County**
Basic Civil Legal Services Fund surcharge	$10.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$45.00	State of Missouri - General Revenue $36, County $9
County Fee	$75.00	County
Court Automation Fund Fee	$7.00	State of Missouri -Statewide Court Automation Fund
Court Reporter fee (All Circuit Division Cases)	$15.00	State of Missouri - General Revenue
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$30.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Head Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards & Training (POST) Commission	$1.00	State of Missouri - Peace Officer Standards & Training Fund

surcharge		
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	State of Missouri - Prosecuting Attorney Training Fund
Sheriffs' Fee	$75.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement Fund
Spinal Cord Injury Fund surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$279.50**	
Misdemeanor Case Costs		
Basic Civil Legal Services Fund surcharge	$8.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$15.00	$12 State of Missouri / $3 County
County Fee	$25.00	County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$15.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Brain Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards and Training (POST) Commission	$1.00	State of Missouri - Peace Officer Standards & Training Fund

surcharge		
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	$0.50 State of Missouri / $0.50 County
Sheriffs' fee	$10.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement fund
Spinal Cord Injury Fund Surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$102.50**	
Municipal Case (Filed in Associate Division) Costs		
Clerk Fee	$15.00	$12 State of Missouri / $3 County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Sheriffs' Retirement Fund surcharge	$3.00	Sheriffs' Retirement Fund
Total	**$33.50**	
Criminal Costs Not Included Above		
Drug Testing by a State Lab	$150.00	State of Missouri

Drug Testing by a Private Lab	Actual Costs	County Reimbursement
Law Enforcement Arrest Costs:		
Highway Patrol		Amt. Approved by the Court
Local (County)		Amt. Approved by the Court
Municipal		Amt. Approved by the Court

The decrease in the court fees, depending on the number of cases, will result in an unknown loss to the courts.

They also assume there will be an unknown decrease in caseload for the courts because the courts will no longer process these cases; however, at this time they are unable to calculate the decrease.

Any significant increase or decrease will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated if passed, this constitutional amendment would have a positive impact on the workload of the Missouri State Public Defender, since possession, manufacture, distribution, etc. of cannabis would no longer be unlawful, offenses that the Public Defender currently uses resources to defend and no longer would need to.

The exact positive impact is difficult to predict because they track cases by statutory offense and most drug offenses are not limited to marijuana.

However, their best estimate, using FY2014 MSPD data, is that this would reduce their caseload by 3,523 cases (685 A/B felonies, 1,797 C/D felonies, 1,041 misdemeanors, and 1,140 probation violations).

In *The Missouri Project: A Study of the Missouri Public Defender System and Attorney Workload Standards*, prepared by RubinBrown on behalf of the American Bar Association's Standing Committee on Legal Aid and Indigent Defendants, the relevant workload standards are: A/B felonies, 47.6 hours per case; C/D felonies, 25.0 hours per case; misdemeanors, 11.7 hours per case; and probation violations, 9.8 hours per case). (The workload standards include only case related tasks over which an attorney has some control (they exclude, for example, in court and travel time) and thereby reflect a conservative estimate.)

Applying those workload standards to the 2,858 cases, those cases require 100,882.7 attorney hours. With 2,080 hours per attorney available each year, that represents the work of 48.5 attorneys.

While in theory they might also handle fewer appeals of guilty verdicts after trial, the fact is that only a very small percentage of their cases proceed to trial and it's likely that only a small percentage of those cases are appeals from marijuana convictions. Therefore this minimal positive impact is not being taken into account in this estimate.
However, the Missouri State Public Defender already is significantly understaffed by 333 attorneys under the workload standards developed in *The Missouri Project*. (The 333 attorneys is a conservative estimate of the under-staffing in that it assumes we contract all conflicts to private attorneys, which we are not able to do for budgetary reasons).

Therefore, despite the positive impact on the workload of the Missouri State Public Defender, because they are already understaffed that savings in attorney time would not allow the Public Defender to reduce its workforce and therefore would not translate into an actual cost savings. However it does reduce by the cost of 48.5 attorneys how much money needs to be added to their budget in order to meet *The Missouri Project*'s workload standards.

Officials from the **State Treasurer's office** indicated this would have no fiscal impact on their office.

Officials from **Greene County** indicated there is anticipated costs for this initiative petition. Unfortunately there is not enough time given in the response to provide an actual estimated costs.

County Prosecutor, Dan Patterson provided the following information:

DenverDA
Mitchell R. Morrissey, District Attorney - Second Judicial District

October 12, 2016

No on 64 Campaign and SAM Action

California voters are being told that they will see the crime rate go down if they vote to legalize marijuana commercially; this has not been the case in the state of Colorado or the city of Denver. Since the legalization of recreational marijuana in Colorado in 2013 traffic related marijuana deaths have increased 48%, marijuana related emergency room visits have increased 49%, and marijuana related calls to the poison center have increased 100%. According to the Colorado Bureau of Investigations in 2015 statewide homicides in Colorado rose 14.7 % over the previous year. Pueblo, Colorado had the highest homicide rate in the state with 11.1 killings per 100,000 residents. Aurora, Colorado's homicide rate more than doubled from 2014. Additionally more places in Colorado were robbed and more thefts occurred, especially cars, as 193,115 motor vehicles were reported stolen, up 27.7 % in 2015 from the previous year. In 2015, sexual assaults rose 10% in Colorado with Denver, Aurora, Lakewood, Westminster and Pueblo all reporting higher numbers as well.

In the city of Denver since the legalization of recreational marijuana the number of crimes in Denver has grown by about 44 %, according to annual figures the city reported to the National Incident Based Reporting System. In 2015 in Denver alone crime rose in every neighborhood in the city. The murder rate hit a decade high, 1059 more cars were broken into, there were 903 more auto thefts, 321 more aggravated assaults and 231 more homes were broken into compared to 2014.

California voters are also being told that legalizing recreational marijuana will free up law enforcement to work on other criminal activities. Again that has not been the case in Denver. Besides the overall increases in crime we have experience, the Denver police department is dealing with a 900% increase in the unlawful cultivation and manufacture of marihuana concentrate, and a 99% increase in the unlawful distribution of marijuana and marijuana concentrate. The quantity of illegal marijuana seized by the Denver police has increased 3,424% on average per case. The volume of marijuana seized per case has increased from an average of 162 pounds to 5724 pounds. In Denver unlawful public consumption of marijuana citations has increased over 300% per year since the legalization of recreational marijuana. The Denver police department is busier enforcing marijuana laws and investigating crimes directly related to marijuana, including murderers, robberies, and home invasions, than any other time in the history of the city.

Sincerely,

Mitchell R. Morrissey
Denver District Attorney

Officials from the **City of Kansas City** indicated sales taxes could be collected. No amount can be reasonably estimated.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from the **University of Central Missouri** indicated this petition would neither provide any fiscal savings, nor additional costs, for their university.

Officials from the **Missouri State University** indicated in response to this petition, no fiscal impact to their university.

Damien Johnson provided the following information as a proponent of this initiative petition.

Annual state government operating costs would increase by at least $1 million with the total increase being unknown. Those costs would be offset by an unknown increase in fee and tax revenues. The fiscal impact to local governmental entities is unknown with some increase in revenue possible.

The net fiscal impact to state and local government is unknown based on the revenue generated by taxes and fees that could offset the operating cost.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, Harris-Stowe State University, Lincoln University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Fiscal Note Summary

This proposal is estimated to result in annual state cost savings of $10 million. Annual state operating costs are estimated to increase by $600,000 to $1 million. Local law enforcement costs could increase.

RE: Petition approval request from Damien Johnson regarding a proposed constitutional amendment to Article VIII (2018-109)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Damien Johnson on December 19, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

Be it resolved by the people of the state of Missouri that the Constitution be amended:

This amendment repeals, in part or in whole, and amends various statutes and subsections relating to political parties. Including but not necessarily limited to RSMO 115.121, 115.122, 115.307, 115.309, 115.31, 115.315, 115.319, 115.321, 115.603, 115.605, 115.607 to 115.627,

Article VIII of the Missouri Constitution by creating a new section known as section 23 of Article VIII to read as follows:

a) Candidates running for United States Senate, United States Congress, Governor, Lt. Governor, Treasurer, Attorney General, Secretary of State, State Senate and State Representative shall be listed as a non-partisan candidate and no Party affiliation shall be listed next to a candidate.

b) Unless running in a special election or a runoff, all candidates shall run in a November election without running in a primary and required to win 50% plus one of the votes cast. If no candidates win 50% plus one of the votes cast, then there shall be a runoff between the top two candidates no later than 60 days after the November election.

c) Candidates shall not be charged more than $100 nor be required to collect signatures.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-109)

Subject

Initiative petition from Damien Johnson regarding a proposed constitutional amendment to Article VIII (Received December 21, 2016)

Date

January 10, 2017

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners.**

Damien Johnson provided information as a proponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they assume that any costs resulting from the proposal could be absorbed with existing resources.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated this petition does not pertain to their department so, they will not be responding.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this legislation will not have a fiscal impact on their department.

Officials from the **Department of Public Safety** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no fiscal impact.

Officials from the **Office of Administration** indicated this proposal enacts one new section in Article VIII, Section 23 to require non-partisan elections. This proposal should not have a fiscal impact for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated this measure changes the way primary and general elections are conducted. If passed, this measure is likely to have a significant effect on the costs of holding elections. There is potential for increased costs to produce ballots for both in-person and absentee voting. The language of this measure also potentially creates the possibility of three separate elections each cycle for state candidates: 1) an August primary for judges, 2) a November general election for all candidates, and 3) a possible run-off election following the November general election. It is also unclear how this measure will impact special elections. Many of the state's voting systems could potentially need to be replaced or upgraded at a quite significant cost under this measure. At this time the projected costs of this measure are unknown, but significant costs are likely to be incurred by both the state and local election authorities.

Additionally:

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an

estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this would have no fiscal impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated no fiscal impact is anticipated if this proposal is adopted.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from **University of Missouri** indicated this initiative petition will not have a fiscal impact on their university.

Officials from the **Kansas City Board of Election Commissioners** indicated the financial impact with this amendment would be roughly $450,000, the cost of having a January election in our jurisdiction. Another issue would be the disenfranchising of Military and Absentee voters with a shorter election cycle (60 day). We would also worry about recruiting enough election workers to work the polls in the month of January. These are our concerns regarding this amendment.

Officials from the **Platte County Board of Elections** indicated their local government estimates the fiscal impact of this bill for fiscal years 2017, 2018, and 2019 to be as follows:

Revenues: None

Cost: Their office estimates the cost of this initiative to be $78,000 in even numbered years.

Technical notes:

The proposal leaves in-tact the primary contest for local candidates and the August election date. Under this proposal with a 50% +1 requirement 3 elections through the fall and winter of even years are all but guaranteed. Currently certification of an election cannot happen until the Friday after the election and the deadline is 2 weeks after the election. The “no more than 60 day rule” when combined with current absentee rules would have final certification and absentee voting beginning on the same day. Ballots will not be ready for six weeks of absentee voting. Additionally, the timeline sets the runoff election in the week between Christmas and New Year’s in most years.

Damien Johnson provided the following information as a proponent of this initiative petition.

The potential savings to governmental entities are unknown, but not likely to lead to a cost increase.

"But not likely" This initiative removes primaries and requires runoffs if no candidates in the race get a majority. Runoffs are required if no candidate gets a majority of the votes cast. Thus, since US congressional seats are what analysis consider safe seats, the state should expect cost savings of not having a primary nor runoff. Clay should win his seat with a majority. There should be some races that would have runoffs.

Hypothetically speaking, had this initiative been in effect for the US senate race last election, Roy Blunt and Jason Kander and all the less financed candidates would run in the general election. Then Blunt and Kander will be the only two candidates facing each other in a runoff. The cost of the race will shift from a primary to a runoff. Being that Blunt was the only statewide candidate who won by plurality statewide he'll be the only candidate running statewide in my hypothetical scenario.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, St. Louis Community College, St. Louis County Board of Elections, Board of Election Commissioners City of St. Louis, Jackson County Election Board,** and **Clay County Board of Election Commissioners**.

Fiscal Note Summary

Local election authorities and the state will likely incur increased election-related costs estimated to be $528,000 per election cycle with the total costs being unknown, but likely significant.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

This measure amends Article X section 26 of the Missouri Constitution by deleting all matters within the enclosed brackets and adding all the underlined matters as required pursuant to Section 116.050 RSMo.

Prohibition on new or local sales, use, or other similar transaction-based tax not [subject to such tax as of January 1, 2015]approved by voters. Mandate voter approval before funding or financing sport facilities.

A. Section 26. In order to prohibit an increase in the tax burden on the citizens of Missouri without voter approval, state and local sales and use taxes (or any similar transaction-based tax) shall not be expanded to impose taxes on any service or transaction that was [not subject to sales, use or similar transaction-based tax on January 1, 2015.] approved by voters.

B. Prohibit funding of sports and entertainment stadiums, centers recreation center or facilities without voter approval.

C. Prohibit expansion, extending, modifying, or amending current or future bonds, tax credits, without voter approval.

D. All provisions of this section are self-executing and severable, and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.

All provisions shall take effect immediately upon passage.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

35 of Article I of the Constitution of Missouri is amended by modifying section 35. The existing section 35 is set forth hereinafter with the new matter bold and deleted matter in brackets,

Definitions of terms, as used in this Act:

a) Cannabis: refers to the cannabis, marihuana, marijuana, cannabis, sativa, cannabis indica, cannabis ruderalis, or any variety of cannabis, including but not limited to, derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof

b) Hemp: The fiber of this plant, extracted from the stem and used to make rope, fabrics, fiberboard, clothing, and paper. The sister plant of cannabis

That agriculture which provides food, energy, health benefits, and security is the foundation and stabilizing force of Missouri's economy. This section shall protect the right to grow cannabis and hemp. To protect this vital sector of Missouri's economy, the right of farmers and ranchers to engage in farming and ranching practices shall be forever guaranteed in this state, subject to duly authorized powers, if any, conferred by article VI of the Constitution of Missouri.

RE: Petition approval request from Damien Johnson regarding a proposed constitutional amendment to Article IV, version 2 (2018-106)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Damien Johnson on December 19, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

RE: Petition approval request from Natalie Meyer regarding a proposed statutory amendment to Chapter 191 (2018-104)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Natalie Meyer on December 19, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

BE IT ENACTED BY THE PEOPLE OF THE STATE OF MISSOURI:

The proposed initiative will amend Chapter 191 of Missouri Revised Statutes by adding twenty-two new sections.

These twenty-two sections shall be known and cited as the "Missouri Death with Dignity Act".

Section 1.

In said sections, the following terms shall mean:

(1) "Adult", any individual who is eighteen years of age or older.

(2) "Attending physician", the physician who has primary responsibility for the care of the patient and treatment of the patient's terminal disease.

(3) "Capable", in the opinion of a court or in the opinion of the patient's attending physician or consulting physician, psychiatrist or psychologist, a patient has the ability to make and communicate health care decisions to health care providers, including communication through persons familiar with the patient's manner of communicating if those persons are available.

(4) "Consulting physician", a physician who is qualified by specialty or experience to make a professional diagnosis and prognosis regarding the patient's disease.

(5) "Counseling", one or more consultations as necessary between a state licensed psychiatrist or psychologist and a patient for the purpose of determining that the patient is capable and not suffering from a psychiatric or psychological disorder or depression causing impaired judgment.

(6) "Health care provider", a person licensed, certified or otherwise authorized or permitted by the law of this state to administer health care or dispense medication in the ordinary course of business or practice of a profession, and includes a health care facility.

(7) "Informed decision", a decision by a qualified patient, to request and obtain a prescription to end his or her life in a humane and dignified manner, that is based on an appreciation of the relevant facts and after being fully informed by the attending physician of:

a. His or her medical diagnosis;

b. His or her prognosis;

c. The potential risks associated with taking the medication to be prescribed;

d. The probable result of taking the medication to be prescribed; and

e. The feasible alternatives, including, but not limited to, comfort care, hospice care and pain control.

(8) "Medically confirmed", the medical opinion of the attending physician has been confirmed by a consulting physician who has examined the patient and the patient's relevant medical records.

(9) "Patient", a person who is under the care of a physician.

(10) "Physician", a doctor of medicine or osteopathy licensed to practice medicine in the state of Missouri

(11) "qualified patient", a capable adult who is a resident of this state and has satisfied the requirements of this initiative in order to obtain a prescription for medication to end his or her life in a humane and dignified manner.

(12) "Terminal disease", an incurable and irreversible disease that has been medically confirmed and shall, within reasonable medical judgment, produce death within six months.

Section 2.

1. An adult who:
    a. Is capable;
    b. Is a residence of this state;
    c. Has been determined by the attending physician and consulting physician to be suffering from a terminal disease; and
    d. Has voluntarily expressed his or her wish to die;

may make a written request for medication for the purpose of ending his or her life in a humane and dignified manner in accordance with this initiative.

2. No person shall qualify under this initiative solely because of age or disability.

Section 3.

1. A valid request for medication under this initiative shall be in substantially the form described in section 20, signed and dated by the patient, and witnessed by at least two individuals who, in the presence of the patient, attest that to the best of their knowledge and belief the patient is capable, acting voluntarily, and is not being coerced to sign the request.
2. One of the witnesses shall be a person who is not:
    a. A relative of the patient by blood, marriage, or adoption;
    b. A person, who at the time the request is signed, would be entitled to any portion of the estate of the qualified patient upon death under any will or by operation of law; or
    c. An owner, operator, or employee of a health care facility where the qualified patient is receiving medical treatment or is a resident
3. The patient's attending physician at the time the request is signed shall not be a witness.

If the patient is in a long-term care facility at the time the written request is made, one of the witnesses shall be an individual designated by the facility and having the qualifications specified by the department of health and senior services by rule.

Section 4

1. The attending physician shall:
    A. Make the initial determination of whether a patient has a terminal disease, is capable, and has made the request voluntarily;
    B. Request that the patient demonstrate Missouri state residency under section 13;
    C. To ensure that the patient is making an informed decision, inform the patient of:
        a. His or her medical diagnosis;
        b. His or her prognosis;
        c. The potential risks associated with taking the medication to be prescribed;
        d. The probable result of taking the medication to be prescribed; and
        e. The feasible alternatives including, but not limited to, comfort care, hospice care, and pain control;
    D. Refer the patient to a consulting physician for medical confirmation of the diagnosis and for a determination that the patient is capable and acting voluntarily;
    E. Refer the patient for counseling if appropriate under section 6;
    F. Recommend that the patient notify next of kin;
    G. Counsel the patient about the importance of having another person present when the patient takes the medication prescribed under this legislation and of not taking the medication in a public place;
    H. Inform the patient that he or she has an opportunity to rescind the request at any time and in any manner, and offer the patient an opportunity to rescind at the end of the fifteen-day waiting period under section 9;

I. Verify, immediately before writing the prescription for medication under this initiative, that the patient is making an informed decision;

J. Fulfill the medical record documentation requirements of section 12;

K. Ensure that all appropriate steps are carried out in accordance with this initiative prior to writing a prescription for medication to enable a qualified patient to end his or her life in a humane and dignified manner; and

L. I. Dispense medications directly, including ancillary medications intended to facilitate the desired effect to minimize the patient's discomfort, provided that the attending physician is authorized under state law and rule to dispense, has a current drug enforcement administration certificate, and complies with any applicable administrative rule; or

II. With the patient's written consent:

a. Contact a pharmacist and inform the pharmacist of the prescription; and

b. Deliver the written prescription personally, by mail, or facsimile to the pharmacist, who shall dispense the medications to either the patient, the attending physician, or an expressly identified agent of the patient.

2. Notwithstanding any other provision of law, the attending physician may sign the patient's death certificate.

Section 5

Before a patient is qualified under this initiative, a consulting physician shall examine the patient and his or her relevant medical records and confirm in writing the attending physician's diagnosis that the patient is suffering from a terminal disease and verify that the patient is capable, is acting voluntarily, and has made an informed decision.

Section 6

If, in the opinion of the attending physician or the consulting physician, a patient may be suffering from a psychiatric or psychological disorder or depression causing impaired judgment, either physician shall refer the patient for counseling. No medication to end a patient's life in a humane and dignified manner shall be prescribed until the person performing the counseling determines that the patient is not suffering from a psychiatric or psychological disorder or depression causing impaired judgment.

Section 7

No person shall receive a prescription for medication to end his or her life in a humane and dignified manner unless he or she has made an informed decision, as defined in section 1. Immediately prior to writing a prescription for medication under this initiative, the attending physician shall verify that the qualified patient is making an informed decision.

Section 8

The attending physician shall recommend that the patient notify the next of kin of his or her request for medication under this initiative. A patient who declines or is unable to notify next of kin shall not have his or her request denied for that reason.

Section 9

In order to receive a prescription for medication to end his or her life in a humane and dignified manner, a qualified patient shall have made an oral request and a written request and reiterate the oral request to his or her attending physician at least fifteen days after making the initial oral request. At the time the qualified patient makes his or her second oral request, the attending physician shall offer the qualified patient an opportunity to rescind the request.

Section 10

A patient may rescind his or her request at any time and in any manner without regard to his or her mental state. No prescription for medication under this initiative shall be written without the attending physician offering the qualified patient an opportunity to rescind the request.

Section 11

No less than fifteen days shall elapse between the patient's initial oral request and the writing of a prescription under this initiative. No less than forty-eight hours shall elapse between the date of the patient's written request and the writing of a prescription under this initiative.

Section 12

The following shall be documented or filed in the patient's medical record:

(1) All oral requests made by the patient for medication to end his or her life in a humane and dignified manner;

(2) All written requests made by the patient for medication to end his or her life in a humane and dignified manner;

(3) The attending physician's diagnosis and prognosis and determination that the patient is capable, is acting voluntarily, and has made an informed decision;

(4) The consulting physician's diagnosis and prognosis and verification that the patient is capable, is acting voluntarily, and has made an informed decision;

(5) A report of the outcome and determinations made during counseling, if performed;

(6) The attending physician's offer to the patient to rescind his or her request at the time of the patient's second oral request under section 9; and

(7) A note by the attending physician indicating that all requirements under this initiative have been met and indicating the steps taken to carry out the request including a notation of the medication prescribed.

Section 13

Only requests made by Missouri residents under this initiative shall be granted. Factors demonstrating Missouri residency include, but are not limited to:

(1) Possession of a Missouri driver's license;

(2) Registration to vote in Missouri;

(3) Evidence that the person owns or leases property in Missouri; or

(4) Filing of a Missouri tax return for the most recent tax year.

Section 14

1. a. The department of health and senior services shall annually review all records maintained under this initiative.
   b. The department of health and senior services shall require any health care provider upon dispensing medication under this initiative to file a copy of the dispensing record with the department.

2. The department of health and senior services shall adopt rules to facilitate the collection of information regarding compliance with this initiative. Except as otherwise required by law, the information collected shall not be a public record and shall not be made available for inspection by the public.

3. The department of health and senior services shall generate and make available to the public an annual statistical report of information collected under subsection 2 of this section.

Section 15

1. No provision in a contract, will, or other agreement, whether written or oral, to the extent the provision would affect whether a person may make or rescind a request for medication to end his or her life in a humane and dignified manner, shall be valid.

2. No obligation owing under any currently existing contract shall be conditioned or affected by the making or rescinding of a request by a person for medication to end his or her life in a humane and dignified manner.

Section 16

The sale, procurement, or issuance of any life, health, or accident insurance or annuity policy or the rate charged for any policy shall not be conditioned upon or affected by the making or rescinding of a request by a person for medication to end his or her life in a humane and dignified manner. A qualified patient's act of ingesting medication to end his or her life in a humane and dignified manner shall not have an effect upon a life, health, or accident insurance or annuity policy.

Section 17

Nothing is this initiative shall be construed to authorize a physician or any other person to end a patient's life by lethal injection, mercy killing, or active euthanasia. Actions taken in accordance with this initiative shall not for any purpose constitute suicide, assisted suicide, mercy killing, or homicide under the law.

Section 18

1. Except as provided in subsection 2 of this section and section 20:
   a. No person shall be subject to civil or criminal liability or professional disciplinary action for participating in good faith compliance with this initiative including being present when a qualified patient takes the prescribed medication to end his or her life in a humane and dignified manner;
   b. No professional organization or association or health care provider shall subject a person to censure, discipline, suspension, loss of license, loss of privileges, loss of membership, or other penalty for participating or refusing to participate in good faith compliance with this initiative;
   c. No request by a patient for or provision by an attending physician of medication in good faith compliance with this initiative shall constitute neglect for any purpose of law or provide the sole basis for the appointment of a guardian or conservator; and
   d. No health care provider shall be under any duty, whether by contract, statute, or any other legal requirement to participate in the provision to a qualified patient of medication to end his or her life in a humane and dignified manner. If a health care provider is unable or unwilling to carry out a patient's request under this initiative and the patient transfers his or her care to a new health care provider, the prior health care provider shall, upon request, transfer a copy of the patient's relevant medical records to the new health care provider.

2. (1) Notwithstanding any other provision of law, a health care provider may prohibit another health care provider from participating under the Missouri death with dignity act on the premises of the prohibiting provider if the prohibiting provider has notified the health care provider of the prohibiting provider's policy regarding participation in the Missouri death with dignity act. Nothing in this subdivision shall prevent a health care provider from providing health care services to a patient that do not constitute participation in the Missouri death with dignity act.
   (2) Notwithstanding the provisions of subsection 1 of this section, a health care provider may subject another health care provider to the following sanctions if the sanctioning health care provider has notified the sanctioning provider prior to participation under this initiative that it prohibits participation in the Missouri death with dignity act:
   (a) Loss of privileges, loss of membership, or other sanctions provided under the medical staff bylaws, policies, and procedures of the sanctioning health care provider if the sanctioned provider is a member of the sanctioning provider's medical staff and participates under the Missouri death with

dignity act while on the health care facility premises of the sanctioning health care provider, but not including the private medical office of a physician or other provider;

(b) Termination of a lease or other property contract or other nonmonetary remedies provided by a lease contract, not including loss or restriction of medical staff privileges or exclusion from a provider panel, if the sanctioned provider participates under the Missouri death with dignity act while on the premises of the sanctioning health care provider or on property that is owned by or under the direct control of the sanctioning health care provider; or

(c) Termination of a contract or other nonmonetary remedies provided by contract if the sanctioned provider participates under the Missouri death with dignity act while acting in the course and scope of the sanctioned provider's capacity as an employee or independent contractor of the sanctioning health care provider. Nothing in this paragraph shall be construed to prevent:

a. A health care provider from participating under the Missouri death with dignity act while acting outside the course and scope of the provider's capacity as an employee or independent contractor; or

b. A patient from contracting with his or her attending physician and consulting physician to act outside the course and scope of the provider's capacity as an employee or independent contractor of the sanctioning health care provider.

(3) A health care provider that imposes sanctions under subdivision (2) of this subsection shall follow all due process and other procedures the sanctioning health care provider may have that are related to the imposition of sanctions on another health care provider.

(4) For the purposes of this subsection, the following terms shall mean:

(a) "Notify", a separate statement in writing to the health care provider specifically informing the health care provider before the provider's participation under the Missouri death with dignity act of the sanctioning health care provider's policy about participation in activities covered by the Missouri death with dignity act;

(b) "Participate under the Missouri death with dignity act", to perform the duties of an attending physician under section 5, the consulting physician function under section 5, or the counseling function under section 6. Participate under the Missouri death with dignity act does not include:

a. Making an initial determination that a patient has a terminal disease and informing the patient of the medical prognosis;

b. Providing information about the Missouri death with dignity act to a patient upon the request of the patient;

c. Providing a patient, upon the request of the patient, with a referral to another physician; or

d. A patient contracting with his or her attending physician and consulting physician to act outside of the course and scope of the provider's capacity as an employee or independent contractor of the sanctioning health care provider.

3. Suspension or termination of staff membership or privileges under subsection 2 of this section is not reportable to the department or state board of registration for the healing arts. Action taken under sections 3 to 6 shall not be the sole basis for a report of unprofessional conduct.

4. No provision of this initiative shall be construed to allow a lower standard of care for patients in the community where the patient is treated or a similar community.

Section 19

1. A person, who without authorization of the patient, willfully alters or forges a request for medication or conceals or destroys a rescission of that request with the intent or effect of causing the patient's death is guilty of a class A felony.

2. A person who coerces or exerts undue influence on a patient to request medication to end the patient's life or to destroy a rescission of a request is guilty of a class A felony.

3. Nothing in this initiative shall limit further liability for civil damages resulting from other negligent conduct or intentional misconduct by any person.

4. The penalties in this initiative do not preclude criminal penalties applicable under other law for conduct that is inconsistent with this initiative.

Section 20

Any governmental entity that incurs costs resulting from a person terminating his or her life under this initiative in a public place has a claim against the estate of the person to recover such costs and reasonable attorneys' fees related to enforcing the claim.

Section 21

A request for a medication as authorized by this initiative shall be in substantially the following form:

REQUEST FOR MEDICATION TO END MY LIFE

IN A HUMANE AND DIGNIFIED MANNER

I, ... , am an adult of sound mind.

I am suffering from ....., which my attending physician has determined is a terminal disease and which has been medically confirmed by a consulting physician. I have been fully informed of my diagnosis, prognosis, the nature of medication to be prescribed and potential associated risks, the expected result, and the feasible alternatives, including comfort care, hospice care, and pain control. I request that my attending physician prescribe medication that will end my life in a humane and dignified manner.

INITIAL ONE:

..... I have informed my family of my decision and taken their opinions into consideration.

..... I have decided not to inform my family of my decision.

..... I have no family to inform of my decision.

I understand that I have the right to rescind this request at any time.

I understand the full import of this request and I expect to die when I take the medication to be prescribed. I further understand that although most deaths occur within three hours, my death may take longer, and my physician has counseled me about this possibility.

I make this request voluntarily and without reservation, and I accept full moral responsibility for my actions.

Signed: .....

Dated: .....

DECLARATION OF WITNESSES

We declare that the person making and signing the above request:

(1) Is personally known to us or has provided proof of identity;

(2) Signed this request in our presence on the date of the person's signature;

(3) Appears to be of sound mind and not under duress, fraud, or undue influence;

and

(4) Is not a patient for whom either of us is the attending physician.

..... Witness 1/Date

..... Witness 2/Date

NOTE: One witness shall not be a relative (by blood, marriage, or adoption) of the person signing this request, shall not be entitled to any portion of the person's estate upon death, and shall not own, operate, or be employed at a health care facility where the person is a patient or resident. If the patient is an inpatient at a health care facility, one of the witnesses shall be an individual designated by the facility.

Section 22

1. Any person who, without authorization of the principal, willfully alters, forges, conceals, or destroys an instrument, the reinstatement or revocation of an instrument, or any other evidence or document reflecting the principal's desires and interests with the intent and effect of causing a withholding or withdrawal of life-sustaining procedures or of artificially administered nutrition and hydration which hastens the death of the principal is guilty of a class A felony.

2. Except as provided in subsection 1 of this section, any person who, without authorization of the principal, willfully alters, forges, conceals, or destroys an instrument, the reinstatement or revocation of an instrument, or any other evidence or document reflecting the principal's desires and interests with the intent and effect of affecting a health care decision is guilty of a class A misdemeanor.

RE: Petition approval request from Marc Ellinger regarding a proposed statutory amendment to Chapters 84 and 105 (2018-103)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Marc Ellinger on December 14, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

Be it enacted by the people of the State of Missouri:

Sections 84.460 and 84.860 are repealed, Section 105.726 is amended, and seven new sections are enacted, to be known as Sections 84.891, 84.892, 84.893, 84.894, 84.895, 84.896, and 84.897, to read as follows:

84.891. No elected or appointed official of the state or any political subdivision thereof shall act or refrain from acting in any manner to impede, obstruct, hinder, or otherwise interfere with any member of a municipal police force established under sections 84.893 to 84.896 in the performance of his or her job duties, or with any aspect of any investigation arising from the performance of such job duties. This section shall not be construed to prevent such officials from acting within the normal course and scope of their employment or from acting to implement sections 84.893 to 84.896. Any person who violates this section shall be liable for a penalty of two thousand five hundred dollars for each offense and shall forever be disqualified from holding any office or employment whatsoever with the governmental entity the person served at the time of the violation. The penalty shall not be paid by the funds of any committee as the term "committee" is defined in section 130.011. This section shall not be construed to interfere with the punishment, under any laws of this state, of a criminal offense committed by such officials, nor shall this section apply to duly appointed members of the municipal police force, or their appointing authorities, whose conduct is otherwise provided for by law.

84.892. 1. It shall be an unlawful employment practice for an official, employee, or agent of a municipal police force established under sections 84.893 to 84.896 to discharge, demote, reduce the pay of, or otherwise retaliate against an employee of the municipal police force for reporting to any superior, government agency, or the press the conduct of another employee that the reporting employee believes, in good faith, is illegal.

2. Any employee of a municipal police force may bring a cause of action for general or special damages based on a violation of this section.

84.893. 1. Subject to the provisions of sections 84.894 to 84.896, any city with a population of 400,000 or more may establish a municipal police force for the purposes of:

(1) Preserving the public peace, welfare, and order;

(2) Preventing crime and arresting suspected offenders;

(3) Enforcing the laws of the state and ordinances of the city;

(4) Exercising all powers available to a police force under generally applicable state law; and

(5) Regulating and licensing all private watchmen, private detectives, and private policemen serving or acting as such in said city.

2. Any person who acts as a private watchman, private detective, or private policeman in said cities without having obtained a written license from said cities is guilty of a class A misdemeanor.

84.894. 1. Notwithstanding any provisions of this chapter to the contrary, any city with a population of 400,000 or more may establish a municipal police force on or after July 1, 2019, according to the procedures and requirements of this section. The purpose of these procedures and requirements is to provide for an orderly and appropriate transition in the governance of the police force and provide for an equitable employment transition for commissioned and civilian personnel.

2. Upon the establishment of a municipal police force by a city under sections 84.893 to 84.896, the board of police commissioners shall convey, assign, and otherwise transfer to the city title and ownership of all indebtedness and assets, including, but not limited to, all funds and real and personal property held in the name of or controlled by the board of police commissioners created under sections 84.350 to 84.860. The board of police commissioners shall execute all documents reasonably required to accomplish such transfer of ownership and obligations.

3. If the city establishes a municipal police force and completes the transfer described in subsection 2 of this section, the city shall provide the necessary funds for the maintenance of the municipal police force.

4. Before a city with a population of 400,000 or more may establish a municipal police force under this section, the city shall adopt an ordinance accepting responsibility, ownership, and liability as successor-in-interest for contractual obligations, indebtedness, and other lawful obligations of the board of police commissioners subject to the provisions of subsection 2 of section 84.895.

5. A city with a population of 400,000 or more that establishes a municipal police force shall initially employ, without a reduction in rank, salary, or benefits, all commissioned and civilian personnel of the board of police commissioners created under sections 84.350 to 84.860 that were employed by the board immediately prior to the date the municipal police force was established. Such commissioned personnel who previously were employed by the board may only be involuntarily terminated by the city with a population of 400,000 or more for cause. The city shall also recognize all accrued years of service that such commissioned and civilian personnel had with the board of police commissioners. Such personnel shall be entitled to the same holidays, vacation, and sick leave they were entitled to as employees of the board of police commissioners.

6. Commissioned and civilian personnel who were previously employed by the board shall continue to be subject, throughout their employment for the city with a population of 400,000 or more, to a residency rule no more restrictive than a requirement of retaining a primary residence in a city with a population of 400,000 or more for a total of seven years and of then allowing them to maintain a primary residence outside the city with a population of 400,000 or more so long as the residence is located within a one-hour response time.

7. The commissioned and civilian personnel who retire from service with the board of police commissioners before the establishment of a municipal police force under subsection 1 of this section shall continue to be entitled to the same pension benefits provided under chapter 86 and the same benefits set forth in subsection 5 of this section.

8. If the city with a population of 400,000 or more elects to establish a municipal police force under this section, the city shall establish a separate division for the operation of its municipal police force. The civil service commission of the city may adopt rules and regulations appropriate for the unique operation of a police department. Such rules and regulations shall reserve exclusive authority over the disciplinary process and procedures affecting commissioned officers to the civil service commission; however, until such time as the city adopts such rules and regulations, the commissioned personnel shall continue to be governed by the board of police commissioners' rules and regulations in effect immediately prior to the establishment of the municipal police force, with the police chief acting in

place of the board of police commissioners for purposes of applying the rules and regulations. Unless otherwise provided for, existing civil service commission rules and regulations governing the appeal of disciplinary decisions to the civil service commission shall apply to all commissioned and civilian personnel. The civil service commission's rules and regulations shall provide that records prepared for disciplinary purposes shall be confidential, closed records available solely to the civil service commission and those who possess authority to conduct investigations regarding disciplinary matters pursuant to the civil service commission's rules and regulations. A hearing officer shall be appointed by the civil service commission to hear any such appeals that involve discipline resulting in a suspension of greater than fifteen days, demotion, or termination, but the civil service commission shall make the final findings of fact, conclusions of law, and decision which shall be subject to any right of appeal under chapter 536.

9. A city with a population of 400,000 or more that establishes and maintains a municipal police force under this section:

(1) Shall provide or contract for life insurance coverage and for insurance benefits providing health, medical, and disability coverage for commissioned and civilian personnel of the municipal police force to the same extent as was provided by the board of police commissioners under sections 84.350 to 84.860;

(2) Shall provide or contract for medical and life insurance coverage for any commissioned or civilian personnel who retired from service with the board of police commissioners or who were employed by the board of police commissioners and retire from the municipal police force of a city with a population of 400,000 or more to the same extent such medical and life insurance coverage was provided by the board of police commissioners under sections 84.350 to 84.860;

(3) Shall make available medical and life insurance coverage for purchase to the spouses or dependents of commissioned and civilian personnel who retire from service with the board of police commissioners or the municipal police force and deceased commissioned and civilian personnel who receive pension benefits under chapter 86 at the rate that such dependent's or spouse's coverage would cost under the appropriate plan if the deceased were living; and

(4) May pay an additional shift differential compensation to commissioned and civilian personnel for evening and night tours of duty in an amount not to exceed ten percent of the officer's base hourly rate.

10. A city with a population of 400,000 or more that establishes a municipal police force under sections 84.893 to 84.896 shall establish a transition committee of five members for the purpose of: coordinating and implementing the transition of authority, operations, assets, and obligations from the board of police commissioners to the city; winding down the affairs of the board; making nonbinding recommendations for the transition of the police force from the board to the city; and other related duties, if any, established by executive order of the city's mayor. Once the ordinance referenced in section 84.894 is enacted, the city shall provide written notice to the board of police commissioners and the governor of the State of Missouri. Within thirty days of such notice, the mayor shall appoint three members to the committee, two of whom shall be members of a statewide law enforcement association that represents at least five thousand law enforcement officers. The remaining members of the committee shall include the police chief of the municipal police force and a person who currently or previously served as a commissioner on the board of police commissioners, who shall be appointed to the committee by the mayor of such city.

84.895. 1. Except as required for the board of police commissioners to conclude its affairs and pursue legal claims and defenses, upon the establishment of a municipal police force, the terms of office of the commissioners of the board of police created under sections 84.350 through 84.860 shall expire, and the provisions of sections 84.350 to 84.860 shall not apply to any city with a population of 400,000 or more or its municipal police force as of such date. The board shall continue to operate, if necessary, to wind down the board's affairs until the transfer of ownership and obligations under subsection 2 of section 84.894 has been completed. During such time, the board of police commissioners shall designate and authorize its secretary to act on behalf of the board for purposes of performing the board's duties and any other actions incident to the transfer and winding down of the board's affairs.

2. For any claim, lawsuit, or other action arising out of actions occurring before the date of completion of the transfer provided under subsection 2 of section 84.894, the state shall continue to provide legal representation as set forth in section 105.726, and the state legal expense fund shall continue to provide reimbursement for such claims under section 105.726. This subsection applies to all claims, lawsuits, and other actions brought against any commissioner, police officer, employee, agent, representative, or any individual or entity acting or purporting to act on its or their behalf.

3. Notwithstanding any other provision of law, rule, or regulation to the contrary, any city with a population of 400,000 or more that establishes a municipal police force under sections 84.893 to 84.896 shall not be restricted or limited in any way in the selection of a police chief or chief of the division created under subsection 8 of section 84.894.

84.896. Any police pension system created under chapter 86 for the benefit of a police force established under sections 84.350 to 84.860 shall continue to be governed by chapter 86, and shall apply to any police force established under section 84.893 to 84.896. Other than any provision that makes chapter 86 applicable to a municipal police force established under section 84.893 to 84.896, nothing in sections 84.893 to 84.896 shall be construed as limiting or changing the rights or benefits provided under chapter 86.

84.897. Notwithstanding the provisions of section 1.140 to the contrary, the provisions of sections 84.893 to 84.896 shall be non-severable. If any provision of sections 84.893 to 84.896 is for any reason held to be invalid, such decision shall invalidate all of the remaining provisions of this act.

105.726. 1. Nothing in sections 105.711 to 105.726 shall be construed to broaden the liability of the state of Missouri beyond the provisions of sections 537.600 to 537.610, nor to abolish or waive any defense at law which might otherwise be available to any agency, officer, or employee of the state of Missouri. Sections 105.711 to 105.726 do not waive the sovereign immunity of the state of Missouri.

2. The creation of the state legal expense fund and the payment therefrom of such amounts as may be necessary for the benefit of any person covered thereby are deemed necessary and proper public purposes for which funds of this state may be expended.

3. Moneys in the state legal expense fund shall not be available for the payment of any claim or any amount required by any final judgment rendered by a court of competent jurisdiction against a board of police commissioners

established under chapter 84, including the commissioners, any police officer, notwithstanding sections 84.330 and 84.710, or other provisions of law, other employees, agents, representative, or any other individual or entity acting or purporting to act on its or their behalf. Such was the intent of the general assembly in the original enactment of sections 105.711 to 105.726, and it is made express by this section in light of the decision in Wayman Smith, III, et al. v. State of Missouri, 152 S.W.3d 275. Except that the commissioner of administration shall reimburse from the legal expense fund[the board of police commissioners established under section 84.350, and] any successor-in-interest established pursuant to section 84.344 or section 84.894, for liability claims otherwise eligible for payment under section 105.711 paid by such [board]successor-in-interest up to a maximum of one million dollars per fiscal year.

4. Subject to the provisions of subsection 2 of section 84.345 or subsection 2 of section 84.895, if the representation of the attorney general is requested by a board of police commissioners or its successor-in-interest established pursuant to section 84.344 or section 84.894, the attorney general shall represent, investigate, defend, negotiate, or compromise all claims under sections 105.711 to 105.726 for the board of police commissioners, its successor-in-interest pursuant to section 84.344 or section 84.894, any police officer, other employees, agents, representatives, or any other individual or entity acting or purporting to act on their behalf. The attorney general may establish procedures by rules promulgated under chapter 536 under which claims must be referred for the attorney general's representation. The attorney general and the officials of the city which the police board represents or represented shall meet and negotiate reasonable expenses or charges that will fairly compensate the attorney general and the office of administration for the cost of the representation of the claims under this section.

5. Claims tendered to the attorney general promptly after the claim was asserted as required by section 105.716 and prior to August 28, 2005, may be investigated, defended, negotiated, or compromised by the attorney general and full payments may be made from the state legal expense fund on behalf of the entities and individuals described in this section as a result of the holding in Wayman Smith, III, et al. v. State of Missouri, 152 S.W.3d 275.

[84.460. So soon as the board created herein shall hold their first meeting, it shall be their duty to inform the chief of police and the other officers of the police force of such city that they require their attendance upon them and obedience to their orders. For failure to attend as required, and for each and every failure to obey the lawful orders of said board, the officers so notified shall be fined in any sum not exceeding five hundred dollars, to be recovered by action at law instituted by said board, in the name of the state. From and after the first meeting aforesaid, the whole of the then existing police force in such city shall pass under the exclusive management and control of the said board, and be subject to no other control and entitled to receive neither orders nor pay, except arrearages then due, from any other authority, and shall so continue, subject, however, to removal or suspension, at the discretion of said board, and with the power in said board to fill vacancies, until said board shall publicly declare that the organization of the police force, created by sections 84.350 to 84.860 is complete. Upon such public declaration, and from the time thereof thenceforward, all ordinances of such city are hereby declared null and void, so far as they conflict with sections 84.350 to 84.860 or assume to confer upon the mayor, chief of police, common council, or any other person or persons, the power to appoint, dismiss, or in any way or to any extent, employ or control any police force organized or to be organized under such ordinances, or any of them, and from and after such public declaration as aforesaid, the police force organized, or which may be organized under such ordinances, or any of them, shall cease to exist, and its functions and powers be at an end.]

[84.860. Any officer or servant of the mayor or common council or municipal assembly of the said cities, or other persons whatsoever, who shall forcibly resist or obstruct the execution or enforcement of any of the provisions of sections 84.350 to 84.860 or relating to the same, or who shall disburse any money in violation thereof, or who shall hinder or obstruct the organization or maintenance of said board of police, or the police force provided in said sections to be organized and maintained, or who shall maintain or control any police force other than the one herein provided for, or who shall delay or hinder the due enforcement of said sections by failing or neglecting to perform the duties therein imposed upon him, shall be liable to a penalty of one thousand dollars for each and every offense, recoverable by the board by action at law in the name of the state, and shall forever thereafter be disqualified from holding or exercising any office or employment whatsoever under the mayor or common council or municipal assembly of said cities, or under said sections; provided, however, that nothing in this section shall be construed to interfere with the punishment, under any existing or any future laws of this state, or any criminal offense which shall be committed by the said parties in or about the resistance, obstruction, hindrance, conspiracy, combination or disbursement aforesaid.]

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-103)

Subject

Initiative petition from Marc Ellinger regarding a proposed amendment to Chapters 84 and 105 of the Revised Statutes of Missouri. (Received December 14, 2016)

Date

January 3, 2017

Description

This proposal would amend Chapters 84 and 105 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Kansas City Boards of Police Commissioners,** the **Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Assumptions

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this legislation will not have a fiscal impact on their department.

Officials from the **Department of Public Safety** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated under this proposal, the Governor would no longer be required to appoint members of the Kansas City Board of Police Commissioners if Kansas City chooses to assume control of the Kansas City Police Force. There should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal response.

Officials from the **Office of Administration** indicated:

This proposal repeals Sections 84.460 and 84.860, RSMo and adds seven new sections (Sections 84.891-84.897, RSMo).

Under this proposal, Kansas City could choose to assume control of the Kansas City Police Force and the Kansas City Board of Police Commissioners would be disbanded. The State would be required to provide legal representation and Legal Expense Fund coverage for claims up to the date of the transition.

This proposal should result in future savings to the Legal Expense Fund. The savings will begin upon the transfer and phase-in as claims made prior to the transfer are resolved and the successor in interest takes responsibility for all new claims. They estimate the annual net savings to the Legal Expense Fund to be approximately $500,000. This is based on an average of Kansas City Police Board payments made from the Legal Expense Fund since FY08.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this would have no fiscal impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated:

A positive fiscal impact would eventually be obtained by local control of the KCPD through various budgetary controls and the elimination of duplication of services and/or functions. A requirement to retain all employees unless removed for cause means duplicative services/functions would still be staffed so savings would not be immediately recognized. The proposal refers to organizations that exist in St. Louis but not in Kansas City. If KC is required to form those groups, i.e., civil service commission, then that would be an added cost. Indirect budgetary savings would eventually be realized through the integration of the management and operation of the KCPD as another department of the City. Costs for payment of judgments would be incurred since the State Legal Defense Fund would not fund defense after the KCPD became a part of the City, but the ability to control personnel should negate additional costs.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from **University of Missouri** indicated they have reviewed this proposed legislation and have determined there would be no significant financial impact on their university.

Officials from **Missouri State University** indicated no fiscal impact to their university for this petition.

Officials from **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this will have not fiscal impact on their university.

The State Auditor's office did not receive a response from the **Attorney General's office,** the **Department of Elementary and Secondary Education,** the **Department of Natural Resources,** the **Office of State Courts Administrator, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, St. Louis Community College, Kansas City Board of Police Commissioners, The Metropolitan**

Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Northwest Missouri State University, Southeast Missouri State University, and **Truman State University**.

Fiscal Note Summary

State governmental entities estimate a savings up to $500,000 annually. Local governmental entities estimate an unknown positive fiscal impact.

December 13, 2016

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Mike Louis regarding a proposed constitutional amendment to Article I, version 10 (2018-102)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mike Louis on December 12, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

Version 10

NOTICE: You are advised that the propose constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal or modify by implication Section 290 of the Missouri Revised Statutes.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article I of the Constitution is revised by amending Section 29 to read as follows:

Section 29. That employees shall have the right to organize and to bargain collectively through representatives of their own choosing. No law or ordinance shall restrict or impair an agreement which requires employees to support their chosen collective bargaining representative. The rights guaranteed by this section shall be unalienable. Any restriction on these rights shall be subject to strict scrutiny and the State of Missouri shall be obligated to uphold these rights and under no circumstances decline to protect against their infringement.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-102)

Subject

Initiative petition from Mike Louis regarding a proposed constitutional amendment to Article I. (Received December 13, 2016)

Date

January 3, 2017

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Kansas City Boards of Police Commissioners,** the **Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Edward D. Greim provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they assume that any potential costs arising from the adoption of this proposal can be absorbed with existing resources.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated they defer to the Office of Administration.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated they defer to the Office of Administration for a statewide response.

Officials from the **Department of Public Safety** indicated they defer to the Office of Administration Personnel response for this legislation.

Officials from the **Department of Social Services** indicated no fiscal impact on their department. They defer to the Office of Administration for response to the fiscal note request.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal response.

Officials from the **Office of Administration** indicated:

The proposed amendment would prohibit any law or ordinance from restricting or impairing an agreement which requires employees to support their chosen collective bargaining representative. The State of Missouri shall be obligated to uphold these rights and under no circumstances decline to protect against their infringement.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any substantial impact on their office.

Officials from the **State Treasurer's office** indicated this would have no fiscal impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report due to lack of quantifiable information pertaining to the language of the amendment from their county for this initiative petition.

Officials from the **City of Kansas City** indicated no fiscal impact is anticipated if this proposal is adopted.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from **University of Missouri** indicated they have reviewed this proposed legislation and have determined there would be no significant financial impact on their university.

Officials from **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from **Missouri State University** indicated no fiscal impact to their university for this petition.

Officials from **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Edward D. Greim provided the following information as an opponent of this initiative petition.

Re: Initiative Petitions 2018-092 through 2018-099 and 2018-101 through 2018-102

Dear Mr. Halwes,

Please consider this letter as a fiscal impact statement regarding Initiative Petitions 2018-092 through 2018-099 and 2018-101 through 2018-102 (the "Initiative Petitions"). If passed, any of these ten initiatives would have a negative impact on state and local governments, as well as Missouri small businesses. While the Initiative Petitions would primarily result in uncertain or unclear direct effects, the secondary effects are negative and potentially significant. Direct effects stem from labor and contracting costs that the state and its political subdivisions will incur to renegotiate contracts with labor organizations. These direct effects would be larger if, on the Initiative Petition's effective date, the state of Missouri has adopted a so-called "Right-to-Work" law. It is exceedingly likely that the state will have a Right-to-Work law by the potential effective date of the Initiative Petitions: December 6, 2018.[1]

Moreover, certain public employees, namely public school teachers, are currently excluded from the Missouri Public Sector Labor Law. §§ 105.500-.530 RSMo. The Initiative Petitions impliedly repeal statutes and ordinances that limit the ability of teachers and other types of public employees to commit other employees to "exclusive representation" by a union. Public employees' contracts that already rely on laws or ordinances prohibiting exclusive representation would violate the Initiative Petitions, and require renegotiation.[2]

[1] See, for example, http://news.stlpublicradio.org/post/only-scope-and-timing-missouris-expected-right-work-law-question#stream/0; http://www.kshb.com/news/state/missouri/missouri-moves-closer-to-becoming-right-to-work-state
[2] See http://showmeinstitute.org/blog/government-unions/teachers-union-gets-collective-bargaining-wrong

The indirect effects of the Initiative Petitions present a debate this Office should not take a definitive position on. The indirect effects of prohibiting a "Right-to-Work" bill by the General Assembly are unknown. First, it is unknown if Missouri will have a Right-to-Work law in 2018, though the state most likely will.[3] Second, if Missouri has a Right-to-Work law in 2018, it is unclear what the precise scope of the law will be.[4]

Third, regardless of whether the Initiative Petitions will, in fact, pre-empt an existing Right-to-Work law in Missouri, the overall economic impact of a state Right-to-Work law is unknown. However, most research suggests that a state Right-to-Work law would yield positive fiscal impacts for a state such as Missouri. A Right-to-Work law would make Missouri more competitive with neighboring states. Every state neighboring Missouri, except Illinois, has a Right-to-Work law. Still, the ultimate fiscal or economic impact of a constitutional provision pre-empting or preventing a Right-to-Work law is unknown.

What is known is that in areas with low union support, union membership declines with the passage of a Right-to-Work law.[5] When a union member quits the union and stops paying union dues, other things equal, the former member's take-home pay goes up. The former union member is no longer paying dues, but is able to maintain their same employment and gross wage rate. Some of this new take-home pay represents new taxable wages (through decreased deductions for payment of union dues).[6] This is a potential source of new revenue that the Initiative Petitions take away. In addition to an income tax effect, this new take-home pay may also be spent on state revenue producing activities such as consuming goods subject to sales tax or making taxable investments. If Missouri has a Right-to-Work law in 2018, some individuals who opt out of union membership will thereafter be forced to pay union dues, and taxable wages will decrease.

In 2014, James Sherk identified several indirect effects associated with Right-to-Work laws.[7] These indirect effects show that permitting a Right-to-Work law would allow Missouri to be more competitive for new jobs and decreased unemployment:

- Roughly half of all major businesses refuse to consider locating in jurisdictions with compulsory dues.
- Bureau of Labor Statistics data show that between 1990 and 2014 total employment grew more than twice as fast in right-to-work states as in states with compulsory dues.

[3] http://news.stlpublicradio.org/post/only-scope-and-timing-missouris-expected-right-work-law-question#stream/0
[4] Id.
[5] Ozkan Eren and I. Serkan Ozbeklik, "Right-to-Work Laws and State-Level Economic Outcomes: Evidence from the Case Studies of Idaho and Oklahoma Using Synthetic Control Method," Working Paper, February 2011, at http://econweb.umd.edu/~davis/eventpapers/OzbeklikRight.pdf (November 9, 2011) (identifying a 15% decline in union membership in Idaho and Oklahoma).
[6] https://www.irs.gov/publications/p17/ch28.html (stating that certain union dues reduce an individual's taxable income).
[7] http://www.heritage.org/research/reports/2014/12/right-to-work-laws-myth-vs-fact

- Average wages in right-to-work states are indeed slightly lower than in non-right-to-work states. This occurs because almost every Southern state has a right-to-work law and the South has a lower cost of living. Studies that control for differences in costs of living find workers in states with voluntary dues have no lower—and possibly slightly higher—real wages than workers in states with compulsory dues.

The Initiative Petitions seek to prevent Missouri from taking a step forward and implementing policies that would make Missouri a more attractive place to do business for large manufacturing employers. The Initiative Petitions discourage both new and current employers (like Boeing and Ford) from investing capital, hiring, or retaining employees in Missouri.[8]

Missouri small businesses would be affected by the Initiative Petitions. Small businesses have less bargaining power or ability to weather union organizing events or work stoppages. The regulatory burdens associated with running a union shop are higher per capita for a small business. Due to their size, small businesses are less likely to unionize, but small businesses that do unionize will become less competitive.

In short, much of the fiscal impact of the Initiative Petitions will be secondary. The only direct cost is the potential costs state and local government entities may incur in renegotiating employment contracts. The Initiative Petitions will not directly result in any government savings or increased revenues. Because these fiscal notes call for the Auditor to operate in the area of secondary effects, it is critical that she treat both sides of the question equally.

Conclusion

In conclusion, the State Auditor should note the increased cost to be borne by state and local government entities through employment contracting costs for employees not currently covered by an "exclusive representation" union. The other fiscal impacts are all secondary and unknown; however, future costs and revenue losses may be significant.

Should you desire further detail or have any questions about this fiscal impact statement, please do not hesitate to contact me.

Sincerely,

Edward D. Greim

RE: Petition approval request from Mike Louis regarding a proposed constitutional amendment to Article I, version 9 (2018-101)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mike Louis on December 12, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

Version 9

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article I of the Constitution is revised by amending Section 29 to read as follows:

Section 29. That employees shall have the right to organize and to bargain collectively through representatives of their own choosing. No law or ordinance shall restrict or impair an agreement which requires employees to support their chosen collective bargaining representative. The rights guaranteed by this section shall be unalienable. Any restriction on these rights shall be subject to strict scrutiny and the State of Missouri shall be obligated to uphold these rights and under no circumstances decline to protect against their infringement.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-101)

Subject

Initiative petition from Mike Louis regarding a proposed constitutional amendment to Article I. (Received December 13, 2016)

Date

January 3, 2017

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Kansas City Boards of Police Commissioners,** the **Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Edward D. Greim provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they assume that any potential costs arising from the adoption of this proposal can be absorbed with existing resources.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated they defer to the Office of Administration.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated they defer to the Office of Administration for a statewide response.

Officials from the **Department of Public Safety** indicated they defer to the Office of Administration Personnel response for this legislation.

Officials from the **Department of Social Services** indicated no fiscal impact on their department. They defer to the Office of Administration for response to the fiscal note request.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal response.

Officials from the **Office of Administration** indicated:

The proposed amendment would prohibit any law or ordinance from restricting or impairing an agreement which requires employees to support their chosen collective bargaining representative. The State of Missouri shall be obligated to uphold these rights and under no circumstances decline to protect against their infringement.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any substantial impact on their office.

Officials from the **State Treasurer's office** indicated this would have no fiscal impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report due to lack of quantifiable information pertaining to the language of the amendment from their county for this initiative petition.

Officials from the **City of Kansas City** indicated no fiscal impact is anticipated if this proposal is adopted.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from **University of Missouri** indicated they have reviewed this proposed legislation and have determined there would be no significant financial impact on their university.

Officials from **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from **Missouri State University** indicated no fiscal impact to their university for this petition.

Officials from **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Edward D. Greim provided the following information as an opponent of this initiative petition.

Re: Initiative Petitions 2018-092 through 2018-099 and 2018-101 through 2018-102

Dear Mr. Halwes,

Please consider this letter as a fiscal impact statement regarding Initiative Petitions 2018-092 through 2018-099 and 2018-101 through 2018-102 (the "Initiative Petitions"). If passed, any of these ten initiatives would have a negative impact on state and local governments, as well as Missouri small businesses. While the Initiative Petitions would primarily result in uncertain or unclear direct effects, the secondary effects are negative and potentially significant. Direct effects stem from labor and contracting costs that the state and its political subdivisions will incur to renegotiate contracts with labor organizations. These direct effects would be larger if, on the Initiative Petition's effective date, the state of Missouri has adopted a so-called "Right-to-Work" law. It is exceedingly likely that the state will have a Right-to-Work law by the potential effective date of the Initiative Petitions: December 6, 2018.[1]

Moreover, certain public employees, namely public school teachers, are currently excluded from the Missouri Public Sector Labor Law. §§ 105.500-.530 RSMo. The Initiative Petitions impliedly repeal statutes and ordinances that limit the ability of teachers and other types of public employees to commit other employees to "exclusive representation" by a union. Public employees' contracts that already rely on laws or ordinances prohibiting exclusive representation would violate the Initiative Petitions, and require renegotiation.[2]

[1] See, for example, http://news.stlpublicradio.org/post/only-scope-and-timing-missouris-expected-right-work-law-question#stream/0; http://www.kshb.com/news/state/missouri/missouri-moves-closer-to-becoming-right-to-work-state
[2] See http://showmeinstitute.org/blog/government-unions/teachers-union-gets-collective-bargaining-wrong

The indirect effects of the Initiative Petitions present a debate this Office should not take a definitive position on. The indirect effects of prohibiting a "Right-to-Work" bill by the General Assembly are unknown. First, it is unknown if Missouri will have a Right-to-Work law in 2018, though the state most likely will.[3] Second, if Missouri has a Right-to-Work law in 2018, it is unclear what the precise scope of the law will be.[4]

Third, regardless of whether the Initiative Petitions will, in fact, pre-empt an existing Right-to-Work law in Missouri, the overall economic impact of a state Right-to-Work law is unknown. However, most research suggests that a state Right-to-Work law would yield positive fiscal impacts for a state such as Missouri. A Right-to-Work law would make Missouri more competitive with neighboring states. Every state neighboring Missouri, except Illinois, has a Right-to-Work law. Still, the ultimate fiscal or economic impact of a constitutional provision pre-empting or preventing a Right-to-Work law is unknown.

What is known is that in areas with low union support, union membership declines with the passage of a Right-to-Work law.[5] When a union member quits the union and stops paying union dues, other things equal, the former member's take-home pay goes up. The former union member is no longer paying dues, but is able to maintain their same employment and gross wage rate. Some of this new take-home pay represents new taxable wages (through decreased deductions for payment of union dues).[6] This is a potential source of new revenue that the Initiative Petitions take away. In addition to an income tax effect, this new take-home pay may also be spent on state revenue producing activities such as consuming goods subject to sales tax or making taxable investments. If Missouri has a Right-to-Work law in 2018, some individuals who opt out of union membership will thereafter be forced to pay union dues, and taxable wages will decrease.

In 2014, James Sherk identified several indirect effects associated with Right-to-Work laws.[7] These indirect effects show that permitting a Right-to-Work law would allow Missouri to be more competitive for new jobs and decreased unemployment:

- Roughly half of all major businesses refuse to consider locating in jurisdictions with compulsory dues.
- Bureau of Labor Statistics data show that between 1990 and 2014 total employment grew more than twice as fast in right-to-work states as in states with compulsory dues.

[3] http://news.stlpublicradio.org/post/only-scope-and-timing-missouris-expected-right-work-law-question#stream/0
[4] Id.
[5] Ozkan Eren and I. Serkan Ozbeklik, "Right-to-Work Laws and State-Level Economic Outcomes: Evidence from the Case Studies of Idaho and Oklahoma Using Synthetic Control Method," Working Paper, February 2011, at http://econweb.umd.edu/~davis/eventpapers/OzbeklikRight.pdf (November 9, 2011) (identifying a 15% decline in union membership in Idaho and Oklahoma).
[6] https://www.irs.gov/publications/p17/ch28.html (stating that certain union dues reduce an individual's taxable income).
[7] http://www.heritage.org/research/reports/2014/12/right-to-work-laws-myth-vs-fact

- Average wages in right-to-work states are indeed slightly lower than in non-right-to-work states. This occurs because almost every Southern state has a right-to-work law and the South has a lower cost of living. Studies that control for differences in costs of living find workers in states with voluntary dues have no lower—and possibly slightly higher—real wages than workers in states with compulsory dues.

The Initiative Petitions seek to prevent Missouri from taking a step forward and implementing policies that would make Missouri a more attractive place to do business for large manufacturing employers. The Initiative Petitions discourage both new and current employers (like Boeing and Ford) from investing capital, hiring, or retaining employees in Missouri.[8]

Missouri small businesses would be affected by the Initiative Petitions. Small businesses have less bargaining power or ability to weather union organizing events or work stoppages. The regulatory burdens associated with running a union shop are higher per capita for a small business. Due to their size, small businesses are less likely to unionize, but small businesses that do unionize will become less competitive.

In short, much of the fiscal impact of the Initiative Petitions will be secondary. The only direct cost is the potential costs state and local government entities may incur in renegotiating employment contracts. The Initiative Petitions will not directly result in any government savings or increased revenues. Because these fiscal notes call for the Auditor to operate in the area of secondary effects, it is critical that she treat both sides of the question equally.

Conclusion

In conclusion, the State Auditor should note the increased cost to be borne by state and local government entities through employment contracting costs for employees not currently covered by an "exclusive representation" union. The other fiscal impacts are all secondary and unknown; however, future costs and revenue losses may be significant.

Should you desire further detail or have any questions about this fiscal impact statement, please do not hesitate to contact me.

Sincerely,

Edward D. Greim

RE: Petition approval request from Damien Johnson regarding a proposed constitutional amendment to Article X (2018-100)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Damien Johnson on December 12, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

This measure amends Article X section 26 of the Missouri Constitution by deleting all matters within the enclosed brackets and adding all the underlined matters as required pursuant to Section 116.050 RSMo.

Prohibition on new or local sales, use, or other similar transaction-based tax not [subject to such tax as of January 1, 2015]approved by voters. Mandate voter approval before funding or financing sport facilities.

A. Section 26. In order to prohibit an increase in the tax burden on the citizens of Missouri without voter approval, state and local sales and use taxes (or any similar transaction-based tax) shall not be expanded to impose taxes on any service or transaction that was [not subject to sales, use or similar transaction-based tax on January 1, 2015.] approved by voters.
B. Prohibit funding of sports and entertainment stadiums, centers recreation center or facilities without voter approval.
C. Prohibit expansion, extending, modifying, or amending current or future bonds, tax credits, without voter approval.
D. All provisions of this section are self-executing and severable, and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.

All provisions shall take effect immediately upon passage.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article I of the Constitution is revised by amending Section 29 to read as follows:

Section 29. That employees and employers shall have the right to organize and to bargain collectively through representatives of their own choosing. That an employee accepting employment with an employer in a position represented by a representative of employees' choosing may be required to contribute that employee's pro-rata share of representational costs if the employer and employees' chosen representative have so agreed.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-099)

Subject

Initiative petition from Mike Louis regarding a proposed constitutional amendment to Article I. (Received December 12, 2016)

Date

January 3, 2017

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Kansas City Boards of Police Commissioners,** the **Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Edward D. Greim provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they assume that any potential costs arising from the adoption of this proposal can be absorbed with existing resources.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated they defer to the Office of Administration.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated they defer to the Office of Administration for a statewide response.

Officials from the **Department of Public Safety** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated no fiscal impact on their department. They defer to the Office of Administration for response to the fiscal note request.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal response.

Officials from the **Office of Administration** indicated:

The proposed amendment would allow employers, in addition to employees, to organize and bargain collectively. It would also require employees to contribute toward the employee's pro-rate share of representational costs if the employer and employee's chosen representative have so agreed.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any substantial impact on their office.

Officials from the **State Treasurer's office** indicated this would have no fiscal impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report due to lack of quantifiable information pertaining to the language of the amendment from their county for this initiative petition.

Officials from the **City of Kansas City** indicated no fiscal impact is anticipated if this proposal is adopted.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from **University of Missouri** indicated they have reviewed this proposed legislation and have determined there would be no significant financial impact on their university.

Officials from **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from **Missouri State University** indicated no fiscal impact to their university for this petition.

Officials from **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this amendment will have no fiscal impact on their university.

Edward D. Greim provided the following information as an opponent of this initiative petition.

Mr. Jon Halwes
Missouri State Auditor's Office
Truman State Office Building
301 West High Street, Rm 880, P.O. Box 869
Jefferson City, Missouri 65102

Re: Initiative Petitions 2018-092 through 2018-099 and 2018-101 through 2018-102

Dear Mr. Halwes,

Please consider this letter as a fiscal impact statement regarding Initiative Petitions 2018-092 through 2018-099 and 2018-101 through 2018-102 (the "Initiative Petitions"). If passed, any of these ten initiatives would have a negative impact on state and local governments, as well as Missouri small businesses. While the Initiative Petitions would primarily result in uncertain or unclear direct effects, the secondary effects are negative and potentially significant. Direct effects stem from labor and contracting costs that the state and its political subdivisions will incur to renegotiate contracts with labor organizations. These direct effects would be larger if, on the Initiative Petition's effective date, the state of Missouri has adopted a so-called "Right-to-Work" law. It is exceedingly likely that the state will have a Right-to-Work law by the potential effective date of the Initiative Petitions: December 6, 2018.[1]

Moreover, certain public employees, namely public school teachers, are currently excluded from the Missouri Public Sector Labor Law. §§ 105.500-.530 RSMo. The Initiative Petitions impliedly repeal statutes and ordinances that limit the ability of teachers and other types of public employees to commit other employees to "exclusive representation" by a union. Public employees' contracts that already rely on laws or ordinances prohibiting exclusive representation would violate the Initiative Petitions, and require renegotiation.[2]

[1] See, for example, http://news.stlpublicradio.org/post/only-scope-and-timing-missouris-expected-right-work-law-question#stream/0; http://www.kshb.com/news/state/missouri/missouri-moves-closer-to-becoming-right-to-work-state
[2] See http://showmeinstitute.org/blog/government-unions/teachers-union-gets-collective-bargaining-wrong

The indirect effects of the Initiative Petitions present a debate this Office should not take a definitive position on. The indirect effects of prohibiting a "Right-to-Work" bill by the General Assembly are unknown. First, it is unknown if Missouri will have a Right-to-Work law in 2018, though the state most likely will.[3] Second, if Missouri has a Right-to-Work law in 2018, it is unclear what the precise scope of the law will be.[4]

Third, regardless of whether the Initiative Petitions will, in fact, pre-empt an existing Right-to-Work law in Missouri, the overall economic impact of a state Right-to-Work law is unknown. However, most research suggests that a state Right-to-Work law would yield positive fiscal impacts for a state such as Missouri. A Right-to-Work law would make Missouri more competitive with neighboring states. Every state neighboring Missouri, except Illinois, has a Right-to-Work law. Still, the ultimate fiscal or economic impact of a constitutional provision pre-empting or preventing a Right-to-Work law is unknown.

What is known is that in areas with low union support, union membership declines with the passage of a Right-to-Work law.[5] When a union member quits the union and stops paying union dues, other things equal, the former member's take-home pay goes up. The former union member is no longer paying dues, but is able to maintain their same employment and gross wage rate. Some of this new take-home pay represents new taxable wages (through decreased deductions for payment of union dues).[6] This is a potential source of new revenue that the Initiative Petitions take away. In addition to an income tax effect, this new take-home pay may also be spent on state revenue producing activities such as consuming goods subject to sales tax or making taxable investments. If Missouri has a Right-to-Work law in 2018, some individuals who opt out of union membership will thereafter be forced to pay union dues, and taxable wages will decrease.

In 2014, James Sherk identified several indirect effects associated with Right-to-Work laws.[7] These indirect effects show that permitting a Right-to-Work law would allow Missouri to be more competitive for new jobs and decreased unemployment:

- Roughly half of all major businesses refuse to consider locating in jurisdictions with compulsory dues.
- Bureau of Labor Statistics data show that between 1990 and 2014 total employment grew more than twice as fast in right-to-work states as in states with compulsory dues.

[3] http://news.stlpublicradio.org/post/only-scope-and-timing-missouris-expected-right-work-law-question#stream/0
[4] Id.
[5] Ozkan Eren and I. Serkan Ozbeklik, "Right-to-Work Laws and State-Level Economic Outcomes: Evidence from the Case Studies of Idaho and Oklahoma Using Synthetic Control Method," Working Paper, February 2011, at http://econweb.umd.edu/~davis/eventpapers/OzbeklikRight.pdf (November 9, 2011) (identifying a 15% decline in union membership in Idaho and Oklahoma).
[6] https://www.irs.gov/publications/p17/ch28.html (stating that certain union dues reduce an individual's taxable income).
[7] http://www.heritage.org/research/reports/2014/12/right-to-work-laws-myth-vs-fact

- Average wages in right-to-work states are indeed slightly lower than in non-right-to-work states. This occurs because almost every Southern state has a right-to-work law and the South has a lower cost of living. Studies that control for differences in costs of living find workers in states with voluntary dues have no lower—and possibly slightly higher—real wages than workers in states with compulsory dues.

The Initiative Petitions seek to prevent Missouri from taking a step forward and implementing policies that would make Missouri a more attractive place to do business for large manufacturing employers. The Initiative Petitions discourage both new and current employers (like Boeing and Ford) from investing capital, hiring, or retaining employees in Missouri.[8]

Missouri small businesses would be affected by the Initiative Petitions. Small businesses have less bargaining power or ability to weather union organizing events or work stoppages. The regulatory burdens associated with running a union shop are higher per capita for a small business. Due to their size, small businesses are less likely to unionize, but small businesses that do unionize will become less competitive.

In short, much of the fiscal impact of the Initiative Petitions will be secondary. The only direct cost is the potential costs state and local government entities may incur in renegotiating employment contracts. The Initiative Petitions will not directly result in any government savings or increased revenues. Because these fiscal notes call for the Auditor to operate in the area of secondary effects, it is critical that she treat both sides of the question equally.

Conclusion

In conclusion, the State Auditor should note the increased cost to be borne by state and local government entities through employment contracting costs for employees not currently covered by an "exclusive representation" union. The other fiscal impacts are all secondary and unknown; however, future costs and revenue losses may be significant.

Should you desire further detail or have any questions about this fiscal impact statement, please do not hesitate to contact me.

Sincerely,

Edward D. Greim
Partner, Graves Garrett, LLC

RE: Petition approval request from Mike Louis regarding a proposed constitutional amendment to Article I, version 7 (2018-098)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mike Louis on December 9, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article I of the Constitution is revised by amending Section 29 to read as follows:

Section 29. That employees and employers shall have the right to organize and to bargain collectively through representatives of their own choosing. No existing or future law or ordinance of the state or its political subdivisions shall impair, restrict or limit the negotiation and enforcement of any collectively bargained agreement with an employer respecting financial support by employees of their collective bargaining representative according to the terms of that agreement.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-098)

Subject

Initiative petition from Mike Louis regarding a proposed constitutional amendment to Article I. (Received December 12, 2016)

Date

January 3, 2017

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Kansas City Boards of Police Commissioners,** the **Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Edward D. Greim provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they assume that any potential costs arising from the adoption of this proposal can be absorbed with existing resources.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated they defer to the Office of Administration.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated they defer to the Office of Administration for a statewide response.

Officials from the **Department of Public Safety** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated no fiscal impact on their department. They defer to the Office of Administration for response to the fiscal note request.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal response.

Officials from the **Office of Administration** indicated:

The proposed amendment would allow employers, in addition to employees, to organize and bargain collectively. It would also prohibit existing or future laws or ordinances from interfering with the ability of employees to negotiate and enforce collective bargaining agreements respecting financial support by employees of their collective bargaining representative.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any substantial impact on their office.

Officials from the **State Treasurer's office** indicated this would have no fiscal impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report due to lack of quantifiable information pertaining to the language of the amendment from their county for this initiative petition.

Officials from the **City of Kansas City** indicated no fiscal impact is anticipated if this proposal is adopted.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from **University of Missouri** indicated they have reviewed this proposed legislation and have determined there would be no significant financial impact on their university.

Officials from **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from **Missouri State University** indicated no fiscal impact to their university for this petition.

Officials from **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this amendment will have no fiscal impact on their university.

Edward D. Greim provided the following information as an opponent of this initiative petition.

Jefferson City, Missouri 65102

Re: Initiative Petitions 2018-092 through 2018-099 and 2018-101 through 2018-102

Dear Mr. Halwes,

Please consider this letter as a fiscal impact statement regarding Initiative Petitions 2018-092 through 2018-099 and 2018-101 through 2018-102 (the "Initiative Petitions"). If passed, any of these ten initiatives would have a negative impact on state and local governments, as well as Missouri small businesses. While the Initiative Petitions would primarily result in uncertain or unclear direct effects, the secondary effects are negative and potentially significant. Direct effects stem from labor and contracting costs that the state and its political subdivisions will incur to renegotiate contracts with labor organizations. These direct effects would be larger if, on the Initiative Petition's effective date, the state of Missouri has adopted a so-called "Right-to-Work" law. It is exceedingly likely that the state will have a Right-to-Work law by the potential effective date of the Initiative Petitions: December 6, 2018.[1]

Moreover, certain public employees, namely public school teachers, are currently excluded from the Missouri Public Sector Labor Law. §§ 105.500-.530 RSMo. The Initiative Petitions impliedly repeal statutes and ordinances that limit the ability of teachers and other types of public employees to commit other employees to "exclusive representation" by a union. Public employees' contracts that already rely on laws or ordinances prohibiting exclusive representation would violate the Initiative Petitions, and require renegotiation.[2]

[1] See, for example, http://news.stlpublicradio.org/post/only-scope-and-timing-missouris-expected-right-work-law-question#stream/0; http://www.kshb.com/news/state/missouri/missouri-moves-closer-to-becoming-right-to-work-state
[2] See http://showmeinstitute.org/blog/government-unions/teachers-union-gets-collective-bargaining-wrong

The indirect effects of the Initiative Petitions present a debate this Office should not take a definitive position on. The indirect effects of prohibiting a "Right-to-Work" bill by the General Assembly are unknown. First, it is unknown if Missouri will have a Right-to-Work law in 2018, though the state most likely will.[3] Second, if Missouri has a Right-to-Work law in 2018, it is unclear what the precise scope of the law will be.[4]

Third, regardless of whether the Initiative Petitions will, in fact, pre-empt an existing Right-to-Work law in Missouri, the overall economic impact of a state Right-to-Work law is unknown. However, most research suggests that a state Right-to-Work law would yield positive fiscal impacts for a state such as Missouri. A Right-to-Work law would make Missouri more competitive with neighboring states. Every state neighboring Missouri, except Illinois, has a Right-to-Work law. Still, the ultimate fiscal or economic impact of a constitutional provision pre-empting or preventing a Right-to-Work law is unknown.

What is known is that in areas with low union support, union membership declines with the passage of a Right-to-Work law.[5] When a union member quits the union and stops paying union dues, other things equal, the former member's take-home pay goes up. The former union member is no longer paying dues, but is able to maintain their same employment and gross wage rate. Some of this new take-home pay represents new taxable wages (through decreased deductions for payment of union dues).[6] This is a potential source of new revenue that the Initiative Petitions take away. In addition to an income tax effect, this new take-home pay may also be spent on state revenue producing activities such as consuming goods subject to sales tax or making taxable investments. If Missouri has a Right-to-Work law in 2018, some individuals who opt out of union membership will thereafter be forced to pay union dues, and taxable wages will decrease.

In 2014, James Sherk identified several indirect effects associated with Right-to-Work laws.[7] These indirect effects show that permitting a Right-to-Work law would allow Missouri to be more competitive for new jobs and decreased unemployment:

- Roughly half of all major businesses refuse to consider locating in jurisdictions with compulsory dues.
- Bureau of Labor Statistics data show that between 1990 and 2014 total employment grew more than twice as fast in right-to-work states as in states with compulsory dues.

[3] http://news.stlpublicradio.org/post/only-scope-and-timing-missouris-expected-right-work-law-question#stream/0
[4] Id.
[5] Ozkan Eren and I. Serkan Ozbeklik, "Right-to-Work Laws and State-Level Economic Outcomes: Evidence from the Case Studies of Idaho and Oklahoma Using Synthetic Control Method," Working Paper, February 2011, at http://econweb.umd.edu/~davis/eventpapers/OzbeklikRight.pdf (November 9, 2011) (identifying a 15% decline in union membership in Idaho and Oklahoma).
[6] https://www.irs.gov/publications/p17/ch28.html (stating that certain union dues reduce an individual's taxable income).
[7] http://www.heritage.org/research/reports/2014/12/right-to-work-laws-myth-vs-fact

- Average wages in right-to-work states are indeed slightly lower than in non-right-to-work states. This occurs because almost every Southern state has a right-to-work law and the South has a lower cost of living. Studies that control for differences in costs of living find workers in states with voluntary dues have no lower—and possibly slightly higher—real wages than workers in states with compulsory dues.

The Initiative Petitions seek to prevent Missouri from taking a step forward and implementing policies that would make Missouri a more attractive place to do business for large manufacturing employers. The Initiative Petitions discourage both new and current employers (like Boeing and Ford) from investing capital, hiring, or retaining employees in Missouri.[8]

Missouri small businesses would be affected by the Initiative Petitions. Small businesses have less bargaining power or ability to weather union organizing events or work stoppages. The regulatory burdens associated with running a union shop are higher per capita for a small business. Due to their size, small businesses are less likely to unionize, but small businesses that do unionize will become less competitive.

In short, much of the fiscal impact of the Initiative Petitions will be secondary. The only direct cost is the potential costs state and local government entities may incur in renegotiating employment contracts. The Initiative Petitions will not directly result in any government savings or increased revenues. Because these fiscal notes call for the Auditor to operate in the area of secondary effects, it is critical that she treat both sides of the question equally.

Conclusion

In conclusion, the State Auditor should note the increased cost to be borne by state and local government entities through employment contracting costs for employees not currently covered by an "exclusive representation" union. The other fiscal impacts are all secondary and unknown; however, future costs and revenue losses may be significant.

Should you desire further detail or have any questions about this fiscal impact statement, please do not hesitate to contact me.

Sincerely,

Edward D. Greim

RE: Petition approval request from Mike Louis regarding a proposed constitutional amendment to Article I, version 6 (2018-097)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mike Louis on December 9, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

My commission expires:

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article I of the Constitution is revised by amending Section 29 to read as follows:

Section 29. That employees shall have the right to organize and to bargain collectively through representatives of their own choosing. No existing or future law or ordinance of the state or its political subdivisions shall impair, restrict or limit the negotiation and enforcement of any collectively bargained agreement with an employer respecting financial support by employees of their collective bargaining representative according to the terms of that agreement.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-097)

Subject

Initiative petition from Mike Louis regarding a proposed constitutional amendment to Article I. (Received December 12, 2016)

Date

January 3, 2017

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Kansas City Boards of Police Commissioners,** the **Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Edward D. Greim provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they assume that any potential costs arising from the adoption of this proposal can be absorbed with existing resources.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated they defer to the Office of Administration.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated they defer to the Office of Administration for a statewide response.

Officials from the **Department of Public Safety** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated no fiscal impact on their department. They defer to the Office of Administration for response to the fiscal note request.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal response.

Officials from the **Office of Administration** indicated:

The proposed amendment would prohibit existing or future laws or ordinances from interfering with the ability of employees to negotiate and enforce collective bargaining agreements respecting financial support by employees of their collective bargaining representative.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any substantial impact on their office.

Officials from the **State Treasurer's office** indicated this would have no fiscal impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report due to lack of quantifiable information pertaining to the language of the amendment from their county for this initiative petition.

Officials from the **City of Kansas City** indicated no fiscal impact is anticipated if this proposal is adopted.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from **University of Missouri** indicated they have reviewed this proposed legislation and have determined there would be no significant financial impact on their university.

Officials from **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from **Missouri State University** indicated no fiscal impact to their university for this petition.

Officials from **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this amendment will have no fiscal impact on their university.

Edward D. Greim provided the following information as an opponent of this initiative petition.

Mr. Jon Halwes
Missouri State Auditor's Office
Truman State Office Building
301 West High Street, Rm 880, P.O. Box 869
Jefferson City, Missouri 65102

Re: Initiative Petitions 2018-092 through 2018-099 and 2018-101 through 2018-102

Dear Mr. Halwes,

Please consider this letter as a fiscal impact statement regarding Initiative Petitions 2018-092 through 2018-099 and 2018-101 through 2018-102 (the "Initiative Petitions"). If passed, any of these ten initiatives would have a negative impact on state and local governments, as well as Missouri small businesses. While the Initiative Petitions would primarily result in uncertain or unclear direct effects, the secondary effects are negative and potentially significant. Direct effects stem from labor and contracting costs that the state and its political subdivisions will incur to renegotiate contracts with labor organizations. These direct effects would be larger if, on the Initiative Petition's effective date, the state of Missouri has adopted a so-called "Right-to-Work" law. It is exceedingly likely that the state will have a Right-to-Work law by the potential effective date of the Initiative Petitions: December 6, 2018.[1]

Moreover, certain public employees, namely public school teachers, are currently excluded from the Missouri Public Sector Labor Law. §§ 105.500-.530 RSMo. The Initiative Petitions impliedly repeal statutes and ordinances that limit the ability of teachers and other types of public employees to commit other employees to "exclusive representation" by a union. Public employees' contracts that already rely on laws or ordinances prohibiting exclusive representation would violate the Initiative Petitions, and require renegotiation.[2]

[1] See, for example, http://news.stlpublicradio.org/post/only-scope-and-timing-missouris-expected-right-work-law-question#stream/0; http://www.kshb.com/news/state/missouri/missouri-moves-closer-to-becoming-right-to-work-state
[2] See http://showmeinstitute.org/blog/government-unions/teachers-union-gets-collective-bargaining-wrong

The indirect effects of the Initiative Petitions present a debate this Office should not take a definitive position on. The indirect effects of prohibiting a "Right-to-Work" bill by the General Assembly are unknown. First, it is unknown if Missouri will have a Right-to-Work law in 2018, though the state most likely will.[3] Second, if Missouri has a Right-to-Work law in 2018, it is unclear what the precise scope of the law will be.[4]

Third, regardless of whether the Initiative Petitions will, in fact, pre-empt an existing Right-to-Work law in Missouri, the overall economic impact of a state Right-to-Work law is unknown. However, most research suggests that a state Right-to-Work law would yield positive fiscal impacts for a state such as Missouri. A Right-to-Work law would make Missouri more competitive with neighboring states. Every state neighboring Missouri, except Illinois, has a Right-to-Work law. Still, the ultimate fiscal or economic impact of a constitutional provision pre-empting or preventing a Right-to-Work law is unknown.

What is known is that in areas with low union support, union membership declines with the passage of a Right-to-Work law.[5] When a union member quits the union and stops paying union dues, other things equal, the former member's take-home pay goes up. The former union member is no longer paying dues, but is able to maintain their same employment and gross wage rate. Some of this new take-home pay represents new taxable wages (through decreased deductions for payment of union dues).[6] This is a potential source of new revenue that the Initiative Petitions take away. In addition to an income tax effect, this new take-home pay may also be spent on state revenue producing activities such as consuming goods subject to sales tax or making taxable investments. If Missouri has a Right-to-Work law in 2018, some individuals who opt out of union membership will thereafter be forced to pay union dues, and taxable wages will decrease.

In 2014, James Sherk identified several indirect effects associated with Right-to-Work laws.[7] These indirect effects show that permitting a Right-to-Work law would allow Missouri to be more competitive for new jobs and decreased unemployment:

- Roughly half of all major businesses refuse to consider locating in jurisdictions with compulsory dues.
- Bureau of Labor Statistics data show that between 1990 and 2014 total employment grew more than twice as fast in right-to-work states as in states with compulsory dues.

[3] http://news.stlpublicradio.org/post/only-scope-and-timing-missouris-expected-right-work-law-question#stream/0
[4] Id.
[5] Ozkan Eren and I. Serkan Ozbeklik, "Right-to-Work Laws and State-Level Economic Outcomes: Evidence from the Case Studies of Idaho and Oklahoma Using Synthetic Control Method," Working Paper, February 2011, at http://econweb.umd.edu/~davis/eventpapers/OzbeklikRight.pdf (November 9, 2011) (identifying a 15% decline in union membership in Idaho and Oklahoma).
[6] https://www.irs.gov/publications/p17/ch28.html (stating that certain union dues reduce an individual's taxable income).
[7] http://www.heritage.org/research/reports/2014/12/right-to-work-laws-myth-vs-fact

- Average wages in right-to-work states are indeed slightly lower than in non-right-to-work states. This occurs because almost every Southern state has a right-to-work law and the South has a lower cost of living. Studies that control for differences in costs of living find workers in states with voluntary dues have no lower—and possibly slightly higher—real wages than workers in states with compulsory dues.

The Initiative Petitions seek to prevent Missouri from taking a step forward and implementing policies that would make Missouri a more attractive place to do business for large manufacturing employers. The Initiative Petitions discourage both new and current employers (like Boeing and Ford) from investing capital, hiring, or retaining employees in Missouri.[8]

Missouri small businesses would be affected by the Initiative Petitions. Small businesses have less bargaining power or ability to weather union organizing events or work stoppages. The regulatory burdens associated with running a union shop are higher per capita for a small business. Due to their size, small businesses are less likely to unionize, but small businesses that do unionize will become less competitive.

In short, much of the fiscal impact of the Initiative Petitions will be secondary. The only direct cost is the potential costs state and local government entities may incur in renegotiating employment contracts. The Initiative Petitions will not directly result in any government savings or increased revenues. Because these fiscal notes call for the Auditor to operate in the area of secondary effects, it is critical that she treat both sides of the question equally.

Conclusion

In conclusion, the State Auditor should note the increased cost to be borne by state and local government entities through employment contracting costs for employees not currently covered by an "exclusive representation" union. The other fiscal impacts are all secondary and unknown; however, future costs and revenue losses may be significant.

Should you desire further detail or have any questions about this fiscal impact statement, please do not hesitate to contact me.

Sincerely,

Edward D. Greim

RE: Petition approval request from Mike Louis regarding a proposed constitutional amendment to Article I, version 5 (2018-096)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mike Louis on December 9, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

My commission expires:

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article I of the Constitution is revised by amending Section 29 to read as follows:

Section 29. That employees shall have the right to organize and to bargain collectively through representatives of their own choosing. No existing or future law or ordinance of the state or its political subdivisions shall impair, restrict or limit the ability of employees to negotiate, enter into and enforce any collectively bargained agreement with an employer that provides financial support for the representational services their collective bargaining representative performs.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-096)

Subject

Initiative petition from Mike Louis regarding a proposed constitutional amendment to Article I. (Received December 12, 2016)

Date

January 3, 2017

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Kansas City Boards of Police Commissioners,** the **Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Edward D. Greim provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they assume that any potential costs arising from the adoption of this proposal can be absorbed with existing resources.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated they defer to the Office of Administration.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated they defer to the Office of Administration for a statewide response.

Officials from the **Department of Public Safety** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated no fiscal impact on their department. They defer to the Office of Administration for response to the fiscal note request.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal response.

Officials from the **Office of Administration** indicated:

The proposed amendment would prohibit existing or future laws or ordinances from interfering with the ability of employees to negotiate and enforce collective bargaining agreements respecting financial support by employees of their collective bargaining representative.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any substantial impact on their office.

Officials from the **State Treasurer's office** indicated this would have no fiscal impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report due to lack of quantifiable information pertaining to the language of the amendment from their county for this initiative petition.

Officials from the **City of Kansas City** indicated no fiscal impact is anticipated if this proposal is adopted.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from **University of Missouri** indicated they have reviewed this proposed legislation and have determined there would be no significant financial impact on their university.

Officials from **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from **Missouri State University** indicated no fiscal impact to their university for this petition.

Officials from **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this amendment will have no fiscal impact on their university.

Edward D. Greim provided the following information as an opponent of this initiative petition.

Mr. Jon Halwes
Missouri State Auditor's Office
Truman State Office Building
301 West High Street, Rm 880, P.O. Box 869
Jefferson City, Missouri 65102

Re: Initiative Petitions 2018-092 through 2018-099 and 2018-101 through 2018-102

Dear Mr. Halwes,

Please consider this letter as a fiscal impact statement regarding Initiative Petitions 2018-092 through 2018-099 and 2018-101 through 2018-102 (the "Initiative Petitions"). If passed, any of these ten initiatives would have a negative impact on state and local governments, as well as Missouri small businesses. While the Initiative Petitions would primarily result in uncertain or unclear direct effects, the secondary effects are negative and potentially significant. Direct effects stem from labor and contracting costs that the state and its political subdivisions will incur to renegotiate contracts with labor organizations. These direct effects would be larger if, on the Initiative Petition's effective date, the state of Missouri has adopted a so-called "Right-to-Work" law. It is exceedingly likely that the state will have a Right-to-Work law by the potential effective date of the Initiative Petitions: December 6, 2018.[1]

Moreover, certain public employees, namely public school teachers, are currently excluded from the Missouri Public Sector Labor Law. §§ 105.500-.530 RSMo. The Initiative Petitions impliedly repeal statutes and ordinances that limit the ability of teachers and other types of public employees to commit other employees to "exclusive representation" by a union. Public employees' contracts that already rely on laws or ordinances prohibiting exclusive representation would violate the Initiative Petitions, and require renegotiation.[2]

[1] See, for example, http://news.stlpublicradio.org/post/only-scope-and-timing-missouris-expected-right-work-law-question#stream/0; http://www.kshb.com/news/state/missouri/missouri-moves-closer-to-becoming-right-to-work-state
[2] See http://showmeinstitute.org/blog/government-unions/teachers-union-gets-collective-bargaining-wrong

The indirect effects of the Initiative Petitions present a debate this Office should not take a definitive position on. The indirect effects of prohibiting a "Right-to-Work" bill by the General Assembly are unknown. First, it is unknown if Missouri will have a Right-to-Work law in 2018, though the state most likely will.[3] Second, if Missouri has a Right-to-Work law in 2018, it is unclear what the precise scope of the law will be.[4]

Third, regardless of whether the Initiative Petitions will, in fact, pre-empt an existing Right-to-Work law in Missouri, the overall economic impact of a state Right-to-Work law is unknown. However, most research suggests that a state Right-to-Work law would yield positive fiscal impacts for a state such as Missouri. A Right-to-Work law would make Missouri more competitive with neighboring states. Every state neighboring Missouri, except Illinois, has a Right-to-Work law. Still, the ultimate fiscal or economic impact of a constitutional provision pre-empting or preventing a Right-to-Work law is unknown.

What is known is that in areas with low union support, union membership declines with the passage of a Right-to-Work law.[5] When a union member quits the union and stops paying union dues, other things equal, the former member's take-home pay goes up. The former union member is no longer paying dues, but is able to maintain their same employment and gross wage rate. Some of this new take-home pay represents new taxable wages (through decreased deductions for payment of union dues).[6] This is a potential source of new revenue that the Initiative Petitions take away. In addition to an income tax effect, this new take-home pay may also be spent on state revenue producing activities such as consuming goods subject to sales tax or making taxable investments. If Missouri has a Right-to-Work law in 2018, some individuals who opt out of union membership will thereafter be forced to pay union dues, and taxable wages will decrease.

In 2014, James Sherk identified several indirect effects associated with Right-to-Work laws.[7] These indirect effects show that permitting a Right-to-Work law would allow Missouri to be more competitive for new jobs and decreased unemployment:

- Roughly half of all major businesses refuse to consider locating in jurisdictions with compulsory dues.
- Bureau of Labor Statistics data show that between 1990 and 2014 total employment grew more than twice as fast in right-to-work states as in states with compulsory dues.

[3] http://news.stlpublicradio.org/post/only-scope-and-timing-missouris-expected-right-work-law-question#stream/0
[4] Id.
[5] Ozkan Eren and I. Serkan Ozbeklik, "Right-to-Work Laws and State-Level Economic Outcomes: Evidence from the Case Studies of Idaho and Oklahoma Using Synthetic Control Method," Working Paper, February 2011, at http://econweb.umd.edu/~davis/eventpapers/OzbeklikRight.pdf (November 9, 2011) (identifying a 15% decline in union membership in Idaho and Oklahoma).
[6] https://www.irs.gov/publications/p17/ch28.html (stating that certain union dues reduce an individual's taxable income).
[7] http://www.heritage.org/research/reports/2014/12/right-to-work-laws-myth-vs-fact

- Average wages in right-to-work states are indeed slightly lower than in non-right-to-work states. This occurs because almost every Southern state has a right-to-work law and the South has a lower cost of living. Studies that control for differences in costs of living find workers in states with voluntary dues have no lower—and possibly slightly higher—real wages than workers in states with compulsory dues.

The Initiative Petitions seek to prevent Missouri from taking a step forward and implementing policies that would make Missouri a more attractive place to do business for large manufacturing employers. The Initiative Petitions discourage both new and current employers (like Boeing and Ford) from investing capital, hiring, or retaining employees in Missouri.[8]

Missouri small businesses would be affected by the Initiative Petitions. Small businesses have less bargaining power or ability to weather union organizing events or work stoppages. The regulatory burdens associated with running a union shop are higher per capita for a small business. Due to their size, small businesses are less likely to unionize, but small businesses that do unionize will become less competitive.

In short, much of the fiscal impact of the Initiative Petitions will be secondary. The only direct cost is the potential costs state and local government entities may incur in renegotiating employment contracts. The Initiative Petitions will not directly result in any government savings or increased revenues. Because these fiscal notes call for the Auditor to operate in the area of secondary effects, it is critical that she treat both sides of the question equally.

Conclusion

In conclusion, the State Auditor should note the increased cost to be borne by state and local government entities through employment contracting costs for employees not currently covered by an "exclusive representation" union. The other fiscal impacts are all secondary and unknown; however, future costs and revenue losses may be significant.

Should you desire further detail or have any questions about this fiscal impact statement, please do not hesitate to contact me.

Sincerely,

Edward D. Greim

RE: Petition approval request from Mike Louis regarding a proposed constitutional amendment to Article I, version 4 (2018-095)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mike Louis on December 9, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal or modify by implication Section 290 of the Missouri Revised Statutes.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article I of the Constitution is revised by amending Section 29 to read as follows:

Section 29. That employees and employers shall have the right to organize and to bargain collectively through representatives of their own choosing. That an employee accepting employment with an employer in a position represented by a representative of employees' choosing may be required to contribute that employee's pro-rata share of representational costs if the employer and employees' chosen representative have so agreed.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-095)

Subject

Initiative petition from Mike Louis regarding a proposed constitutional amendment to Article I. (Received December 12, 2016)

Date

January 3, 2017

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Kansas City Boards of Police Commissioners,** the **Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Edward D. Greim provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they assume that any potential costs arising from the adoption of this proposal can be absorbed with existing resources.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated they defer to the Office of Administration.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated they defer to the Office of Administration for a statewide response.

Officials from the **Department of Public Safety** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated no fiscal impact on their department. They defer to the Office of Administration for response to the fiscal note request.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal response.

Officials from the **Office of Administration** indicated:

The proposed amendment would allow employers, in addition to employees, to organize and bargain collectively. It would also require employees to contribute toward the employee's pro-rate share of representational costs if the employer and employee's chosen representative have so agreed.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any substantial impact on their office.

Officials from the **State Treasurer's office** indicated this would have no fiscal impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report due to lack of quantifiable information pertaining to the language of the amendment from their county for this initiative petition.

Officials from the **City of Kansas City** indicated no fiscal impact is anticipated if this proposal is adopted.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from **University of Missouri** indicated they have reviewed this proposed legislation and have determined there would be no significant financial impact on their university.

Officials from **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from **Missouri State University** indicated no fiscal impact to their university for this petition.

Officials from **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this amendment will have no fiscal impact on their university.

Edward D. Greim provided the following information as an opponent of this initiative petition.

Re: Initiative Petitions 2018-092 through 2018-099 and 2018-101 through 2018-102

Dear Mr. Halwes,

Please consider this letter as a fiscal impact statement regarding Initiative Petitions 2018-092 through 2018-099 and 2018-101 through 2018-102 (the "Initiative Petitions"). If passed, any of these ten initiatives would have a negative impact on state and local governments, as well as Missouri small businesses. While the Initiative Petitions would primarily result in uncertain or unclear direct effects, the secondary effects are negative and potentially significant. Direct effects stem from labor and contracting costs that the state and its political subdivisions will incur to renegotiate contracts with labor organizations. These direct effects would be larger if, on the Initiative Petition's effective date, the state of Missouri has adopted a so-called "Right-to-Work" law. It is exceedingly likely that the state will have a Right-to-Work law by the potential effective date of the Initiative Petitions: December 6, 2018.[1]

Moreover, certain public employees, namely public school teachers, are currently excluded from the Missouri Public Sector Labor Law. §§ 105.500-.530 RSMo. The Initiative Petitions impliedly repeal statutes and ordinances that limit the ability of teachers and other types of public employees to commit other employees to "exclusive representation" by a union. Public employees' contracts that already rely on laws or ordinances prohibiting exclusive representation would violate the Initiative Petitions, and require renegotiation.[2]

[1] See, for example, http://news.stlpublicradio.org/post/only-scope-and-timing-missouris-expected-right-work-law-question#stream/0; http://www.kshb.com/news/state/missouri/missouri-moves-closer-to-becoming-right-to-work-state
[2] See http://showmeinstitute.org/blog/government-unions/teachers-union-gets-collective-bargaining-wrong

The indirect effects of the Initiative Petitions present a debate this Office should not take a definitive position on. The indirect effects of prohibiting a "Right-to-Work" bill by the General Assembly are unknown. First, it is unknown if Missouri will have a Right-to-Work law in 2018, though the state most likely will.[3] Second, if Missouri has a Right-to-Work law in 2018, it is unclear what the precise scope of the law will be.[4]

Third, regardless of whether the Initiative Petitions will, in fact, pre-empt an existing Right-to-Work law in Missouri, the overall economic impact of a state Right-to-Work law is unknown. However, most research suggests that a state Right-to-Work law would yield positive fiscal impacts for a state such as Missouri. A Right-to-Work law would make Missouri more competitive with neighboring states. Every state neighboring Missouri, except Illinois, has a Right-to-Work law. Still, the ultimate fiscal or economic impact of a constitutional provision pre-empting or preventing a Right-to-Work law is unknown.

What is known is that in areas with low union support, union membership declines with the passage of a Right-to-Work law.[5] When a union member quits the union and stops paying union dues, other things equal, the former member's take-home pay goes up. The former union member is no longer paying dues, but is able to maintain their same employment and gross wage rate. Some of this new take-home pay represents new taxable wages (through decreased deductions for payment of union dues).[6] This is a potential source of new revenue that the Initiative Petitions take away. In addition to an income tax effect, this new take-home pay may also be spent on state revenue producing activities such as consuming goods subject to sales tax or making taxable investments. If Missouri has a Right-to-Work law in 2018, some individuals who opt out of union membership will thereafter be forced to pay union dues, and taxable wages will decrease.

In 2014, James Sherk identified several indirect effects associated with Right-to-Work laws.[7] These indirect effects show that permitting a Right-to-Work law would allow Missouri to be more competitive for new jobs and decreased unemployment:

- Roughly half of all major businesses refuse to consider locating in jurisdictions with compulsory dues.
- Bureau of Labor Statistics data show that between 1990 and 2014 total employment grew more than twice as fast in right-to-work states as in states with compulsory dues.

[3] http://news.stlpublicradio.org/post/only-scope-and-timing-missouris-expected-right-work-law-question#stream/0
[4] Id.
[5] Ozkan Eren and I. Serkan Ozbeklik, "Right-to-Work Laws and State-Level Economic Outcomes: Evidence from the Case Studies of Idaho and Oklahoma Using Synthetic Control Method," Working Paper, February 2011, at http://econweb.umd.edu/~davis/eventpapers/OzbeklikRight.pdf (November 9, 2011) (identifying a 15% decline in union membership in Idaho and Oklahoma).
[6] https://www.irs.gov/publications/p17/ch28.html (stating that certain union dues reduce an individual's taxable income).
[7] http://www.heritage.org/research/reports/2014/12/right-to-work-laws-myth-vs-fact

- Average wages in right-to-work states are indeed slightly lower than in non-right-to-work states. This occurs because almost every Southern state has a right-to-work law and the South has a lower cost of living. Studies that control for differences in costs of living find workers in states with voluntary dues have no lower—and possibly slightly higher—real wages than workers in states with compulsory dues.

The Initiative Petitions seek to prevent Missouri from taking a step forward and implementing policies that would make Missouri a more attractive place to do business for large manufacturing employers. The Initiative Petitions discourage both new and current employers (like Boeing and Ford) from investing capital, hiring, or retaining employees in Missouri.[8]

Missouri small businesses would be affected by the Initiative Petitions. Small businesses have less bargaining power or ability to weather union organizing events or work stoppages. The regulatory burdens associated with running a union shop are higher per capita for a small business. Due to their size, small businesses are less likely to unionize, but small businesses that do unionize will become less competitive.

In short, much of the fiscal impact of the Initiative Petitions will be secondary. The only direct cost is the potential costs state and local government entities may incur in renegotiating employment contracts. The Initiative Petitions will not directly result in any government savings or increased revenues. Because these fiscal notes call for the Auditor to operate in the area of secondary effects, it is critical that she treat both sides of the question equally.

Conclusion

In conclusion, the State Auditor should note the increased cost to be borne by state and local government entities through employment contracting costs for employees not currently covered by an "exclusive representation" union. The other fiscal impacts are all secondary and unknown; however, future costs and revenue losses may be significant.

Should you desire further detail or have any questions about this fiscal impact statement, please do not hesitate to contact me.

Sincerely,

Edward D. Greim

RE: Petition approval request from Mike Louis regarding a proposed constitutional amendment to Article I, version 3 (2018-094)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mike Louis on December 9, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal or modify by implication Section 290 of the Missouri Revised Statutes.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article I of the Constitution is revised by amending Section 29 to read as follows:

Section 29. That employees and employers shall have the right to organize and to bargain collectively through representatives of their own choosing. No existing or future law or ordinance of the state or its political subdivisions shall impair, restrict or limit the negotiation and enforcement of any collectively bargained agreement with an employer respecting financial support by employees of their collective bargaining representative according to the terms of that agreement.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-094)

Subject

Initiative petition from Mike Louis regarding a proposed constitutional amendment to Article I. (Received December 12, 2016)

Date

January 3, 2017

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Kansas City Boards of Police Commissioners,** the **Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Edward D. Greim provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they assume that any potential costs arising from the adoption of this proposal can be absorbed with existing resources.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated they defer to the Office of Administration.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated they defer to the Office of Administration for a statewide response.

Officials from the **Department of Public Safety** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated no fiscal impact on their department. They defer to the Office of Administration for response to the fiscal note request.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal response.

Officials from the **Office of Administration** indicated:

The proposed amendment would allow employers, in addition to employees, to organize and bargain collectively. It would also prohibit existing or future laws or ordinances from interfering with the ability of employees to negotiate, enter into and enforce collective bargaining agreements that provide financial support for the presentational services their collective bargaining representative performs.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any substantial impact on their office.

Officials from the **State Treasurer's office** indicated this would have no fiscal impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report due to lack of quantifiable information pertaining to the language of the amendment from their county for this initiative petition.

Officials from the **City of Kansas City** indicated no fiscal impact is anticipated if this proposal is adopted.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from **University of Missouri** indicated they have reviewed this proposed legislation and have determined there would be no significant financial impact on their university.

Officials from **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from **Missouri State University** indicated no fiscal impact to their university for this petition.

Officials from **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this amendment will have no fiscal impact on their university.

Edward D. Greim provided the following information as an opponent of this initiative petition.

Re: Initiative Petitions 2018-092 through 2018-099 and 2018-101 through 2018-102

Dear Mr. Halwes,

Please consider this letter as a fiscal impact statement regarding Initiative Petitions 2018-092 through 2018-099 and 2018-101 through 2018-102 (the "Initiative Petitions"). If passed, any of these ten initiatives would have a negative impact on state and local governments, as well as Missouri small businesses. While the Initiative Petitions would primarily result in uncertain or unclear direct effects, the secondary effects are negative and potentially significant. Direct effects stem from labor and contracting costs that the state and its political subdivisions will incur to renegotiate contracts with labor organizations. These direct effects would be larger if, on the Initiative Petition's effective date, the state of Missouri has adopted a so-called "Right-to-Work" law. It is exceedingly likely that the state will have a Right-to-Work law by the potential effective date of the Initiative Petitions: December 6, 2018.[1]

Moreover, certain public employees, namely public school teachers, are currently excluded from the Missouri Public Sector Labor Law. §§ 105.500-.530 RSMo. The Initiative Petitions impliedly repeal statutes and ordinances that limit the ability of teachers and other types of public employees to commit other employees to "exclusive representation" by a union. Public employees' contracts that already rely on laws or ordinances prohibiting exclusive representation would violate the Initiative Petitions, and require renegotiation.[2]

[1] See, for example, http://news.stlpublicradio.org/post/only-scope-and-timing-missouris-expected-right-work-law-question#stream/0; http://www.kshb.com/news/state/missouri/missouri-moves-closer-to-becoming-right-to-work-state
[2] See http://showmeinstitute.org/blog/government-unions/teachers-union-gets-collective-bargaining-wrong

The indirect effects of the Initiative Petitions present a debate this Office should not take a definitive position on. The indirect effects of prohibiting a "Right-to-Work" bill by the General Assembly are unknown. First, it is unknown if Missouri will have a Right-to-Work law in 2018, though the state most likely will.[3] Second, if Missouri has a Right-to-Work law in 2018, it is unclear what the precise scope of the law will be.[4]

Third, regardless of whether the Initiative Petitions will, in fact, pre-empt an existing Right-to-Work law in Missouri, the overall economic impact of a state Right-to-Work law is unknown. However, most research suggests that a state Right-to-Work law would yield positive fiscal impacts for a state such as Missouri. A Right-to-Work law would make Missouri more competitive with neighboring states. Every state neighboring Missouri, except Illinois, has a Right-to-Work law. Still, the ultimate fiscal or economic impact of a constitutional provision pre-empting or preventing a Right-to-Work law is unknown.

What is known is that in areas with low union support, union membership declines with the passage of a Right-to-Work law.[5] When a union member quits the union and stops paying union dues, other things equal, the former member's take-home pay goes up. The former union member is no longer paying dues, but is able to maintain their same employment and gross wage rate. Some of this new take-home pay represents new taxable wages (through decreased deductions for payment of union dues).[6] This is a potential source of new revenue that the Initiative Petitions take away. In addition to an income tax effect, this new take-home pay may also be spent on state revenue producing activities such as consuming goods subject to sales tax or making taxable investments. If Missouri has a Right-to-Work law in 2018, some individuals who opt out of union membership will thereafter be forced to pay union dues, and taxable wages will decrease.

In 2014, James Sherk identified several indirect effects associated with Right-to-Work laws.[7] These indirect effects show that permitting a Right-to-Work law would allow Missouri to be more competitive for new jobs and decreased unemployment:

- Roughly half of all major businesses refuse to consider locating in jurisdictions with compulsory dues.
- Bureau of Labor Statistics data show that between 1990 and 2014 total employment grew more than twice as fast in right-to-work states as in states with compulsory dues.

[3] http://news.stlpublicradio.org/post/only-scope-and-timing-missouris-expected-right-work-law-question#stream/0
[4] Id.
[5] Ozkan Eren and I. Serkan Ozbeklik, "Right-to-Work Laws and State-Level Economic Outcomes: Evidence from the Case Studies of Idaho and Oklahoma Using Synthetic Control Method," Working Paper, February 2011, at http://econweb.umd.edu/~davis/eventpapers/OzbeklikRight.pdf (November 9, 2011) (identifying a 15% decline in union membership in Idaho and Oklahoma).
[6] https://www.irs.gov/publications/p17/ch28.html (stating that certain union dues reduce an individual's taxable income).
[7] http://www.heritage.org/research/reports/2014/12/right-to-work-laws-myth-vs-fact

- Average wages in right-to-work states are indeed slightly lower than in non-right-to-work states. This occurs because almost every Southern state has a right-to-work law and the South has a lower cost of living. Studies that control for differences in costs of living find workers in states with voluntary dues have no lower—and possibly slightly higher—real wages than workers in states with compulsory dues.

The Initiative Petitions seek to prevent Missouri from taking a step forward and implementing policies that would make Missouri a more attractive place to do business for large manufacturing employers. The Initiative Petitions discourage both new and current employers (like Boeing and Ford) from investing capital, hiring, or retaining employees in Missouri.[8]

Missouri small businesses would be affected by the Initiative Petitions. Small businesses have less bargaining power or ability to weather union organizing events or work stoppages. The regulatory burdens associated with running a union shop are higher per capita for a small business. Due to their size, small businesses are less likely to unionize, but small businesses that do unionize will become less competitive.

In short, much of the fiscal impact of the Initiative Petitions will be secondary. The only direct cost is the potential costs state and local government entities may incur in renegotiating employment contracts. The Initiative Petitions will not directly result in any government savings or increased revenues. Because these fiscal notes call for the Auditor to operate in the area of secondary effects, it is critical that she treat both sides of the question equally.

Conclusion

In conclusion, the State Auditor should note the increased cost to be borne by state and local government entities through employment contracting costs for employees not currently covered by an "exclusive representation" union. The other fiscal impacts are all secondary and unknown; however, future costs and revenue losses may be significant.

Should you desire further detail or have any questions about this fiscal impact statement, please do not hesitate to contact me.

Sincerely,

Edward D. Greim

My commission expires:

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal or modify by implication Section 290 of the Missouri Revised Statutes.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article I of the Constitution is revised by amending Section 29 to read as follows:

Section 29. That employees shall have the right to organize and to bargain collectively through representatives of their own choosing. No existing or future law or ordinance of the state or its political subdivisions shall impair, restrict or limit the negotiation and enforcement of any collectively bargained agreement with an employer respecting financial support by employees of their collective bargaining representative according to the terms of that agreement.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-093)

Subject

Initiative petition from Mike Louis regarding a proposed constitutional amendment to Article I. (Received December 12, 2016)

Date

January 3, 2017

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Kansas City Boards of Police Commissioners,** the **Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Edward D. Greim provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they assume that any potential costs arising from the adoption of this proposal can be absorbed with existing resources.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated they defer to the Office of Administration.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated they defer to the Office of Administration for a statewide response.

Officials from the **Department of Public Safety** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated no fiscal impact on their department. They defer to the Office of Administration for response to the fiscal note request.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal response.

Officials from the **Office of Administration** indicated:

The proposed amendment would prohibit existing or future laws or ordinances from interfering with the ability of employees to negotiate, enter into and enforce collective bargaining agreements that provide financial support for the presentational services their collective bargaining representative performs.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any substantial impact on their office.

Officials from the **State Treasurer's office** indicated this would have no fiscal impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report due to lack of quantifiable information pertaining to the language of the amendment from their county for this initiative petition.

Officials from the **City of Kansas City** indicated no fiscal impact is anticipated if this proposal is adopted.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from **University of Missouri** indicated they have reviewed this proposed legislation and have determined there would be no significant financial impact on their university.

Officials from **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from **Missouri State University** indicated no fiscal impact to their university for this petition.

Officials from **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this amendment will have no fiscal impact on their university.

Edward D. Greim provided the following information as an opponent of this initiative petition.

Re: Initiative Petitions 2018-092 through 2018-099 and 2018-101 through 2018-102

Dear Mr. Halwes,

Please consider this letter as a fiscal impact statement regarding Initiative Petitions 2018-092 through 2018-099 and 2018-101 through 2018-102 (the "Initiative Petitions"). If passed, any of these ten initiatives would have a negative impact on state and local governments, as well as Missouri small businesses. While the Initiative Petitions would primarily result in uncertain or unclear direct effects, the secondary effects are negative and potentially significant. Direct effects stem from labor and contracting costs that the state and its political subdivisions will incur to renegotiate contracts with labor organizations. These direct effects would be larger if, on the Initiative Petition's effective date, the state of Missouri has adopted a so-called "Right-to-Work" law. It is exceedingly likely that the state will have a Right-to-Work law by the potential effective date of the Initiative Petitions: December 6, 2018.[1]

Moreover, certain public employees, namely public school teachers, are currently excluded from the Missouri Public Sector Labor Law. §§ 105.500-.530 RSMo. The Initiative Petitions impliedly repeal statutes and ordinances that limit the ability of teachers and other types of public employees to commit other employees to "exclusive representation" by a union. Public employees' contracts that already rely on laws or ordinances prohibiting exclusive representation would violate the Initiative Petitions, and require renegotiation.[2]

[1] See, for example, http://news.stlpublicradio.org/post/only-scope-and-timing-missouris-expected-right-work-law-question#stream/0; http://www.kshb.com/news/state/missouri/missouri-moves-closer-to-becoming-right-to-work-state
[2] See http://showmeinstitute.org/blog/government-unions/teachers-union-gets-collective-bargaining-wrong

The indirect effects of the Initiative Petitions present a debate this Office should not take a definitive position on. The indirect effects of prohibiting a "Right-to-Work" bill by the General Assembly are unknown. First, it is unknown if Missouri will have a Right-to-Work law in 2018, though the state most likely will.[3] Second, if Missouri has a Right-to-Work law in 2018, it is unclear what the precise scope of the law will be.[4]

Third, regardless of whether the Initiative Petitions will, in fact, pre-empt an existing Right-to-Work law in Missouri, the overall economic impact of a state Right-to-Work law is unknown. However, most research suggests that a state Right-to-Work law would yield positive fiscal impacts for a state such as Missouri. A Right-to-Work law would make Missouri more competitive with neighboring states. Every state neighboring Missouri, except Illinois, has a Right-to-Work law. Still, the ultimate fiscal or economic impact of a constitutional provision pre-empting or preventing a Right-to-Work law is unknown.

What is known is that in areas with low union support, union membership declines with the passage of a Right-to-Work law.[5] When a union member quits the union and stops paying union dues, other things equal, the former member's take-home pay goes up. The former union member is no longer paying dues, but is able to maintain their same employment and gross wage rate. Some of this new take-home pay represents new taxable wages (through decreased deductions for payment of union dues).[6] This is a potential source of new revenue that the Initiative Petitions take away. In addition to an income tax effect, this new take-home pay may also be spent on state revenue producing activities such as consuming goods subject to sales tax or making taxable investments. If Missouri has a Right-to-Work law in 2018, some individuals who opt out of union membership will thereafter be forced to pay union dues, and taxable wages will decrease.

In 2014, James Sherk identified several indirect effects associated with Right-to-Work laws.[7] These indirect effects show that permitting a Right-to-Work law would allow Missouri to be more competitive for new jobs and decreased unemployment:

- Roughly half of all major businesses refuse to consider locating in jurisdictions with compulsory dues.
- Bureau of Labor Statistics data show that between 1990 and 2014 total employment grew more than twice as fast in right-to-work states as in states with compulsory dues.

[3] http://news.stlpublicradio.org/post/only-scope-and-timing-missouris-expected-right-work-law-question#stream/0
[4] Id.
[5] Ozkan Eren and I. Serkan Ozbeklik, "Right-to-Work Laws and State-Level Economic Outcomes: Evidence from the Case Studies of Idaho and Oklahoma Using Synthetic Control Method," Working Paper, February 2011, at http://econweb.umd.edu/~davis/eventpapers/OzbeklikRight.pdf (November 9, 2011) (identifying a 15% decline in union membership in Idaho and Oklahoma).
[6] https://www.irs.gov/publications/p17/ch28.html (stating that certain union dues reduce an individual's taxable income).
[7] http://www.heritage.org/research/reports/2014/12/right-to-work-laws-myth-vs-fact

- Average wages in right-to-work states are indeed slightly lower than in non-right-to-work states. This occurs because almost every Southern state has a right-to-work law and the South has a lower cost of living. Studies that control for differences in costs of living find workers in states with voluntary dues have no lower—and possibly slightly higher—real wages than workers in states with compulsory dues.

The Initiative Petitions seek to prevent Missouri from taking a step forward and implementing policies that would make Missouri a more attractive place to do business for large manufacturing employers. The Initiative Petitions discourage both new and current employers (like Boeing and Ford) from investing capital, hiring, or retaining employees in Missouri.[8]

Missouri small businesses would be affected by the Initiative Petitions. Small businesses have less bargaining power or ability to weather union organizing events or work stoppages. The regulatory burdens associated with running a union shop are higher per capita for a small business. Due to their size, small businesses are less likely to unionize, but small businesses that do unionize will become less competitive.

In short, much of the fiscal impact of the Initiative Petitions will be secondary. The only direct cost is the potential costs state and local government entities may incur in renegotiating employment contracts. The Initiative Petitions will not directly result in any government savings or increased revenues. Because these fiscal notes call for the Auditor to operate in the area of secondary effects, it is critical that she treat both sides of the question equally.

Conclusion

In conclusion, the State Auditor should note the increased cost to be borne by state and local government entities through employment contracting costs for employees not currently covered by an "exclusive representation" union. The other fiscal impacts are all secondary and unknown; however, future costs and revenue losses may be significant.

Should you desire further detail or have any questions about this fiscal impact statement, please do not hesitate to contact me.

Sincerely,

Edward D. Greim

RE: Petition approval request from Mike Louis regarding a proposed constitutional amendment to Article I, version 1 (2018-092)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mike Louis on December 9, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal or modify by implication Section 290 of the Missouri Revised Statutes.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article I of the Constitution is revised by amending Section 29 to read as follows:

Section 29. That employees shall have the right to organize and to bargain collectively through representatives of their own choosing. No existing or future law or ordinance of the state or its political subdivisions shall impair, restrict or limit the ability of employees to negotiate, enter into and enforce any collectively bargained agreement with an employer that provides financial support for the representational services their collective bargaining representative performs.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-092)

Subject

Initiative petition from Mike Louis regarding a proposed constitutional amendment to Article I. (Received December 12, 2016)

Date

January 3, 2017

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Kansas City Boards of Police Commissioners,** the **Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Edward D. Greim provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they assume that any potential costs arising from the adoption of this proposal can be absorbed with existing resources.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated they defer to the Office of Administration.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated they defer to the Office of Administration for a statewide response.

Officials from the **Department of Public Safety** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated no fiscal impact on their department. They defer to the Office of Administration for response to the fiscal note request.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal response.

Officials from the **Office of Administration** indicated:

The proposed amendment would prohibit existing or future laws or ordinances from interfering with the ability of employees to negotiate, enter into and enforce collective bargaining agreements that provide financial support for the presentational services their collective bargaining representative performs.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any substantial impact on their office.

Officials from the **State Treasurer's office** indicated this would have no fiscal impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report due to lack of quantifiable information pertaining to the language of the amendment from their county for this initiative petition.

Officials from the **City of Kansas City** indicated no fiscal impact is anticipated if this proposal is adopted.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from **University of Missouri** indicated they have reviewed this proposed legislation and have determined there would be no significant financial impact on their university.

Officials from **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from **Missouri State University** indicated no fiscal impact to their university for this petition.

Officials from **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this amendment will have no fiscal impact on their university.

Edward D. Greim provided the following information as an opponent of this initiative petition.

301 West High Street, Rm 880, P.O. Box 869
Jefferson City, Missouri 65102

Re: Initiative Petitions 2018-092 through 2018-099 and 2018-101 through 2018-102

Dear Mr. Halwes,

Please consider this letter as a fiscal impact statement regarding Initiative Petitions 2018-092 through 2018-099 and 2018-101 through 2018-102 (the "Initiative Petitions"). If passed, any of these ten initiatives would have a negative impact on state and local governments, as well as Missouri small businesses. While the Initiative Petitions would primarily result in uncertain or unclear direct effects, the secondary effects are negative and potentially significant. Direct effects stem from labor and contracting costs that the state and its political subdivisions will incur to renegotiate contracts with labor organizations. These direct effects would be larger if, on the Initiative Petition's effective date, the state of Missouri has adopted a so-called "Right-to-Work" law. It is exceedingly likely that the state will have a Right-to-Work law by the potential effective date of the Initiative Petitions: December 6, 2018.[1]

Moreover, certain public employees, namely public school teachers, are currently excluded from the Missouri Public Sector Labor Law. §§ 105.500-.530 RSMo. The Initiative Petitions impliedly repeal statutes and ordinances that limit the ability of teachers and other types of public employees to commit other employees to "exclusive representation" by a union. Public employees' contracts that already rely on laws or ordinances prohibiting exclusive representation would violate the Initiative Petitions, and require renegotiation.[2]

[1] See, for example, http://news.stlpublicradio.org/post/only-scope-and-timing-missouris-expected-right-work-law-question#stream/0; http://www.kshb.com/news/state/missouri/missouri-moves-closer-to-becoming-right-to-work-state
[2] See http://showmeinstitute.org/blog/government-unions/teachers-union-gets-collective-bargaining-wrong

The indirect effects of the Initiative Petitions present a debate this Office should not take a definitive position on. The indirect effects of prohibiting a "Right-to-Work" bill by the General Assembly are unknown. First, it is unknown if Missouri will have a Right-to-Work law in 2018, though the state most likely will.[3] Second, if Missouri has a Right-to-Work law in 2018, it is unclear what the precise scope of the law will be.[4]

Third, regardless of whether the Initiative Petitions will, in fact, pre-empt an existing Right-to-Work law in Missouri, the overall economic impact of a state Right-to-Work law is unknown. However, most research suggests that a state Right-to-Work law would yield positive fiscal impacts for a state such as Missouri. A Right-to-Work law would make Missouri more competitive with neighboring states. Every state neighboring Missouri, except Illinois, has a Right-to-Work law. Still, the ultimate fiscal or economic impact of a constitutional provision pre-empting or preventing a Right-to-Work law is unknown.

What is known is that in areas with low union support, union membership declines with the passage of a Right-to-Work law.[5] When a union member quits the union and stops paying union dues, other things equal, the former member's take-home pay goes up. The former union member is no longer paying dues, but is able to maintain their same employment and gross wage rate. Some of this new take-home pay represents new taxable wages (through decreased deductions for payment of union dues).[6] This is a potential source of new revenue that the Initiative Petitions take away. In addition to an income tax effect, this new take-home pay may also be spent on state revenue producing activities such as consuming goods subject to sales tax or making taxable investments. If Missouri has a Right-to-Work law in 2018, some individuals who opt out of union membership will thereafter be forced to pay union dues, and taxable wages will decrease.

In 2014, James Sherk identified several indirect effects associated with Right-to-Work laws.[7] These indirect effects show that permitting a Right-to-Work law would allow Missouri to be more competitive for new jobs and decreased unemployment:

- Roughly half of all major businesses refuse to consider locating in jurisdictions with compulsory dues.
- Bureau of Labor Statistics data show that between 1990 and 2014 total employment grew more than twice as fast in right-to-work states as in states with compulsory dues.

[3] http://news.stlpublicradio.org/post/only-scope-and-timing-missouris-expected-right-work-law-question#stream/0
[4] Id.
[5] Ozkan Eren and I. Serkan Ozbeklik, "Right-to-Work Laws and State-Level Economic Outcomes: Evidence from the Case Studies of Idaho and Oklahoma Using Synthetic Control Method," Working Paper, February 2011, at http://econweb.umd.edu/~davis/eventpapers/OzbeklikRight.pdf (November 9, 2011) (identifying a 15% decline in union membership in Idaho and Oklahoma).
[6] https://www.irs.gov/publications/p17/ch28.html (stating that certain union dues reduce an individual's taxable income).
[7] http://www.heritage.org/research/reports/2014/12/right-to-work-laws-myth-vs-fact

- Average wages in right-to-work states are indeed slightly lower than in non-right-to-work states. This occurs because almost every Southern state has a right-to-work law and the South has a lower cost of living. Studies that control for differences in costs of living find workers in states with voluntary dues have no lower—and possibly slightly higher—real wages than workers in states with compulsory dues.

The Initiative Petitions seek to prevent Missouri from taking a step forward and implementing policies that would make Missouri a more attractive place to do business for large manufacturing employers. The Initiative Petitions discourage both new and current employers (like Boeing and Ford) from investing capital, hiring, or retaining employees in Missouri.[8]

Missouri small businesses would be affected by the Initiative Petitions. Small businesses have less bargaining power or ability to weather union organizing events or work stoppages. The regulatory burdens associated with running a union shop are higher per capita for a small business. Due to their size, small businesses are less likely to unionize, but small businesses that do unionize will become less competitive.

In short, much of the fiscal impact of the Initiative Petitions will be secondary. The only direct cost is the potential costs state and local government entities may incur in renegotiating employment contracts. The Initiative Petitions will not directly result in any government savings or increased revenues. Because these fiscal notes call for the Auditor to operate in the area of secondary effects, it is critical that she treat both sides of the question equally.

Conclusion

In conclusion, the State Auditor should note the increased cost to be borne by state and local government entities through employment contracting costs for employees not currently covered by an "exclusive representation" union. The other fiscal impacts are all secondary and unknown; however, future costs and revenue losses may be significant.

Should you desire further detail or have any questions about this fiscal impact statement, please do not hesitate to contact me.

Sincerely,

Edward D. Greim

RE: Petition approval request from Timothy Gilio regarding a proposed constitutional amendment to Article IV, version 2 (2018-091)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Timothy Gilio on December 9, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

This measure amends the Missouri Constitution by adding Section 54 to Article IV. This amendment implicitly repeals in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105.1, 105.1108.1, 105.1112.1, 195.0010.1, 196.0100.1, 263.0250.1,577.0024.1, 579.0015.1, 579.0020.1, 579.0030.1, 579.0055.1, 579.0065.1, 579.0068.1, and 579.0105.1

Be it resolved by the people of the state of Missouri that the Constitution be amended:

One new section is adopted to be known as Article IV, Section 54 and to read as follows:

1.Cannabis aka marijuana and cannabis hemp shall immediately be removed from Missouri's list of controlled substances and shall no longer be listed among Missouri's drugs schedules.

2. Definitions of terms used in this Act: cannabis and cannabis hemp refer to cannabis marijuana, cannabis sativa, cannabis indica, cannabis ruderalis or any variety of cannabis including any derivative, concentrate, extract, flower leaf particle preparation resin root salt seed stalk stem or any product thereof.
a. Medical cannabis refers to Physician or Veterinarian written recommended use of cannabis or any form of cannabis derivative, concentrate, extract, flower, stem, stalk, root, leaf, or any Cannabis product thereof.
b. Personal aka recreational use refers to any cannabis products use not recommended by Physician's or Veterinarian's
c. Cannabis accessories means any equipment, products or materials of any kind that are used or intended for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging or storing of cannabis or hemp or for ingesting, inhaling, vaporizing smoking or otherwise introducing cannabis into or onto the human body with any vehicle or what could be construed as a dangerous device.
d. Establishment refers to cannabis cultivating facility, a cannabis manufacturing facility or retail store or other entity that cultivates, prepares manufactures packages transports or sells cannabis or hemp products or accessories.

3. Minors refers to anyone under the age of 21
a. Cannabis or its products shall not be sold to anyone under the age of 21.
b. Anyone under the age of 21 shall have legal access to cannabis through a physician's written recommendation, parental supervision or a legal guardian for medical conditions or diseases that cannabis might help with.
c. No minor shall be prosecuted for possession of cannabis or its products & shall not be prohibited from taking cannabis as medicine in any school within the boundaries of Missouri.

4. The following acts are not unlawful and shall not be an offense under these revised Missouri law's
a. Possession or cultivation of cannabis for personal or medical use in an area sufficient to produce the quantity necessary to address one's personal or medical needs
b. Cultivating, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes, provided the person has current applicable licenses to run a business in Missouri. No special licensing will be required beyond that which is applicable for the cultivation, harvest, processing, manufacturing, packaging, distribution, transferal, display, or possessing of any non-toxic food or food product.
c. Providing cannabis, aka marijuana and or any part of the cannabis plant thereof to be sold to the public must be tested by an accredited testing facility and all packaging labeled accordingly to reflect said testing.
d. Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs through e of this section

5. Patients' rights: cannabis shall be available to all patients regardless of age, race or gender without taxation when recommended by a physician as a medicine.
a. All patients engaged in cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through conventional therapeutic means.

6. All prisoners that have been found guilty in a Missouri Court off a nonviolent cannabis related crime shall immediately be released and all charges for non-violent cannabis crimes shall be expunged from their records.
a. Within 60 days of passage of this act, the attorney general's office shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis related nonviolent civil and criminal records in Missouri, to be distributed to all circuit court judges within the state.

7. No Missouri law enforcement personnel, state, county, city employee, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri constitution.
a. Any person who impedes the lawful exercise of these provisions is guilty of a class A misdemeanor and is subject to all penalties or fines thereof.
b. An additional 5% tax will be added to all personal / recreational sales of Cannabis not to include any Hemp or Hemp by products sold within the boundaries of Missouri in addition to any established state, county or city sales tax already set in place to be collected by the State of Missouri Sales Taxation Division. The 5% additional sales tax monies collected will be collected by the State of Missouri Sales Taxation Division, divided and distributed as directed in this paragraph on a quarterly basis as follows, 2.5% will go to Missouri Public Schools that teach Preschool or K through 12 grade or any combination of aforementioned . The remaining 2.5% will be directed to the Missouri Veteran Administration to help with housing, clothing, food and medical needs for our multitude of Missouri veterans.

8. Cannabis farmers, manufacturer's processors and distributors shall not be subject to any special zoning requirements, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor of agricultural products.

9. Pursuant to the ninth and tenth amendments to the constitution of the United States, the people of Missouri hereby repudiate and challenge federal cannabis prohibitions that conflict with this act.
a. The state of Missouri will honor all legally obtained patients medical cards regardless of the state where issued and Missouri shall become reciprocity with all legal states where Cannabis is considered legalized by law for medical or recreational use.
b. Opinions pertaining to, and willingness to recommend medical cannabis therapy shall not be a criteria for the licensure of physicians or Veterinarian's; No physician or Veterinarian shall be subject to any professional license review or hearing as a result of recommending or approving medical cannabis therapy.
c. Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis, hemp or any derivatives or parts thereof.

10. All provisions of this section are self-executing and serviceable. Except where otherwise indicated in the text of this document this constitutional amendment shall supersede any and all conflicting city, county, state or federal statutory, local charter, ordinance or resolution and shall be implemented no later than January 31st, following the election that placed this initiative before the people of Missouri.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-091)

Subject

Initiative petition from Timothy Gilio regarding a proposed constitutional amendment to Article IV. (Received December 9, 2016)

Date

December 30, 2016

Description

This proposal would amend Article IV of the Constitution of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners** and **The Metropolitan Police Department - City of St. Louis.**

Assumptions

Officials from the **Attorney General's office** indicated this proposal would require them to develop and make public an order, within 60 days, for the immediate destruction of "all cannabis related nonviolent civil and criminal records in Missouri…" and states that the "people of Missouri hereby repudiate and challenge federal cannabis prohibitions that conflict with this act."

They assume that some amount of increased litigation would result. They assume they could absorb increased costs with existing resources, but would request additional appropriation if substantial litigation resulted.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated there would be no impact to their department as a result of this initiative petition.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated they expect no changes in revenue and increased costs of $0 for fiscal year 2018, $99,045 for fiscal year 2019, and $169,098 for fiscal year 2020.

Section 192.945, RSMo, allows their department to issue a hemp extract registration card for persons suffering from intractable epilepsy. The hemp extract registration card allows for the legal possession and use of cannabidiol (CBD) oil. This proposal allows for the legal use of marijuana for both medical and recreational purposes. Therefore, persons with intractable epilepsy would not need to apply for a hemp extract registration card in order to legally use the CBD oil.

Rental space for two staff located in Jefferson City would be required: 2 staff x 230 sq.ft./FTE x $21.00 = $9,660.

The proposed language would legalize the use of marijuana for medical and recreational purposes. There could be an unknown impact on small businesses that serve as cultivators, manufacturers, dispensary facilities, and/or testing centers.

This proposal does not require their department to issue any licenses or conduct inspections to ensure the safety of marijuana infused food products. However, sections 196.010 through 196.298, RSMo, gives their department responsibility for the regulation of food to include such duties as ensuring food safety, sanitation, proper labeling, etc. Therefore, they would have responsibility to ensure facilities that manufacture foods containing marijuana and marijuana products are regulated the same as other food manufacturers.

Due to the broad parameters of this proposal, it is difficult to determine how many food manufacturing facilities would be established. States which have legalized retail marijuana have seen a significant demand for edible marijuana products. For the purposes of this fiscal note, they estimates that at least 300 food manufacturing facilities would be established as a result of this proposal. In order to properly inspect these manufacturing facilities, DCPH would require a minimum of two Environmental Public Health Specialist IV staff (A27, $44,352, Step G). This law shall be implemented no later than January 31 following the November 2018 election. Therefore, DCPH assumes that the two Environmental Public Health Specialist IV positions would begin January 1, 2019.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated a fiscal impact (cost avoidance) of $7,178,073 in fiscal year 2019, $7,511,746 in fiscal year 2020, $10,741,186 in fiscal year 2022 and thereafter.

Legalizing the possession and use of marijuana would remove from the criminal statutes all controlled substance offenses for marijuana, including possession, distribution and trafficking. If the legislation that removed marijuana from the list of controlled substances was retrospective then there would be two reductions in the cost of incarceration: the release of offenders serving a marijuana offense and fewer admissions to prison. The legalization of marijuana will largely impact offenders who are only serving a marijuana offense. Offenders serving multiple concurrent sentences will continue to be required to serve the other sentences after legalization and no estimate is made for offenders serving multiple sentences.

The reduction in the offender population is the total of reductions from the expungement of sentences and fewer admissions and probations. The cost avoidance is based upon a direct prison cost per year in FY16 of $6,085 and an average cost of $2,234 per year for offenders on field supervision. In the first year after the enactment of the legislation that legalizes marijuana there is an estimated reduction of 633 offenders in prison and 3,676 offenders on field supervision. In the next year (FY20) there will be no discharges from expungement but the reduction in the prison population will increase to 214. The field reduction will continue into FY21 because the marijuana offenders are estimated to serve 2.5 years on supervision.

The estimate is qualified by the use of an expansion factor that assumes that the drug distribution in the sentences where the drug is not known will be similar to that where the drug is known.

The estimated cost avoidance in the first year is $7,178,073 and will be $10,741,186 after the 4th year.

If marijuana usage becomes legal it could impact the safety and security of our prisons as it is not believed that there is a means for testing whether an employee is under the influence of marijuana. Impaired prison employees or visitors can impact the safe and secure operation of our prisons.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated total fund costs for General Revenue will be $150,012 for fiscal year 2018, $30,752 for fiscal year 2019, and $31,521 for fiscal year 2020.

This petition opens up the possibility of additional business opportunities in cannabis farming, manufacturing, and distribution of products.

Fiscal Note	IP 18-090			ITSD - DOR

Section Funding:	General Revenue		150,012	30,752	31,521
	Federal		-	-	-
	Other		-	-	-
	Total		150,012	30,752	31,521

This would create an unknown positive impact on Total State Revenue.

This petition increases state revenues by an unknown amount.

The provisions of section 7b add an additional five percent tax to all personal/recreational sales of cannabis not including hemp or hemp by-products sold in Missouri. This tax is in addition to any state, county, or city sales taxes already in place. This section also requires the division and distribution of these collections on a quarterly basis to Missouri public schools and the Missouri Veterans' Administration.

This Article states that the tax is to be collected by the State of Missouri Sales Tax Division. There is no State of Missouri Sales Tax Division and their department assumes

that the taxpayer will remit the tax to their department. Because there are no enforcement provisions, it may be difficult for their department to enforce the collection of the additional tax under current sales tax statutes. Their department will not be able to make refunds to taxpayers as the article is currently drafted.

Administrative Impact:

Business Tax Processing:
Although the legislation bases the additional five percent tax on retail sales, it is in addition to and separate from state, county, or city sales tax, and must therefore be reported and deposited separately.

If this money needs to remain in a non-state account, either it would need to stay in the sales suspense holding account until distribution or new bank accounts would need to be established for each.

Officials from the **Department of Public Safety** indicate they see no fiscal impact due to this legislation.

Officials from the **Missouri State Highway Patrol** indicated they expect increased operating costs of $426,236 for the first year implemented, $487,384 for the second year implemented, and $492,597 for the third year implemented.

The provisions of this petition would require their agency to rent office space for 4 FTE's to process the expungement requests.

The proposed legislation would order the immediate destruction of all cannabis-related non-violent civil and criminal records in Missouri.

Two different divisions within their agency will be impacted by this legislation. Here is a breakdown for each division:

The Criminal Justice Information Services Division (CJIS) states that there are currently 95,550 arrest charges in the Central Repository. The current expungement process, pursuant to Chapter 610, takes approximately 90 minutes to process. One FTE can handle 1,243 expungements per year. Conservatively, at least five FTE's would be required to initially handle the expungments created by this legislation. A significant processing backlog would occur if sufficient FTE's are not assigned to accommodate the number of expungements ordered.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 90 minutes. Therefore, one FTE can handle 1,243 expungements per year = 111,840 / 90.

These FTE's (CJIS Technicians, Range 16) would be necessary to process all expungement requests, review criminal history records, contact any agency associated with the arrests or convictions, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE at $55,495 and the ability of that employee to process 1,243 expungements per year, the cost alone per expungement is $55,495 \ 1,243 = $44.64. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories, as well as contacting of the various agencies associated with the arrests. In researching other states with similar expungement requirements, they all charge a fee to offset the cost of the time required to process the expungements. Their fees ranged from $50 to $450 per petition per arrest date.

These FTE will most likely be 2nd and 3rd shift employees so they would not require any equipment. However, there would be recurring costs of $650 per year per FTE for office supplies and phone charges. If any FTE were placed on the 1st shift, standard equipment would be required at a one-time cost of $6,094 per FTE.

5 CJIS Technicians ($1,232.50 x 24)	$147,900
Office Equipment/HW/SW	$6,094
RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

Patrol Records Division

Currently, there are 86,600 records in the Patrol's Traffic Arrest System (TAS) pertaining to arrests completed by our agency that could possibly meet the requirements of this proposed constitutional amendment. These are arrest and arrest/disposition records pertaining to individuals the age of 21 years and older with an NCIC modifier of 60-64 that relate to marijuana offenses. Given this, if only ten percent of the individuals who qualify to have his or her record expunged sought to do so, the Patrol Records Division (PRD) would require 4 FTE's. However, if a large number of these expungements were to be granted with even four FTE's, the backlog would compound greatly to the point it may take several years to catch up. If 100 percent of the individuals who qualify to have their record expunged sought to do so, the Patrol Records Division would require 35 FTE's to complete this task in approximately one year.

The addition of 35 FTE's would require additional supervisory personnel. However, due to the vague and uncertain nature of this proposed amendment, the Patrol Records Division has no true way to determine the actual effect or costs.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 45 minutes. Therefore, one FTE can handle 2,485 expungements per year = 111,840 / 45.

With the current estimate of 86,600 records that potentially meet the requirements of this proposed amendment and would potentially be eligible for expungement, the following percentages of persons actually requesting an expungement will directly relate to the number of PRD FTE's required:

10% = 86,600 x .10 = 8,660 / 2,485 = 4 FTE's
50% = 86,600 x .50 = 43,300 / 2,485 = 17 FTE's
100% = 86,600 / 2,485 = 35 FTE's

These FTE's (Quality Control Clerks, Range 10) would be necessary to process all expungement requests, review records, contact agencies, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE of $45,702 and the ability of that employee to process 2,485 expungements per year, the cost per expungement is $45,702 \ 2,485 = $18.39. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories.

Processing ten percent of the possible expungements would require additional workspace. The physical requirements would increase with the number of FTE's required to meet the demand for expungements. There will be recurring costs of $650 per year per FTE for

office supplies and phone charges. Standard equipment and office furniture would be required at a one-time cost of $6,094 per FTE.

4 Quality Control Clerks ($1,015 x 24)	$97,440
Equipment/Office Furniture	$6,094

RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

The provisions of this petition would require our agency to rent office space for 4 FTE's to process the expungement requests. The Office of Administration states that 920 square feet of office space would be required. The following costs apply per square foot:

Office Space	$14/Sq Ft
Janitorial/Trash Costs	$1.50/Sq Ft
Utility Costs	$2/Sq Ft

The agency provided the following additional comments:

It is suggested to add this additional language to provide for the collection of a fee to offset the costs of the expungements:

43.530. 1. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than nine dollars per request for criminal history record information not based on a fingerprint search. In each year beginning on or after January 1, 2010, the superintendent may increase the fee paid by requesting entities by an amount not to exceed one dollar per year, however, under no circumstance shall the fee paid by requesting entities exceed fifteen dollars per request.

2. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than twenty dollars per request for criminal history record information based on a fingerprint search, unless the request is required under the provisions of subdivision (6) of section 210.481, section 210.487, or section 571.101, in which case the fee shall be fourteen dollars.

3. A request made under subsections 1 and 2 of this section shall be limited to check and search on one individual. Each request shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. The highway patrol may establish procedures for receiving requests for criminal history record information for classification and search for fingerprints, from courts and other entities, and for the payment of such requests. There is hereby established by the treasurer of the state of Missouri a fund to be entitled as the "Criminal Record System Fund". Notwithstanding the provisions of section 33.080 to the contrary, if the moneys collected and deposited into this fund are not totally expended annually for the purposes set forth in

sections 43.500 to 43.543, the unexpended moneys in such fund shall remain in the fund and the balance shall be kept in the fund to accumulate from year to year.

4. For all petitions for expungement under the provisions of Chapter 610, Section 577.054, or any other created expungement requirement under statute, excluding Section 610.122, the applicant shall pay a fee of seventy-five dollars per arrest date listed on the petition. Each petition shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. For expungements that require removal from the Traffic Arrest System twenty dollars of the seventy-five dollar fee will be deposited in the Highway Patrol Traffic Records Fund.

There are numerous uncertainties associated with this proposed constitutional amendment. The definition of a "non-violent cannabis-only offense" needs to be added. It is unclear if individuals with the aforementioned conviction records are required to abide by the expungement process mandated by various other state statutes. Does the individual just complete and file a document with a circuit clerk and the record is expunged or does the "court," whomever that is, order the immediate expungement of all civil and criminal records pertaining to non-violent cannabis only offenses?

Our agency requests clarification of number 7 which states that no Missouri law enforcement personnel, state, county, city employee, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri constitution. Does this mean that the Highway Patrol could no longer participate in federal operations when requested?

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's Office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no fiscal impact.

Officials from the **Office of Administration** (OA) indicated:

Section 54 of Article IV would allow the medical and recreational use of marijuana and hemp, as well as the cultivation, production, transportation and retail sale of marijuana and hemp and their related products. Subsection 3 allows the sale of marijuana to

individuals under the age of 21 only with physician or parental permission. Subsection 6 requires that all prisoners that have been convicted in Missouri of a nonviolent cannabis related crime shall be immediately released and all related charges shall be expunged from their records. Subsection 7 creates an excise tax of five percent on all retail sales of marijuana, in addition to any established state or local sales taxes. The revenue shall be deposited to the credit of general revenue with the provision that 2.5 percent be distributed to elementary and secondary public education schools and 2.5 percent be distributed to the Missouri Veterans' Administration. (Note: There is no Missouri Veterans' Administration. For the purposes of this analysis, B&P assumes it will refer to the Missouri Veterans' Commission.) Subsection 5, however, allows all medical marijuana users, with recommendation by a physician, to purchase cannabis without taxation. Subsection 10 provides that the provisions in the amendment take effect no later than January 31st, following the election that placed the initiative before the people of Missouri.

B&P estimates that subsection 7 of this initiative petition could increase TSR by as much as $17.2M and GR by as much as $16.5M once fully implemented in FY 2021. The Substance Abuse and Mental Health Services Administration (SAMHSA) reports that 9.95% of Missouri population age 18 and older use marijuana. For the purposes of this analysis, B&P assumes the same percentage for marijuana users over the age of 21. The U.S. Census (2010) reports the population of Missouri residents over the age of 21 as 4,300,988 people. Multiplying the percentage of Missouri residents who use marijuana by the population of Missouri residents over the age of 21 gives an estimate of the number of Missouri residents who use marijuana:

	4,300,988	(MO residents over the age of 21)
X	9.95%	(% of MO residents who use marijuana)
	427,948	(MO residents who use marijuana)

However, B&P estimates that of those who use marijuana, roughly 65,000 would be medical users. SAMHSA reports that the total number of U.S. population age 18 and older use marijuana is 27,169,000 people. B&P assumes dividing the number of MO residents who use marijuana by the U.S. population that uses marijuana will provide an estimate of the percentage of the U.S. market that is attributable to Missouri.

	427,948	(MO residents who use marijuana)
÷	27,169,000	(Number of U.S. marijuana users)
	1.58%	(% U.S. market that is attributable to MO)

Using the estimate above for medical users, of that 1.58 percent approximately 0.24% could be considered medical. Therefore, B&P estimates that the size of the U.S. market that is attributable to Missouri, less medical marijuana users, is 1.33 percent. Using an

established estimate[1] for the U.S. market of $14.0B and multiplying by the percentage of the U.S. market that is attributable to Missouri, B&P estimates that Missouri's marijuana market, less medical marijuana use, could be worth $186.7M. Assuming Missouri's marijuana market is worth $186.7M, an excise tax of five percent could increase TSR and GR by as much as $9.3M once fully implemented. Table 1 shows a breakdown of revenue increases by tax type.

[1] http://scholar.harvard.edu/files/miron/files/budget_2010_final_0.pdf

Table 1: Revenue Generated by Marijuana Taxes		
Tax	**FY 2020 (5 months)**	**Fully Implemented (FY 2021)**
Sales Tax		
General Revenue	3,002,000	7,206,000
Education	233,000	559,000
Conservation	29,000	70,000
Parks, Soil, Water	23,000	56,000
Local	120,000	287,000
Marijuana Excise Tax		
General Revenue	3,890,000	9,337,000
Total		
General Revenue	6,893,000	16,543,000
Education	233,000	559,000
Conservation	29,000	70,000
Parks, Soil, Water	23,000	56,000
Local	120,000	287,000
TSR	7,178,000	17,228,000

Officials from the **Office of State Courts Administrator** indicated the proposed initiative petition would create a new section of the Missouri Constitution to be known as Article IV, section 54. This section would allow citizens over the age of twenty-one years to have the right to engage in the production, sale, distribution and consumption of marijuana and the manufacture of goods from hemp, subject to reasonable regulations adopted by the state pursuant to this section.

The average of all marijuana related charge codes from 2011 to 2015 for Circuit case types is 14,122 per year. The average of all marijuana related charge codes from 2011 to

2015 for Associate case types is 10,982. We are unable to determine what number of these charges were for someone over the age of twenty-one.

The following Criminal Court Costs would be affected by this petition:

Criminal Court Costs		
Felony Case Costs	**Amount of Cost**	**Disburse to State/County**
Basic Civil Legal Services Fund surcharge	$10.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$45.00	State of Missouri - General Revenue $36, County $9
County Fee	$75.00	County
Court Automation Fund Fee	$7.00	State of Missouri -Statewide Court Automation Fund
Court Reporter fee (All Circuit Division Cases)	$15.00	State of Missouri - General Revenue
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$30.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Head Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards & Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	State of Missouri - Prosecuting Attorney Training Fund
Sheriffs' Fee	$75.00	County

Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement Fund
Spinal Cord Injury Fund surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$279.50**	
Misdemeanor Case Costs		
Basic Civil Legal Services Fund surcharge	$8.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$15.00	$12 State of Missouri / $3 County
County Fee	$25.00	County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$15.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Brain Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	$0.50 State of Missouri / $0.50 County
Sheriffs' fee	$10.00	County
Sheriffs' Retirement Fund surcharge (except	$3.00	Sheriffs' Retirement fund

21st Circuit)		
Spinal Cord Injury Fund Surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$102.50**	
Municipal Case (Filed in Associate Division) Costs		
Clerk Fee	$15.00	$12 State of Missouri / $3 County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Sheriffs' Retirement Fund surcharge	$3.00	Sheriffs' Retirement Fund
Total	**$33.50**	
Criminal Costs Not Included Above		
Drug Testing by a State Lab	$150.00	State of Missouri
Drug Testing by a Private Lab	Actual Costs	County Reimbursement
Law Enforcement Arrest Costs:		
Highway Patrol		Amt. Approved by the Court
Local (County)		Amt. Approved by the Court
Municipal		Amt. Approved by the Court

The decrease in the court fees, depending on the number of cases, will result in an unknown loss to the courts. They also assume there will be an unknown decrease in

caseload for the courts because the courts will no longer process these cases; however, at this time they are unable to calculate the decrease.

Any significant increase or decrease will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated if passed, this constitutional amendment would have a positive impact on the workload of the Missouri State Public Defender, since possession, manufacture, distribution, etc. of cannabis would no longer be unlawful, offenses that the Public Defender currently uses resources to defend and no longer would need to.

The exact positive impact is difficult to predict because they track cases by statutory offense and most drug offenses are not limited to marijuana.

However, their best estimate, using FY2014 MSPD data, is that this would reduce their caseload by 3,523 cases (685 A/B felonies, 1,797 C/D felonies, 1,041 misdemeanors, and 1,140 probation violations).

In *The Missouri Project: A Study of the Missouri Public Defender System and Attorney Workload Standards*, prepared by RubinBrown on behalf of the American Bar Association's Standing Committee on Legal Aid and Indigent Defendants, the relevant workload standards are: A/B felonies, 47.6 hours per case; C/D felonies, 25.0 hours per case; misdemeanors, 11.7 hours per case; and probation violations, 9.8 hours per case).

(The workload standards include only case related tasks over which an attorney has some control (they exclude, for example, in court and travel time) and thereby reflect a conservative estimate.)

Applying those workload standards to the 2,858 cases, those cases require 100,882.7 attorney hours. With 2,080 hours per attorney available each year, that represents the work of 48.5 attorneys.

While in theory they might also handle fewer appeals of guilty verdicts after trial, the fact is that only a very small percentage of their cases proceed to trial and it's likely that only a small percentage of those cases are appeals from marijuana convictions. Therefore this minimal positive impact is not being taken into account in this estimate.

However, the Missouri State Public Defender already is significantly understaffed by 333 attorneys under the workload standards developed in *The Missouri Project*. (The 333 attorneys is a conservative estimate of the under-staffing in that it assumes we contract all conflicts to private attorneys, which we are not able to do for budgetary reasons).

Therefore, despite the positive impact on the workload of the Missouri State Public Defender, because they are already understaffed that savings in attorney time would not allow the Public Defender to reduce its workforce and therefore would not translate into an actual cost savings. However it does reduce by the cost of 48.5 attorneys how much money needs to be added to their budget in order to meet *The Missouri Project*'s workload standards.

Officials from the **State Treasurer's office** indicated this would have no fiscal impact on their office.

Officials from **Greene County** indicated there is anticipated costs for this initiative petition. Unfortunately there is not enough time given in the response to provide an actual estimated costs.

County Prosecutor, Dan Patterson provided the following information:

October 12, 2016

No on 64 Campaign and SAM Action

California voters are being told that they will see the crime rate go down if they vote to legalize marijuana commercially; this has not been the case in the state of Colorado or the city of Denver. Since the legalization of recreational marijuana in Colorado in 2013 traffic related marijuana deaths have increased 48%, marijuana related emergency room visits have increased 49%, and marijuana related calls to the poison center have increased 100%. According to the Colorado Bureau of Investigations in 2015 statewide homicides in Colorado rose 14.7 % over the previous year. Pueblo, Colorado had the highest homicide rate in the state with 11.1 killings per 100,000 residents. Aurora, Colorado's homicide rate more than doubled from 2014. Additionally more places in Colorado were robbed and more thefts occurred, especially cars, as 193,115 motor vehicles were reported stolen, up 27.7 % in 2015 from the previous year. In 2015, sexual assaults rose 10% in Colorado with Denver, Aurora, Lakewood, Westminster and Pueblo all reporting higher numbers as well.

In the city of Denver since the legalization of recreational marijuana the number of crimes in Denver has grown by about 44 %, according to annual figures the city reported to the National Incident Based Reporting System. In 2015 in Denver alone crime rose in every neighborhood in the city. The murder rate hit a decade high, 1059 more cars were broken into, there were 903 more auto thefts, 321 more aggravated assaults and 231 more homes were broken into compared to 2014.

California voters are also being told that legalizing recreational marijuana will free up law enforcement to work on other criminal activities. Again that has not been the case in Denver. Besides the overall increases in crime we have experience, the Denver police department is dealing with a 900% increase in the unlawful cultivation and manufacture of marihuana concentrate, and a 99% increase in the unlawful distribution of marijuana and marijuana concentrate. The quantity of illegal marijuana seized by the Denver police has increased 3,424% on average per case. The volume of marijuana seized per case has increased from an average of 162 pounds to 5724 pounds. In Denver unlawful public consumption of marijuana citations has increased over 300% per year since the legalization of recreational marijuana. The Denver police department is busier enforcing marijuana laws and investigating crimes directly related to marijuana, including murderers, robberies, and home invasions, than any other time in the history of the city.

Sincerely,

Mitchell R. Morrissey
Denver District Attorney

Officials from the **City of Kansas City** indicated sales taxes could be collected. No amount can be reasonably estimated.

Officials from **University of Missouri** indicated the University of Missouri Health Care (MUHC) has reviewed the proposed initiative petition and determined that the fiscal impact should not exceed $100,000.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, St. Louis Community College, Kansas City Board of Police Commissioners** and **The Metropolitan Police Department - City of St. Louis**.

Fiscal Note Summary

This proposal is estimated to increase annual state tax revenues by $17 million when fully implemented with additional estimated annual state savings of $11 million. State implementation costs are estimated at $150,000 with annual operating costs estimated at $700,000. Local law enforcement costs could increase.

RE: Petition approval request from Timothy Gilio regarding a proposed constitutional amendment to Article IV, version 1 (2018-090)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Timothy Gilio on December 9, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

This measure amends the Missouri Constitution by adding Section 54 to Article IV. This amendment implicitly repeals in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105.1, 105.1108.1, 105.1112.1, 195.0010.1, 196.0100.1, 263.0250.1,577.0024.1, 579.0015.1, 579.0020.1, 579.0030.1, 579.0055.1, 579.0065.1, 579.0068.1, and 579.0105.1

Be it resolved by the people of the state of Missouri that the Constitution be amended:

One new section is adopted to be known as Article IV, Section 54 and to read as follows:

1.Cannabis aka marijuana and cannabis hemp shall immediately be removed from Missouri's list of controlled substances and shall no longer be listed among Missouri's drugs schedules.

2. Definitions of terms used in this Act: cannabis and cannabis hemp refer to cannabis marijuana, cannabis sativa, cannabis indica, cannabis ruderalis or any variety of cannabis including any derivative, concentrate, extract, flower leaf particle preparation resin root salt seed stalk stem or any product thereof.
a. Medical cannabis refers to Physician or Veterinarian written recommended use of cannabis or any form of cannabis derivative, concentrate, extract, flower, stem, stalk, root, leaf, or any Cannabis product thereof.
b. Personal aka recreational use refers to any cannabis products use not recommended by Physician's or Veterinarian's
c. Cannabis accessories means any equipment, products or materials of any kind that are used or intended for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging or storing of cannabis or hemp or for ingesting, inhaling, vaporizing smoking or otherwise introducing cannabis into or onto the human body with any vehicle or what could be construed as a dangerous device.
d. Establishment refers to cannabis cultivating facility, a cannabis manufacturing facility or retail store or other entity that cultivates, prepares manufactures packages transports or sells cannabis or hemp products or accessories.

3. Minors refers to anyone under the age of 21
a. Cannabis or its products shall not be sold to anyone under the age of 21.
b. Anyone under the age of 21 shall have legal access to cannabis through a physician's written recommendation, parental supervision or a legal guardian for medical conditions or diseases that cannabis might help with.
c. No minor shall be prosecuted for possession of cannabis or its products & shall not be prohibited from taking cannabis as medicine in any school within the boundaries of Missouri.

4. The following acts are not unlawful and shall not be an offense under these revised Missouri law's
a. Possession or cultivation of cannabis for personal or medical use in an area sufficient to produce the quantity necessary to address one's personal or medical needs
b. Cultivating, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes, provided the person has current applicable licenses to run a business in Missouri. No special licensing will be required beyond that which is applicable for the cultivation, harvest, processing, manufacturing, packaging, distribution, transferal, display, or possessing of any non-toxic food or food product.
c. Providing cannabis, aka marijuana and or any part of the cannabis plant thereof to be sold to the public must be tested by an accredited testing facility and all packaging labeled accordingly to reflect said testing.
d. Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs through e of this section

5. Patients' rights: cannabis shall be available to all patients regardless of age, race or gender without taxation when recommended by a physician as a medicine.
a. All patients engaged in cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through conventional therapeutic means.

6. All prisoners that have been found guilty in a Missouri Court off a nonviolent cannabis related crime shall immediately be released and all charges for non-violent cannabis crimes shall be expunged from their records.
a. Within 60 days of passage of this act, the attorney general's office shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis related nonviolent civil and criminal records in Missouri, to be distributed to all circuit court judges within the state.

7. No Missouri law enforcement personnel, state, county, city employee, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri constitution.
a. Any person who impedes the lawful exercise of these provisions is guilty of a class A misdemeanor and is subject to all penalties or fines thereof.
b. An additional 5% tax will be added to all personal / recreational sales of Cannabis not to include any Hemp or Hemp by products sold within the boundaries of Missouri in addition to any established state, county or city sales tax already set in place to be collected by the State of Missouri Sales Taxation Division. The 5% additional sales tax monies collected will be collected by the State of Missouri Sales Taxation Division, divided and distributed as directed in this paragraph on a quarterly basis as follows, 2.5% will go to Missouri Public Schools that teach Preschool or K through 12 grade or any combination of aforementioned . The remaining 2.5% will be directed to the Missouri Veteran Administration to help with housing, clothing, food and medical needs for our multitude of Missouri veterans.

8. Cannabis farmers, manufacturer's processors and distributors shall not be subject to any special zoning requirements, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor of agricultural products.

9. Pursuant to the ninth and tenth amendments to the constitution of the United States, the people of Missouri hereby repudiate and challenge federal cannabis prohibitions that conflict with this act.
a. The state of Missouri will honor all legally obtained patients medical cards regardless of the state where issued and Missouri shall become reciprocity with all legal states where Cannabis is considered legalized by law for medical or recreational use.
b. Opinions pertaining to, and willingness to recommend medical cannabis therapy shall not be a criteria for the licensure of physicians or Veterinarian's; No physician or Veterinarian shall be subject to any professional license review or hearing as a result of recommending or approving medical cannabis therapy.
c. Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis, hemp or any derivatives or parts thereof.

10. All provisions of this section are self-executing and serviceable. Except where otherwise indicated in the text of this document this constitutional amendment shall supersede any and all conflicting city, county, state or federal statutory, local charter, ordinance or resolution and shall be implemented no later than January 31st, following the election that placed this initiative before the people of Missouri.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-090)

Subject

Initiative petition from Timothy Gilio regarding a proposed constitutional amendment to Article IV. (Received December 9, 2016)

Date

December 30, 2016

Description

This proposal would amend Article IV of the Constitution of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners** and **The Metropolitan Police Department - City of St. Louis.**

Assumptions

Officials from the **Attorney General's office** indicated among other provisions, this proposal would require them to develop and make public an order, within 60 days, for the immediate destruction of "all cannabis related nonviolent civil and criminal records in Missouri…" and states that the "people of Missouri hereby repudiate and challenge federal cannabis prohibitions that conflict with this act."

They assume that some amount of increased litigation would result. They assume they could absorb increased costs with existing resources, but would request additional appropriation if substantial litigation resulted.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated there would be no impact to their department as a result of this initiative petition.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated they expect no changes in revenue and increased costs of $0 for fiscal year 2018, $99,045 for fiscal year 2019, and $169,098 for fiscal year 2020.

Section 192.945, RSMo, allows their department to issue a hemp extract registration card for persons suffering from intractable epilepsy. The hemp extract registration card allows for the legal possession and use of cannabidiol (CBD) oil. This proposal allows for the legal use of marijuana for both medical and recreational purposes. Therefore, persons with intractable epilepsy would not need to apply for a hemp extract registration card in order to legally use the CBD oil.

Rental space for two staff located in Jefferson City would be required: 2 staff x 230 sq.ft./FTE x $21.00 = $9,660.

The proposed language would legalize the use of marijuana for medical and recreational purposes. There could be an unknown impact on small businesses that serve as cultivators, manufacturers, dispensary facilities, and/or testing centers.

This proposal does not require their department to issue any licenses or conduct inspections to ensure the safety of marijuana infused food products. However, sections 196.010 through 196.298, RSMo, gives their department responsibility for the regulation of food to include such duties as ensuring food safety, sanitation, proper labeling, etc. Therefore, they would have responsibility to ensure facilities that manufacture foods containing marijuana and marijuana products are regulated the same as other food manufacturers.

Due to the broad parameters of this proposal, it is difficult to determine how many food manufacturing facilities would be established. States which have legalized retail marijuana have seen a significant demand for edible marijuana products. For the purposes of this fiscal note, they estimate that at least 300 food manufacturing facilities would be established as a result of this proposal. In order to properly inspect these manufacturing facilities, DCPH would require a minimum of two Environmental Public Health Specialist IV staff (A27, $44,352, Step G). This law shall be implemented no later than January 31 following the November 2018 election. Therefore, DCPH assumes that the two Environmental Public Health Specialist IV positions would begin January 1, 2019.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated a fiscal impact (cost avoidance) of $7,178,073 in fiscal year 2019 (7 Months), $7,511,746 in fiscal year 2020, $10,741,186 in fiscal year 2022 and thereafter.

Legalizing the possession and use of marijuana would remove from the criminal statutes all controlled substance offenses for marijuana, including possession, distribution and trafficking. If the legislation that removed marijuana from the list of controlled substances was retrospective then there would be two reductions in the cost of incarceration: the release of offenders serving a marijuana offense and fewer admissions to prison. The legalization of marijuana will largely impact offenders who are only serving a marijuana offense. Offenders serving multiple concurrent sentences will continue to be required to serve the other sentences after legalization and no estimate is made for offenders serving multiple sentences.

The reduction in the offender population is the total of reductions from the expungement of sentences and fewer admissions and probations. The cost avoidance is based upon a direct prison cost per year in FY16 of $6,085 and an average cost of $2,234 per year for offenders on field supervision. In the first year after the enactment of the legislation that legalizes marijuana there is an estimated reduction of 633 offenders in prison and 3,676 offenders on field supervision. In the next year (FY20) there will be no discharges from expungement but the reduction in the prison population will increase to 214. The field reduction will continue into FY21 because the marijuana offenders are estimated to serve 2.5 years on supervision.

The estimate is qualified by the use of an expansion factor that assumes that the drug distribution in the sentences where the drug is not known will be similar to that where the drug is known.

The estimated cost avoidance in the first year is $7,178,073 and will be $10,741,186 after the 4th year.

If marijuana usage becomes legal it could impact the safety and security of our prisons as it is not believed that there is a means for testing whether an employee is under the influence of marijuana. Impaired prison employees or visitors can impact the safe and secure operation of our prisons.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated total fund costs for General Revenue will be $150,012 for fiscal year 2018, $30,752 for fiscal year 2019, and $31,521 for fiscal year 2020.

This petition opens up the possibility of additional business opportunities in cannabis farming, manufacturing, and distribution of products.

	Total		150,012	30,752	31,521

This would create an unknown positive impact on Total State Revenue.

This petition increases state revenues by an unknown amount.

The provisions of section 7b add an additional five percent tax to all personal/recreational sales of cannabis not including hemp or hemp by-products sold in Missouri. This tax is in addition to any state, county, or city sales taxes already in place. This section also requires the division and distribution of these collections on a quarterly basis to Missouri public schools and the Missouri Veterans' Administration.

This Article states that the tax is to be collected by the State of Missouri Sales Tax Division. There is no State of Missouri Sales Tax Division and their department assumes

that the taxpayer will remit the tax to the Department of Revenue. Because there are no enforcement provisions, it may be difficult for their department to enforce the collection of the additional tax under current sales tax statutes. Their department will not be able to make refunds to taxpayers as the article is currently drafted.

Administrative Impact:

Business Tax Processing:
Although the legislation bases the additional five percent tax on retail sales, it is in addition to and separate from state, county, or city sales tax, and must therefore be reported and deposited separately.

If this money needs to remain in a non-state account, either it would need to stay in the sales suspense holding account until distribution or new bank accounts would need to be established for each.

Officials from the **Department of Public Safety** indicate they see no fiscal impact due to this legislation.

Officials from the **Missouri State Highway Patrol** indicated they expect increased operating costs of $426,236 for the first year implemented, $487,384 for the second year implemented, and $492,597 for the third year implemented.

The provisions of this petition would require their agency to rent office space for 4 FTE's to process the expungement requests.

The proposed legislation would order the immediate destruction of all cannabis-related non-violent civil and criminal records in Missouri.

Two different divisions within their agency will be impacted by this legislation. Here is a breakdown for each division:

The Criminal Justice Information Services Division (CJIS) states that there are currently 95,550 arrest charges in the Central Repository. The current expungement process, pursuant to Chapter 610, takes approximately 90 minutes to process. One FTE can handle 1,243 expungements per year. Conservatively, at least five FTE's would be required to initially handle the expungments created by this legislation. A significant processing backlog would occur if sufficient FTE's are not assigned to accommodate the number of expungements ordered.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 90 minutes. Therefore, one FTE can handle 1,243 expungements per year = 111,840 / 90.

These FTE's (CJIS Technicians, Range 16) would be necessary to process all expungement requests, review criminal history records, contact any agency associated with the arrests or convictions, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE at $55,495 and the ability of that employee to process 1,243 expungements per year, the cost alone per expungement is $55,495 \ 1,243 = $44.64. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories, as well as contacting of the various agencies associated with the arrests. In researching other states with similar expungement requirements, they all charge a fee to offset the cost of the time required to process the expungements. Their fees ranged from $50 to $450 per petition per arrest date.

These FTE will most likely be 2nd and 3rd shift employees so they would not require any equipment. However, there would be recurring costs of $650 per year per FTE for office supplies and phone charges. If any FTE were placed on the 1st shift, standard equipment would be required at a one-time cost of $6,094 per FTE.

5 CJIS Technicians ($1,232.50 x 24)	$147,900
Office Equipment/HW/SW	$6,094
RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

Patrol Records Division

Currently, there are 86,600 records in the Patrol's Traffic Arrest System (TAS) pertaining to arrests completed by our agency that could possibly meet the requirements of this proposed constitutional amendment. These are arrest and arrest/disposition records pertaining to individuals the age of 21 years and older with an NCIC modifier of 60-64 that relate to marijuana offenses. Given this, if only ten percent of the individuals who qualify to have his or her record expunged sought to do so, the Patrol Records Division (PRD) would require 4 FTE's. However, if a large number of these expungements were to be granted with even four FTE's, the backlog would compound greatly to the point it may take several years to catch up. If 100 percent of the individuals who qualify to have their record expunged sought to do so, the Patrol Records Division would require 35 FTE's to complete this task in approximately one year.

The addition of 35 FTE's would require additional supervisory personnel. However, due to the vague and uncertain nature of this proposed amendment, the Patrol Records Division has no true way to determine the actual effect or costs.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 45 minutes. Therefore, one FTE can handle 2,485 expungements per year = 111,840 / 45.

With the current estimate of 86,600 records that potentially meet the requirements of this proposed amendment and would potentially be eligible for expungement, the following percentages of persons actually requesting an expungement will directly relate to the number of PRD FTE's required:

10% = 86,600 x .10 = 8,660 / 2,485 = 4 FTE's
50% = 86,600 x .50 = 43,300 / 2,485 = 17 FTE's
100% = 86,600 / 2,485 = 35 FTE's

These FTE's (Quality Control Clerks, Range 10) would be necessary to process all expungement requests, review records, contact agencies, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE of $45,702 and the ability of that employee to process 2,485 expungements per year, the cost per expungement is $45,702 \ 2,485 = $18.39. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories.

Processing ten percent of the possible expungements would require additional workspace. The physical requirements would increase with the number of FTE's required to meet the demand for expungements. There will be recurring costs of $650 per year per FTE for

office supplies and phone charges. Standard equipment and office furniture would be required at a one-time cost of $6,094 per FTE.

4 Quality Control Clerks ($1,015 x 24)	$97,440
Equipment/Office Furniture	$6,094

RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

The provisions of this petition would require our agency to rent office space for 4 FTE's to process the expungement requests. The Office of Administration states that 920 square feet of office space would be required. The following costs apply per square foot:

Office Space	$14/Sq Ft
Janitorial/Trash Costs	$1.50/Sq Ft
Utility Costs	$2/Sq Ft

The agency provided the following additional comments:

It is suggested to add this additional language to provide for the collection of a fee to offset the costs of the expungements:

43.530. 1. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than nine dollars per request for criminal history record information not based on a fingerprint search. In each year beginning on or after January 1, 2010, the superintendent may increase the fee paid by requesting entities by an amount not to exceed one dollar per year, however, under no circumstance shall the fee paid by requesting entities exceed fifteen dollars per request.

2. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than twenty dollars per request for criminal history record information based on a fingerprint search, unless the request is required under the provisions of subdivision (6) of section 210.481, section 210.487, or section 571.101, in which case the fee shall be fourteen dollars.

3. A request made under subsections 1 and 2 of this section shall be limited to check and search on one individual. Each request shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. The highway patrol may establish procedures for receiving requests for criminal history record information for classification and search for fingerprints, from courts and other entities, and for the payment of such requests. There is hereby established by the treasurer of the state of Missouri a fund to be entitled as the "Criminal Record System Fund". Notwithstanding the provisions of section 33.080 to the contrary, if the moneys collected and deposited into this fund are not totally expended annually for the purposes set forth in

sections 43.500 to 43.543, the unexpended moneys in such fund shall remain in the fund and the balance shall be kept in the fund to accumulate from year to year.

4. For all petitions for expungement under the provisions of Chapter 610, Section 577.054, or any other created expungement requirement under statute, excluding Section 610.122, the applicant shall pay a fee of seventy-five dollars per arrest date listed on the petition. Each petition shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. For expungements that require removal from the Traffic Arrest System twenty dollars of the seventy-five dollar fee will be deposited in the Highway Patrol Traffic Records Fund.

There are numerous uncertainties associated with this proposed constitutional amendment. The definition of a "non-violent cannabis-only offense" needs to be added. It is unclear if individuals with the aforementioned conviction records are required to abide by the expungement process mandated by various other state statutes. Does the individual just complete and file a document with a circuit clerk and the record is expunged or does the "court," whomever that is, order the immediate expungement of all civil and criminal records pertaining to non-violent cannabis only offenses?

Our agency requests clarification of number 7 which states that no Missouri law enforcement personnel, state, county, city employee, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri constitution. Does this mean that the Highway Patrol could no longer participate in federal operations when requested?

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's Office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no fiscal impact.

Officials from the **Office of Administration** (OA) indicated:

Section 54 of Article IV would allow the medical and recreational use of marijuana and hemp, as well as the cultivation, production, transportation and retail sale of marijuana and hemp and their related products. Subsection 3 allows the sale of marijuana to

individuals under the age of 21 only with physician or parental permission. Subsection 6 requires that all prisoners that have been convicted in Missouri of a nonviolent cannabis related crime shall be immediately released and all related charges shall be expunged from their records. Subsection 7 creates an excise tax of five percent on all retail sales of marijuana, in addition to any established state or local sales taxes. The revenue shall be deposited to the credit of general revenue with the provision that 2.5 percent be distributed to elementary and secondary public education schools and 2.5 percent be distributed to the Missouri Veterans' Administration. (Note: There is no Missouri Veterans' Administration. For the purposes of this analysis, B&P assumes it will refer to the Missouri Veterans' Commission.) Subsection 5, however, allows all medical marijuana users, with recommendation by a physician, to purchase cannabis without taxation. Subsection 10 provides that the provisions in the amendment take effect no later than January 31st, following the election that placed the initiative before the people of Missouri.

B&P estimates that subsection 7 of this initiative petition could increase TSR by as much as $17.2M and GR by as much as $16.5M once fully implemented in FY 2021. The Substance Abuse and Mental Health Services Administration (SAMHSA) reports that 9.95% of Missouri population age 18 and older use marijuana. For the purposes of this analysis, B&P assumes the same percentage for marijuana users over the age of 21. The U.S. Census (2010) reports the population of Missouri residents over the age of 21 as 4,300,988 people. Multiplying the percentage of Missouri residents who use marijuana by the population of Missouri residents over the age of 21 gives an estimate of the number of Missouri residents who use marijuana:

	4,300,988	(MO residents over the age of 21)
X	9.95%	(% of MO residents who use marijuana)
	427,948	(MO residents who use marijuana)

However, B&P estimates that of those who use marijuana, roughly 65,000 would be medical users. SAMHSA reports that the total number of U.S. population age 18 and older use marijuana is 27,169,000 people. B&P assumes dividing the number of MO residents who use marijuana by the U.S. population that uses marijuana will provide an estimate of the percentage of the U.S. market that is attributable to Missouri.

	427,948	(MO residents who use marijuana)
÷	27,169,000	(Number of U.S. marijuana users)
	1.58%	(% U.S. market that is attributable to MO)

Using the estimate above for medical users, of that 1.58 percent approximately 0.24% could be considered medical. Therefore, B&P estimates that the size of the U.S. market that is attributable to Missouri, less medical marijuana users, is 1.33 percent. Using an

established estimate[1] for the U.S. market of $14.0B and multiplying by the percentage of the U.S. market that is attributable to Missouri, B&P estimates that Missouri's marijuana market, less medical marijuana use, could be worth $186.7M. Assuming Missouri's marijuana market is worth $186.7M, an excise tax of five percent could increase TSR and GR by as much as $9.3M once fully implemented. Table 1 shows a breakdown of revenue increases by tax type.

[1] http://scholar.harvard.edu/files/miron/files/budget_2010_final_0.pdf

Table 1: Revenue Generated by Marijuana Taxes		
Tax	**FY 2020 (5 months)**	**Fully Implemented (FY 2021)**
Sales Tax		
General Revenue	3,002,000	7,206,000
Education	233,000	559,000
Conservation	29,000	70,000
Parks, Soil, Water	23,000	56,000
Local	120,000	287,000
Marijuana Excise Tax		
General Revenue	3,890,000	9,337,000
Total		
General Revenue	6,893,000	16,543,000
Education	233,000	559,000
Conservation	29,000	70,000
Parks, Soil, Water	23,000	56,000
Local	120,000	287,000
TSR	7,178,000	17,228,000

Officials from the **Office of State Courts Administrator** indicated:

The proposed initiative petition would create a new section of the Missouri Constitution to be known as Article IV, section 54. This section would allow citizens over the age of twenty-one years to have the right to engage in the production, sale, distribution and consumption of marijuana and the manufacture of goods from hemp, subject to reasonable regulations adopted by the state pursuant to this section.

The average of all marijuana related charge codes from 2011 to 2015 for Circuit case types is 14,122 per year. The average of all marijuana related charge codes from 2011 to 2015 for Associate case types is 10,982. They are unable to determine what number of these charges were for someone over the age of twenty-one.

The following Criminal Court Costs would be affected by this petition:

Criminal Court Costs		
Felony Case Costs	**Amount of Cost**	**Disburse to State/County**
Basic Civil Legal Services Fund surcharge	$10.00	State of Missouri - Basic Civil Legal Services Fund

Drug Testing by a Private Lab	Actual Costs	County Reimbursement
Law Enforcement Arrest Costs:		
Highway Patrol		Amt. Approved by the Court
Local (County)		Amt. Approved by the Court
Municipal		Amt. Approved by the Court

The decrease in the court fees, depending on the number of cases, will result in an unknown loss to the courts. They also assume there will be an unknown decrease in caseload for the courts because the courts will no longer process these cases; however, at this time they are unable to calculate the decrease.

Any significant increase or decrease will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated if passed, this constitutional amendment would have a positive impact on the workload of the Missouri State Public Defender, since possession, manufacture, distribution, etc. of cannabis would no longer be unlawful, offenses that the Public Defender currently uses resources to defend and no longer would need to.

The exact positive impact is difficult to predict because they track cases by statutory offense and most drug offenses are not limited to marijuana.

However, their best estimate, using FY2014 MSPD data, is that this would reduce their caseload by 3,523 cases (685 A/B felonies, 1,797 C/D felonies, 1,041 misdemeanors, and 1,140 probation violations).

In *The Missouri Project: A Study of the Missouri Public Defender System and Attorney Workload Standards*, prepared by RubinBrown on behalf of the American Bar Association's Standing Committee on Legal Aid and Indigent Defendants, the relevant

workload standards are: A/B felonies, 47.6 hours per case; C/D felonies, 25.0 hours per case; misdemeanors, 11.7 hours per case; and probation violations, 9.8 hours per case). (The workload standards include only case related tasks over which an attorney has some control (they exclude, for example, in court and travel time) and thereby reflect a conservative estimate.)

Applying those workload standards to the 2,858 cases, those cases require 100,882.7 attorney hours. With 2,080 hours per attorney available each year, that represents the work of 48.5 attorneys.

While in theory they might also handle fewer appeals of guilty verdicts after trial, the fact is that only a very small percentage of their cases proceed to trial and it's likely that only a small percentage of those cases are appeals from marijuana convictions. Therefore this minimal positive impact is not being taken into account in this estimate.

However, the Missouri State Public Defender already is significantly understaffed by 333 attorneys under the workload standards developed in *The Missouri Project*. (The 333 attorneys is a conservative estimate of the under-staffing in that it assumes we contract all conflicts to private attorneys, which we are not able to do for budgetary reasons).

Therefore, despite the positive impact on the workload of the Missouri State Public Defender, because they are already understaffed that savings in attorney time would not allow the Public Defender to reduce its workforce and therefore would not translate into an actual cost savings. However it does reduce by the cost of 48.5 attorneys how much money needs to be added to their budget in order to meet *The Missouri Project*'s workload standards.

Officials from the **State Treasurer's office** indicated this would have no fiscal impact on their office.

Officials from **Greene County** indicated there is anticipated costs for this initiative petition. Unfortunately there is not enough time given in the response to provide an actual estimated costs.

County Prosecutor, Dan Patterson provided the following information:

No on 64 Campaign and SAM Action

California voters are being told that they will see the crime rate go down if they vote to legalize marijuana commercially; this has not been the case in the state of Colorado or the city of Denver. Since the legalization of recreational marijuana in Colorado in 2013 traffic related marijuana deaths have increased 48%, marijuana related emergency room visits have increased 49%, and marijuana related calls to the poison center have increased 100%. According to the Colorado Bureau of Investigations in 2015 statewide homicides in Colorado rose 14.7 % over the previous year. Pueblo, Colorado had the highest homicide rate in the state with 11.1 killings per 100,000 residents. Aurora, Colorado's homicide rate more than doubled from 2014. Additionally more places in Colorado were robbed and more thefts occurred, especially cars, as 193,115 motor vehicles were reported stolen, up 27.7 % in 2015 from the previous year. In 2015, sexual assaults rose 10% in Colorado with Denver, Aurora, Lakewood, Westminster and Pueblo all reporting higher numbers as well.

In the city of Denver since the legalization of recreational marijuana the number of crimes in Denver has grown by about 44 %, according to annual figures the city reported to the National Incident Based Reporting System. In 2015 in Denver alone crime rose in every neighborhood in the city. The murder rate hit a decade high, 1059 more cars were broken into, there were 903 more auto thefts, 321 more aggravated assaults and 231 more homes were broken into compared to 2014.

California voters are also being told that legalizing recreational marijuana will free up law enforcement to work on other criminal activities. Again that has not been the case in Denver. Besides the overall increases in crime we have experience, the Denver police department is dealing with a 900% increase in the unlawful cultivation and manufacture of marihuana concentrate, and a 99% increase in the unlawful distribution of marijuana and marijuana concentrate. The quantity of illegal marijuana seized by the Denver police has increased 3,424% on average per case. The volume of marijuana seized per case has increased from an average of 162 pounds to 5724 pounds. In Denver unlawful public consumption of marijuana citations has increased over 300% per year since the legalization of recreational marijuana. The Denver police department is busier enforcing marijuana laws and investigating crimes directly related to marijuana, including murderers, robberies, and home invasions, than any other time in the history of the city.

Sincerely,

Mitchell R. Morrissey
Denver District Attorney

Officials from the **City of Kansas City** indicated sales taxes could be collected. No amount can be reasonably estimated.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from **University of Missouri** indicated they have reviewed the proposed initiative petition and determined that the fiscal impact should not exceed $100,000.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, St. Louis Community College, Kansas City Board of Police Commissioners** and **The Metropolitan Police Department - City of St. Louis**.

Fiscal Note Summary

This proposal is estimated to increase annual state tax revenues by $17 million when fully implemented with additional estimated annual state savings of $11 million. State implementation costs are estimated at $150,000 with annual operating costs estimated at $700,000. Local law enforcement costs could increase.

December 9, 2016

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Marc Ellinger regarding a proposed statutory amendment to Chapters 84 and 105 (2018-089)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Marc Ellinger on December 8, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

Be it enacted by the people of the State of Missouri as follows:

Sections 84.460 and 84.860 are repealed, Section 105.726 is amended, and seven new sections are enacted, to be known as Sections 84.891, 84.892, 84.893, 84.894, 84.895, 84.896, and 84.897, to read as follows:

84.891. No elected or appointed official of the state or any political subdivision thereof shall act or refrain from acting in any manner to impede, obstruct, hinder, or otherwise interfere with any member of a municipal police force established under sections 84.893 to 84.896 in the performance of his or her job duties, or with any aspect of any investigation arising from the performance of such job duties. This section shall not be construed to prevent such officials from acting within the normal course and scope of their employment or from acting to implement sections 84.893 to 84.896. Any person who violates this section shall be liable for a penalty of two thousand five hundred dollars for each offense and shall forever be disqualified from holding any office or employment whatsoever with the governmental entity the person served at the time of the violation. The penalty shall not be paid by the funds of any committee as the term "committee" is defined in section 130.011. This section shall not be construed to interfere with the punishment, under any laws of this state, of a criminal offense committed by such officials, nor shall this section apply to duly appointed members of the municipal police force, or their appointing authorities, whose conduct is otherwise provided for by law.

84.892. 1. It shall be an unlawful employment practice for an official, employee, or agent of a municipal police force established under sections 84.893 to 84.896 to discharge, demote, reduce the pay of, or otherwise retaliate against an employee of the municipal police force for reporting to any superior, government agency, or the press the conduct of another employee that the reporting employee believes, in good faith, is illegal.

2. Any employee of a municipal police force may bring a cause of action for general or special damages based on a violation of this section.

84.893. 1. Subject to the provisions of sections 84.894 to 84.896, any city with a population of 400,000 or more may establish a municipal police force for the purposes of:

(1) Preserving the public peace, welfare, and order;

(2) Preventing crime and arresting suspected offenders;

(3) Enforcing the laws of the state and ordinances of the city;

(4) Exercising all powers available to a police force under generally applicable state law; and

(5) Regulating and licensing all private watchmen, private detectives, and private policemen serving or acting as such in said city.

2. Any person who acts as a private watchman, private detective, or private policeman in said cities without having obtained a written license from said cities is guilty of a class A misdemeanor.

84.894. 1. Notwithstanding any provisions of this chapter to the contrary, any city with a population of 400,000 or more may establish a municipal police force on or after July 1, 2019, according to the procedures and requirements of this section. The purpose of these procedures and requirements is to provide for an orderly and appropriate transition in the governance of the police force and provide for an equitable employment transition for commissioned and civilian personnel.

2. Upon the establishment of a municipal police force by a city under sections 84.893 to 84.896, the board of police commissioners shall convey, assign, and otherwise transfer to the city title and ownership of all indebtedness and assets, including, but not limited to, all funds and real and personal property held in the name of or controlled by the board of police commissioners created under sections 84.350 to 84.860. The board of police commissioners shall execute all documents reasonably required to accomplish such transfer of ownership and obligations.

3. If the city establishes a municipal police force and completes the transfer described in subsection 2 of this section, the city shall provide the necessary funds for the maintenance of the municipal police force.

4. Before a city with a population of 400,000 or more may establish a municipal police force under this section, the city shall adopt an ordinance accepting responsibility, ownership, and liability as successor-in-interest for contractual obligations, indebtedness, and other lawful obligations of the board of police commissioners subject to the provisions of subsection 2 of section 84.895.

5. A city with a population of 400,000 or more that establishes a municipal police force shall initially employ, without a reduction in rank, salary, or benefits, all commissioned and civilian personnel of the board of police commissioners created under sections 84.350 to 84.860 that were employed by the board immediately prior to the date the municipal police force was established. Such commissioned personnel who previously were employed by the board may only be involuntarily terminated by the city with a population of 400,000 or more for cause. The city shall also recognize all accrued years of service that such commissioned and civilian personnel had with the board of police commissioners. Such personnel shall be entitled to the same holidays, vacation, and sick leave they were entitled to as employees of the board of police commissioners.

6. Commissioned and civilian personnel who were previously employed by the board shall continue to be subject, throughout their employment for the city with a population of 400,000 or more, to a residency rule no more restrictive than a requirement of retaining a primary residence in a city with a population of 400,000 or more for a total of seven years and of then allowing them to maintain a primary residence outside the city with a population of 400,000 or more so long as the residence is located within a one-hour response time.

7. The commissioned and civilian personnel who retire from service with the board of police commissioners before the establishment of a municipal police force under subsection 1 of this section shall continue to be entitled to the same pension benefits provided under chapter 86 and the same benefits set forth in subsection 5 of this section.

8. If the city with a population of 400,000 or more elects to establish a municipal police force under this section, the city shall establish a separate division for the operation of its municipal police force. The civil service commission of the city may adopt rules and regulations appropriate for the unique operation of a police department. Such rules and regulations shall reserve exclusive authority over the disciplinary process and procedures affecting commissioned officers to the civil service commission; however, until such time as the city adopts such rules and regulations, the commissioned personnel shall continue to be governed by the board of police commissioners' rules and regulations in effect immediately prior to the establishment of the municipal police force, with the police chief acting in

place of the board of police commissioners for purposes of applying the rules and regulations. Unless otherwise provided for, existing civil service commission rules and regulations governing the appeal of disciplinary decisions to the civil service commission shall apply to all commissioned and civilian personnel. The civil service commission's rules and regulations shall provide that records prepared for disciplinary purposes shall be confidential, closed records available solely to the civil service commission and those who possess authority to conduct investigations regarding disciplinary matters pursuant to the civil service commission's rules and regulations. A hearing officer shall be appointed by the civil service commission to hear any such appeals that involve discipline resulting in a suspension of greater than fifteen days, demotion, or termination, but the civil service commission shall make the final findings of fact, conclusions of law, and decision which shall be subject to any right of appeal under chapter 536.

9. A city with a population of 400,000 or more that establishes and maintains a municipal police force under this section:

(1) Shall provide or contract for life insurance coverage and for insurance benefits providing health, medical, and disability coverage for commissioned and civilian personnel of the municipal police force to the same extent as was provided by the board of police commissioners under sections 84.350 to 84.860;

(2) Shall provide or contract for medical and life insurance coverage for any commissioned or civilian personnel who retired from service with the board of police commissioners or who were employed by the board of police commissioners and retire from the municipal police force of a city with a population of 400,000 or more to the same extent such medical and life insurance coverage was provided by the board of police commissioners under sections 84.350 to 84.860;

(3) Shall make available medical and life insurance coverage for purchase to the spouses or dependents of commissioned and civilian personnel who retire from service with the board of police commissioners or the municipal police force and deceased commissioned and civilian personnel who receive pension benefits under chapter 86 at the rate that such dependent's or spouse's coverage would cost under the appropriate plan if the deceased were living; and

(4) May pay an additional shift differential compensation to commissioned and civilian personnel for evening and night tours of duty in an amount not to exceed ten percent of the officer's base hourly rate.

10. A city with a population of 400,000 or more that establishes a municipal police force under sections 84.893 to 84.896 shall establish a transition committee of five members for the purpose of: coordinating and implementing the transition of authority, operations, assets, and obligations from the board of police commissioners to the city; winding down the affairs of the board; making nonbinding recommendations for the transition of the police force from the board to the city; and other related duties, if any, established by executive order of the city's mayor. Once the ordinance referenced in section 84.894 is enacted, the city shall provide written notice to the board of police commissioners and the governor of the State of Missouri. Within thirty days of such notice, the mayor shall appoint three members to the committee, two of whom shall be members of a statewide law enforcement association that represents at least five thousand law enforcement officers. The remaining members of the committee shall include the police chief of the municipal police force and a person who currently or previously served as a commissioner on the board of police commissioners, who shall be appointed to the committee by the mayor of such city.

84.895. 1. Except as required for the board of police commissioners to conclude its affairs and pursue legal claims and defenses, upon the establishment of a municipal police force, the terms of office of the commissioners of the board of police created under sections 84.350 through 84.860 shall expire, and the provisions of sections 84.350 to 84.860 shall not apply to any city with a population of 400,000 or more or its municipal police force as of such date. The board shall continue to operate, if necessary, to wind down the board's affairs until the transfer of ownership and obligations under subsection 2 of section 84.894 has been completed. During such time, the board of police commissioners shall designate and authorize its secretary to act on behalf of the board for purposes of performing the board's duties and any other actions incident to the transfer and winding down of the board's affairs.

2. For any claim, lawsuit, or other action arising out of actions occurring before the date of completion of the transfer provided under subsection 2 of section 84.894, the state shall continue to provide legal representation as set forth in section 105.726, and the state legal expense fund shall continue to provide reimbursement for such claims under section 105.726. This subsection applies to all claims, lawsuits, and other actions brought against any commissioner, police officer, employee, agent, representative, or any individual or entity acting or purporting to act on its or their behalf.

3. Notwithstanding any other provision of law, rule, or regulation to the contrary, any city with a population of 400,000 or more that establishes a municipal police force under sections 84.893 to 84.896 shall not be restricted or limited in any way in the selection of a police chief or chief of the division created under subsection 8 of section 84.894.

84.896. Any police pension system created under chapter 86 for the benefit of a police force established under sections 84.350 to 84.860 shall continue to be governed by chapter 86, and shall apply to any police force established under section 84.893 to 84.896. Other than any provision that makes chapter 86 applicable to a municipal police force established under section 84.893 to 84.896, nothing in sections 84.893 to 84.896 shall be construed as limiting or changing the rights or benefits provided under chapter 86.

84.897. Notwithstanding the provisions of section 1.140 to the contrary, the provisions of sections 84.893 to 84.896 shall be non-severable. If any provision of sections 84.893 to 84.896 is for any reason held to be invalid, such decision shall invalidate all of the remaining provisions of this act.

105.726. 1. Nothing in sections 105.711 to 105.726 shall be construed to broaden the liability of the state of Missouri beyond the provisions of sections 537.600 to 537.610, nor to abolish or waive any defense at law which might otherwise be available to any agency, officer, or employee of the state of Missouri. Sections 105.711 to 105.726 do not waive the sovereign immunity of the state of Missouri.

2. The creation of the state legal expense fund and the payment therefrom of such amounts as may be necessary for the benefit of any person covered thereby are deemed necessary and proper public purposes for which funds of this state may be expended.

3. Moneys in the state legal expense fund shall not be available for the payment of any claim or any amount required by any final judgment rendered by a court of competent jurisdiction against a board of police commissioners

established under chapter 84, including the commissioners, any police officer, notwithstanding sections 84.330 and 84.710, or other provisions of law, other employees, agents, representative, or any other individual or entity acting or purporting to act on its or their behalf. Such was the intent of the general assembly in the original enactment of sections 105.711 to 105.726, and it is made express by this section in light of the decision in Wayman Smith, III, et al. v. State of Missouri, 152 S.W.3d 275. Except that the commissioner of administration shall reimburse from the legal expense fund[the board of police commissioners established under section 84.350, and] any successor-in-interest established pursuant to section 84.344 or section 84.894, for liability claims otherwise eligible for payment under section 105.711 paid by such [board]successor-in-interest up to a maximum of one million dollars per fiscal year.

4. Subject to the provisions of subsection 2 of section 84.345 or subsection 2 of section 84.895, if the representation of the attorney general is requested by a board of police commissioners or its successor-in-interest established pursuant to section 84.344 or section 84.894, the attorney general shall represent, investigate, defend, negotiate, or compromise all claims under sections 105.711 to 105.726 for the board of police commissioners, its successor-in-interest pursuant to section 84.344 or section 84.894, any police officer, other employees, agents, representatives, or any other individual or entity acting or purporting to act on their behalf. The attorney general may establish procedures by rules promulgated under chapter 536 under which claims must be referred for the attorney general's representation. The attorney general and the officials of the city which the police board represents or represented shall meet and negotiate reasonable expenses or charges that will fairly compensate the attorney general and the office of administration for the cost of the representation of the claims under this section.

5. Claims tendered to the attorney general promptly after the claim was asserted as required by section 105.716 and prior to August 28, 2005, may be investigated, defended, negotiated, or compromised by the attorney general and full payments may be made from the state legal expense fund on behalf of the entities and individuals described in this section as a result of the holding in Wayman Smith, III, et al. v. State of Missouri, 152 S.W.3d 275.

[84.460. So soon as the board created herein shall hold their first meeting, it shall be their duty to inform the chief of police and the other officers of the police force of such city that they require their attendance upon them and obedience to their orders. For failure to attend as required, and for each and every failure to obey the lawful orders of said board, the officers so notified shall be fined in any sum not exceeding five hundred dollars, to be recovered by action at law instituted by said board, in the name of the state. From and after the first meeting aforesaid, the whole of the then existing police force in such city shall pass under the exclusive management and control of the said board, and be subject to no other control and entitled to receive neither orders nor pay, except arrearages then due, from any other authority, and shall so continue, subject, however, to removal or suspension, at the discretion of said board, and with the power in said board to fill vacancies, until said board shall publicly declare that the organization of the police force, created by sections 84.350 to 84.860 is complete. Upon such public declaration, and from the time thereof thenceforward, all ordinances of such city are hereby declared null and void, so far as they conflict with sections 84.350 to 84.860 or assume to confer upon the mayor, chief of police, common council, or any other person or persons, the power to appoint, dismiss, or in any way or to any extent, employ or control any police force organized or to be organized under such ordinances, or any of them, and from and after such public declaration as aforesaid, the police force organized, or which may be organized under such ordinances, or any of them, shall cease to exist, and its functions and powers be at an end.]

[84.860. Any officer or servant of the mayor or common council or municipal assembly of the said cities, or other persons whatsoever, who shall forcibly resist or obstruct the execution or enforcement of any of the provisions of sections 84.350 to 84.860 or relating to the same, or who shall disburse any money in violation thereof, or who shall hinder or obstruct the organization or maintenance of said board of police, or the police force provided in said sections to be organized and maintained, or who shall maintain or control any police force other than the one herein provided for, or who shall delay or hinder the due enforcement of said sections by failing or neglecting to perform the duties therein imposed upon him, shall be liable to a penalty of one thousand dollars for each and every offense, recoverable by the board by action at law in the name of the state, and shall forever thereafter be disqualified from holding or exercising any office or employment whatsoever under the mayor or common council or municipal assembly of said cities, or under said sections; provided, however, that nothing in this section shall be construed to interfere with the punishment, under any existing or any future laws of this state, or any criminal offense which shall be committed by the said parties in or about the resistance, obstruction, hindrance, conspiracy, combination or disbursement aforesaid.]

RE: Petition approval request from Damien Johnson regarding a proposed constitutional amendment to Article IV, Version 3 (2018-088)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Damien Johnson on December 7, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

b) If, primary caregiver, the dispensary verifies the patient and the primary caregiver.
c) The patient's 9 digit random alphabet. Dispensaries my issue an random alphabet after verifying residency.

6. The Department of Health and Human Services shall issue 9 digit random alphabet out to patients and keep records of the alphabet on a state wide registry. The registry is to verify it's a Missouri patient and it shall not be subjected to Sunshine request under rsmo chapter 610. No law enforcement agency my access the list without a warrant. Law enforcement agencies my only view a printed list but not electronically. Dispensaries shall the Register with the the Department of Health and Human Services for:

a) licensing and regulations
b) paying fees of no more then $100.00
c) to assist with the 9 digit random alphabet registry.

7. Upon the passage of this Act, all persons incarcerated or under supervision of the Missouri Board of Probation and Parole for non-violent, cannabis-only offenses which are no longer illegal for medical treatment in the State of Missouri under this Act and been convicted prior to this Act shall be immediately released and their civil and criminal records shall be expunge by the Court.

8. Any person who willfully impedes the lawful exercise of these provisions is guilty of a Class A misdemeanor.

10. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirement, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor. Patients are are allowed to grow cannabis for medical treatment for self. Primary caregiver are allowed to grow for their patients.

12. All provisions of this section are self-executing and severable, and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.

13. This shall become effective on December 6th 2018.

In the November general of 2020, voters shall vote to repeal the above section & replace it with the below section. A yes vote approve the repeal above section an replace with below section. If voters fail shall to vote yes, the above section remains and voters shall vote again every four years until voters vote yes.

This measure amends the Missouri Constitution by adding Section 54 to Article 4. This amendment implicitly repeals, in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105, 105.1108, 105.1112, 195.010.(10)(b)c,195.010.(10)(d), 195.010.(17)(m)(b), 195.010.(17)(g), 195.010.(17)(l),195.010(24), 195.015.4, 195.017.2(4)(r), 195.017.2(4)(z), 195.017.2(4)(ii),195.140.2(2), 195.202.2, 195.202.3, 195.211.2, 195.211.3, 195.211.4, 195.222.7,195.223.7, 195.223.8, 263.250.1.

1.The following shall be called the Cannabis Legalization Amendment

2.Definition of terms, as used in this Act:

a) "cannabis" and "cannabis hemp" refer to the cannabis, marihuana, marijuana, cannabis sativa, cannabis indica, cannabis ruderalis, or any variety of cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof.
b) "hemp": the fiber of this plant, extracted from the stem and used to make rope, stout fabrics, fiberboard, and paper. the sister plant of cannabis
c) "medical cannabis" refers to the medical use of cannabis.
d) "personal use" refers to the non-medical consumption of cannabis.
e) "Expungeable marijuana offense" are any convictions committed prior to this amendment.
f) "cannabis accessories" means any equipment, products, or materials of any kind that are used, intended for use, or designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing cannabis, or for ingesting, inhaling, vaporizing, smoking or otherwise introducing cannabis into and/or onto the human body.
g) "establishment" refers to a cannabis cultivation facility, a cannabis testing facility, a cannabis product manufacturing facility, or a retail cannabis store or other entity that cultivates, prepares, manufactures, packages, transports or sells cannabis, cannabis products and/or cannabis accessories.

3. Missouri Controlled Substance relating to marijuana schedule list shall change to reflect that cannabis as defined in Section 1.a) are permitted for personal use for persons 21 of age or older and shall be available with a doctor's recommendation without an age limit.The following acts are not unlawful and shall not be an offense under Missouri law or be a basis for seizure or forfeiture.

a) Adult Possession of cannabis for personal at 21 years or older.
b) Possession, production, cultivation and distribution of hemp, marijuana and cannabis.
c) Cultivation, harvesting processing, manufacturing, packaging, distributing, transferring, displaying or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes provided the person has current applicable licensing to operate a commercial establishment. No special licensing will be required beyond that which is applicable for the cultivation, harvest, processing, manufacturing, packaging, distribution, transferal, display or possessing of any non-toxic food or food product.

4. Medical cannabis shall be available to patients who have a physician's recommendation.

a) All patients engaged in cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through other pharmaceutical means.
b) Cannabis acquisition, possession, and consumption shall be permitted to patients under the age of twenty-one with the consent of a parent or legal guardian and through the supervision of a parent or legal custodian and a licensed physician.
c) Licensed physicians shall not be penalized for, nor restricted from recommending cannabis for medical purposes to any person.
d) Opinions pertaining to, and willingness to recommend medical cannabis therapy shall not be a criteria for the licensure of physicians; no physician shall be subject to any professional licensing review or hearing as a result of recommending or approving medical cannabis therapy.
e) Any individual who is a legal cannabis patient in another state shall be granted the same rights and privileges as a legal Missouri cannabis patient.

Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis.

5. Nothing in this section shall:

a) Require an employer to retain an employee who is impaired on the job by his use of cannabis.
b) Permit operation of a motor vehicle, watercraft, aircraft, train, or any transportation device of vehicle by anyone who is impaired by marijuana, cannabis or any other controlled substance.
c) Permit the transfer or sale of cannabis intended for adult use to a person younger than twenty-one years of age.

6. Forbid any individual, corporate property owner, elementary education institutions, and secondary education institutions from prohibiting the distribution, sale or cultivation of cannabis within their dwelling for medical treatment

7. The dictates of this Initiative shall be implemented no later than January 1, following the election that placed this Initiative before the people.

8. Upon the passage of this Act, all persons incarcerated or under supervision of the Missouri Board of Probation and Parole for nonviolent, cannabis-only offenses which are no longer illegal in the State of Missouri under this Act shall be immediately released.

(a) The Court shall order the immediate expungement of civil and criminal records pertaining to all non-violent cannabis only offenses which are no longer illegal in the State of Missouri under this Act.
(b) Within 60 days of the passage of this Act, The Attorney General shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis-related nonviolent civil and criminal records in Missouri and for any offense covered by this amendment. This document shall be distributed to all Circuit Court clerks within the State.
9. No Missouri law enforcement personnel or state funds shall be used to assist or aid in the enforcement of federal cannabis laws involving acts which are no longer illegal in the State of Missouri under this amendment.
10. Any person who willfully impedes the lawful exercise of these provisions is guilty of a Class A misdemeanor.
11. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirement, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor.
12. Taxes and regulations not conflicting with sections may be imposed on the production, distribution, cultivation and possession of cannabis, marijuana and hemp shall be subjected to duly authorized powers, if any, conferred by article III and VI of the Constitution of Missouri:
13. All provisions of this section are self-executing and severable, and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.

13. This shall become effective on December 6th 2018.

In the November general of 2020, voters shall vote to repeal the above section & replace it with the below section. A yes vote approve the repeal above section an replace with below section. If voters fail shall to vote yes, the above section remains and voters shall vote again every four years until voters vote yes.

This measure amends the Missouri Constitution by adding Section 54 to Article 4. This amendment implicitly repeals, in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105, 105.1108, 105.1112, 195.010.(10)(b)c,195.010.(10)(d), 195.010.(17)(m)(b), 195.010.(17)(g), 195.010.(17)(l),195.010(24), 195.015.4, 195.017.2(4)(r), 195.017.2(4)(z), 195.017.2(4)(ii),195.140.2(2), 195.202.2, 195.202.3, 195.211.2, 195.211.3, 195.211.4, 195.222.7,195.223.7, 195.223.8, 263.250.1.

1.The following shall be called the Johnson Amendment II

2.Definition of terms, as used in this Act:

a) "cannabis" and "cannabis hemp" refer to the cannabis, marihuana, marijuana, cannabis sativa, cannabis indica, cannabis ruderalis, or any variety of cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof.
b) "hemp": the fiber of this plant, extracted from the stem and used to make rope, stout fabrics, fiberboard, and paper. the sister plant of cannabis
c) "medical cannabis" refers to the medical use of cannabis.
d) "personal use" refers to the non-medical consumption of cannabis.
e) "Expungeable marijuana offense" are any convictions committed prior to this amendment.
f) "cannabis accessories" means any equipment, products, or materials of any kind that are used, intended for use, or designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing cannabis, or for ingesting, inhaling, vaporizing, smoking or otherwise introducing cannabis into and/or onto the human body.
g) "establishment" refers to a cannabis cultivation facility, a cannabis testing facility, a cannabis product manufacturing facility, or a retail cannabis store or other entity that cultivates, prepares, manufactures, packages, transports or sells cannabis, cannabis products and/or cannabis accessories.

3. Missouri Controlled Substance relating to marijuana schedule list shall change to reflect that cannabis as defined in Section 1.a) are permitted for personal use for persons 21 of age or older and shall be available with a doctor's recommendation without an age limit.The following acts are not unlawful and shall not be an offense under Missouri law or be a basis for seizure or forfeiture.

a) Adult Possession of cannabis for personal at 21 years or older.
b) Possession, production, cultivation and distribution of hemp, marijuana and cannabis.
c) Cultivation, harvesting processing, manufacturing, packaging, distributing, transferring, displaying or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes provided the person has current applicable licensing to operate a commercial establishment. No special licensing will be required beyond that which is applicable for the cultivation, harvest, processing, manufacturing, packaging, distribution, transferal, display or possessing of any non-toxic food or food product.

4. Medical cannabis shall be available to patients who have a physician's recommendation.

a) All patients engaged in cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through other pharmaceutical means.
b) Cannabis acquisition, possession, and consumption shall be permitted to patients under the age of twenty-one with the consent of a parent or legal guardian and through the supervision of a parent or legal custodian and a licensed physician.
c) Licensed physicians shall not be penalized for, nor restricted from recommending cannabis for medical purposes to any person.
d) Opinions pertaining to, and willingness to recommend medical cannabis therapy shall not be a criteria for the licensure of physicians; no physician shall be subject to any professional licensing review or hearing as a result of recommending or approving medical cannabis therapy.
e) Any individual who is a legal cannabis patient in another state shall be granted the same rights and privileges as a legal Missouri cannabis patient.

Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis.

5. Nothing in this section shall:

a) Require an employer to retain an employee who is impaired on the job by his use of cannabis.
b) Permit operation of a motor vehicle, watercraft, aircraft, train, or any transportation device of vehicle by anyone who is impaired by marijuana, cannabis or any other controlled substance.
c) Permit the transfer or sale of cannabis intended for adult use to a person younger than twenty-one years of age.

6. Forbid any individual, corporate property owner, elementary education institutions, and secondary education institutions from prohibiting the distribution, sale or cultivation of cannabis within their dwelling for medical treatment

7. The dictates of this Initiative shall be implemented no later than January 1, following the election that placed this Initiative before the people.

8. Upon the passage of this Act, all persons incarcerated or under supervision of the Missouri Board of Probation and Parole for nonviolent, cannabis-only offenses which are no longer illegal in the State of Missouri under this Act shall be immediately released.

(a) The Court shall order the immediate expungement of civil and criminal records pertaining to all non-violent cannabis only offenses which are no longer illegal in the State of Missouri under this Act.
(b) Within 60 days of the passage of this Act, The Attorney General shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis-related nonviolent civil and criminal records in Missouri and for any offense covered by this amendment. This document shall be distributed to all Circuit Court clerks within the State.
9. No Missouri law enforcement personnel or state funds shall be used to assist or aid in the enforcement of federal cannabis laws involving acts which are no longer illegal in the State of Missouri under this amendment.
10. Any person who willfully impedes the lawful exercise of these provisions is guilty of a Class A misdemeanor.
11. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirement, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor.
12. Taxes and regulations not conflicting with sections may be imposed on the production, distribution, cultivation and possession of cannabis, marijuana and hemp shall be subjected to duly authorized powers, if any, conferred by article III and VI of the Constitution of Missouri:
13. All provisions of this section are self-executing and severable, and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.

Be it enacted by the people of the state of Missouri:

Sections 290.502, 290.512, and 290.527 of the Revised Statutes of Missouri are amended and a new section to be known as section 290.529 is enacted to read as follows:

290.502. 1. Except as may be otherwise provided pursuant to sections 290.500 to 290.530, effective January 1, 2007, every employer shall pay to each employee wages at the rate of $6.50 per hour, or wages at the same rate or rates set under the provisions of federal law as the prevailing federal minimum wage applicable to those covered jobs in interstate commerce, whichever rate per hour is higher.

2. The minimum wage shall be increased or decreased on January 1, 2008, and on January 1 of successive years, by the increase or decrease in the cost of living. On September 30, 2007, and on each September 30 of each successive year, the director shall measure the increase or decrease in the cost of living by the percentage increase or decrease as of the preceding July over the level as of July of the immediately preceding year of the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) or successor index as published by the U.S. Department of Labor or its successor agency, with the amount of the minimum wage increase or decrease rounded to the nearest five cents.

3. Except as may be otherwise provided pursuant to sections 290.500 to 290.530, and notwithstanding subsection (1) of this section, effective January 1, 2019, every employer shall pay to each employee wages at the rate of not less than $9.00 per hour, or wages at the same rate or rates set under the provisions of federal law as the prevailing federal minimum wage applicable to those covered jobs in interstate commerce, whichever rate per hour is higher. Thereafter, the minimum wage established by this subsection shall be increased each year by $1.00 per hour, effective January 1 of each of the next three years, until it reaches $12.00 per hour, effective January 1, 2022. Thereafter, the minimum wage established by this subsection shall be increased or decreased on January 1, 2023, and on January 1 of successive years, per the method set forth in subsection (2) of this section. If at any time the federal minimum wage rate is above or is thereafter increased above the minimum wage then in effect under this subsection, the minimum wage required by this subsection shall continue to be increased pursuant to this subsection (3), but the higher federal rate shall immediately become the minimum wage required by this subsection and shall be increased or decreased per the method set forth in subsection (2) for so long as it remains higher than the state minimum wage required and increased pursuant to this subsection.

4. For purposes of this section, the term "public employer" means an employer that is the state or a political subdivision of the state, including a department, agency, officer, bureau, division, board, commission, or instrumentality of the state, or a city, county, town, village, school district, or other political subdivision of the state. Subsection (3) of this section shall not apply to a public employer with respect to its employees. Any public employer that is subject to subsections (1) and (2) of this section shall continue to be subject to those subsections.

290.512. 1. [No] Except as provided in subsection (2) of this section, no employer of any employee who receives and retains compensation in the form of gratuities in addition to wages is required to pay wages in excess of fifty percent of the minimum wage rate specified in sections 290.500 to 290.530, however, total compensation for such employee shall total at least the minimum wage specified in sections 290.500 to 290.530, the difference being made up by the employer.

2. Beginning January 1, 2019 and effective on the dates set forth below in this subsection, and notwithstanding the percentage established in subsection (1) of this section, no employer of any employee who receives and retains compensation in the form of gratuities in addition to wages is required to pay wages in excess of the percent set forth below in this subsection of the minimum wage rate specified in subsection (3) of section 290.502 or, where applicable, the minimum wage rate otherwise specified in sections 290.500 to 290.530:

(1) fifty-one percent, effective January 1, 2019;
(2) fifty-three, effective January 1, 2020;
(3) fifty-five percent, effective January 1, 2021;
(4) fifty-seven percent, effective January 1, 2022;
(5) fifty-eight percent, effective January 1, 2023;
(6) sixty percent, effective January 1, 2024;

however, in all cases, total compensation for such employee shall total at least the minimum wage specified in subsection (3) of section 290.502 or, where applicable, the minimum wage rate otherwise specified in sections 290.500 to 290.530, the difference being made up by the employer.

3. For purposes of this section, the term "public employer" means an employer that is the state or a political subdivision of the state, including a department, agency, officer, bureau, division, board, commission, or instrumentality of the state, or a city, county, town, village, school district, or other political subdivision of the state. Subsection (2) of this section shall not apply to a public employer with respect to its employees. Any public employer that is subject to subsection (1) of this section shall continue to be subject to that subsection at

the percentage set forth therein of the minimum wage rate specified in subsections (1) and (2) of section 290.502 or, where applicable, the minimum wage rate otherwise specified in sections 290.500 to 290.530.

[2.] 4. If an employee receives and retains compensation in the form of goods or services as an incident of his employment and if he is not required to exercise any discretion in order to receive the goods or services, the employer is required to pay only the difference between the fair market value of the goods and services and the minimum wage otherwise required to be paid by sections 290.500 to 290.530. The fair market value of the goods and services shall be computed on a weekly basis. The director shall provide by regulation a method of valuing the goods and services received by any employee in lieu of the wages otherwise required to be paid under the provisions of sections 290.500 to 290.530. He shall also provide by regulation a method of determining those types of goods and services that are an incident of employment the receipt of which does not require any discretion on the part of the employee.

290.527. Any employer who pays any employee less wages than the wages to which the employee is entitled under or by virtue of sections 290.500 to 290.530 shall be liable to the employee affected for the full amount of the wage rate and an additional [equal] amount equal to twice the unpaid wages as liquidated damages, less any amount actually paid to the employee by the employer and for costs and such reasonable attorney fees as may be allowed by the court or jury. The employee may bring any legal action necessary to collect the claim. Any agreement between the employee and the employer to work for less than the wage rate shall be no defense to the action. All actions for the collection of any deficiency in wages shall be commenced within [two] three years of the accrual of the cause of action.

290.529. Except in the circumstances set forth in section 290.523, all the provisions of sections 290.500 to 290.530 are severable. If any provision, including any section, subsection, subdivision, paragraph, sentence, or clause, of sections 290.500 to 290.530, or the application thereof to any person or circumstance, is found by a court of competent jurisdiction to be invalid, unconstitutional, or unconstitutionally enacted, such decision shall not affect other provisions or applications of sections 290.500 to 290.530 that can be given effect without the invalid, unconstitutional, or unconstitutionally enacted provision or application.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-084)

Subject

Initiative petition from Richard Von Glahn regarding a proposed amendment to Chapter 290 of the Revised Statutes of Missouri. (Received December 6, 2016)

Date

December 22, 2016

Description

This proposal would amend Chapter 290 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Lara Granich and **Missouri Jobs with Justice Voter Action** provided information as a proponent of the proposal to the State Auditor's office.

Robert Bonney, Chief Executive Officer of the Missouri Restaurant Association provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they assume that any potential costs arising from the adoption of this proposal can be absorbed with existing resources.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated they will defer to the Office of Administration regarding any costs associated with this initiative petition.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department because public employers are exempt.

Officials from the **Department of Health and Senior Services** indicated this proposal would have no direct fiscal impact on their department since government employees are exempt from its provisions. However, employees of certain entities that receive funding through the department's budget would be impacted, such as Medicaid Home and Community Based Services vendors/providers and Area Agencies on Aging.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition does not apply to public employers with respect to its employees. Therefore, this petition, if passed, would have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated it appears Sections 290.502.4 and 290.512.3 would exclude public employers from the provisions of 290.502 subsection (3) and 290.512 subsection (2). They are a part of the definition of public employers. Therefore they assume there would be no direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated they defer to the Office of Administration.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this petition will have no fiscal impact on their department. They defer to the Office of Administration - Budget and

Planning Division for a statewide response on how this petition may impact state revenues.

Officials from the **Department of Public Safety** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department. They defer to the Office of Administration for response to this fiscal note request.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no fiscal impact.

Officials from the **Office of Administration (OA)** indicated this proposal amends Sections 290.502, 290.512, 290.527, RSMo and adds Section 290.529, RSMo.

Section 290.502, RSMo, increases the minimum wage to $9.00 per hour, beginning January 1, 2019 and by another $1.00 per hour each year until it reaches $12.00 per hour beginning January 1, 2022. Thereafter, the minimum wage will be adjusted annually based on the increase/decrease in the cost of living.

Section 290.512, RSMo, increases the base salary for tipped employees. Effective January 1, 2019, employers must pay at least 51% of the minimum wage rate to tipped employees. Each year thereafter the rate increases until January 1, 2024 when tipped employees should be paid 60% of the minimum wage as established in Section 290.502, RSMo.

The proposal exempts public employers from both requirements; therefore, there would be no cost to the State of Missouri.

Because no tax rates are affected, there is no direct impact on general and total state revenues. However, these proposals may have several indirect affects which could impact revenue collections by an unknown amount, including but not limited to:

- Increased wages for certain employees. According to the US BLS, in 2015, Missouri had 57,000 hourly employees earning wages at or below the federal minimum wage;[1]
- Increased consumption by those employees;
- Lower overall employment (if employers choose to hold costs steady);

[1] http://www.bls.gov/opub/reports/minimum-wage/2015/home.htm

- Lower business investment (if employers' payrolls increase);
- Increased prices as firms pass–through labor costs.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact for their office as it would be exempt from the provisions set forth in the petition.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this would have no fiscal impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated no fiscal impact is anticipated if this proposal is adopted because cities are excluded from operation of the proposal.

Officials from the **City of Raymore** indicated there would be no direct fiscal impact on employee salaries. However there would be a potential increase cost in the capital projects. We have no way of predicting that value.

Officials from **University of Missouri** indicated we do not see an impact on the University of Missouri System.

Officials from **University of Central Missouri** indicated no fiscal impact.

Officials from **Missouri State University** indicated there will be no fiscal impact to their university for this fiscal note.

Officials from **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated the proposed statutory amendment will have no fiscal impact on their university.

Lara Granich and **Missouri Jobs with Justice Voter Action** provided the following information as proponents of this initiative petition.

Re: Fiscal Impact Analysis of Minimum Wage Initiative Petitions

Proposal 1 $15 by 2026 and Tipped Minimum Wage at 100% by 2028
Proposal 2 $15 by 2026 and Tipped Minimum Wage at 60% by 2024
Proposal 3 $15 by 2026 and Tipped Minimum Wage at 100% by 2028
Proposal 4 $15 by 2026 and Tipped Minimum Wage at 60% by 2024
Proposal 5 $15 by 2027 and Tipped Minimum Wage at 100% by 2028
Proposal 6 $15 by 2027 and Tipped Minimum Wage at 60% by 2024
Proposal 7 $14 by 2024 and Tipped Minimum Wage at 100% by 2028
Proposal 8 $14 by 2024 and Tipped Minimum Wage at 60% by 2024
Proposal 9 $13 by 2023 and Tipped Minimum Wage at 100% by 2028
Proposal 10 $13 by 2023 and Tipped Minimum Wage at 60% by 2024
Proposal 11 $12 by 2022 and Tipped Minimum Wage at 100% by 2028
Proposal 12 $12 by 2022 and Tipped Minimum Wage at 60% by 2024

This letter is from Lara Granich and Missouri Jobs with Justice Voter Action, proponents of the above-referenced initiative petitions. Pursuant to RSMo. Section 116.175, we write to submit the following fiscal impact information to assist your office in its analysis of the fiscal impact of the above-mentioned twelve proposed Minimum Wage Initiative Petitions.

The estimated net fiscal impact for each of the twelve versions of the initiative in the final phase-in year is summarized in the right-most column of Table 2 below. The estimated net fiscal impact for each version of the initiative for 2019 and 2020 – the first two fiscal years of implementation – is summarized in Table 3 below.

Our analysis estimates the impact of each of the twelve proposed initiative petitions on state and local sales and personal income tax revenue in Missouri. We follow the process that has been used in the past to estimate the impact of minimum initiative petitions on state and local sales and personal income tax, with some refinements. We also address certain claims that have been made by opponents in the past.

As these proposed initiatives exclude from the minimum wage increases public workers employed by the state or by local governments, the initiatives are not expected to have any direct impact on state and local payroll costs. Accordingly, we do not include in our analysis any such estimates.

I. Estimate of Number of Workers Affected Statewide and the Impact on Their Wages

Table 1. Summary of the Number of Affected Workers and Aggregate Wage Increases for the Final Year of Minimum Wage Phase-In.

Proposal	Year of Peak Minimum Wage (MW)	Proposed Peak MW	Tipped MW in Peak MW Year	Workers Affected by MW Increase	Aggregate Annual Wage Increase in Nominal Dollars
1	2026	$ 15.00	$ 13.50	1,117,399	$ 8,294,071,138
2	2026	$ 15.00	$ 9.00	1,117,399	$ 8,165,764,211
3	2026	$ 15.00	$ 13.50	1,117,399	$ 8,294,071,138
4	2026	$ 15.00	$ 9.00	1,117,399	$ 8,165,764,211
5	2027	$ 15.00	$ 14.25	1,097,200	$ 8,058,515,525
6	2027	$ 15.00	$ 9.00	1,096,645	$ 7,908,877,243
7	2024	$ 14.00	$ 11.20	1,044,718	$ 7,064,599,152
8	2024	$ 14.00	$ 8.40	1,043,118	$ 6,985,083,230
9	2023	$ 13.00	$ 9.75	949,801	$ 5,741,687,801
10	2023	$ 13.00	$ 7.54	944,495	$ 5,682,599,137
11	2022	$ 12.00	$ 8.40	867,022	$ 4,552,685,065
12	2022	$ 12.00	$ 6.84	858,952	$ 4,517,542,341

Note: Author's Analysis of American Community Survey (ACS) Data from 2014.

Across the twelve proposals analyzed, the total aggregate wage increase for workers in Missouri ranges from a low of $4.517 billion (Proposal 12) to a high of $8.294 billion under Proposals 1 and 3. While some proposals have the same final impact numbers, they have different impacts in the initial years (not listed) based on the relative pace of increases in earlier years. A full, year-by-year impact analysis is presented in Appendix Tables 1 through 12 below.

The wage impact of an increase in the Missouri minimum wage is calculated using the following procedure. The American Community Survey (ACS) Public Use Micro Sample for the most recent year available (2014) for the State of Missouri was downloaded from the US Census Bureau. The ACS was chosen over the Current Population survey because the ACS has a significantly larger sample. We followed the method of Perry, Thomason, and Bernhardt (2016) for calculating an hourly wage rate from the ACS based on observed total annual wage income, typical hours worked each week and weeks worked per year. Since ACS income figures are clustered around whole-numbers, we smoothed the wage distribution by randomly adding or subtracting $0.25 from each wage figure.

Wage adjustments were made only for those individuals earning less than the proposed minimum wage, or proposed tipped minimum wage. We did not make additional adjustments for the "ripple effect" of minimum wage increases on workers earning slightly above the new threshold. Recent evidence suggests that workers earning up to 15% above of the minimum wage also receive small increases in response to a minimum wage increase. (See Wicks-Lim (2006) and Dube, Giuliano and Leonard (2015)). Thus, the estimated impacts listed above are likely to be smaller than the actual impact of increasing the minimum wage to the proposed level.

All wage earners are included in this calculation. To be consistent with past estimates, public employees should have been excluded. Employees in the public sector were included because the ACS does not have a published variable that

allows for identification of public employees. This inclusion of public employees will have a minimal impact on our results.[1]

All wages from the 2014 survey were adjusted upward to account for inflation between the time of the survey and the time of measurement of the impact. Actual inflation was to adjust wages to 2015. For all subsequent years between 2016 and 2028, baseline wages were inflated by the annual average rate of change in the Consumer Price Index for Urban Workers (CPI-U) for the Midwest region. The 2015 and 2016 Missouri Minimum wage of $7.65 was adjusted by the same factor prior to measuring the impact of a change to the proposed minimum wage in 2019.

After these adjustments, the resulting hourly wage of all employees was compared to the proposed minimum wage. A total of twelve proposals were analyzed. For each proposal, we constructed a baseline wage scenario which used only basic wage changes from expected inflation rates to predict each ACS respondent's hourly wage rate in each year between 2019 and 2028. We then constructed a counterfactual, or "proposed" wage distribution for each worker under all twelve minimum wage proposed scenarios. Since the minimum wage proposals offered six different paths for raising the minimum wage for all non-tipped private sector workers, and two different wage paths for tipped workers (for each proposal), we create separate minimum wage changes for tipped and non-tipped workers. Specifically, we used information on a worker's occupation and observed wage levels to separately identify tipped workers and assign them the proposed tipped minimum wage in each year, rather than the higher non-tipped minimum wage.[2]

If the proposed minimum wage was less than the inflation-adjusted hourly earnings of an employee, then no impact was calculated. If the proposed minimum wage was more than the hourly earnings on an employee, then the difference between the inflation-adjusted hourly earnings (i.e. baseline) and the proposed minimum wage was calculated. That difference was multiplied by the number of hours the employee worked in the year to calculate the annual impact for that employee. The result was then multiplied by a weighting factor for that employee in the population. The total impact for the State of Missouri was then summed across all affected workers to generate a total estimated increase in wage income in the state.

II. Economic Literature on the Impact of Minimum Wage Increases on Employment

Next we review the economic literature on the impact of minimum wage increases on employment. Opponents often claim that minimum wage increases may reduce employment in a state. If that were true, then those employment reductions would result in reductions in state income and sales tax revenue or increases in unemployment-related costs to the state.

However, as explained in greater detail below, review of the most credible recent empirical research on the minimum wage shows that increases have had no discernible impact on aggregate employment levels. Larger $15 minimum wage increases, such as those adopted recently in New York, California, Seattle and other jurisdictions, have not yet been studied to determine whether the same holds true for them. While it is possible that there may be some employment

[1] For Missouri's state employees, this can be validated by viewing the earnings of all state employees at: http://mapyourtaxes.mo.gov/MAP/Employees/. Larger counties and cities will also have almost all public employees earning more than the highest proposed minimum wage. Local public employees in small counties and towns may have some public employees who earn less than the highest proposed minimum.

[2] We defined tipped workers as those employed in occupations that typically receive a large share of income as tips. These occupations were 'Bartenders', 'Waiters and Waitresses', 'Food Servers, Non-restaurant' and 'Miscellaneous food preparation and serving related workers including dining room and cafeteria attendants and bartender helpers.'

losses from such larger minimum wage increases as the result of increased use of automation or other factors, we offset this potential negative effect by not also calculating the positive potential job growth stemming from multiplier effects of the spending of minimum wage workers who receive substantial raises. There is substantial research to indicate that increases in the minimum wage have multiplier effects that increase the direct effects. For this reason, and because of the likely increases in wages to individuals who earn above the proposed minimum wages, the wage and tax impacts summarized in the table are considered conservative estimates relative to the total impact that would occur as a result of increasing the minimum wage to the proposed levels.

Economists have conducted hundreds of studies of the employment impact of the minimum wage. A meta-study—a formal statistical study of studies—by Doucouliagos and Stanley (2009) reviewed all the research conducted over the last three decades on the employment impact of minimum wage increases on teenagers in the United States. The researchers concluded that the bulk of the studies find that higher minimum wages have had little or no discernible effect on the employment prospects of low-wage workers. Their study followed a rigorous, peer-reviewed procedure and has the advantage of using a set of predetermined, objective criteria for weighing the validity of statistical findings across studies with different results. (Source: Doucouliagos, Hristos and T. D. Stanley. 2009. "Publication Selection Bias in Minimum-Wage Research? A Meta-Regression Analysis." British Journal of Industrial Relations, vol. 47, no. 2, pp. 406–28.)

Recent theoretical and empirical research emphasizes several explanations for the consistently negligible employment impacts of moderate increases in the minimum wage. First, relative to total wage costs, minimum wage increases are small. Second, employers and workers appear to respond to minimum-wage increases in many ways that reduce the direct cost to employers and substantially reduce or eliminate the need to cut employment.

Probably the most important economic response to a higher minimum wage is a reduction in turnover. At higher wages, employers fill vacancies faster and retain employees longer, boosting total employment and average productivity per worker while reducing direct and indirect training costs. Dube, Lester, and Reich (2012), for example, examined the effect of the minimum wage on labor turnover among teens and restaurant workers. They find "...striking evidence that separations, new hires, and turnover rates for teens and restaurant workers fall substantially following a minimum wage increase..." (p. 2) Their findings, using nationally representative data, are consistent with local case studies of the minimum wage and related "living wage" laws, including Dube, Naidu, and Reich's (2007) analysis of the San Francisco city-wide minimum wage; Fairris's (2005) study of local government contractors in Los Angeles; Howes (2005) on homecare workers in California; and Reich, Hall, and Jacobs (2005) on workers at the San Francisco airport. (Sources: Dube, Arindrajit, T. William Lester, and Michael Reich. 2012. "Minimum Wage Shocks, Employment Flows and Labor Market Frictions." "Living Wage Policies at the San Francisco Airport: Impacts on Workers and Businesses." *Industrial Relations*, vol. 44, no. 1, pp. 106–138.)

Employers also appear to respond to increases in the minimum wage by taking measures to boost productivity. Hirsch, Kaufman, and Zelenska's (2011) study of the impact of the federal minimum wage increase on 81 fast-food restaurants in Georgia and Alabama, for example, asked fast-food managers about the scope for efficiency improvements in

response to the minimum-wage rise. About 90% of managers indicated that they planned to respond to the minimum wage increase with increased performance standards such as "requiring a better attendance and on-time record, faster and more proficient performance of job duties, taking on additional tasks, and faster termination of poor performers." (p. 27) Roughly the same share of managers said that they sought to "boost morale" by presenting the minimum wage increase as a "challenge to the store" and using this as a way "to energize employees to improve productivity." (pp. 28–29) Based on their interviews with store managers, the researchers concluded that a minimum wage increase may function as a "catalyst or shock that forces managers to step out of the daily routine and think about where cost savings can occur." (p. 29) (Source: Hirsch, Barry T., Bruce Kaufman, and Tetyana Zelenska, "Minimum Wage Channels of Adjustment." IZA Discussion Paper No. 6132. Germany: Institute for the Study of Labor. http://www2.gsu.edu/~ecobth/IZA_HKZ_MinWageCoA_dp6132.pdf)

A higher minimum wage may also motivate workers to work harder, independently of any actions by employers to increase productivity. According to "efficiency wage" theory, wages above the competitive-market rate may elicit greater work effort for several reasons. As Carl Shapiro and Joseph Stiglitz (1984) have argued, higher pay increases the cost to workers of losing their job, potentially inducing greater effort from workers in order to reduce their chances of being fired. George Akerlof (1982), arguing from a more sociological point of view, has suggested that workers may see higher wages as a gift from employers, leading workers to reciprocate by working harder. (Sources: Shapiro, Carl and Joseph E. Stiglitz. 1984. "Equilibrium unemployment as a worker discipline device." *American Economic Review*, vol. 74, no. 3, pp. 433–44; Akerlof, George A. 1982. "Labor contracts as partial gift exchange." *Quarterly Journal of Economics*, vol. 97, no. 4, pp. 543–69.)

We therefore conclude that the proposed increase in the Missouri minimum wage would have no discernible impact on the employment levels of low-wage workers. Note too, we conclude the same as to small businesses. In fact, the proposed increases will not affect some small businesses as the state minimum wage law exempts individuals employed by any retail or service business that has a gross volume of sales made or business done of less than $500,000 annually. Accordingly, we do not factor in reductions in employment, or any resulting decrease in sales tax or income tax. We also do not project any increased unemployment insurance costs—both because we do not project any resulting job losses, and, additionally, because unemployment insurance costs are paid for by employer premiums, and so are ultimately not a cost to the state.

III. State and Local Sales and Personal Income Tax Revenue Impact of Raising the Minimum Wage

Based on the wage impact figures calculated above, and the understanding that the minimum wage increases would be unlikely to result in offsetting job losses, we next calculate the impact of the projected wage increases on state and local sales and personal income tax revenue in Missouri. We project only the direct impact of the twelve minimum wage increase scenarios on such tax revenue. We do not attempt to project the additional impact through a GDP multiplier effect, or the potentially higher sales taxes generated if employers offset wage increases with slightly higher prices (which would be taxable). Studies are mixed as to whether businesses increase prices by even small amounts when the minimum wage increases.

Increase in Personal Income Tax Revenue and Sales Tax Revenue Due to Increased Wages. In order to determine the projected increase in personal income tax revenues that would result directly from the increased wages, we had to develop assumptions about the effective income tax rates of the affected workers. We made the following assumptions with respect to the effective tax rate:

1. That 25% of affected workers can be claimed as a dependent on another party's Missouri income tax return and, as a result, would pay an effective tax rate of 6.0% on the increase in income;
2. That 50% of the affected workers would file as single taxpayers, would claim one deduction of $2,100, and would be entitled to a standard deduction of $5,800. This would result in an effective tax rate of 2.47%;
3. The remaining 25% would, we assumed, pay no additional Missouri income tax. In light of these assumptions, the increased Missouri income tax revenue for each petition version can be calculated as follows: (total wage increase * 25% * 6.0%) + (total wage increase * 50% * 2.47%) + (total wage increase *25% * 0%).

Sales Tax Revenue. The State of Missouri imposes a 4.225% state sales tax on those items that are not exempt from the sales tax base. In addition, the average local sales tax rate is 2.95%. As a result, the average Missouri net sales tax rate is 7.175%. To estimate the share of income that is spent on goods and services that are subject to sales taxes, we used data from the 2015 Consumer Expenditure Survey (CES) for the US to estimate the share of income spent on categories that are subject to sales taxes. The CES summary tables list average spending per consumer across 20 different categories (e.g. housing, transportation, food away from home) and we categorized each spending item as taxable or non-taxable and then calculated the share of spending that was taxable.[3] The resulting rate was 30.3%.

Based upon the above assumptions, and the total wage increase calculations for each version of the petition, we estimate that the increase in state and local sale tax revenue, and in state income tax revenue, resulting from the increased wages would be as follows for the final year of the minimum wage phase-in, for each of the twelve versions of the initiative:

Table 2. Summary of the Impact of Minimum Wage Increases on State and Local Sales and Income Taxes in Final Year of Full Minimum Wage Phase-In.

Proposal	Final Year of Minimum Wage Phase-In	State & Local Sales Tax Revenue Increase	Personal Income Tax Revenue	Total Sales and Personal Income Tax Revenue Increase
1	2026	$ 180,361,529	$ 226,842,846	$ 407,204,375
2	2026	$ 177,571,387	$ 223,333,651	$ 400,905,039
3	2026	$ 180,361,529	$ 226,842,846	$ 407,204,375
4	2026	$ 177,571,387	$ 223,333,651	$ 400,905,039
5	2027	$ 175,239,175	$ 220,400,400	$ 395,639,574
6	2027	$ 171,985,165	$ 216,307,793	$ 388,292,957
7	2024	$ 153,625,630	$ 193,216,787	$ 346,842,417
8	2024	$ 151,896,490	$ 191,042,026	$ 342,938,516
9	2023	$ 124,857,814	$ 157,035,161	$ 281,892,975
10	2023	$ 123,572,881	$ 155,419,086	$ 278,991,968
11	2022	$ 99,001,953	$ 124,515,937	$ 223,517,889
12	2022	$ 98,237,745	$ 123,554,783	$ 221,792,528

[3] Specifically, the categories we assumed to be subject to state and local sales taxes are: food, household furnishings and equipment, vehicle purchases, gasoline and motor oil, entertainment, and all other expenditures. We assumed that 50% of the spending on the category "apparel and services" was taxable.

Note: Author's Analysis of American Community Survey (ACS) data from 2014 and fiscal impact assumptions described above. All dollars are in nominal figures.

As described in Table 2 above, the final fiscal impact of the proposed minimum wage increases varies based on the ultimate level of the minimum wage and the degree of tipped minimum wage phase-out. The estimates of the total fiscal benefit range from $221 million to $407 million annually.

Section 23.140, RSMo., indicates that the fiscal note shall address the cost of the proposed legislation to the state for the first two fiscal years—which, in the case of the proposed initiatives, will be 2019 and 2020. Table 3 below summarizes our projected total sales and personal income tax revenue increases for years 2019 and 2020 for each of the twelve versions of the initiative:

Table 3. Summary of the Impact of Minimum Wage Increases on State and Local Sales and Income Taxes in 2019 & 2020

Proposal	Total Sales and Personal Income Tax Revenue Increase—2019	Total Sales and Personal Income Tax Revenue Increase—2020
1	$ 60,008,101	$ 88,368,944
2	$ 59,882,683	$ 88,058,046
3	$ 93,306,606	$ 123,377,155
4	$ 93,142,857	$ 122,961,967
5	$ 91,491,028	$ 117,027,046
6	$ 91,328,763	$ 116,631,083
7	$ 91,491,028	$ 127,734,685
8	$ 91,328,763	$ 127,305,194
9	$ 91,491,028	$ 127,734,685
10	$ 91,328,763	$ 127,305,194
11	$ 91,491,028	$ 127,734,685
12	$ 91,328,763	$ 127,305,194

Complete year-by-year summaries of the fiscal benefits for all twelve versions of the proposed initiative can be found in Appendix tables 1 through 12.

Please also consider the following with reference to section 23.140, RSMo. The proposed measures will not establish a program or agency that will duplicate an existing program or agency. There is not a federal mandate for the proposed measures (although the United States Department of Labor currently supports minimum wage increases). The proposed measures will not have significant direct fiscal impact upon political subdivisions of the state because the measures exclude employees of public employers. And, the proposed measures do not require new physical facilities. We reference the economic impact of the proposed measures on small businesses in Section II above.

We hope that this information is useful to your office as you prepare your analyses of the petitions.

Respectfully submitted,

Lara Granich
Missouri Jobs with Justice Voter Action

Re: Initiative Petitions 2018-073 through 2018-084

Dear Mr. Halwes,

I write on behalf of Robert Bonney. Mr. Bonney is the Chief Executive Officer of the Missouri Restaurant Association. Please consider this letter and the accompanying studies as his fiscal impact statement as an opponent of Initiative Petitions 2018-073 through 2018-084 (the "Initiative Petitions"). If passed, any of these twelve initiatives would have a substantial negative impact on state and local governments, as well as Missouri small businesses. Those effects are both direct (as noted in Section 1) and secondary (as noted in Sections 2 through 5). The direct effects stem from higher labor and contracting costs that the state and its political subdivisions will incur, despite the Initiatives' effort to exclude government workers from the mandate.

The indirect effects will present a debate this Office has seen before. The proponents of the Initiative Petitions will once again rely on data sourced from political activist groups who claim increases in the minimum wage only serve to create new taxable income. The reality is that such groups approach this issue with political bias. Their analysis is one-sided because it completely ignores the fact that a wage increase does not "create" income from thin air; instead, it is an economic transfer from Missouri businesses to workers. Missouri businesses must pay the new wages "created" by the increases. Political activists' models fail to account, then, for two specific manifestations of the "debit" side of this transfer: reductions in employment, and the reduction in corporate income tax paid based upon business done in Missouri.

The failure to account for any employment effect at any proposed wage increase—even a near doubling of the minimum wage to $15—is particularly puzzling, because Missouri's most populous areas border Illinois and Kansas. These states, respectively, have minimum wages of $8.25 and $7.25. Neither state adjusts the minimum wage for inflation. Likewise, the second

effect—loss of corporate income tax revenues—is a mathematical certainty. Missouri businesses will be the source of the wage increase, which will lower their own taxable income. Assuming a one-to-one substitution of "created" wages for lost corporate income, the difference in the rates at which these two types of income are taxed will result in a net decrease in state revenue. A dollar from increased wages is taxable by state government in Missouri at 6% or substantially less, whereas Missouri's corporate income tax rate is 6.25%.

On top of these two types of negative outcomes—lower employment and lower state tax revenues—there may be second-order effects to small businesses because they lack the access to capital to weather price fluctuations; they may not survive at all because they may not have the flexibility to simply cut employment, shifting their reliance to capital instead of labor resources, or suffering a decrease in production and revenue.

In short, much of the fiscal impact regarding the current crop of wage-related ballot measures is secondary: they cause transfers of wealth within (or out of) the state economy, and those transfers of wealth then create second-order effects for state and local governments via their collection of tax revenues and provision of welfare services for the unemployed or less-employed. Because these fiscal notes call for the Auditor operate in the area of secondary effects, it is critical that she treat both sides of the wealth transfer equally, and refrain from assessing only one half of the wage increase equation.

1. Direct Labor Cost Impact on State and Local Government Budgets

As noted to the State Auditor's Office previously by Dr. David Macpherson, a nationally prominent labor and economics expert, there are two ways to measure labor cost on state and local government budgets. First, one can use the information included in fiscal note responses from state and local government entities. It is important to note that these fiscal notes provide an incomplete and, therefore, too-low estimate of labor cost. Few state and local government entities respond to requests for a fiscal note response, and those that do respond often ignore important effects.

Second, data from the U.S. Census Bureau's Current Population Survey (CPS) can be used to calculate increased labor cost to state and local government entities in Missouri. To combat this time-honored analysis, and in a blatant attempt to manipulate the fiscal note process, the Initiative Petitions provide that they will raise the minimum wage for private workers, but not for workers employed by state or local governmental entities. No conceivable justification exists for solely raising the minimum wage on private businesses. Whatever the disparity between the value of total compensation at a private business and at a government employer, that disparity does not approach the wage adjustments at issue here, ranging from an inflation adjusted wage increase of 68.54% (($15-$8.90)/$8.90) in Initiative Petitions 2018-073 through 2018-076 to a wage increase of 42.01% (($15-$8.45)/$8.45) in Initiative Petitions 2018-083 through 2018-084.

Moreover, it is unreasonable to assume that on a sustained basis public employers, as defined in the Initiative Petitions, would be able to maintain dramatically lower wage levels than

private businesses. Public employers would lose staff employable at higher rates in the private market, imposing substantial costs on government productivity. Using the method traditionally employed by labor economists and followed by the Auditor's office, one can calculate the annual wage costs to state and local governmental entities, based on the annual wage cost for each state and local government worker in the ORG CPS, as detailed on page 6 of Dr. Macpherson's 2012 report, as well as in Dr. Macpherson's 2014 report, attached hereto as **Exhibit A and Exhibit B**. Even if the auditor finds that a specific estimate of costs is not determinable, the auditor should note that the initiative is "likely to result in significant costs to state and local governmental entities" through the form of higher wage costs and higher contracting costs.

The proponents of the Initiative Petitions may argue that the Auditor should abandon any state and local cost estimates altogether. The proponents will argue that provisions they have inserted in the statute would mean that state and local government entities will not have to pay higher wages to their employees. Setting aside unjustifiable discrimination against private employers (and "public employees"), the provision is of uncertain legal effect and constitutionality. A "public employer," defined in the initiatives as "the state or a political subdivision of the state" still incurs substantial costs for wages of individuals that are "private employees," rather than "public employees." Cleaning services, food service, and other essential services often rely on state contracts with outside vendors. Sometimes, a contract rate may vary depending on the cost of labor. Even if the contract rate is fixed, it must be re-bid periodically, and that bidding process would take into account the new minimum wage. Plainly, the initiative would impose higher costs for state and local governments in contracting with any private entity and its employees. As a matter of law, it would be insufficient and unfair for the Auditor's fiscal note or summary to simply assume that these costs to state and local governmental entities do not exist.

2. Cost of Unemployment Benefits

a) The effect of inflation on Missouri's minimum wage

CPS–ORG data show that between 2007 and 2015, median nominal wages for adult (25–59 years old) workers in the U.S. grew by 1.68 percent a year. However, Missouri's minimum wage is currently adjusted using "the percentage increase or decrease as of the preceding July over the level as of July of the immediately preceding year of the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W)." Section 290.502, RSMo. Coincidentally (or perhaps not), the CPI-W, over the period from 2006 to 2016, also increased at an average rate of 1.68 percent a year.

Year	CPI-W	Observed inflation %
2006	199.2	
2007	203.7	0.022590361
2008	216.304	0.061875307

2009	210.526	-0.0267124
2010	213.898	0.016017024
2011	222.686	0.041085003
2012	225.568	0.01294199
2013	230.084	0.02002057
2014	234.525	0.019301646
2015	233.806	-0.00306577
2016	234.771	0.004127353

Using Missouri's current inflation-adjusted minimum wage rate and an assumed, constant 1.68 percent increase in the CPI-W, the minimum wage in Missouri will be as follows:

Year	Estimated Minimum Wage
2016	$7.65 (observed)
2017	$7.70 (observed)
2018	$7.85
2019	$8.00
2020	$8.15
2021	$8.30
2022	$8.45
2023	$8.60
2024	$8.75
2025	$8.90
2026	$9.05
2027	$9.20

b) Calculating job loss attributable to increased minimum wage

At least one outside economist, James Sherk, has already provided an estimate for job loss in Missouri based on a $15 minimum wage. Mr. Sherk calculated the effect of a $15 minimum wage implemented in 2021. Mr. Sherk's figures accounted for inflation by estimating the present value of $15.00 in 2021, rather than estimating an absolute figure for wage inflation in Missouri. Mr. Sherk calculated the present value of $15.00 in 2021 to be $13.57, per hour, based on wage inflation of 1.68 percent. Mr. Sherk evaluated the change from $7.65 per hour to $13.57 per hour (a 77.39% increase), exclusive of agricultural workers. Cumulatively, Mr. Sherk

calculated this 77.39 percent increase in wages to reduce employment in the affected workforce by (0.7739*0.677) 52.39%.

Mr. Sherk calculated that approximately 40.9% of Missouri's Wage and Salary Workers would be affected by such a $15 minimum wage. Mr. Sherk's calculations reveal that a $15 minimum wage in 2021 would be expected to reduce the number of full-time equivalent jobs in Missouri by approximately 218,000. Based on CPS–ORG data, these figures reveal an affected workforce of approximately 416,086 workers impacted by a $15 minimum wage increase in 2021.

However, in 2014, Dr. Macpherson found, using more conservative, national-level Congressional Budget Office data, that an increase to a $10.10 minimum wage, effective January 1, 2015, would eliminate about 15,700 jobs in Missouri. Dr. Macpherson analyzed the effect of a Missouri $10.10 minimum wage using a model suitable to a national analysis. This analysis predicted a loss of 15,700 Missouri jobs based on a wage increase from $7.50 in 2014 to $10.10 in 2015 (a 34.67% increase).

On the whole, the analysis by Mr. Sherk is more instructive here, since it anticipates a state level change to $15.00. The most accurate way to determine the estimate of Workers Affected would be to analyze the CPS–ORG data. However, without such data readily available in the time constraints imposed by the fiscal note process, it is reasonable for estimation purposes to assume Mr. Sherk's figures are evenly distributed. Assuming that worker data follows an equal distribution, the Initiative Petitions would be expected to result in the following job losses:

Year of final prescribed wage increase	Wage without IP	Wage mandated by IP	Percentage increase	Percentage of affected workers who lose jobs (Percentage Increase x 0.677 Elasticity)	Estimate of Workers Affected	Estimate of Missouri Workers Unemployed by Initiative
2022	$8.45	$12.00	42.01%	28.44%	225,876	64,244
2023	$8.60	$13.00	51.16%	34.64%	275,076	95,279
2024	$8.75	$14.00	60.00%	40.62%	322,589	131,036
2026	$9.05	$15.00	65.75%	44.51%	353,481	157,334
2027	$9.20	$15.00	63.04%	42.68%	338,952	144,666

c) The best estimate for a price elasticity of demand for low-skilled labor is -0.677.

As noted by Mr. Sherk, starting wages of $15.00 per hour mean that full-time employee must create at least $38,700 a year in value for his or her employer (including wages, employer

payroll taxes, and mandatory healthcare benefits). High minimum wages and mandatory benefit costs make it much harder for less-experienced and less-skilled workers to find jobs, particularly full-time work.

Recent labor economics scholarship has revealed that, accounting for publication bias, a state-specific elasticity of demand for less-skilled workers is, on average, approximately -0.677, though some estimates are even higher, around -1.0.[1] "[E]conomists have extensively studied how businesses respond to higher wages overall, not just minimum-wage increases. On average these studies find a 10 percent increase in labor costs causes firms to reduce employment of less-skilled workers by 6.8 percent in the long run."[2]

While these elasticity estimates are substantial in absolute terms, there is reason to believe that such estimates might still understate the impact of a Missouri state-specific effort to increase the minimum wage. This is so for several reasons. First, traditionally, labor economists view labor as a reasonably difficult input to substitute; however, Missouri businesses have readily available options. There are relatively few barriers to doing business in Missouri's border states, and businesses can easily relocate across a state line to take advantage of more favorable wage (and tax laws). Additionally, substantially raising the cost for Missouri labor, relative to labor sources in other states and other countries, is likely to force many manufacturing jobs in Missouri to disappear entirely. Automation is also a significant risk. The substitution of labor is becoming increasingly easy due to technology advancements and the "sharing" economy, where fewer individuals are "employees" covered by the minimum wage. Finally, a labor "price shock" may result in significant decreases in the demand for goods and services. People make behavioral changes to avoid higher costs, including eating out less often and generally decreasing consumption (or shifting their activities to consumption involving comparatively low amounts of labor) wherever possible.

d) Unemployment Benefit Costs

We derived an average unemployment payout by calculating the expected weekly unemployment benefit amount. Based on current data, the expected unemployment weekly benefit amount of a worker making $7.65 an hour, on a 40 hour workweek, is $159.30 per week,

[1] Sherk, James, "How $15-per-Hour Minimum Starting Wages Would Affect Each State," The Heritage Foundation, http://report.heritage.org/ib4601.

[2] "The coefficients on these estimates imply an elasticity of –0.677 for a study published in 2012 (the most recent year in their data) of long-run unconditional labor demand for low-skilled labor in the U.S., estimated using industry-level administrative panel data and a structural form model." "Estimates that do not account for publication bias tend to slow a long-run elasticity closer to –1.0. See, for example, George Borjas, Labor Economics, 6th ed. (Columbus, OH: McGraw-Hill, 2013), Chapter 4: 'The evidence also suggests that the estimates of the long-run labor demand elasticity cluster around –1, so the long-run labor demand curve is indeed more elastic than the short-run curve.' " Sherk, available at http://report.heritage.org/ib4601.

for 20 weeks.[3] The expected unemployment weekly benefit amount of a worker making $11.99 an hour is $249.39 per week. The expected unemployment weekly benefit amount of a worker making $12.99 an hour is $270.19 per week. The expected unemployment weekly benefit amount of a worker making $13.99 an hour is $290.99 per week. The expected unemployment weekly benefit amount of a worker making $14.99 an hour is $311.79 per week. We assume that workers will seek unemployment insurance for the full twenty weeks authorized under Missouri law, because unemployment attributable to an increase in the minimum wage is structural. In this case, structural unemployment occurs because workers' job skills do not meet the established "price floor" of labor, rendering the worker's skills unmarketable. Assuming an even distribution of workers affected, the average unemployment benefit cost to the state for a worker is calculated as follows:

- For Initiative Petitions 2018-073 through 2018-078, [($159.30+$311.79)/2]*20 = $4,710.90
- For Initiative Petitions 2018-079 through 2018-080, [($159.30+$290.99)/2]*20 = $4,502.90
- For Initiative Petitions 2018-081 through 2018-082, [($159.30+$270.19)/2]*20 = $4,294.90
- For Initiative Petitions 2018-083 through 2018-084, [($159.30+$249.39)/2]*20 = $4,086.90

Consistent with Dr. Macpherson's 2012 report, it would be reasonable for the Auditor to assume that 35% of unemployed workers will receive unemployment benefits. Combining these numbers leads to the following estimates:

Year of final prescribed wage increase	Estimate of Missouri Workers Unemployed by Initiative	Estimated Unemployment Amount Per Worker	Estimated Total Unemployment Benefits Paid	Average Cost of Annual Unemployment Benefits Paid by State
2022 ($12)	64,244	$4,086.90	$91,895,081.93	$22,973,770.48
2023 ($13)	95,279	$4,294.90	$143,224,223.60	$28,644,844.72

[3] https://labor.mo.gov/DES/Claims/calculator. A 2015 law decreased the unemployment benefit period from 20 weeks to 13 weeks, but the Supreme Court of Missouri struck down the law in July 2016.

2024 ($14)	131,036	$4,502.90	$206,514,130.35	$34,419,021.73
2026 ($15)	157,334	$4,710.90	$259,415,324.82	$32,426,915.60
2027 ($15)	144,666	$4,710.90	$238,527,470.79	$26,503,052.31

3. Impact on State Income Tax Revenue

The 2012 analysis prepared by Dr. Macpherson may also be used as a reference in calculating the effect of the initiative petitions on state income tax revenue. Here, again, it is reasonable to assume that our "affected workers" are evenly distributed, though precise CPS–ORG data would also provide a reliable estimate. Here, the increased income tax revenue is the additional income tax paid by workers whose wages increase. There is a loss of revenue, however, in the form of decreased income tax paid by workers whose wages decrease and businesses who absorb the increased cost of labor, rather than passing it along to customers.

For the purposes of these estimates, we assume that workers work 40 hours a week and 52 weeks per year:

Year of final prescribed wage increase	Estimate of Workers Affected	Estimate of Missouri Workers Unemployed by IP	Estimate of Missouri Workers with Increased Wages	Annual Increase in Wages Paid to Workers who get Wage Increase in Final Year	Annual Decrease in Wages Paid to Workers now Unemployed
2022 ($12)	225,876	64,244	161,632	$596,746,272.84	$237,187,559.20
2023 ($13)	275,076	95,279	179,797	$822,752,260.32	$336,905,136.41
2024 ($14)	322,589	131,036	191,553	$1,045,881,167.64	$442,900,455.01
2026 ($15)	353,481	157,334	196,147	$1,213,758,000.24	$482,701,950.51
2027 ($15)	338,952	144,666	194,286	$1,171,933,152.00	$421,267,392.00

These net wage increases will lead to corresponding increases in state income tax collections. Traditionally, it has been assumed that about 50% of affected workers will pay 6% income tax, while the other 50% of workers pay no state income tax. This assumption may be

less accurate at the higher wage increases contemplated by the Initiative Petitions. Accordingly, figures are also displayed assuming that about 75% of affected workers will pay 6% income tax, while the other 25% of workers pay no state income tax.

Annual Net Increase in Wages Paid To Workers	Annual Income Tax Increase from Wage Increase (50% pay tax)	Annual Income Tax Increase from Wage Increase (75% pay tax)
$359,558,713.64	$10,786,761.41	$16,180,142.11
$485,847,123.91	$14,575,413.72	$21,863,120.58
$602,980,712.63	$18,089,421.38	$27,134,132.07
$731,056,049.73	$21,931,681.49	$32,897,522.24
$750,665,760.00	$22,519,972.80	$33,779,959.20

Based on these figures, Missouri businesses must also decide whether to pass along any increase in wage costs (wages and mandatory payments).[4]

Year of final prescribed wage increase	Annual Cost to Business from Increased Wage in Final Year of Increase	Annual Decreased Corporate Income Tax if cost is fully absorbed	Annual Decreased Corporate Income Tax if cost is 50% absorbed
2022 ($12)	$642,397,362.71	$40,149,835.17	$20,074,917.58
2023 ($13)	$885,692,808.24	$55,355,800.51	$27,677,900.26
2024 ($14)	$1,125,891,076.96	$70,368,192.31	$35,184,096.16
2026 ($15)	$1,306,610,487.26	$81,663,155.45	$40,831,577.73
2027 ($15)	$1,261,586,038.13	$78,849,127.38	$39,424,563.69

Assuming businesses absorb half of the cost of increased wages, and 75 percent of affected workers pay the new, higher taxes, the effect on state income tax collections is estimated to be:

[4] A healthcare benefit cost estimate is not available based on the time limitations imposed by this fiscal note.

Year of final prescribed wage increase	Annual Net Income Tax Revenue Loss
2022 ($12)	($3,894,775.47)
2023 ($13)	($5,814,779.68)
2024 ($14)	($8,049,964.09)
2026 ($15)	($7,934,055.49)
2027 ($15)	($5,644,604.49)

4. Sales tax revenue gain or loss

Projecting any increase in sales tax revenue resulting from an increased minimum wage would require the auditor's office to conclude, based on data separate and apart from the sheer conjecture typically offered by political activist groups: (1) the net effect on consumer disposable income and (2) the percentage of a consumer's disposable income that is spent on goods subject to the sales tax, taking into consideration that the scope of Missouri's sales tax has been truncated by a voter-approved constitutional amendment from November 2016.

Typically, the Auditor's office multiplies the total increase in worker earnings (which should be adjusted for employment reductions) and multiplies the result by 25 percent, then multiplying that figure by the Missouri the population weighted combined average state and local sales tax in Missouri, 7.81%.[5] Based on this estimate, the population-weighted combined average local sales tax is 3.585%.

However, it would be deceptive to fail to account for sales tax losses from workers whose wages are eliminated or sales tax losses from reduced business profits (attributable to the higher wages paid), which will lower spending by business owners. The first figure is calculable by determining the total annual wages (adjusted for employment deductions) for all workers who lose jobs due to a minimum wage hike, multiplied by 25 percent. The second number is

[5] http://taxfoundation.org/sites/taxfoundation.org/files/docs/LOST--2015.png.

calculable by multiplying the total increase in worker earnings (multiplied by 1.0765 to account for Social Security and Medicare taxes) by approximately 15 percent.[6]

Year of final prescribed wage increase	Annual Net Increase in Wages Paid To Workers	New Wages Spent on Sales Tax Items	Annual Cost to Business from Increased Wage	Annual Business Income No Longer Included in Sales Tax Base (50% passed-through)
2022 ($12)	$359,558,714	$89,889,678	$642,397,363	($96,359,604)
2023 ($13)	$485,847,124	$121,461,781	$885,692,808	($132,853,921)
2024 ($14)	$602,980,713	$150,745,178	$1,125,891,077	($168,883,662)
2025 ($15)	$731,056,050	$182,764,012	$1,306,610,487	($195,991,573)
2026 ($15)	$750,665,760	$187,666,440	$1,261,586,038	($189,237,906)

Accordingly, the annual net losses in sales tax revenue, and total tax losses are as follows:

Year of final prescribed wage increase	Annual Net Income Tax Revenue Loss	Annual Net Loss in State Sales Tax	Total Annual Loss in State Tax Revenue	Annual Net Loss in Local Sales Tax
2022 ($12)	($3,894,775.47)	($273,354.37)	($4,168,129.84)	($231,946.85)
2023 ($13)	($5,814,779.68)	($481,317.93)	($6,296,097.61)	($408,408.23)
2024 ($14)	($8,049,964.09)	($766,350.92)	($8,816,315.01)	($650,264.63)
2026 ($15)	($7,934,055.49)	($558,864.44)	($8,492,919.93)	($474,208.05)
2027 ($15)	($5,644,604.49)	($66,394.43)	($5,710,998.92)	($56,337.05)

[6] This estimate would also need to be adjusted to reflect certain employers' mandate under the Affordable Care Act to provide healthcare coverage and pay 60 percent of such coverage.

Graves Garrett LLC

5. Damage to small business

Additionally, any proponent or opponent fiscal note submission is required, pursuant to Missouri law, to state the impact of the initiative on small businesses. According to analysis by the Employment Policies Institute, 40 percent of the minimum wage workforce is employed at businesses with fewer than 50 employees. [7] The impact on extra costs to small business may be more significant than even this 40% figure suggests. Small businesses are more easily shut down by input price increases than large businesses, which have greater access to capital to weather the storm. Clearly, small businesses that do not shut down due to increases in the minimum wage will pay higher costs, estimated at about 40% of business' total increased costs, described above.

Conclusion

In conclusion, the State Auditor should attempt to quantify the increased cost to be borne by state and local government entities through increased contracting costs as a result of an increase to the minimum wage. This direct cost is outlined in Section 1.

Indirect costs are outlined in Sections 2 through 5, and show a net loss. Although such second-order effects more difficult to predict, a net loss is easily the most likely outcome. Significantly, this result is only obtainable if the Auditor reviews both the "credit" and "debit" sides of the transfer of wealth from businesses to workers. The Auditor should refrain from taking the proponents' likely invitation to consider and present only the "credit," side, and should attempt to provide a complete picture of all effects of a minimum wage increase, including the loss of revenue to state and local governments from individuals who lose employment. Only conveying (or quantifying) the potential for gain, without fairly conveying the likelihood of net loss, would be deceptive and unfair.

Should you desire further detail or have any questions about this fiscal impact statement, please do not hesitate to contact me.

Sincerely,

Edward D. Greim

FISCAL ANALYSIS
OF
PROPOSED STATUTORY INITIATIVE PETITIONS 2012-084 AND 2012-085

I. Introduction

This report was undertaken at the request of counsel representing plaintiffs in the case of Victor Allred versus Robin Carnahan and Thomas Schweich. As part of the basis of the lawsuit, the plaintiffs allege that the fiscal note summaries for proposed statutory initiative petitions 2012-084 and 2012-085 are insufficient and unfair. I was asked by counsel to evaluate the fiscal impact of proposed statutory initiative petitions 2012-084 and 2012-085.

The results of my analysis indicate:

(1) labor costs to state and local government entities, based on state auditor fiscal notes, will rise by more than $1,352,182. A more inclusive estimate indicates that state and local government labor costs will increase by $16,003,712;

(2) unemployment benefit costs will rise by $4,397,510 during the first year of the minimum wage increase;

(3) individual income tax revenue will rise by at most $4,078,088;

(4) the loss in corporate income tax revenue could be as high as $9,243,105;

(5) state and local sales tax revenue will rise by at most $2,919,327;

(6) during the first year: state and local governments will incur increased costs of $20,401,222; the change in state and local government revenue will

range from -$2,245,690 to +$6,997,415; and the net state and local government fiscal impact will range from -$22,646,912 to -$13,403,807.

The report is organized as follows. My qualifications to prepare this report are contained in Section II. Section III describes the data and records I relied upon for this report. Section IV reviews the estimated fiscal impact of proposed statutory initiative petitions 2012-084 and 2012-085. A summary and my conclusions are provided in Section VI.

II. Qualifications

I am currently the E.M. Stevens Professor of Economics at Trinity University in San Antonio, Texas. Previously, I was employed by Florida State University as Director of the Pepper Institute on Aging and Public Policy and the Rod and Hope Brim Eminent Scholar in Economics. I have taught both undergraduate and graduate Econometrics (statistical analysis of economic data), and Labor Economics. I have published over 50 articles in peer-reviewed professional journals.

I am currently serving on the editorial board of the *Journal of Forensic Economics*, which is a peer-reviewed journal. I have also served as a reviewer or 'referee' for 24 peer-reviewed journals, including the *Journal of Human Resources, Journal of Labor Economics, Quarterly Journal of Economics,* and the *Review of Economics and Statistics*. Based upon these experiences, I am very familiar with the scholarly and professional research process and the concept of peer review.

I have prepared numerous analyses and reports that use statistical methods as applied to specific questions. I have been responsible for developing the techniques and approaches required for these analyses. I routinely use computers and statistical software packages to assist me in my analytical work. I have been qualified as an expert witness on statistical analysis of employment discrimination and economic damages in state courts in Florida and Georgia and Federal Courts, and I have given expert testimony. I have prepared analyses and offered testimony on behalf of both plaintiffs and defendants.

Details of my qualifications are reflected in my current resume and legal cases, attached as Appendix A to the report.

III. Data and Records

I reviewed the following materials in preparing this report.

- Plaintiff's Complaint
- Material cited in footnotes below.

IV. Fiscal Impact

A. Overview

The proposed statutory initiative petitions 2012-084 and 2012-085 contain many elements in common. Both initiatives would increase the Missouri minimum wage to $8.25 per hour, alter the exemption for retail and service firms, raise the cash wage of tipped workers from 50% to 60% of the minimum wage, and increase the statute of limitation from two to three year for underpayment claims.

The initiatives differ in their linkage to the federal minimum wage. Initiative petition 2012-084 requires that the state minimum wage be automatically increased to the

federal minimum wage if it is higher than the state minimum wage. Initiative petition 2012-085 does not have such a linkage. It only requires that workers be paid the higher of the state minimum wage or the federal minimum wage. The linkage to the federal minimum wage will cause the state minimum wage to be higher under initiative petition 2012-084 over time. This is because the state minimum wage, in contrast to the federal minimum wage, is adjusted for inflation as measured by the Consumer Price Index.

An increase in the minimum wage in Missouri will affect state and local government entities in two ways. First, it will directly increase the cost of labor to state and local government entities. This will occur due to the increase in wages of state and local government workers earning between the existing minimum wage of $7.25 and the new minimum wage of $8.25.[1] In addition, workers laid off due to the minimum wage increase can collect unemployment benefits. The state government will bear the cost of unemployment benefits of these workers for the first 20 weeks. Second, state and local government may gain increased revenue through higher income tax and sales taxes paid by workers affected by the minimum wage who remain employed. However, state and local government will suffer reduced tax revenue to the extent the higher wage cost lowers profits of businesses.

The following sections estimate the cost and revenue effects to state and local government entities of the proposed minimum wage increase.

[1] Information about the minimum wage in Missouri is available at http://www.labor.mo.gov/DLS/minimumwage/.

B. Direct Labor Cost Impact on State and Local Government Budgets

There are two possible ways to measure the direct labor cost on state and local government budgets. First, one can use the information included in the fiscal notes prepared by the State Auditor regarding the proposed initiatives. It is important to note that the fiscal notes provide an incomplete and thus too low estimate of the direct labor cost. The fiscal notes indicate that the Office of Administration's (OA) Division of Personnel reported that as of September 2011 there were 834 state workers who would be affected by an increase of the minimum wage to $8.25 and the "approximate annual cost" would be more than $540,000.

This OA estimate excludes seasonal workers such as State Fair employees, State Parks Employees, and tax season staff. The Division of Revenue noted its labor cost would rise by $40,000. The Division of Natural Resources stated they have over 500 workers who would be affected by the increase, but did not provide an estimate of the cost. The State Fair hired 745 workers that would be affected, but no cost estimate was provided.

Thus, the cost to state government, based on the fiscal notes, would be more than $580,000.

The fiscal notes also provide an incomplete and thus too low measure of the cost to local government and public educational institutions. Many cities and educational institutions did not respond to Office of Auditor's survey or provide an estimate of the cost of the higher minimum wage. The City of Columbia, City of Jefferson, City of

Joseph, Linn State Technical College, and Metropolitan Community College did provide such an estimate. The total cost to these five institutions is $772,182.

Based on the fiscal notes, the cost to state and local government entities of the increase in the minimum wage to $8.25 will be more than $1,352,182.

Second, data from the U.S. Census Bureau's Current Population Survey (CPS) can also be used to calculate the cost of the increased labor cost to state and local government entities in Missouri. Using the data from January 2010 to December 2011 Outgoing Rotation Group (ORG) CPS, I calculated that 17,089 state and local government workers would be affected by the minimum wage increase. I defined affected workers as those individuals earning between $7.00 and $8.24 per hour. Though the minimum wage was $7.25 per hour during this period, I also included those workers reporting earnings of $7.00 to $7.24 since some individuals may round their wage rate. I calculated the annual wage cost for each state and local government worker (i) in the ORG CPS as:

$$Annual\ Wage\ Cost_i = (\$8.25 - current\ wage_i) * weekly\ hours_i * 52.$$[2]

The average annual wage cost increase was $870. I summed the cost over each worker (i) to obtain the total wage cost to state and local government entities in Missouri of $14,866,430.

The increased wage cost is not the only labor cost to state and local government entities of the minimum wage increase. Employers are required to pay 7.65% of their wage costs in Social Security and Medicare taxes. Thus, the total labor cost of the minimum wage increase will be 1.0765 times $14,866,430 or $16,003,712.

---

[2] I assume that persons reporting an hourly wage rate between $7.00 and $7.24 are actually earning $7.25 per hour.

C. Unemployment Benefit Impact

The higher minimum wage will cause firms to reduce their level of employment.[3] As a result, the number of unemployed workers will increase. Thus, another important fiscal cost of the minimum wage increase is the cost of the unemployment insurance benefits for the workers laid off as a result of the minimum wage increase.

To calculate the cost to the unemployment benefits program, I first calculated the number of workers laid off. To do so, I calculated a probability of job loss for each affected Missouri worker (i) in the January 2010 to December 2011 ORG CPS:

$$Probability\ Job\ Loss_{\ i} = \frac{(\$8.25 - Current\ Wage_i)}{Current\ Wage_i} * elasticity_i.$$

I used the preferred employment elasticity (i.e., sensitivity of employment to wage changes) contained in Sabia and Burkhauser (2010), which was -0.6 for individuals aged 16 to 29 without a high school degree and -0.2 for all other individuals. The sole exception was for state and local government workers, where I assumed an elasticity of zero.[4] The sum across all affected workers yielded an estimated job loss of 5,745 jobs.

The next step was to calculate the weekly benefit for the average unemployed worker. Using the benefits calculator on the Missouri unemployment benefits web site and the wage income of average private-sector affected worker ($10,937), yields an average weekly benefit of $109.36[5]. The state of Missouri pays the first 20 weeks of benefits.[6] Thus, each eligible unemployed worker could receive a total of $2,187.20 in

---

[3] For a survey of research regarding the effect of the minimum wage on employment, see David Neumark and William L. Wascher, *Minimum Wages* (Cambridge, MA: MIT Press, 2008).
[4] Joseph J. Sabia and Richard V. Burkhauser, "Minimum Wages and Poverty: Will a $9.50 Federal Minimum Wage Really Help the Working Poor?" *Southern Economic Journal* (January 2010): 592-623.
[5] http://www.labor.mo.gov/DES/Claims/calculator.asp
[6] See http://www.labor.mo.gov/DES/Claims/

benefits paid for by the state of Missouri. These jobs are permanently eliminated and so it is appropriate to calculate the full amount of benefits for each worker.

Unemployment insurance, however, does not cover all unemployed workers. For example, it does not cover people who leave a job voluntarily, people looking for their first job, and re-entrants who previously left the labor force voluntarily. Furthermore, some individuals don't apply for benefits even though they are eligible. I assume that 35% of the unemployed workers will receive unemployment benefits based on analysis by Wenger (2001).[7]

The last step is to calculate the total cost to the Missouri unemployment benefits program. This done by multiplying the number of jobs lost (5,745) times the average benefit amount ($2,187.20) times the percent of unemployed individuals collecting benefits (35%). This calculation yields a figure of $4,397,510. This cost would be borne only during the first year of the minimum wage increase. The inflation adjustments in the minimum wage will also yield costs to the unemployment insurance program, but it is not possible to estimate the amount.

D. Impact on State Income Tax Revenue

The state of Missouri will gain increased revenue through higher income tax taxes paid by workers affected by the minimum wage who remain employed. However, it will

[7] Jeffery Wenger. "Divided We Fall: Deserving Workers Slip through America's Patchwork Unemployment Insurance System." *Economic Policy Institute*, 2001. Sabia and Burkhauser (2010) make the same assumption in their calculation of the amount of unemployment benefits generated by a minimum wage increase.

suffer reduced corporate income tax revenue to the extent the higher wage cost lowers profits of businesses.

To calculate the impact on individual income tax revenue, I again used data from January 2010 to December 2011 ORG CPS. I defined affected workers as those Missouri individuals earning between $7.00 and $8.24 per hour.[8] I used the following formula to estimate the change in income tax revenue:

$$\Delta Tax\ Revenue_i = (Tax_After_i - Tax_Before_i) - Prob_Job_Loss_i * Tax_Before_i,$$

where Tax_After_i is the income tax paid by worker i after the minimum wage increase. Tax_Before_i is the income tax paid by worker i after the minimum wage increase, and $Prob_Job_Loss_i$ is the probability of job loss for worker i. The first term shows the change in individual income tax revenue assuming no job loss and the second term shows the loss in tax revenue due to the employment loss caused by the minimum wage increase.

The income tax calculations were based on two assumptions.[9] First, the 50% percent of affected workers who were under the age 25 who were assumed to be dependents on another person's tax return. As a result, it was assumed that the affected workers' earnings were taxable at the maximum Missouri income tax rate of 6% both and after the minimum wage increase.[10] Second, all persons age 25 and older were assumed to be paying little or no income tax after exemptions and deductions. Thus, about 50% of the earnings increase will be taxed at a rate of 6%.

---

[8] I again assume that persons reporting an hourly wage rate between $7.00 and $7.24 are actually earning $7.25 per hour. The annual earnings level was calculated as the worker's wage rate times usual weekly hours worked times 52.

[9] The same assumptions are used in the State Auditor's fiscal notes for the initiatives.

[10] This assumption will overstate the revenue increase as 20% of affected workers under the age 25 are living by themselves and some of these individuals will not be a dependent on another person's tax return.

The tax calculations reveal an increase in income tax revenue increase to the state. Assuming no workers were laid off by the minimum wage increase, income tax revenue would rise by $6,043,534. However, the state will lose $1,965,446 in income tax revenue due to the lost earnings of private-sector workers no longer employed due to the minimum wage hike.[11] Thus, the net increase in individual income tax revenue is $4,078,088.

Businesses have three options to respond to the higher labor costs of a higher minimum wage. They can reduce their profits, raise prices, or lay off workers. Based on the 2010-2011 ORG CPS data, the minimum wage increase will raise private-sector labor costs by $192,620,900 if employment levels are not reduced. However, labor costs will be lowered by $55,240,790 due to the reduction in employment. Thus, labor costs will, on net, rise by $137,380,110. These increased labor costs may be either passed on to consumers through higher prices or reduced profits or more likely some combination of higher prices and reduced profits. Assuming that businesses absorbed all of the higher costs through reduced profits, the corporate income tax revenue would fall by the Missouri corporate income tax of 6.25% times the rise in labor costs of $137,380,110 * 1.0765 (to account for employer-paid Social Security and Medicare taxes) or $9,243,106.[12] Alternatively, if half of the higher labor costs were passed on to consumers, then corporate income tax revenue would fall by $4,621,553.

[11] The probability of job loss was calculated in the same manner as in the prior section.
[12] The corporate income tax for Missouri is available at: http://dor.mo.gov/business/corporate/

E. Impact on State and Local Sales Tax Revenue

To calculate the impact on state and local sales tax revenue the following approach was undertaken.[13] First, the total increase in worker earnings, adjusted for employment reductions, was calculated using the 2010-2011 ORG CPS. This figure was $152,246,540. Second, the increase in Missouri taxable sales was calculated as 25% of the earnings increase or $38,061,635. Third, the increase in sales tax revenue was calculated by multiplying the taxable sales change times the average state and local rate of 7.67% or $2,919,327.[14]

The higher minimum wage may decrease sales tax revenue to the extent that it reduces business profits, which will lower spending by business owners.

VI. Summary and Conclusions

I was asked by counsel to evaluate the fiscal impact of proposed statutory initiative petitions 2012-084 and 2012-085.

The results of my analysis indicate:

(1) labor costs to state and local government entities, based on state auditor fiscal notes, will rise by more than $1,352,182. A more inclusive estimate indicates that state and local government labor costs will increase by $16,003,712;

[13] The same general approach is used in the State Auditor's fiscal notes for the initiatives.
[14] The average rate comes from http://taxfoundation.org/news/show/27023.html

(2) unemployment benefit costs will rise by $4,397,510 during the first year of the minimum wage increase;

(3) individual income tax revenue will rise by at most $4,078,088;

(4) the loss in corporate income tax revenue could be as high as $9,243,105;

(5) state and local sales tax revenue will rise by at most $2,919,327;

(6) during the first year: state and local governments will incur increased costs of $20,401,222; the change in state and local government revenue will range from -$2,245,690 to +$6,997,415; and the net state and local government fiscal impact will range from -$22,646,912 to -$13,403,807.

Miami University Faculty Research Grant, 6/1989-8/1989, $4,000, "Declining Unionism and the Gender Wage Gap," with William Even.

Participation in National Meetings

Panel Discussant, American Real Estate and Urban Economics Association/ASSA meetings, January 2008.

Presented, "Employee Turnover in the Long-Term Care Industry," at Academy Health Annual Research Meetings, June 2007.

Presented, "Participant Direction in Defined Contribution Pension Plans," at International Atlantic Economic Society meetings, October 2006.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at International Atlantic Economic Society meetings, October 2005.

Presented, "Replacing Earnings After Termination: Evidence from the Displaced Worker Survey," at the Allied Social Science Association/National Association of Forensic Economics, January 2002.

Presented, "Labor Market Transitions of Older Workers," at the Allied Social Science Association/Society of Government Economists meetings, January 1999.

Presented, "Why has the Loss in Pension Coverage Accelerated Among Less Educated Workers?" at the American Economic Association Meetings, 1995.

Presented, "Wages and Gender Composition: Why Do Women's Jobs Pay Less?" at the American Economic Association Meetings, 1994, with Barry Hirsch.

Presented, "Pensions, Labor Turnover, and Employer Size" at the American Economic Association Meetings, 1993, with William Even.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the American Economic Association meetings, 1992, with William Even.

Participation in Regional Meetings

Presented "Unions and Pension Performance: The Role of Pension Design," at Southern Economics Association meetings, November 2009.

Panel member, "Recent Federal Reserve Policy: An Evaluation" at Southern Economics Association meetings, November 2009.

Discussant, "Topics in Health Economics," at Southern Economics Association meetings, November 2009.

Discussant, "Teacher Pay, Principals, and Schooling," at Southern Economics Association meetings, November 2009.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Western Economic Association meetings, July 2009.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Eastern Economic Association meetings, February 2009.

Panel Discussant at the Southern Economic Association meetings, November 2008.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Southern Economic Association meetings, November 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Western Economic Association meetings, July 2008.

Chair "Pensions and Retirement" Session at Southern Economic Association meetings, November 2007.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Southern Economic Association meetings, November 2007.

Presented, "Participant Direction in Defined Contribution Pension Plans," at Southern Economic Association meetings, November 2006.

Panel Discussant, Southern Economic Association meetings, November 2005.

Presented, "Do Pensions Impede Phased Retirement?" at the Southern Economic Association meetings, November 2004.

Presented, "When Will the Gender Gap in Retirement Income Narrow?" at the Southern Economic Association meetings, November 2003.

Presented, "How Will the Growth of DC and 401(k) Plans Affect Pension Income?" at the Southern Economic Association meetings, November 2002.

Presented, "Racial Composition, Wages, and Quality Sorting," at the Southern Economic Association meetings, November 1999.

Presented, "Racial and Ethnic Differences in Pension Coverage and Benefit Levels," at the Southern Economic Association meetings, November 1998.

Presented, "Factors Influencing Participation and Contribution Levels in 401(k) Plans," at the Western Economics Association meetings, July 1998.

Presented, "Aging at Work: Employment Determination, Firm Strategies, and Public Policy in the United States," at the Western Economic Association meetings, July 1994.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Western Economic Association meetings, July 1992.

Presented "Plant Size and the Decline of Unionism," at the Southern Economic Association meetings, 1989, with William Even.

Panel Discussant, Southern Economic Association meetings, November 1989.

Presented "The Labor Force Participation and Earnings Profiles of Married Female Immigrants," at the Southern Economic Association meetings, November 1988.

Presented "Pensions, Screening, and the Gender Wage Gap," at the Southern Economic Association meetings, November 1988.

Session Chair and Panel Discussant at the Southern Economic Association meetings, November 1988.

Participation in Invited Seminars, Conferences, and other Presentations

Presented, "Teaching Macroeconomics During Troubled Times," at Creative Ideas for Your Basic Economics Course Conference at Florida State University, February 2012.

Presented, "Participant Direction in Defined Contribution Pension Plans," at Pennsylvania State University, April 2010.

Presented, "The Parallels Between the Japanese Economic Crisis of the 1990s and the US Today" at Creative Ideas for Your Basic Economics Course Conference at Florida State University, February 2010.

Chair "Minimum Wage & EITC" Session at Society of Labor Economists meetings, May 2009.

Presented "Participant Direction in Defined Contribution Plans," at Lehigh University, April 2009.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Association of Private Enterprise Education meetings, April 2009.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Trinity University, October 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Georgia State University, April 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Association of Private Enterprise Education meetings, April 2008.
Presented, "Improving Pension Coverage at Small Firms," at Hudson Institute, May 2006.

Presented, "Participant Direction in Defined Contribution Plans," at Society of Labor Economics meetings, May 2006.

Presented, "Participant Direction in Defined Contribution Plans," at Association of Private Enterprise Education meetings, April 2006.

Presented, "Participant Direction in Defined Contribution Plans," at University of Wisconsin-Milwaukee, April 2006.

Invited Panel Participant for Pepper Foundation and Center Symposium on pension reform, Washington, DC, February 2006.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at West Virginia University, April 2005.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at the University of Kentucky, November 2004.

Presented, "The Causes and Consequences of Company Stock Holdings in Pension Funds," at the Federal Reserve Bank of Atlanta, April 2004.

Presented, "The Causes and Consequences of Company Stock Holdings in Pension Funds," at the University of Oklahoma, February 2004.

Presented, "Tracking Union and Nonunion Wages in the U.S.: Can the Evidence be Reconciled?" at the Middlebury Annual Conference on Economic Issues, April 2002.

Presented, "How Will the Growth of DC and 401(k) Plans Affect Pension Income?" at the Miami University Center for Pension and Retirement Research Conference, June 2001.

Presented, "Benefits and Worker Productivity," Benefits for the Workplace of Tomorrow Conference, Wharton School, University of Pennsylvania, May 2001.

Participant, Innovations in Managing the Financial Risks of Retirement Conference, Wharton School, University of Pennsylvania, May 2000.

Presented "Using Hi-Tech in Large Lectures," at Association of Private Enterprise Education meetings, April 2000.

Presented "Employee Participation in 401(k) Plans," at University of Wisconsin-Milwaukee, October 1999.

Presented "Gender, Race, and Ethnicity in the Labor Market," as part of the Smith Chair course in Labor Economics at Brigham Young University, September 1999.

Presented, "The Decline in Pension Coverage Among Less Educated Workers," at the Florida State University Economics Department Seminar Series, 1996.

Presented, "Children's Effects on Women's Labor Market Attachment and Earnings" at the Conference on the Changes in Working Time in Canada and the United States, Canadian Employment Research Forum, 1996.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" at the Ohio State University Economics Department Seminar Series, 1996.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" at the Florida State University Economics Department Seminar Series, 1995.

Presented, "Employer Size and Labor Turnover: The Role of Pensions," at Syracuse University, 1995.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" while visiting scholar at the Federal Reserve Bank of Cleveland, 1995.

Presented, "Trends in Individual and Household Pension Coverage," at the Miami University Center for Pension and Retirement Research Conference, 1994.

Presented, "Racial Composition, Quality Sorting, and the Black-White Wage Gap" at the University of Wisconsin, Institute for Research on Poverty, Small Grants Workshop, 1993, with Barry Hirsch.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Florida State University Economics Department Seminar Series, 1992.

Participant at National Bureau of Economic Research (NBER) Labor Studies meetings of the Summer Institute, 1992.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Miami University Conference on Current Pension Policy Issues, 1992.

Organizer and participant at conference on "Contemporary Issues in Pension Economics," hosted by the Center for Pension and Retirement Research, Miami University, 1990.

Presented "The Effect of International Competition on Union and Nonunion Wages," at the University of Cincinnati Seminar Series, 1987.

ABOUT THE MISSOURI RESTAURANT ASSOCIATION

With origins dating back to 1916, the Missouri Restaurant Association (MRA) is a statewide trade association representing over 1,500 member establishments. The association's membership is diverse, and includes full service, fast casual, and quick service restaurants, cafeterias, hotels, schools, institutions, contract feeders, and ancillary foodservice providers such as theme parks. The association has been successful in securing support from virtually every segment of the foodservice and hospitality industry.

MRA includes seven chapters as extensions of the parent organization, each with its own Officers, Board of Directors, and limited budget. The association is governed by a Board of Directors comprised of five Officers, 33 Directors, and each President of the seven affiliated chapters.

MRA is dedicated to serving the needs of the foodservice and hospitality industry, enhancing and improving its growth and development, assisting and educating its members in operating more effectively, improving the political and social environment in which the industry conducts business, for the benefit of its members, patrons, employees, and the well-being of the community.

David A. Macpherson is the E.M. Stevens Professor of Economics at Trinity University. He received undergraduate and doctoral degrees in economics from Pennsylvania State University.

Dr. Macpherson has published over 60 articles in leading economics and real estate journals including Review of Economics and Statistics, Industrial and Labor Relations Review, Journal of Labor Economics, Journal of Human Resources, and Journal of Real Estate Economics and Finance. His research has been funded by a variety of entities including the National Science Foundation, Florida Legislature, and the National Association of Realtors. He is co-author of the undergraduate labor economics text, Contemporary Labor Economics, as well as the principles of economics text, Economics: Private and Public Choice. He is included in Who's Who in Economics, Fourth Edition, which includes the 1,200 most frequently cited economists.

THE IMPACT OF A $10.10 MINIMUM WAGE ON JOBS AND TAXPAYER COSTS IN MISSOURI

June 2014

Executive Summary 4
Results 5
Technical Appendix 7

EXECUTIVE SUMMARY

Missouri's minimum wage of $7.50 is linked to rise in most years with the inflation rate. But some state legislators and labor unions would like to raise that figure even higher. For instance, a recent labor union-organized bus tour in the state promoted a $10.10 minimum wage in St. Louis.

Proponents have enthusiastically pointed to the benefits of the $10.10 policy. But there's been far less discussion of the costs involved with a $10.10-an-hour minimum wage—both the cost on employment, and the cost to taxpayers.

In this study, labor economist David Macpherson of Trinity University uses Census Bureau data to estimate the impact on Missouri's labor market and budget from raising the minimum wage to $10.10 an hour. He also provides separate results for the St. Louis metropolitan area.

Dr. Macpherson's employment estimates follow the methodology used by the nonpartisan Congressional Budget Office in its report earlier this year estimating the impact of a $10.10 minimum wage nationwide, which in turn relied on 60 different empirical studies to formulate its estimates.

Statewide, he finds that over 15,000 jobs would be lost at the $10.10 wage level—with 9,300 of those jobs being held by women. In the St. Louis metropolitan area, approximately 4,800 jobs would be lost from a $10.10 minimum wage.

The cost to taxpayers would be significant: There are approximately 40,000 state and local employees whose wages would be affected by the $10.10 increase in Missouri, for a combined cost to taxpayers of $87 million annually.

Raising wages is an admirable goal, but the evidence suggests that accomplishing this goal with a blunt wage mandate could do more harm than good.

RESULTS

The minimum wage is one of the most hotly-debated topics in the political world. Some legislators claim that a higher base wage will stimulate the economy; others claim that it will reduce jobs when affected employers can't offset the higher costs through higher prices.

Economists, who have studied the issue since the late 1940s, tend to take a skeptical view of minimum wage increases. Since the early 1990s, for instance, roughly 85 percent of the most credible research on the minimum wage points to job loss for less-skilled groups. The nonpartisan Congressional Budget Office (CBO), in an evaluation of President Obama's proposed $10.10 minimum wage increase, reviewed 60 different studies and concluded that the policy would eliminate 500,000 jobs if enacted.

The estimates that follow, of the employment impact of a higher minimum wage on Missouri's labor market, were performed by Dr. David Macpherson of Trinity University. Dr. Macpherson followed closely the methodology used by the CBO in its 2014 report. Dr. Macpherson also estimates the taxpayer costs of a higher minimum wage, as many state and local public employees will see their earnings increase when the minimum wage rises.

Dr. Macpherson's methodology is presented in detail in a technical appendix.

Estimated Employment Effects of a $10.10 Minimum Wage in Missouri

Statewide, Dr. Macpherson finds that increasing the minimum wage to $10.10 would eliminate over 15,000 jobs—approximately 60 percent of which are jobs held by women. The bulk of the job losses would be concentrated among individuals with a high school degree or less, and among people who work in the retail or leisure & hospitality industries.

(Note: Totals have slight discrepancies due to rounding.)

City-Specific Minimum Wage Employment Impacts

The city of St. Louis has been the subject of a number of protests calling for a higher minimum wage. Dr. Macpherson analyzed the employment impact of a $10.10 minimum wage in the St. Louis metropolitan area, providing breakouts by gender and education where the data permits. He estimates that the wage hike would eliminate approximately 5,000 jobs—just over half of which would be jobs held by women.

RESULTS CONTINUED

Missouri Taxpayer Costs of a $10.10 Minimum Wage

Dr. Macpherson estimates that approximately forty thousand state & local public employees would be affected by a minimum wage increase to $10.10 an hour. These additional wage costs translate to new costs for state and local taxpayers. Following the methodology described in detail in the technical appendix, Dr. Macpherson estimates both the straight wage cost of a $10.10 minimum wage, as well as the total compensation cost with Social Security, Medicare, workers compensation, and unemployment insurance included. Statewide, taxpayers would shoulder an additional $87 million in costs if the base wage was increased to $10.10 an hour and public employees were covered by the new wage.

Missouri Taxpayer Costs of a $10.10 Minimum Wage	
# of State & Local Workers	304,588
# Affected By $10.10 MW	40,103
Annual Wage Cost	$79,629,374
Annual Compensation Cost	$87,004,355

Note: Annual compensation costs include the cost of worker's compensation, FICA, and unemployment insurance benefits.

TECHNICAL APPENDIX

Estimating Employment Loss and the Cost to State and Local Government of an Increase in the Minimum Wage

Dr. David Macpherson
E.M. Stevens Professor of Economics
Trinity University

This paper describes how we estimate the employment loss and the cost to state and local governments of a proposed increase in the minimum wage effective on January 1, 2015.

Data and Sample

First, we use data from the Current Population Survey (CPS) Outgoing Rotation Groups (ORG) from January 2011 through December 2013. For each worker in the sample, we calculate their wage rate. We also adjust the wage rate to reflect a forecast of wages in 2015. This is done in two steps. First, based on legislation enacted as of April 2014, we estimate the minimum wage that would be in effect in January 2015 for each state and city that we consider. If a state or city has an indexed minimum wage, we increase the January 2014 state or city minimum wage by the Congressional Budget Office (CBO) inflation forecast for 2014 of 1.7%.

Since we use data from 2011 through 2013, we also follow the CBO approach for forecasting what the wage distribution would be in 2015. This is done in two steps. First, we adjust wages observed prior to 2013 to reflect 2013 minimum wage legislation. For example, if the minimum wage in a state was $7.25 in 2011 and grew to $8.00 by 2013, anyone who earned between $7.25 and $8.00 in 2011 would have their wage increased to $8.00. After wages are adjusted to 2013 levels, we assume that all wages grow by 2.9% in 2014. Using the resulting 2015 distribution of wages, we adjust for minimum wage legislation that would increase the minimum between 2013 and 2015. Anyone earning a wage between the 2013 and 2015 minimum wage is assigned a wage matching the 2015 minimum wage.

After generating the forecast 2015 distribution of wages reflecting wage growth and existing minimum wage legislation, we identify workers who would be affected by additional changes to the 2015 minimum wage as those with wages between the predicted minimum wage legislated for 2015 (or up to $.25 below it) and the proposed minimum.

To estimate the number of affected workers, we take two steps. First, for each state, we estimate the number of affected workers for 2013. Second, we adjust the weights in the 2011 and 2012 data so that the state-specific number of affected workers implied by the 2011 and 2012 data matches that for 2013. This adjustment is designed to correct for the changing economic climate as the economy recovers from the great recession and to generate estimates that are as close as possible to the most recent data (2013). After we adjust the 2011 and 2012 weights, we estimate the number of affected workers by summing their earnings weights and dividing the total by 36 (the number of months of data).

[1] Also, following CBO, anyone earning up to $.25 less than the 2011 minimum wage would have their wage increased by the amount that the minimum wage increased (i.e. a $7.00 wage would be increased to $7.75 in this example). This approach is used to adjust for the fact that many workers round their answers when asked about their wage.

TECHINCAL APPENDIX CONTINUED

Employment Loss

To estimate employment loss, for each affected worker we compute:

L = e *(Proposed Min Wage /Min Wage 2015 – 1)

where e is an assumed elasticity of employment with respect to changes in the minimum wage, Min Wage 2015 is the minimum wage currently legislated for 2015, and Proposed Min Wage is the minimum wage that is being proposed for 2015. Thus, for example, if a worker is projected to earn the federal minimum of $7.25 in 2015, the expected reduction in employment resulting from a $10.10 minimum wage in 2015 if e=.45 is .45*(10.10/7.25 – 1) = .18. That is, for every 100 workers currently earning the federal minimum, the expectation is that 18 would lose a job if the minimum wage elasticity is .45.

To estimate the aggregate employment loss in the economy, we use earnings weights to sum L across workers. We also follow the Congressional Budget Office (2014) and use an elasticity of 0.15 for non-teenagers and 0.45 for teenagers.

Cost to State and Local Government

We use the same data to estimate the cost to state and local government of a proposed minimum wage hike. We apply the same definition of affected workers described above and estimate the number of state and local government workers affected by a minimum wage hike. We do not, however, assume that there is any job loss for state and local workers as we do not have an appropriate elasticity estimate specific to state and local workers. To the extent that state or local governments reduce hours or employment in response tothe minimum wage hike, our estimate of the cost of the hike would be overstated.

To estimate the increase in annual payroll cost resulting from an increase in the minimum wage, we estimate the increase in annual cost for each worker as:

(Proposed Min Wage-Min Wage 2015)*weekly hours*52

We then multiply the increase in annual cost by the earnings weight for each worker and sum across workers. Since an increase in wages also requires increased employer contributions for Social Security, Medicare, workers' compensation and unemployment insurance, we apply an estimate of the payroll tax rate for these mandatory programs to calculate the additional cost for these programs.

For each state and city considered, we provide tables summarizing the number of affected workers, employment loss, and the distribution of employment loss by sex, education, race, age and industry. Given that we use three years of data, a rule of thumb for minimum sample size required to achieve a reasonably accurate estimate of the employment loss is to require at least 30,000 people be in the relevant category. For example, if there are fewer than 30,000 people projected to be in a particular industry category, the Bureau of Labor Statistics would not report the estimate due to a lack of reliability based on the variance of the estimate relative to its mean.

In addition to the estimate of employment loss, for each state or city considered, we estimate the number of state and local workers that would be affected by the minimum wage hike and the total annual cost to government in terms of wages and total compensation. As with the employment estimates, we advise caution in interpreting estimates that are based on fewer than 30,000 affected workers.

[3] Congressional Budget Office, "The Effects of a Minimum-Wage Increase on Employment and Family Income," February 2014.

[4] For workers paid by the hour the reported hourly wage was used. For workers who are not paid by the hour, we calculate the hourly wage by dividing usual weekly earnings by usual weekly hours. Overtime pay was calculated as time and one-half for hours above 40 hours for hourly workers.

[5] The assumed payroll tax for Medicare and Social Security is 7.65 percent. To estimate the payroll tax for workers' compensation and unemployment insurance, we use unpublished data from the 2010 Employer Cost of Employee Compensation database for state and local workers in the relevant region in 2010.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College,** and **St. Louis Community College, Harris-Stowe State University, Lincoln University,**. **Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Fiscal Note Summary

State and local governments estimate no direct costs or savings from the proposal, but operating costs could increase by an unknown annual amount that could be significant. State and local government tax revenue could change by an unknown annual amount ranging from a $4.4 million decrease to a $222 million increase depending on business decisions.

Jefferson City, MO 65101

RE: Petition approval request from Richard Von Glahn regarding a proposed statutory amendment to Chapter 290, version 11 (2018-083)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Richard Von Glahn on December 5, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

Be it enacted by the people of the state of Missouri:

Sections 290.502, 290.512, and 290.527 of the Revised Statutes of Missouri are amended and a new section to be known as section 290.529 is enacted to read as follows:

290.502. 1. Except as may be otherwise provided pursuant to sections 290.500 to 290.530, effective January 1, 2007, every employer shall pay to each employee wages at the rate of $6.50 per hour, or wages at the same rate or rates set under the provisions of federal law as the prevailing federal minimum wage applicable to those covered jobs in interstate commerce, whichever rate per hour is higher.

2. The minimum wage shall be increased or decreased on January 1, 2008, and on January 1 of successive years, by the increase or decrease in the cost of living. On September 30, 2007, and on each September 30 of each successive year, the director shall measure the increase or decrease in the cost of living by the percentage increase or decrease as of the preceding July over the level as of July of the immediately preceding year of the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) or successor index as published by the U.S. Department of Labor or its successor agency, with the amount of the minimum wage increase or decrease rounded to the nearest five cents.

3. Except as may be otherwise provided pursuant to sections 290.500 to 290.530, and notwithstanding subsection (1) of this section, effective January 1, 2019, every employer shall pay to each employee wages at the rate of not less than $9.00 per hour, or wages at the same rate or rates set under the provisions of federal law as the prevailing federal minimum wage applicable to those covered jobs in interstate commerce, whichever rate per hour is higher. Thereafter, the minimum wage established by this subsection shall be increased each year by $1.00 per hour, effective January 1 of each of the next three years, until it reaches $12.00 per hour, effective January 1, 2022. Thereafter, the minimum wage established by this subsection shall be increased or decreased on January 1, 2023, and on January 1 of successive years, per the method set forth in subsection (2) of this section. If at any time the federal minimum wage rate is above or is thereafter increased above the minimum wage then in effect under this subsection, the minimum wage required by this subsection shall continue to be increased pursuant to this subsection (3), but the higher federal rate shall immediately become the minimum wage required by this subsection and shall be increased or decreased per the method set forth in subsection (2) for so long as it remains higher than the state minimum wage required and increased pursuant to this subsection.

4. For purposes of this section, the term "public employer" means an employer that is the state or a political subdivision of the state, including a department, agency, officer, bureau, division, board, commission, or instrumentality of the state, or a city, county, town, village, school district, or other political subdivision of the state. Subsection (3) of this section shall not apply to a public employer with respect to its employees. Any public employer that is subject to subsections (1) and (2) of this section shall continue to be subject to those subsections.

290.512. 1. [No] Except as provided in subsection (2) of this section, no employer of any employee who receives and retains compensation in the form of gratuities in addition to wages is required to pay wages in excess of fifty percent of the minimum wage rate specified in sections 290.500 to 290.530, however, total compensation for such employee shall total at least the minimum wage specified in sections 290.500 to 290.530, the difference being made up by the employer.

2. Beginning January 1, 2019 and effective on the dates set forth below in this subsection, and notwithstanding the percentage established in subsection (1) of this section, no employer of any employee who receives and retains compensation in the form of gratuities in addition to wages is required to pay wages in excess of the percent set forth below in this subsection of the minimum wage rate specified in subsection (3) of section 290.502 or, where applicable, the minimum wage rate otherwise specified in sections 290.500 to 290.530:

(1) fifty-five percent, effective January 1, 2019;
(2) sixty percent, effective January 1, 2020;
(3) sixty-five percent, effective January 1, 2021;
(4) seventy percent, effective January 1, 2022;
(5) seventy-five percent, effective January 1, 2023;
(6) eighty percent, effective January 1, 2024;
(7) eighty-five percent, effective January 1, 2025;
(8) ninety percent, effective January 1, 2026;
(9) ninety-five percent; effective January 1, 2027;
(10) one hundred percent, effective January 1, 2028;

however, in all cases, total compensation for such employee shall total at least the minimum wage specified in subsection (3) of section 290.502 or, where applicable, the minimum wage rate otherwise specified in sections 290.500 to 290.530, the difference being made up by the employer.

3. For purposes of this section, the term "public employer" means an employer that is the state or a political subdivision of the state, including a department, agency, officer, bureau, division, board, commission, or instrumentality of the state, or a city, county, town, village, school district, or other political subdivision of the state. Subsection (2) of this section shall not apply to a public employer with respect to its employees. Any public employer that is subject to subsection (1) of this section shall continue to be subject to that subsection at the percentage set forth therein of the minimum wage rate specified in subsections (1) and (2) of section 290.502 or, where applicable, the minimum wage rate otherwise specified in sections 290.500 to 290.530.

[2.] 4. If an employee receives and retains compensation in the form of goods or services as an incident of his employment and if he is not required to exercise any discretion in order to receive the goods or services, the employer is required to pay only the difference between the fair market value of the goods and services and the minimum wage otherwise required to be paid by sections 290.500 to 290.530. The fair market value of the goods and services shall be computed on a weekly basis. The director shall provide by regulation a method of valuing the goods and services received by any employee in lieu of the wages otherwise required to be paid under the provisions of sections 290.500 to 290.530. He shall also provide by regulation a method of determining those types of goods and services that are an incident of employment the receipt of which does not require any discretion on the part of the employee.

290.527. Any employer who pays any employee less wages than the wages to which the employee is entitled under or by virtue of sections 290.500 to 290.530 shall be liable to the employee affected for the full amount of the wage rate and an additional [equal] amount equal to twice the unpaid wages as liquidated damages, less any amount actually paid to the employee by the employer and for costs and such reasonable attorney fees as may be allowed by the court or jury. The employee may bring any legal action necessary to collect the claim. Any agreement between the employee and the employer to work for less than the wage rate shall be no defense to the action. All actions for the collection of any deficiency in wages shall be commenced within [two] three years of the accrual of the cause of action.

290.529. Except in the circumstances set forth in section 290.523, all the provisions of sections 290.500 to 290.530 are severable. If any provision, including any section, subsection, subdivision, paragraph, sentence, or clause, of sections 290.500 to 290.530, or the application thereof to any person or circumstance, is found by a court of competent jurisdiction to be invalid, unconstitutional, or unconstitutionally enacted, such decision shall not affect other provisions or applications of sections 290.500 to 290.530 that can be given effect without the invalid, unconstitutional, or unconstitutionally enacted provision or application.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-083)

Subject

Initiative petition from Richard Von Glahn regarding a proposed amendment to Chapter 290 of the Revised Statutes of Missouri. (Received December 6, 2016)

Date

December 22, 2016

Description

This proposal would amend Chapter 290 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Lara Granich and **Missouri Jobs with Justice Voter Action** provided information as proponents of the proposal to the State Auditor's office.

Robert Bonney, Chief Executive Officer of the Missouri Restaurant Association provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they assume that any potential costs arising from the adoption of this proposal can be absorbed with existing resources.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated they will defer to the Office of Administration regarding any costs associated with this initiative petition.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department because public employers are exempt.

Officials from the **Department of Health and Senior Services** indicated this proposal would have no direct fiscal impact on their department since government employees are exempt from its provisions. However, employees of certain entities that receive funding through the department's budget would be impacted, such as Medicaid Home and Community Based Services vendors/providers and Area Agencies on Aging.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition does not apply to public employers with respect to its employees. Therefore, this petition, if passed, would have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated it appears Sections 290.502.4 and 290.512.3 would exclude public employers from the provisions of 290.502 subsection (3) and 290.512 subsection (2). They are a part of the definition of public employers. Therefore they assume there would be no direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated they defer to the Office of Administration.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this petition will have no fiscal impact on their department. They defer to the Office of Administration - Budget and

Planning Division for a statewide response on how this petition may impact state revenues.

Officials from the **Department of Public Safety** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department. They defer to the Office of Administration for response to this fiscal note request.

Officials from the **Governor's office** indicated there should be no added cost or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no fiscal impact.

Officials from the **Office of Administration (OA)** indicated this proposal amends Sections 290.502, 290.512, 290.527, RSMo and adds Section 290.529, RSMo.

Section 290.502, RSMo, increases the minimum wage to $9.00 per hour, beginning January 1, 2019 and by another $1.00 per hour each year until it reaches $12.00 per hour beginning January 1, 2022. Thereafter, the minimum wage will be adjusted annually based on the increase/decrease in the cost of living.

Section 290.512, RSMo, increases the base salary for tipped employees. Effective January 1, 2019, employers must pay at least 55% of the minimum wage rate to tipped employees. Each year thereafter the rate increases by five percent until January 1, 2028 when tipped employees should be paid 100% of the minimum wage as established in Section 290.502, RSMo.

The proposal exempts public employers from both requirements; therefore there would be no cost to the State of Missouri.

Because no tax rates are affected, there is no direct impact on general and total state revenues. However, these proposals may have several indirect affects which could impact revenue collections by an unknown amount, including but not limited to:

- Increased wages for certain employees. According to the US BLS, in 2015, Missouri had 57,000 hourly employees earning wages at or below the federal minimum wage;[1]
- Increased consumption by those employees;
- Lower overall employment (if employers choose to hold costs steady);

[1] http://www.bls.gov/opub/reports/minimum-wage/2015/home.htm

- Lower business investment (if employers' payrolls increase);
- Increased prices as firms pass–through labor costs.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact for their office as it would be exempt from the provisions set forth in the petition.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this would have no fiscal impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated no fiscal impact is anticipated if this proposal is adopted because cities are excluded from operation of the proposal.

Officials from the **City of Raymore** indicated there would be no direct fiscal impact on employee salaries. However there would be a potential increase cost in the capital projects. We have no way of predicting that value.

Officials from **University of Missouri** indicated we do not see an impact on the University of Missouri System.

Officials from **University of Central Missouri** indicated no fiscal impact.

Officials from **Missouri State University** indicated there will be no fiscal impact to their university for this fiscal note.

Officials from **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated the proposed statutory amendment will have no fiscal impact on their university.

Lara Granich and **Missouri Jobs with Justice Voter Action** provided the following information as proponents of this initiative petition.

Re: Fiscal Impact Analysis of Minimum Wage Initiative Petitions

Proposal 1 $15 by 2026 and Tipped Minimum Wage at 100% by 2028
Proposal 2 $15 by 2026 and Tipped Minimum Wage at 60% by 2024
Proposal 3 $15 by 2026 and Tipped Minimum Wage at 100% by 2028
Proposal 4 $15 by 2026 and Tipped Minimum Wage at 60% by 2024
Proposal 5 $15 by 2027 and Tipped Minimum Wage at 100% by 2028
Proposal 6 $15 by 2027 and Tipped Minimum Wage at 60% by 2024
Proposal 7 $14 by 2024 and Tipped Minimum Wage at 100% by 2028
Proposal 8 $14 by 2024 and Tipped Minimum Wage at 60% by 2024
Proposal 9 $13 by 2023 and Tipped Minimum Wage at 100% by 2028
Proposal 10 $13 by 2023 and Tipped Minimum Wage at 60% by 2024
Proposal 11 $12 by 2022 and Tipped Minimum Wage at 100% by 2028
Proposal 12 $12 by 2022 and Tipped Minimum Wage at 60% by 2024

This letter is from Lara Granich and Missouri Jobs with Justice Voter Action, proponents of the above-referenced initiative petitions. Pursuant to RSMo. Section 116.175, we write to submit the following fiscal impact information to assist your office in its analysis of the fiscal impact of the above-mentioned twelve proposed Minimum Wage Initiative Petitions.

The estimated net fiscal impact for each of the twelve versions of the initiative in the final phase-in year is summarized in the right-most column of Table 2 below. The estimated net fiscal impact for each version of the initiative for 2019 and 2020 – the first two fiscal years of implementation – is summarized in Table 3 below.

Our analysis estimates the impact of each of the twelve proposed initiative petitions on state and local sales and personal income tax revenue in Missouri. We follow the process that has been used in the past to estimate the impact of minimum initiative petitions on state and local sales and personal income tax, with some refinements. We also address certain claims that have been made by opponents in the past.

As these proposed initiatives exclude from the minimum wage increases public workers employed by the state or by local governments, the initiatives are not expected to have any direct impact on state and local payroll costs. Accordingly, we do not include in our analysis any such estimates.

I. Estimate of Number of Workers Affected Statewide and the Impact on Their Wages

Table 1. Summary of the Number of Affected Workers and Aggregate Wage Increases for the Final Year of Minimum Wage Phase-In.

Proposal	Year of Peak Minimum Wage (MW)	Proposed Peak MW	Tipped MW in Peak MW Year	Workers Affected by MW Increase	Aggregate Annual Wage Increase in Nominal Dollars
1	2026	$ 15.00	$ 13.50	1,117,399	$ 8,294,071,138
2	2026	$ 15.00	$ 9.00	1,117,399	$ 8,165,764,211
3	2026	$ 15.00	$ 13.50	1,117,399	$ 8,294,071,138
4	2026	$ 15.00	$ 9.00	1,117,399	$ 8,165,764,211
5	2027	$ 15.00	$ 14.25	1,097,200	$ 8,058,515,525
6	2027	$ 15.00	$ 9.00	1,096,645	$ 7,908,877,243
7	2024	$ 14.00	$ 11.20	1,044,718	$ 7,064,599,152
8	2024	$ 14.00	$ 8.40	1,043,118	$ 6,985,083,230
9	2023	$ 13.00	$ 9.75	949,801	$ 5,741,687,801
10	2023	$ 13.00	$ 7.54	944,495	$ 5,682,599,137
11	2022	$ 12.00	$ 8.40	867,022	$ 4,552,685,065
12	2022	$ 12.00	$ 6.84	858,952	$ 4,517,542,341

Note: Author's Analysis of American Community Survey (ACS) Data from 2014.

Across the twelve proposals analyzed, the total aggregate wage increase for workers in Missouri ranges from a low of $4.517 billion (Proposal 12) to a high of $8.294 billion under Proposals 1 and 3. While some proposals have the same final impact numbers, they have different impacts in the initial years (not listed) based on the relative pace of increases in earlier years. A full, year-by-year impact analysis is presented in Appendix Tables 1 through 12 below.

The wage impact of an increase in the Missouri minimum wage is calculated using the following procedure. The American Community Survey (ACS) Public Use Micro Sample for the most recent year available (2014) for the State of Missouri was downloaded from the US Census Bureau. The ACS was chosen over the Current Population survey because the ACS has a significantly larger sample. We followed the method of Perry, Thomason, and Bernhardt (2016) for calculating an hourly wage rate from the ACS based on observed total annual wage income, typical hours worked each week and weeks worked per year. Since ACS income figures are clustered around whole-numbers, we smoothed the wage distribution by randomly adding or subtracting $0.25 from each wage figure.

Wage adjustments were made only for those individuals earning less than the proposed minimum wage, or proposed tipped minimum wage. We did not make additional adjustments for the "ripple effect" of minimum wage increases on workers earning slightly above the new threshold. Recent evidence suggests that workers earning up to 15% above of the minimum wage also receive small increases in response to a minimum wage increase. (See Wicks-Lim (2006) and Dube, Giuliano and Leonard (2015)). Thus, the estimated impacts listed above are likely to be smaller than the actual impact of increasing the minimum wage to the proposed level.

All wage earners are included in this calculation. To be consistent with past estimates, public employees should have been excluded. Employees in the public sector were included because the ACS does not have a published variable that

allows for identification of public employees. This inclusion of public employees will have a minimal impact on our results.[1]

All wages from the 2014 survey were adjusted upward to account for inflation between the time of the survey and the time of measurement of the impact. Actual inflation was to adjust wages to 2015. For all subsequent years between 2016 and 2028, baseline wages were inflated by the annual average rate of change in the Consumer Price Index for Urban Workers (CPI-U) for the Midwest region. The 2015 and 2016 Missouri Minimum wage of $7.65 was adjusted by the same factor prior to measuring the impact of a change to the proposed minimum wage in 2019.

After these adjustments, the resulting hourly wage of all employees was compared to the proposed minimum wage. A total of twelve proposals were analyzed. For each proposal, we constructed a baseline wage scenario which used only basic wage changes from expected inflation rates to predict each ACS respondent's hourly wage rate in each year between 2019 and 2028. We then constructed a counterfactual, or "proposed" wage distribution for each worker under all twelve minimum wage proposed scenarios. Since the minimum wage proposals offered six different paths for raising the minimum wage for all non-tipped private sector workers, and two different wage paths for tipped workers (for each proposal), we create separate minimum wage changes for tipped and non-tipped workers. Specifically, we used information on a worker's occupation and observed wage levels to separately identify tipped workers and assign them the proposed tipped minimum wage in each year, rather than the higher non-tipped minimum wage.[2]

If the proposed minimum wage was less than the inflation-adjusted hourly earnings of an employee, then no impact was calculated. If the proposed minimum wage was more than the hourly earnings on an employee, then the difference between the inflation-adjusted hourly earnings (i.e. baseline) and the proposed minimum wage was calculated. That difference was multiplied by the number of hours the employee worked in the year to calculate the annual impact for that employee. The result was then multiplied by a weighting factor for that employee in the population. The total impact for the State of Missouri was then summed across all affected workers to generate a total estimated increase in wage income in the state.

II. Economic Literature on the Impact of Minimum Wage Increases on Employment

Next we review the economic literature on the impact of minimum wage increases on employment. Opponents often claim that minimum wage increases may reduce employment in a state. If that were true, then those employment reductions would result in reductions in state income and sales tax revenue or increases in unemployment-related costs to the state.

However, as explained in greater detail below, review of the most credible recent empirical research on the minimum wage shows that increases have had no discernible impact on aggregate employment levels. Larger $15 minimum wage increases, such as those adopted recently in New York, California, Seattle and other jurisdictions, have not yet been studied to determine whether the same holds true for them. While it is possible that there may be some employment

[1] For Missouri's state employees, this can be validated by viewing the earnings of all state employees at: http://mapyourtaxes.mo.gov/MAP/Employees/. Larger counties and cities will also have almost all public employees earning more than the highest proposed minimum wage. Local public employees in small counties and towns may have some public employees who earn less than the highest proposed minimum.

[2] We defined tipped workers as those employed in occupations that typically receive a large share of income as tips. These occupations were 'Bartenders', 'Waiters and Waitresses', 'Food Servers, Non-restaurant' and 'Miscellaneous food preparation and serving related workers including dining room and cafeteria attendants and bartender helpers.'

losses from such larger minimum wage increases as the result of increased use of automation or other factors, we offset this potential negative effect by not also calculating the positive potential job growth stemming from multiplier effects of the spending of minimum wage workers who receive substantial raises. There is substantial research to indicate that increases in the minimum wage have multiplier effects that increase the direct effects. For this reason, and because of the likely increases in wages to individuals who earn above the proposed minimum wages, the wage and tax impacts summarized in the table are considered conservative estimates relative to the total impact that would occur as a result of increasing the minimum wage to the proposed levels.

Economists have conducted hundreds of studies of the employment impact of the minimum wage. A meta-study—a formal statistical study of studies—by Doucouliagos and Stanley (2009) reviewed all the research conducted over the last three decades on the employment impact of minimum wage increases on teenagers in the United States. The researchers concluded that the bulk of the studies find that higher minimum wages have had little or no discernible effect on the employment prospects of low-wage workers. Their study followed a rigorous, peer-reviewed procedure and has the advantage of using a set of predetermined, objective criteria for weighing the validity of statistical findings across studies with different results. (Source: Doucouliagos, Hristos and T. D. Stanley. 2009. "Publication Selection Bias in Minimum-Wage Research? A Meta-Regression Analysis." British Journal of Industrial Relations, vol. 47, no. 2, pp. 406–28.)

Recent theoretical and empirical research emphasizes several explanations for the consistently negligible employment impacts of moderate increases in the minimum wage. First, relative to total wage costs, minimum wage increases are small. Second, employers and workers appear to respond to minimum-wage increases in many ways that reduce the direct cost to employers and substantially reduce or eliminate the need to cut employment.

Probably the most important economic response to a higher minimum wage is a reduction in turnover. At higher wages, employers fill vacancies faster and retain employees longer, boosting total employment and average productivity per worker while reducing direct and indirect training costs. Dube, Lester, and Reich (2012), for example, examined the effect of the minimum wage on labor turnover among teens and restaurant workers. They find "...striking evidence that separations, new hires, and turnover rates for teens and restaurant workers fall substantially following a minimum wage increase..." (p. 2) Their findings, using nationally representative data, are consistent with local case studies of the minimum wage and related "living wage" laws, including Dube, Naidu, and Reich's (2007) analysis of the San Francisco city-wide minimum wage; Fairris's (2005) study of local government contractors in Los Angeles; Howes (2005) on homecare workers in California; and Reich, Hall, and Jacobs (2005) on workers at the San Francisco airport. (Sources: Dube, Arindrajit, T. William Lester, and Michael Reich. 2012. "Minimum Wage Shocks, Employment Flows and Labor Market Frictions." Berkeley, CA: Institute for Research on Labor and Employment. http://escholarship.org/uc/item/76p927ks; Dube, Arindrajit, Suresh Naidu, and Michael Reich. 2007. "The Economic Effects of a Citywide Minimum Wage." *Industrial and Labor Relations Review*, vol. 60, no. 4, pp. 522–543; Fairris, David. 2005. "The Impact of Living Wages on Employers: A Control Group Analysis of the Los Angeles Ordinance." *Industrial Relations*, vol. 44, no. 1, pp. 84–105; Howes, Candace. 2005. "Living Wages and the Retention of Home Care Workers in San Francisco." *Industrial Relations*, vol. 44, 5 no. 1, pp. 139–63; Reich, Michael, Peter Hall, and Ken Jacobs. 2005. "Living Wage Policies at the San Francisco Airport: Impacts on Workers and Businesses." *Industrial Relations*, vol. 44, no. 1, pp. 106–138.)

Employers also appear to respond to increases in the minimum wage by taking measures to boost productivity. Hirsch, Kaufman, and Zelenska's (2011) study of the impact of the federal minimum wage increase on 81 fast-food restaurants in Georgia and Alabama, for example, asked fast-food managers about the scope for efficiency improvements in

response to the minimum-wage rise. About 90% of managers indicated that they planned to respond to the minimum wage increase with increased performance standards such as "requiring a better attendance and on-time record, faster and more proficient performance of job duties, taking on additional tasks, and faster termination of poor performers." (p. 27) Roughly the same share of managers said that they sought to "boost morale" by presenting the minimum wage increase as a "challenge to the store" and using this as a way "to energize employees to improve productivity." (pp. 28–29) Based on their interviews with store managers, the researchers concluded that a minimum wage increase may function as a "catalyst or shock that forces managers to step out of the daily routine and think about where cost savings can occur." (p. 29) (Source: Hirsch, Barry T., Bruce Kaufman, and Tetyana Zelenska, "Minimum Wage Channels of Adjustment." IZA Discussion Paper No. 6132. Germany: Institute for the Study of Labor. http://www2.gsu.edu/~ecobth/IZA_HKZ_MinWageCoA_dp6132.pdf)

A higher minimum wage may also motivate workers to work harder, independently of any actions by employers to increase productivity. According to "efficiency wage" theory, wages above the competitive-market rate may elicit greater work effort for several reasons. As Carl Shapiro and Joseph Stiglitz (1984) have argued, higher pay increases the cost to workers of losing their job, potentially inducing greater effort from workers in order to reduce their chances of being fired. George Akerlof (1982), arguing from a more sociological point of view, has suggested that workers may see higher wages as a gift from employers, leading workers to reciprocate by working harder. (Sources: Shapiro, Carl and Joseph E. Stiglitz. 1984. "Equilibrium unemployment as a worker discipline device." *American Economic Review*, vol. 74, no. 3, pp. 433–44; Akerlof, George A. 1982. "Labor contracts as partial gift exchange." *Quarterly Journal of Economics*, vol. 97, no. 4, pp. 543–69.)

We therefore conclude that the proposed increase in the Missouri minimum wage would have no discernible impact on the employment levels of low-wage workers. Note too, we conclude the same as to small businesses. In fact, the proposed increases will not affect some small businesses as the state minimum wage law exempts individuals employed by any retail or service business that has a gross volume of sales made or business done of less than $500,000 annually. Accordingly, we do not factor in reductions in employment, or any resulting decrease in sales tax or income tax. We also do not project any increased unemployment insurance costs—both because we do not project any resulting job losses, and, additionally, because unemployment insurance costs are paid for by employer premiums, and so are ultimately not a cost to the state.

III. State and Local Sales and Personal Income Tax Revenue Impact of Raising the Minimum Wage

Based on the wage impact figures calculated above, and the understanding that the minimum wage increases would be unlikely to result in offsetting job losses, we next calculate the impact of the projected wage increases on state and local sales and personal income tax revenue in Missouri. We project only the direct impact of the twelve minimum wage increase scenarios on such tax revenue. We do not attempt to project the additional impact through a GDP multiplier effect, or the potentially higher sales taxes generated if employers offset wage increases with slightly higher prices (which would be taxable). Studies are mixed as to whether businesses increase prices by even small amounts when the minimum wage increases.

Increase in Personal Income Tax Revenue and Sales Tax Revenue Due to Increased Wages. In order to determine the projected increase in personal income tax revenues that would result directly from the increased wages, we had to develop assumptions about the effective income tax rates of the affected workers. We made the following assumptions with respect to the effective tax rate:

1. That 25% of affected workers can be claimed as a dependent on another party's Missouri income tax return and, as a result, would pay an effective tax rate of 6.0% on the increase in income;
2. That 50% of the affected workers would file as single taxpayers, would claim one deduction of $2,100, and would be entitled to a standard deduction of $5,800. This would result in an effective tax rate of 2.47%;
3. The remaining 25% would, we assumed, pay no additional Missouri income tax. In light of these assumptions, the increased Missouri income tax revenue for each petition version can be calculated as follows: (total wage increase * 25% * 6.0%) + (total wage increase * 50% * 2.47%) + (total wage increase *25% * 0%).

Sales Tax Revenue. The State of Missouri imposes a 4.225% state sales tax on those items that are not exempt from the sales tax base. In addition, the average local sales tax rate is 2.95%. As a result, the average Missouri net sales tax rate is 7.175%. To estimate the share of income that is spent on goods and services that are subject to sales taxes, we used data from the 2015 Consumer Expenditure Survey (CES) for the US to estimate the share of income spent on categories that are subject to sales taxes. The CES summary tables list average spending per consumer across 20 different categories (e.g. housing, transportation, food away from home) and we categorized each spending item as taxable or non-taxable and then calculated the share of spending that was taxable.[3] The resulting rate was 30.3%.

Based upon the above assumptions, and the total wage increase calculations for each version of the petition, we estimate that the increase in state and local sale tax revenue, and in state income tax revenue, resulting from the increased wages would be as follows for the final year of the minimum wage phase-in, for each of the twelve versions of the initiative:

Table 2. Summary of the Impact of Minimum Wage Increases on State and Local Sales and Income Taxes in Final Year of Full Minimum Wage Phase-In.

Proposal	Final Year of Minimum Wage Phase-In	State & Local Sales Tax Revenue Increase	Personal Income Tax Revenue	Total Sales and Personal Income Tax Revenue Increase
1	2026	$ 180,361,529	$ 226,842,846	$ 407,204,375
2	2026	$ 177,571,387	$ 223,333,651	$ 400,905,039
3	2026	$ 180,361,529	$ 226,842,846	$ 407,204,375
4	2026	$ 177,571,387	$ 223,333,651	$ 400,905,039
5	2027	$ 175,239,175	$ 220,400,400	$ 395,639,574
6	2027	$ 171,985,165	$ 216,307,793	$ 388,292,957
7	2024	$ 153,625,630	$ 193,216,787	$ 346,842,417
8	2024	$ 151,896,490	$ 191,042,026	$ 342,938,516
9	2023	$ 124,857,814	$ 157,035,161	$ 281,892,975
10	2023	$ 123,572,881	$ 155,419,086	$ 278,991,968
11	2022	$ 99,001,953	$ 124,515,937	$ 223,517,889
12	2022	$ 98,237,745	$ 123,554,783	$ 221,792,528

[3] Specifically, the categories we assumed to be subject to state and local sales taxes are: food, household furnishings and equipment, vehicle purchases, gasoline and motor oil, entertainment, and all other expenditures. We assumed that 50% of the spending on the category "apparel and services" was taxable.

Note: Author's Analysis of American Community Survey (ACS) data from 2014 and fiscal impact assumptions described above. All dollars are in nominal figures.

As described in Table 2 above, the final fiscal impact of the proposed minimum wage increases varies based on the ultimate level of the minimum wage and the degree of tipped minimum wage phase-out. The estimates of the total fiscal benefit range from $221 million to $407 million annually.

Section 23.140, RSMo., indicates that the fiscal note shall address the cost of the proposed legislation to the state for the first two fiscal years—which, in the case of the proposed initiatives, will be 2019 and 2020. Table 3 below summarizes our projected total sales and personal income tax revenue increases for years 2019 and 2020 for each of the twelve versions of the initiative:

Table 3. Summary of the Impact of Minimum Wage Increases on State and Local Sales and Income Taxes in 2019 & 2020

Proposal	Total Sales and Personal Income Tax Revenue Increase—2019	Total Sales and Personal Income Tax Revenue Increase—2020
1	$ 60,008,101	$ 88,368,944
2	$ 59,882,683	$ 88,058,046
3	$ 93,306,606	$ 123,377,155
4	$ 93,142,857	$ 122,961,967
5	$ 91,491,028	$ 117,027,046
6	$ 91,328,763	$ 116,631,083
7	$ 91,491,028	$ 127,734,685
8	$ 91,328,763	$ 127,305,194
9	$ 91,491,028	$ 127,734,685
10	$ 91,328,763	$ 127,305,194
11	$ 91,491,028	$ 127,734,685
12	$ 91,328,763	$ 127,305,194

Complete year-by-year summaries of the fiscal benefits for all twelve versions of the proposed initiative can be found in Appendix tables 1 through 12.

Please also consider the following with reference to section 23.140, RSMo. The proposed measures will not establish a program or agency that will duplicate an existing program or agency. There is not a federal mandate for the proposed measures (although the United States Department of Labor currently supports minimum wage increases). The proposed measures will not have significant direct fiscal impact upon political subdivisions of the state because the measures exclude employees of public employers. And, the proposed measures do not require new physical facilities. We reference the economic impact of the proposed measures on small businesses in Section II above.

We hope that this information is useful to your office as you prepare your analyses of the petitions.

Respectfully submitted,

Lara Granich

Re: Initiative Petitions 2018-073 through 2018-084

Dear Mr. Halwes,

I write on behalf of Robert Bonney. Mr. Bonney is the Chief Executive Officer of the Missouri Restaurant Association. Please consider this letter and the accompanying studies as his fiscal impact statement as an opponent of Initiative Petitions 2018-073 through 2018-084 (the "Initiative Petitions"). If passed, any of these twelve initiatives would have a substantial negative impact on state and local governments, as well as Missouri small businesses. Those effects are both direct (as noted in Section 1) and secondary (as noted in Sections 2 through 5). The direct effects stem from higher labor and contracting costs that the state and its political subdivisions will incur, despite the Initiatives' effort to exclude government workers from the mandate.

The indirect effects will present a debate this Office has seen before. The proponents of the Initiative Petitions will once again rely on data sourced from political activist groups who claim increases in the minimum wage only serve to create new taxable income. The reality is that such groups approach this issue with political bias. Their analysis is one-sided because it completely ignores the fact that a wage increase does not "create" income from thin air; instead, it is an economic transfer from Missouri businesses to workers. Missouri businesses must pay the new wages "created" by the increases. Political activists' models fail to account, then, for two specific manifestations of the "debit" side of this transfer: reductions in employment, and the reduction in corporate income tax paid based upon business done in Missouri.

The failure to account for any employment effect at any proposed wage increase—even a near doubling of the minimum wage to $15—is particularly puzzling, because Missouri's most populous areas border Illinois and Kansas. These states, respectively, have minimum wages of $8.25 and $7.25. Neither state adjusts the minimum wage for inflation. Likewise, the second

effect—loss of corporate income tax revenues—is a mathematical certainty. Missouri businesses will be the source of the wage increase, which will lower their own taxable income. Assuming a one-to-one substitution of "created" wages for lost corporate income, the difference in the rates at which these two types of income are taxed will result in a net decrease in state revenue. A dollar from increased wages is taxable by state government in Missouri at 6% or substantially less, whereas Missouri's corporate income tax rate is 6.25%.

On top of these two types of negative outcomes—lower employment and lower state tax revenues—there may be second-order effects to small businesses because they lack the access to capital to weather price fluctuations; they may not survive at all because they may not have the flexibility to simply cut employment, shifting their reliance to capital instead of labor resources, or suffering a decrease in production and revenue.

In short, much of the fiscal impact regarding the current crop of wage-related ballot measures is secondary: they cause transfers of wealth within (or out of) the state economy, and those transfers of wealth then create second-order effects for state and local governments via their collection of tax revenues and provision of welfare services for the unemployed or less-employed. Because these fiscal notes call for the Auditor operate in the area of secondary effects, it is critical that she treat both sides of the wealth transfer equally, and refrain from assessing only one half of the wage increase equation.

1. Direct Labor Cost Impact on State and Local Government Budgets

As noted to the State Auditor's Office previously by Dr. David Macpherson, a nationally prominent labor and economics expert, there are two ways to measure labor cost on state and local government budgets. First, one can use the information included in fiscal note responses from state and local government entities. It is important to note that these fiscal notes provide an incomplete and, therefore, too-low estimate of labor cost. Few state and local government entities respond to requests for a fiscal note response, and those that do respond often ignore important effects.

Second, data from the U.S. Census Bureau's Current Population Survey (CPS) can be used to calculate increased labor cost to state and local government entities in Missouri. To combat this time-honored analysis, and in a blatant attempt to manipulate the fiscal note process, the Initiative Petitions provide that they will raise the minimum wage for private workers, but not for workers employed by state or local governmental entities. No conceivable justification exists for solely raising the minimum wage on private businesses. Whatever the disparity between the value of total compensation at a private business and at a government employer, that disparity does not approach the wage adjustments at issue here, ranging from an inflation adjusted wage increase of 68.54% (($15-$8.90)/$8.90) in Initiative Petitions 2018-073 through 2018-076 to a wage increase of 42.01% (($15-$8.45)/$8.45) in Initiative Petitions 2018-083 through 2018-084.

Moreover, it is unreasonable to assume that on a sustained basis public employers, as defined in the Initiative Petitions, would be able to maintain dramatically lower wage levels than

private businesses. Public employers would lose staff employable at higher rates in the private market, imposing substantial costs on government productivity. Using the method traditionally employed by labor economists and followed by the Auditor's office, one can calculate the annual wage costs to state and local governmental entities, based on the annual wage cost for each state and local government worker in the ORG CPS, as detailed on page 6 of Dr. Macpherson's 2012 report, as well as in Dr. Macpherson's 2014 report, attached hereto as **Exhibit A and Exhibit B**. Even if the auditor finds that a specific estimate of costs is not determinable, the auditor should note that the initiative is "likely to result in significant costs to state and local governmental entities" through the form of higher wage costs and higher contracting costs.

The proponents of the Initiative Petitions may argue that the Auditor should abandon any state and local cost estimates altogether. The proponents will argue that provisions they have inserted in the statute would mean that state and local government entities will not have to pay higher wages to their employees. Setting aside unjustifiable discrimination against private employers (and "public employees"), the provision is of uncertain legal effect and constitutionality. A "public employer," defined in the initiatives as "the state or a political subdivision of the state" still incurs substantial costs for wages of individuals that are "private employees," rather than "public employees." Cleaning services, food service, and other essential services often rely on state contracts with outside vendors. Sometimes, a contract rate may vary depending on the cost of labor. Even if the contract rate is fixed, it must be re-bid periodically, and that bidding process would take into account the new minimum wage. Plainly, the initiative would impose higher costs for state and local governments in contracting with any private entity and its employees. As a matter of law, it would be insufficient and unfair for the Auditor's fiscal note or summary to simply assume that these costs to state and local governmental entities do not exist.

2. Cost of Unemployment Benefits

a) The effect of inflation on Missouri's minimum wage

CPS–ORG data show that between 2007 and 2015, median nominal wages for adult (25–59 years old) workers in the U.S. grew by 1.68 percent a year. However, Missouri's minimum wage is currently adjusted using "the percentage increase or decrease as of the preceding July over the level as of July of the immediately preceding year of the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W)." Section 290.502, RSMo. Coincidentally (or perhaps not), the CPI-W, over the period from 2006 to 2016, also increased at an average rate of 1.68 percent a year.

Year	CPI-W	Observed inflation %
2006	199.2	
2007	203.7	0.022590361
2008	216.304	0.061875307

2009	210.526	-0.0267124
2010	213.898	0.016017024
2011	222.686	0.041085003
2012	225.568	0.01294199
2013	230.084	0.02002057
2014	234.525	0.019301646
2015	233.806	-0.00306577
2016	234.771	0.004127353

Using Missouri's current inflation-adjusted minimum wage rate and an assumed, constant 1.68 percent increase in the CPI-W, the minimum wage in Missouri will be as follows:

Year	Estimated Minimum Wage
2016	$7.65 (observed)
2017	$7.70 (observed)
2018	$7.85
2019	$8.00
2020	$8.15
2021	$8.30
2022	$8.45
2023	$8.60
2024	$8.75
2025	$8.90
2026	$9.05
2027	$9.20

b) Calculating job loss attributable to increased minimum wage

At least one outside economist, James Sherk, has already provided an estimate for job loss in Missouri based on a $15 minimum wage. Mr. Sherk calculated the effect of a $15 minimum wage implemented in 2021. Mr. Sherk's figures accounted for inflation by estimating the present value of $15.00 in 2021, rather than estimating an absolute figure for wage inflation in Missouri. Mr. Sherk calculated the present value of $15.00 in 2021 to be $13.57, per hour, based on wage inflation of 1.68 percent. Mr. Sherk evaluated the change from $7.65 per hour to $13.57 per hour (a 77.39% increase), exclusive of agricultural workers. Cumulatively, Mr. Sherk

calculated this 77.39 percent increase in wages to reduce employment in the affected workforce by (0.7739*0.677) 52.39%.

Mr. Sherk calculated that approximately 40.9% of Missouri's Wage and Salary Workers would be affected by such a $15 minimum wage. Mr. Sherk's calculations reveal that a $15 minimum wage in 2021 would be expected to reduce the number of full-time equivalent jobs in Missouri by approximately 218,000. Based on CPS–ORG data, these figures reveal an affected workforce of approximately 416,086 workers impacted by a $15 minimum wage increase in 2021.

However, in 2014, Dr. Macpherson found, using more conservative, national-level Congressional Budget Office data, that an increase to a $10.10 minimum wage, effective January 1, 2015, would eliminate about 15,700 jobs in Missouri. Dr. Macpherson analyzed the effect of a Missouri $10.10 minimum wage using a model suitable to a national analysis. This analysis predicted a loss of 15,700 Missouri jobs based on a wage increase from $7.50 in 2014 to $10.10 in 2015 (a 34.67% increase).

On the whole, the analysis by Mr. Sherk is more instructive here, since it anticipates a state level change to $15.00. The most accurate way to determine the estimate of Workers Affected would be to analyze the CPS–ORG data. However, without such data readily available in the time constraints imposed by the fiscal note process, it is reasonable for estimation purposes to assume Mr. Sherk's figures are evenly distributed. Assuming that worker data follows an equal distribution, the Initiative Petitions would be expected to result in the following job losses:

Year of final prescribed wage increase	Wage without IP	Wage mandated by IP	Percentage increase	Percentage of affected workers who lose jobs (Percentage Increase x 0.677 Elasticity)	Estimate of Workers Affected	Estimate of Missouri Workers Unemployed by Initiative
2022	$8.45	$12.00	42.01%	28.44%	225,876	64,244
2023	$8.60	$13.00	51.16%	34.64%	275,076	95,279
2024	$8.75	$14.00	60.00%	40.62%	322,589	131,036
2026	$9.05	$15.00	65.75%	44.51%	353,481	157,334
2027	$9.20	$15.00	63.04%	42.68%	338,952	144,666

c) The best estimate for a price elasticity of demand for low-skilled labor is -0.677.

As noted by Mr. Sherk, starting wages of $15.00 per hour mean that full-time employee must create at least $38,700 a year in value for his or her employer (including wages, employer

payroll taxes, and mandatory healthcare benefits). High minimum wages and mandatory benefit costs make it much harder for less-experienced and less-skilled workers to find jobs, particularly full-time work.

Recent labor economics scholarship has revealed that, accounting for publication bias, a state-specific elasticity of demand for less-skilled workers is, on average, approximately -0.677, though some estimates are even higher, around -1.0.[1] "[E]conomists have extensively studied how businesses respond to higher wages overall, not just minimum-wage increases. On average these studies find a 10 percent increase in labor costs causes firms to reduce employment of less-skilled workers by 6.8 percent in the long run."[2]

While these elasticity estimates are substantial in absolute terms, there is reason to believe that such estimates might still understate the impact of a Missouri state-specific effort to increase the minimum wage. This is so for several reasons. First, traditionally, labor economists view labor as a reasonably difficult input to substitute; however, Missouri businesses have readily available options. There are relatively few barriers to doing business in Missouri's border states, and businesses can easily relocate across a state line to take advantage of more favorable wage (and tax laws). Additionally, substantially raising the cost for Missouri labor, relative to labor sources in other states and other countries, is likely to force many manufacturing jobs in Missouri to disappear entirely. Automation is also a significant risk. The substitution of labor is becoming increasingly easy due to technology advancements and the "sharing" economy, where fewer individuals are "employees" covered by the minimum wage. Finally, a labor "price shock" may result in significant decreases in the demand for goods and services. People make behavioral changes to avoid higher costs, including eating out less often and generally decreasing consumption (or shifting their activities to consumption involving comparatively low amounts of labor) wherever possible.

d) Unemployment Benefit Costs

We derived an average unemployment payout by calculating the expected weekly unemployment benefit amount. Based on current data, the expected unemployment weekly benefit amount of a worker making $7.65 an hour, on a 40 hour workweek, is $159.30 per week,

[1] Sherk, James, "How $15-per-Hour Minimum Starting Wages Would Affect Each State," The Heritage Foundation, http://report.heritage.org/ib4601.

[2] "The coefficients on these estimates imply an elasticity of –0.677 for a study published in 2012 (the most recent year in their data) of long-run unconditional labor demand for low-skilled labor in the U.S., estimated using industry-level administrative panel data and a structural form model." "Estimates that do not account for publication bias tend to slow a long-run elasticity closer to –1.0. See, for example, George Borjas, Labor Economics, 6th ed. (Columbus, OH: McGraw-Hill, 2013), Chapter 4: 'The evidence also suggests that the estimates of the long-run labor demand elasticity cluster around –1, so the long-run labor demand curve is indeed more elastic than the short-run curve.' " Sherk, available at http://report.heritage.org/ib4601.

for 20 weeks.[3] The expected unemployment weekly benefit amount of a worker making $11.99 an hour is $249.39 per week. The expected unemployment weekly benefit amount of a worker making $12.99 an hour is $270.19 per week. The expected unemployment weekly benefit amount of a worker making $13.99 an hour is $290.99 per week. The expected unemployment weekly benefit amount of a worker making $14.99 an hour is $311.79 per week. We assume that workers will seek unemployment insurance for the full twenty weeks authorized under Missouri law, because unemployment attributable to an increase in the minimum wage is structural. In this case, structural unemployment occurs because workers' job skills do not meet the established "price floor" of labor, rendering the worker's skills unmarketable. Assuming an even distribution of workers affected, the average unemployment benefit cost to the state for a worker is calculated as follows:

- For Initiative Petitions 2018-073 through 2018-078, [($159.30+$311.79)/2]*20 = $4,710.90
- For Initiative Petitions 2018-079 through 2018-080, [($159.30+$290.99)/2]*20 = $4,502.90
- For Initiative Petitions 2018-081 through 2018-082, [($159.30+$270.19)/2]*20 = $4,294.90
- For Initiative Petitions 2018-083 through 2018-084, [($159.30+$249.39)/2]*20 = $4,086.90

Consistent with Dr. Macpherson's 2012 report, it would be reasonable for the Auditor to assume that 35% of unemployed workers will receive unemployment benefits. Combining these numbers leads to the following estimates:

Year of final prescribed wage increase	Estimate of Missouri Workers Unemployed by Initiative	Estimated Unemployment Amount Per Worker	Estimated Total Unemployment Benefits Paid	Average Cost of Annual Unemployment Benefits Paid by State
2022 ($12)	64,244	$4,086.90	$91,895,081.93	$22,973,770.48
2023 ($13)	95,279	$4,294.90	$143,224,223.60	$28,644,844.72

[3] https://labor.mo.gov/DES/Claims/calculator. A 2015 law decreased the unemployment benefit period from 20 weeks to 13 weeks, but the Supreme Court of Missouri struck down the law in July 2016.

2024 ($14)	131,036	$4,502.90	$206,514,130.35	$34,419,021.73
2026 ($15)	157,334	$4,710.90	$259,415,324.82	$32,426,915.60
2027 ($15)	144,666	$4,710.90	$238,527,470.79	$26,503,052.31

3. Impact on State Income Tax Revenue

The 2012 analysis prepared by Dr. Macpherson may also be used as a reference in calculating the effect of the initiative petitions on state income tax revenue. Here, again, it is reasonable to assume that our "affected workers" are evenly distributed, though precise CPS–ORG data would also provide a reliable estimate. Here, the increased income tax revenue is the additional income tax paid by workers whose wages increase. There is a loss of revenue, however, in the form of decreased income tax paid by workers whose wages decrease and businesses who absorb the increased cost of labor, rather than passing it along to customers.

For the purposes of these estimates, we assume that workers work 40 hours a week and 52 weeks per year:

Year of final prescribed wage increase	Estimate of Workers Affected	Estimate of Missouri Workers Unemployed by IP	Estimate of Missouri Workers with Increased Wages	Annual Increase in Wages Paid to Workers who get Wage Increase in Final Year	Annual Decrease in Wages Paid to Workers now Unemployed
2022 ($12)	225,876	64,244	161,632	$596,746,272.84	$237,187,559.20
2023 ($13)	275,076	95,279	179,797	$822,752,260.32	$336,905,136.41
2024 ($14)	322,589	131,036	191,553	$1,045,881,167.64	$442,900,455.01
2026 ($15)	353,481	157,334	196,147	$1,213,758,000.24	$482,701,950.51
2027 ($15)	338,952	144,666	194,286	$1,171,933,152.00	$421,267,392.00

These net wage increases will lead to corresponding increases in state income tax collections. Traditionally, it has been assumed that about 50% of affected workers will pay 6% income tax, while the other 50% of workers pay no state income tax. This assumption may be

less accurate at the higher wage increases contemplated by the Initiative Petitions. Accordingly, figures are also displayed assuming that about 75% of affected workers will pay 6% income tax, while the other 25% of workers pay no state income tax.

Annual Net Increase in Wages Paid To Workers	Annual Income Tax Increase from Wage Increase (50% pay tax)	Annual Income Tax Increase from Wage Increase (75% pay tax)
$359,558,713.64	$10,786,761.41	$16,180,142.11
$485,847,123.91	$14,575,413.72	$21,863,120.58
$602,980,712.63	$18,089,421.38	$27,134,132.07
$731,056,049.73	$21,931,681.49	$32,897,522.24
$750,665,760.00	$22,519,972.80	$33,779,959.20

Based on these figures, Missouri businesses must also decide whether to pass along any increase in wage costs (wages and mandatory payments).[4]

Year of final prescribed wage increase	Annual Cost to Business from Increased Wage in Final Year of Increase	Annual Decreased Corporate Income Tax if cost is fully absorbed	Annual Decreased Corporate Income Tax if cost is 50% absorbed
2022 ($12)	$642,397,362.71	$40,149,835.17	$20,074,917.58
2023 ($13)	$885,692,808.24	$55,355,800.51	$27,677,900.26
2024 ($14)	$1,125,891,076.96	$70,368,192.31	$35,184,096.16
2026 ($15)	$1,306,610,487.26	$81,663,155.45	$40,831,577.73
2027 ($15)	$1,261,586,038.13	$78,849,127.38	$39,424,563.69

Assuming businesses absorb half of the cost of increased wages, and 75 percent of affected workers pay the new, higher taxes, the effect on state income tax collections is estimated to be:

[4] A healthcare benefit cost estimate is not available based on the time limitations imposed by this fiscal note.

Year of final prescribed wage increase	Annual Net Income Tax Revenue Loss
2022 ($12)	($3,894,775.47)
2023 ($13)	($5,814,779.68)
2024 ($14)	($8,049,964.09)
2026 ($15)	($7,934,055.49)
2027 ($15)	($5,644,604.49)

4. Sales tax revenue gain or loss

Projecting any increase in sales tax revenue resulting from an increased minimum wage would require the auditor's office to conclude, based on data separate and apart from the sheer conjecture typically offered by political activist groups: (1) the net effect on consumer disposable income and (2) the percentage of a consumer's disposable income that is spent on goods subject to the sales tax, taking into consideration that the scope of Missouri's sales tax has been truncated by a voter-approved constitutional amendment from November 2016.

Typically, the Auditor's office multiplies the total increase in worker earnings (which should be adjusted for employment reductions) and multiplies the result by 25 percent, then multiplying that figure by the Missouri the population weighted combined average state and local sales tax in Missouri, 7.81%.[5] Based on this estimate, the population-weighted combined average local sales tax is 3.585%.

However, it would be deceptive to fail to account for sales tax losses from workers whose wages are eliminated or sales tax losses from reduced business profits (attributable to the higher wages paid), which will lower spending by business owners. The first figure is calculable by determining the total annual wages (adjusted for employment deductions) for all workers who lose jobs due to a minimum wage hike, multiplied by 25 percent. The second number is

[5] http://taxfoundation.org/sites/taxfoundation.org/files/docs/LOST--2015.png.

calculable by multiplying the total increase in worker earnings (multiplied by 1.0765 to account for Social Security and Medicare taxes) by approximately 15 percent.[6]

Year of final prescribed wage increase	Annual Net Increase in Wages Paid To Workers	New Wages Spent on Sales Tax Items	Annual Cost to Business from Increased Wage	Annual Business Income No Longer Included in Sales Tax Base (50% passed-through)
2022 ($12)	$359,558,714	$89,889,678	$642,397,363	($96,359,604)
2023 ($13)	$485,847,124	$121,461,781	$885,692,808	($132,853,921)
2024 ($14)	$602,980,713	$150,745,178	$1,125,891,077	($168,883,662)
2025 ($15)	$731,056,050	$182,764,012	$1,306,610,487	($195,991,573)
2026 ($15)	$750,665,760	$187,666,440	$1,261,586,038	($189,237,906)

Accordingly, the annual net losses in sales tax revenue, and total tax losses are as follows:

Year of final prescribed wage increase	Annual Net Income Tax Revenue Loss	Annual Net Loss in State Sales Tax	Total Annual Loss in State Tax Revenue	Annual Net Loss in Local Sales Tax
2022 ($12)	($3,894,775.47)	($273,354.37)	($4,168,129.84)	($231,946.85)
2023 ($13)	($5,814,779.68)	($481,317.93)	($6,296,097.61)	($408,408.23)
2024 ($14)	($8,049,964.09)	($766,350.92)	($8,816,315.01)	($650,264.63)
2026 ($15)	($7,934,055.49)	($558,864.44)	($8,492,919.93)	($474,208.05)
2027 ($15)	($5,644,604.49)	($66,394.43)	($5,710,998.92)	($56,337.05)

[6] This estimate would also need to be adjusted to reflect certain employers' mandate under the Affordable Care Act to provide healthcare coverage and pay 60 percent of such coverage.

Graves Garrett LLC

5. Damage to small business

Additionally, any proponent or opponent fiscal note submission is required, pursuant to Missouri law, to state the impact of the initiative on small businesses. According to analysis by the Employment Policies Institute, 40 percent of the minimum wage workforce is employed at businesses with fewer than 50 employees. [7] The impact on extra costs to small business may be more significant than even this 40% figure suggests. Small businesses are more easily shut down by input price increases than large businesses, which have greater access to capital to weather the storm. Clearly, small businesses that do not shut down due to increases in the minimum wage will pay higher costs, estimated at about 40% of business' total increased costs, described above.

Conclusion

In conclusion, the State Auditor should attempt to quantify the increased cost to be borne by state and local government entities through increased contracting costs as a result of an increase to the minimum wage. This direct cost is outlined in Section 1.

Indirect costs are outlined in Sections 2 through 5, and show a net loss. Although such second-order effects more difficult to predict, a net loss is easily the most likely outcome. Significantly, this result is only obtainable if the Auditor reviews both the "credit" and "debit" sides of the transfer of wealth from businesses to workers. The Auditor should refrain from taking the proponents' likely invitation to consider and present only the "credit," side, and should attempt to provide a complete picture of all effects of a minimum wage increase, including the loss of revenue to state and local governments from individuals who lose employment. Only conveying (or quantifying) the potential for gain, without fairly conveying the likelihood of net loss, would be deceptive and unfair.

Should you desire further detail or have any questions about this fiscal impact statement, please do not hesitate to contact me.

Sincerely,

Edward D. Greim

FISCAL ANALYSIS
OF
PROPOSED STATUTORY INITIATIVE PETITIONS 2012-084 AND 2012-085

I. Introduction

This report was undertaken at the request of counsel representing plaintiffs in the case of Victor Allred versus Robin Carnahan and Thomas Schweich. As part of the basis of the lawsuit, the plaintiffs allege that the fiscal note summaries for proposed statutory initiative petitions 2012-084 and 2012-085 are insufficient and unfair. I was asked by counsel to evaluate the fiscal impact of proposed statutory initiative petitions 2012-084 and 2012-085.

The results of my analysis indicate:

(1) labor costs to state and local government entities, based on state auditor fiscal notes, will rise by more than $1,352,182. A more inclusive estimate indicates that state and local government labor costs will increase by $16,003,712;

(2) unemployment benefit costs will rise by $4,397,510 during the first year of the minimum wage increase;

(3) individual income tax revenue will rise by at most $4,078,088;

(4) the loss in corporate income tax revenue could be as high as $9,243,105;

(5) state and local sales tax revenue will rise by at most $2,919,327;

(6) during the first year: state and local governments will incur increased costs of $20,401,222; the change in state and local government revenue will

range from -$2,245,690 to +$6,997,415; and the net state and local government fiscal impact will range from -$22,646,912 to -$13,403,807.

The report is organized as follows. My qualifications to prepare this report are contained in Section II. Section III describes the data and records I relied upon for this report. Section IV reviews the estimated fiscal impact of proposed statutory initiative petitions 2012-084 and 2012-085. A summary and my conclusions are provided in Section VI.

II. Qualifications

I am currently the E.M. Stevens Professor of Economics at Trinity University in San Antonio, Texas. Previously, I was employed by Florida State University as Director of the Pepper Institute on Aging and Public Policy and the Rod and Hope Brim Eminent Scholar in Economics. I have taught both undergraduate and graduate Econometrics (statistical analysis of economic data), and Labor Economics. I have published over 50 articles in peer-reviewed professional journals.

I am currently serving on the editorial board of the *Journal of Forensic Economics*, which is a peer-reviewed journal. I have also served as a reviewer or 'referee' for 24 peer-reviewed journals, including the *Journal of Human Resources, Journal of Labor Economics, Quarterly Journal of Economics,* and the *Review of Economics and Statistics*. Based upon these experiences, I am very familiar with the scholarly and professional research process and the concept of peer review.

I have prepared numerous analyses and reports that use statistical methods as applied to specific questions. I have been responsible for developing the techniques and approaches required for these analyses. I routinely use computers and statistical software packages to assist me in my analytical work. I have been qualified as an expert witness on statistical analysis of employment discrimination and economic damages in state courts in Florida and Georgia and Federal Courts, and I have given expert testimony. I have prepared analyses and offered testimony on behalf of both plaintiffs and defendants.

Details of my qualifications are reflected in my current resume and legal cases, attached as Appendix A to the report.

III. Data and Records

I reviewed the following materials in preparing this report.

- Plaintiff's Complaint
- Material cited in footnotes below.

IV. Fiscal Impact

A. Overview

The proposed statutory initiative petitions 2012-084 and 2012-085 contain many elements in common. Both initiatives would increase the Missouri minimum wage to $8.25 per hour, alter the exemption for retail and service firms, raise the cash wage of tipped workers from 50% to 60% of the minimum wage, and increase the statute of limitation from two to three year for underpayment claims.

The initiatives differ in their linkage to the federal minimum wage. Initiative petition 2012-084 requires that the state minimum wage be automatically increased to the

federal minimum wage if it is higher than the state minimum wage. Initiative petition 2012-085 does not have such a linkage. It only requires that workers be paid the higher of the state minimum wage or the federal minimum wage. The linkage to the federal minimum wage will cause the state minimum wage to be higher under initiative petition 2012-084 over time. This is because the state minimum wage, in contrast to the federal minimum wage, is adjusted for inflation as measured by the Consumer Price Index.

An increase in the minimum wage in Missouri will affect state and local government entities in two ways. First, it will directly increase the cost of labor to state and local government entities. This will occur due to the increase in wages of state and local government workers earning between the existing minimum wage of $7.25 and the new minimum wage of $8.25.[1] In addition, workers laid off due to the minimum wage increase can collect unemployment benefits. The state government will bear the cost of unemployment benefits of these workers for the first 20 weeks. Second, state and local government may gain increased revenue through higher income tax and sales taxes paid by workers affected by the minimum wage who remain employed. However, state and local government will suffer reduced tax revenue to the extent the higher wage cost lowers profits of businesses.

The following sections estimate the cost and revenue effects to state and local government entities of the proposed minimum wage increase.

[1] Information about the minimum wage in Missouri is available at http://www.labor.mo.gov/DLS/minimumwage/.

B. Direct Labor Cost Impact on State and Local Government Budgets

There are two possible ways to measure the direct labor cost on state and local government budgets. First, one can use the information included in the fiscal notes prepared by the State Auditor regarding the proposed initiatives. It is important to note that the fiscal notes provide an incomplete and thus too low estimate of the direct labor cost. The fiscal notes indicate that the Office of Administration's (OA) Division of Personnel reported that as of September 2011 there were 834 state workers who would be affected by an increase of the minimum wage to $8.25 and the "approximate annual cost" would be more than $540,000.

This OA estimate excludes seasonal workers such as State Fair employees, State Parks Employees, and tax season staff. The Division of Revenue noted its labor cost would rise by $40,000. The Division of Natural Resources stated they have over 500 workers who would be affected by the increase, but did not provide an estimate of the cost. The State Fair hired 745 workers that would be affected, but no cost estimate was provided.

Thus, the cost to state government, based on the fiscal notes, would be more than $580,000.

The fiscal notes also provide an incomplete and thus too low measure of the cost to local government and public educational institutions. Many cities and educational institutions did not respond to Office of Auditor's survey or provide an estimate of the cost of the higher minimum wage. The City of Columbia, City of Jefferson, City of

Joseph, Linn State Technical College, and Metropolitan Community College did provide such an estimate. The total cost to these five institutions is $772,182.

Based on the fiscal notes, the cost to state and local government entities of the increase in the minimum wage to $8.25 will be more than $1,352,182.

Second, data from the U.S. Census Bureau's Current Population Survey (CPS) can also be used to calculate the cost of the increased labor cost to state and local government entities in Missouri. Using the data from January 2010 to December 2011 Outgoing Rotation Group (ORG) CPS, I calculated that 17,089 state and local government workers would be affected by the minimum wage increase. I defined affected workers as those individuals earning between $7.00 and $8.24 per hour. Though the minimum wage was $7.25 per hour during this period, I also included those workers reporting earnings of $7.00 to $7.24 since some individuals may round their wage rate. I calculated the annual wage cost for each state and local government worker (i) in the ORG CPS as:

$$Annual\ Wage\ Cost_i = (\$8.25 - current\ wage_i) * weekly\ hours_i * 52.$$[2]

The average annual wage cost increase was $870. I summed the cost over each worker (i) to obtain the total wage cost to state and local government entities in Missouri of $14,866,430.

The increased wage cost is not the only labor cost to state and local government entities of the minimum wage increase. Employers are required to pay 7.65% of their wage costs in Social Security and Medicare taxes. Thus, the total labor cost of the minimum wage increase will be 1.0765 times $14,866,430 or $16,003,712.

---

[2] I assume that persons reporting an hourly wage rate between $7.00 and $7.24 are actually earning $7.25 per hour.

C. Unemployment Benefit Impact

The higher minimum wage will cause firms to reduce their level of employment.[3] As a result, the number of unemployed workers will increase. Thus, another important fiscal cost of the minimum wage increase is the cost of the unemployment insurance benefits for the workers laid off as a result of the minimum wage increase.

To calculate the cost to the unemployment benefits program, I first calculated the number of workers laid off. To do so, I calculated a probability of job loss for each affected Missouri worker (i) in the January 2010 to December 2011 ORG CPS:

$$Probability\ Job\ Loss_{\ i} = \frac{(\$8.25 - Current\ Wage_i)}{Current\ Wage_i} * elasticity_i.$$

I used the preferred employment elasticity (i.e., sensitivity of employment to wage changes) contained in Sabia and Burkhauser (2010), which was -0.6 for individuals aged 16 to 29 without a high school degree and -0.2 for all other individuals. The sole exception was for state and local government workers, where I assumed an elasticity of zero.[4] The sum across all affected workers yielded an estimated job loss of 5,745 jobs.

The next step was to calculate the weekly benefit for the average unemployed worker. Using the benefits calculator on the Missouri unemployment benefits web site and the wage income of average private-sector affected worker ($10,937), yields an average weekly benefit of $109.36[5]. The state of Missouri pays the first 20 weeks of benefits.[6] Thus, each eligible unemployed worker could receive a total of $2,187.20 in

---

[3] For a survey of research regarding the effect of the minimum wage on employment, see David Neumark and William L. Wascher, *Minimum Wages* (Cambridge, MA: MIT Press, 2008).
[4] Joseph J. Sabia and Richard V. Burkhauser, "Minimum Wages and Poverty: Will a $9.50 Federal Minimum Wage Really Help the Working Poor?" *Southern Economic Journal* (January 2010): 592-623.
[5] http://www.labor.mo.gov/DES/Claims/calculator.asp
[6] See http://www.labor.mo.gov/DES/Claims/

benefits paid for by the state of Missouri. These jobs are permanently eliminated and so it is appropriate to calculate the full amount of benefits for each worker.

Unemployment insurance, however, does not cover all unemployed workers. For example, it does not cover people who leave a job voluntarily, people looking for their first job, and re-entrants who previously left the labor force voluntarily. Furthermore, some individuals don't apply for benefits even though they are eligible. I assume that 35% of the unemployed workers will receive unemployment benefits based on analysis by Wenger (2001).[7]

The last step is to calculate the total cost to the Missouri unemployment benefits program. This done by multiplying the number of jobs lost (5,745) times the average benefit amount ($2,187.20) times the percent of unemployed individuals collecting benefits (35%). This calculation yields a figure of $4,397,510. This cost would be borne only during the first year of the minimum wage increase. The inflation adjustments in the minimum wage will also yield costs to the unemployment insurance program, but it is not possible to estimate the amount.

D. Impact on State Income Tax Revenue

The state of Missouri will gain increased revenue through higher income tax taxes paid by workers affected by the minimum wage who remain employed. However, it will

[7] Jeffery Wenger. "Divided We Fall: Deserving Workers Slip through America's Patchwork Unemployment Insurance System." *Economic Policy Institute*, 2001. Sabia and Burkhauser (2010) make the same assumption in their calculation of the amount of unemployment benefits generated by a minimum wage increase.

suffer reduced corporate income tax revenue to the extent the higher wage cost lowers profits of businesses.

To calculate the impact on individual income tax revenue, I again used data from January 2010 to December 2011 ORG CPS. I defined affected workers as those Missouri individuals earning between $7.00 and $8.24 per hour.[8] I used the following formula to estimate the change in income tax revenue:

$$\Delta Tax\ Revenue_i = (Tax_After_i - Tax_Before_i) - Prob_Job_Loss_i * Tax_Before_i,$$

where Tax_After_i is the income tax paid by worker i after the minimum wage increase. Tax_Before_i is the income tax paid by worker i after the minimum wage increase, and $Prob_Job_Loss_i$ is the probability of job loss for worker i. The first term shows the change in individual income tax revenue assuming no job loss and the second term shows the loss in tax revenue due to the employment loss caused by the minimum wage increase.

The income tax calculations were based on two assumptions.[9] First, the 50% percent of affected workers who were under the age 25 who were assumed to be dependents on another person's tax return. As a result, it was assumed that the affected workers' earnings were taxable at the maximum Missouri income tax rate of 6% both and after the minimum wage increase.[10] Second, all persons age 25 and older were assumed to be paying little or no income tax after exemptions and deductions. Thus, about 50% of the earnings increase will be taxed at a rate of 6%.

---

[8] I again assume that persons reporting an hourly wage rate between $7.00 and $7.24 are actually earning $7.25 per hour. The annual earnings level was calculated as the worker's wage rate times usual weekly hours worked times 52.

[9] The same assumptions are used in the State Auditor's fiscal notes for the initiatives.

[10] This assumption will overstate the revenue increase as 20% of affected workers under the age 25 are living by themselves and some of these individuals will not be a dependent on another person's tax return.

The tax calculations reveal an increase in income tax revenue increase to the state. Assuming no workers were laid off by the minimum wage increase, income tax revenue would rise by $6,043,534. However, the state will lose $1,965,446 in income tax revenue due to the lost earnings of private-sector workers no longer employed due to the minimum wage hike.[11] Thus, the net increase in individual income tax revenue is $4,078,088.

Businesses have three options to respond to the higher labor costs of a higher minimum wage. They can reduce their profits, raise prices, or lay off workers. Based on the 2010-2011 ORG CPS data, the minimum wage increase will raise private-sector labor costs by $192,620,900 if employment levels are not reduced. However, labor costs will be lowered by $55,240,790 due to the reduction in employment. Thus, labor costs will, on net, rise by $137,380,110. These increased labor costs may be either passed on to consumers through higher prices or reduced profits or more likely some combination of higher prices and reduced profits. Assuming that businesses absorbed all of the higher costs through reduced profits, the corporate income tax revenue would fall by the Missouri corporate income tax of 6.25% times the rise in labor costs of $137,380,110 * 1.0765 (to account for employer-paid Social Security and Medicare taxes) or $9,243,106.[12] Alternatively, if half of the higher labor costs were passed on to consumers, then corporate income tax revenue would fall by $4,621,553.

[11] The probability of job loss was calculated in the same manner as in the prior section.
[12] The corporate income tax for Missouri is available at: http://dor.mo.gov/business/corporate/

E. Impact on State and Local Sales Tax Revenue

To calculate the impact on state and local sales tax revenue the following approach was undertaken.[13] First, the total increase in worker earnings, adjusted for employment reductions, was calculated using the 2010-2011 ORG CPS. This figure was $152,246,540. Second, the increase in Missouri taxable sales was calculated as 25% of the earnings increase or $38,061,635. Third, the increase in sales tax revenue was calculated by multiplying the taxable sales change times the average state and local rate of 7.67% or $2,919,327.[14]

The higher minimum wage may decrease sales tax revenue to the extent that it reduces business profits, which will lower spending by business owners.

VI. Summary and Conclusions

I was asked by counsel to evaluate the fiscal impact of proposed statutory initiative petitions 2012-084 and 2012-085.

The results of my analysis indicate:

(1) labor costs to state and local government entities, based on state auditor fiscal notes, will rise by more than $1,352,182. A more inclusive estimate indicates that state and local government labor costs will increase by $16,003,712;

[13] The same general approach is used in the State Auditor's fiscal notes for the initiatives.
[14] The average rate comes from http://taxfoundation.org/news/show/27023.html

(2) unemployment benefit costs will rise by $4,397,510 during the first year of the minimum wage increase;

(3) individual income tax revenue will rise by at most $4,078,088;

(4) the loss in corporate income tax revenue could be as high as $9,243,105;

(5) state and local sales tax revenue will rise by at most $2,919,327;

(6) during the first year: state and local governments will incur increased costs of $20,401,222; the change in state and local government revenue will range from -$2,245,690 to +$6,997,415; and the net state and local government fiscal impact will range from -$22,646,912 to -$13,403,807.

FISCAL ANALYSIS
OF
PROPOSED STATUTORY INITIATIVE PETITIONS 2012-084 AND 2012-085

Ohio Board of Regents Research Challenge Grant, 1/1990-12/1990, $4,980, "Proposal to Enhance the Data Library of the Center of Pension and Retirement Research," with William Even and Samuel Williamson.

Miami University Faculty Research Grant, 6/1990-8/1990, $4,000, "The Role of Firm Size in Pension Coverage and Options."

Miami University Faculty Research Grant, 6/1989-8/1989, $4,000, "Declining Unionism and the Gender Wage Gap," with William Even.

Participation in National Meetings

Panel Discussant, American Real Estate and Urban Economics Association/ASSA meetings, January 2008.

Presented, "Employee Turnover in the Long-Term Care Industry," at Academy Health Annual Research Meetings, June 2007.

Presented, "Participant Direction in Defined Contribution Pension Plans," at International Atlantic Economic Society meetings, October 2006.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at International Atlantic Economic Society meetings, October 2005.

Presented, "Replacing Earnings After Termination: Evidence from the Displaced Worker Survey," at the Allied Social Science Association/National Association of Forensic Economics, January 2002.

Presented, "Labor Market Transitions of Older Workers," at the Allied Social Science Association/Society of Government Economists meetings, January 1999.

Presented, "Why has the Loss in Pension Coverage Accelerated Among Less Educated Workers?" at the American Economic Association Meetings, 1995.

Presented, "Wages and Gender Composition: Why Do Women's Jobs Pay Less?" at the American Economic Association Meetings, 1994, with Barry Hirsch.

Presented, "Pensions, Labor Turnover, and Employer Size" at the American Economic Association Meetings, 1993, with William Even.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the American Economic Association meetings, 1992, with William Even.

Participation in Regional Meetings

Presented "Unions and Pension Performance: The Role of Pension Design," at Southern Economics Association meetings, November 2009.

Panel member, "Recent Federal Reserve Policy: An Evaluation" at Southern Economics Association meetings, November 2009.

Discussant, "Topics in Health Economics," at Southern Economics Association meetings, November 2009.

Discussant, "Teacher Pay, Principals, and Schooling," at Southern Economics Association meetings, November 2009.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Western Economic Association meetings, July 2009.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Eastern Economic Association meetings, February 2009.

Panel Discussant at the Southern Economic Association meetings, November 2008.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Southern Economic Association meetings, November 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Western Economic Association meetings, July 2008.

Chair "Pensions and Retirement" Session at Southern Economic Association meetings, November 2007.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Southern Economic Association meetings, November 2007.

Presented, "Participant Direction in Defined Contribution Pension Plans," at Southern Economic Association meetings, November 2006.

Panel Discussant, Southern Economic Association meetings, November 2005.

Presented, "Do Pensions Impede Phased Retirement?" at the Southern Economic Association meetings, November 2004.

Presented, "When Will the Gender Gap in Retirement Income Narrow?" at the Southern Economic Association meetings, November 2003.

Presented, "How Will the Growth of DC and 401(k) Plans Affect Pension Income?" at the Southern Economic Association meetings, November 2002.

Presented, "Racial Composition, Wages, and Quality Sorting," at the Southern Economic Association meetings, November 1999.

Presented, "Racial and Ethnic Differences in Pension Coverage and Benefit Levels," at the Southern Economic Association meetings, November 1998.

Presented, "Factors Influencing Participation and Contribution Levels in 401(k) Plans," at the Western Economics Association meetings, July 1998.

Presented, "Aging at Work: Employment Determination, Firm Strategies, and Public Policy in the United States," at the Western Economic Association meetings, July 1994.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Western Economic Association meetings, July 1992.

Presented "Plant Size and the Decline of Unionism," at the Southern Economic Association meetings, 1989, with William Even.

Panel Discussant, Southern Economic Association meetings, November 1989.

Presented "The Labor Force Participation and Earnings Profiles of Married Female Immigrants," at the Southern Economic Association meetings, November 1988.

Presented "Pensions, Screening, and the Gender Wage Gap," at the Southern Economic Association meetings, November 1988.

Session Chair and Panel Discussant at the Southern Economic Association meetings, November 1988.

Participation in Invited Seminars, Conferences, and other Presentations

Presented, "Teaching Macroeconomics During Troubled Times," at Creative Ideas for Your Basic Economics Course Conference at Florida State University, February 2012.

Presented, "Participant Direction in Defined Contribution Pension Plans," at Pennsylvania State University, April 2010.

Presented, "The Parallels Between the Japanese Economic Crisis of the 1990s and the US Today" at Creative Ideas for Your Basic Economics Course Conference at Florida State University, February 2010.

Chair "Minimum Wage & EITC" Session at Society of Labor Economists meetings, May 2009.

Presented "Participant Direction in Defined Contribution Plans," at Lehigh University, April 2009.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Association of Private Enterprise Education meetings, April 2009.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Trinity University, October 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Georgia State University, April 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Association of Private Enterprise Education meetings, April 2008.
Presented, "Improving Pension Coverage at Small Firms," at Hudson Institute, May 2006.

Presented, "Participant Direction in Defined Contribution Plans," at Society of Labor Economics meetings, May 2006.

Presented, "Participant Direction in Defined Contribution Plans," at Association of Private Enterprise Education meetings, April 2006.

Presented, "Participant Direction in Defined Contribution Plans," at University of Wisconsin-Milwaukee, April 2006.

Invited Panel Participant for Pepper Foundation and Center Symposium on pension reform, Washington, DC, February 2006.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at West Virginia University, April 2005.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at the University of Kentucky, November 2004.

Presented, "The Causes and Consequences of Company Stock Holdings in Pension Funds," at the Federal Reserve Bank of Atlanta, April 2004.

Presented, "The Causes and Consequences of Company Stock Holdings in Pension Funds," at the University of Oklahoma, February 2004.

Presented, "Tracking Union and Nonunion Wages in the U.S.: Can the Evidence be Reconciled?" at the Middlebury Annual Conference on Economic Issues, April 2002.

Presented, "How Will the Growth of DC and 401(k) Plans Affect Pension Income?" at the Miami University Center for Pension and Retirement Research Conference, June 2001.

Presented, "Benefits and Worker Productivity," Benefits for the Workplace of Tomorrow Conference, Wharton School, University of Pennsylvania, May 2001.

Participant, Innovations in Managing the Financial Risks of Retirement Conference, Wharton School, University of Pennsylvania, May 2000.

Presented "Using Hi-Tech in Large Lectures," at Association of Private Enterprise Education meetings, April 2000.

Presented "Employee Participation in 401(k) Plans," at University of Wisconsin-Milwaukee, October 1999.

Presented "Gender, Race, and Ethnicity in the Labor Market," as part of the Smith Chair course in Labor Economics at Brigham Young University, September 1999.

Presented, "The Decline in Pension Coverage Among Less Educated Workers," at the Florida State University Economics Department Seminar Series, 1996.

Presented, "Children's Effects on Women's Labor Market Attachment and Earnings" at the Conference on the Changes in Working Time in Canada and the United States, Canadian Employment Research Forum, 1996.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" at the Ohio State University Economics Department Seminar Series, 1996.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" at the Florida State University Economics Department Seminar Series, 1995.

Presented, "Employer Size and Labor Turnover: The Role of Pensions," at Syracuse University, 1995.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" while visiting scholar at the Federal Reserve Bank of Cleveland, 1995.

Presented, "Trends in Individual and Household Pension Coverage," at the Miami University Center for Pension and Retirement Research Conference, 1994.

Presented, "Racial Composition, Quality Sorting, and the Black-White Wage Gap" at the University of Wisconsin, Institute for Research on Poverty, Small Grants Workshop, 1993, with Barry Hirsch.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Florida State University Economics Department Seminar Series, 1992.

Participant at National Bureau of Economic Research (NBER) Labor Studies meetings of the Summer Institute, 1992.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Miami University Conference on Current Pension Policy Issues, 1992.

Organizer and participant at conference on "Contemporary Issues in Pension Economics," hosted by the Center for Pension and Retirement Research, Miami University, 1990.

Presented "The Effect of International Competition on Union and Nonunion Wages," at the University of Cincinnati Seminar Series, 1987.

Refereeing

Bulletin of Economic Research, Canadian Journal of Economics, Contemporary Economic Policy, Eastern Economics Journal, Economic Development and Cultural Change, Economic Inquiry, Industrial Relations, Industrial and Labor Relations Review, International Economic Review, Journal of Economics and Business, Journal of Human Resources, Journal of Labor Economics, Journal of Labor Research, Journal of Pension Economics and Finance, Labour Economics, Mid-American Journal of Business, Policy Studies Review, Quarterly Journal of Economics, Quarterly Review of Economics and Finance, Real Estate Economics, Review *of Economics and Statistics, Social Science Quarterly, Southern Economic Journal*

ABOUT THE MISSOURI RESTAURANT ASSOCIATION

With origins dating back to 1916, the Missouri Restaurant Association (MRA) is a statewide trade association representing over 1,500 member establishments. The association's membership is diverse, and includes full service, fast casual, and quick service restaurants, cafeterias, hotels, schools, institutions, contract feeders, and ancillary foodservice providers such as theme parks. The association has been successful in securing support from virtually every segment of the foodservice and hospitality industry.

MRA includes seven chapters as extensions of the parent organization, each with its own Officers, Board of Directors, and limited budget. The association is governed by a Board of Directors comprised of five Officers, 33 Directors, and each President of the seven affiliated chapters.

MRA is dedicated to serving the needs of the foodservice and hospitality industry, enhancing and improving its growth and development, assisting and educating its members in operating more effectively, improving the political and social environment in which the industry conducts business, for the benefit of its members, patrons, employees, and the well-being of the community.

David A. Macpherson is the E.M. Stevens Professor of Economics at Trinity University. He received undergraduate and doctoral degrees in economics from Pennsylvania State University.

Dr. Macpherson has published over 60 articles in leading economics and real estate journals including Review of Economics and Statistics, Industrial and Labor Relations Review, Journal of Labor Economics, Journal of Human Resources, and Journal of Real Estate Economics and Finance. His research has been funded by a variety of entities including the National Science Foundation, Florida Legislature, and the National Association of Realtors. He is co-author of the undergraduate labor economics text, Contemporary Labor Economics, as well as the principles of economics text, Economics: Private and Public Choice. He is included in Who's Who in Economics, Fourth Edition, which includes the 1,200 most frequently cited economists.

THE IMPACT OF A $10.10 MINIMUM WAGE ON JOBS AND TAXPAYER COSTS IN MISSOURI

June 2014

Economic Analysis by **Dr. David Macpherson**
Trinity University

Index

Executive Summary 4
Results 5
Technical Appendix 7

EXECUTIVE SUMMARY

Missouri's minimum wage of $7.50 is linked to rise in most years with the inflation rate. But some state legislators and labor unions would like to raise that figure even higher. For instance, a recent labor union-organized bus tour in the state promoted a $10.10 minimum wage in St. Louis.

Proponents have enthusiastically pointed to the benefits of the $10.10 policy. But there's been far less discussion of the costs involved with a $10.10-an-hour minimum wage—both the cost on employment, and the cost to taxpayers.

In this study, labor economist David Macpherson of Trinity University uses Census Bureau data to estimate the impact on Missouri's labor market and budget from raising the minimum wage to $10.10 an hour. He also provides separate results for the St. Louis metropolitan area.

Dr. Macpherson's employment estimates follow the methodology used by the nonpartisan Congressional Budget Office in its report earlier this year estimating the impact of a $10.10 minimum wage nationwide, which in turn relied on 60 different empirical studies to formulate its estimates.

Statewide, he finds that over 15,000 jobs would be lost at the $10.10 wage level—with 9,300 of those jobs being held by women. In the St. Louis metropolitan area, approximately 4,800 jobs would be lost from a $10.10 minimum wage.

The cost to taxpayers would be significant: There are approximately 40,000 state and local employees whose wages would be affected by the $10.10 increase in Missouri, for a combined cost to taxpayers of $87 million annually.

Raising wages is an admirable goal, but the evidence suggests that accomplishing this goal with a blunt wage mandate could do more harm than good.

RESULTS

The minimum wage is one of the most hotly-debated topics in the political world. Some legislators claim that a higher base wage will stimulate the economy; others claim that it will reduce jobs when affected employers can't offset the higher costs through higher prices.

Economists, who have studied the issue since the late 1940s, tend to take a skeptical view of minimum wage increases. Since the early 1990s, for instance, roughly 85 percent of the most credible research on the minimum wage points to job loss for less-skilled groups. The nonpartisan Congressional Budget Office (CBO), in an evaluation of President Obama's proposed $10.10 minimum wage increase, reviewed 60 different studies and concluded that the policy would eliminate 500,000 jobs if enacted.

The estimates that follow, of the employment impact of a higher minimum wage on Missouri's labor market, were performed by Dr. David Macpherson of Trinity University. Dr. Macpherson followed closely the methodology used by the CBO in its 2014 report. Dr. Macpherson also estimates the taxpayer costs of a higher minimum wage, as many state and local public employees will see their earnings increase when the minimum wage rises.

Dr. Macpherson's methodology is presented in detail in a technical appendix.

Estimated Employment Effects of a $10.10 Minimum Wage in Missouri

Statewide, Dr. Macpherson finds that increasing the minimum wage to $10.10 would eliminate over 15,000 jobs—approximately 60 percent of which are jobs held by women. The bulk of the job losses would be concentrated among individuals with a high school degree or less, and among people who work in the retail or leisure & hospitality industries.

(Note: Totals have slight discrepancies due to rounding.)

Estimates by Gender

	Job Losses
Male	6,311
Female	9,364
TOTAL	**15,705**

City-Specific Minimum Wage Employment Impacts

The city of St. Louis has been the subject of a number of protests calling for a higher minimum wage. Dr. Macpherson analyzed the employment impact of a $10.10 minimum wage in the St. Louis metropolitan area, providing breakouts by gender and education where the data permits. He estimates that the wage hike would eliminate approximately 5,000 jobs—just over half of which would be jobs held by women.

Impact on St. Louis Metro Area of a $10.10 Minimum Wage	
Gender	*Job Loss*
Male	2,033
Female	2,767
TOTAL	**4,800**
Race	*Job Loss*

Black or Other Race	1,158
Education	*Job Loss*
High School Grad or Less	3,097
Some College, Undergrad or Graduate Degree	1,703

RESULTS CONTINUED

Missouri Taxpayer Costs of a $10.10 Minimum Wage

Dr. Macpherson estimates that approximately forty thousand state & local public employees would be affected by a minimum wage increase to $10.10 an hour. These additional wage costs translate to new costs for state and local taxpayers. Following the methodology described in detail in the technical appendix, Dr. Macpherson estimates both the straight wage cost of a $10.10 minimum wage, as well as the total compensation cost with Social Security, Medicare, workers compensation, and unemployment insurance included. Statewide, taxpayers would shoulder an additional $87 million in costs if the base wage was increased to $10.10 an hour and public employees were covered by the new wage.

Missouri Taxpayer Costs of a $10.10 Minimum Wage	
# of State & Local Workers	304,588
# Affected By $10.10 MW	40,103
Annual Wage Cost	$79,629,374
Annual Compensation Cost	$87,004,355

Note: Annual compensation costs include the cost of worker's compensation, FICA, and unemployment insurance benefits.

TECHNICAL APPENDIX

Estimating Employment Loss and the Cost to State and Local Government of an Increase in the Minimum Wage

Dr. David Macpherson
E.M. Stevens Professor of Economics
Trinity University

This paper describes how we estimate the employment loss and the cost to state and local governments of a proposed increase in the minimum wage effective on January 1, 2015.

Data and Sample

First, we use data from the Current Population Survey (CPS) Outgoing Rotation Groups (ORG) from January 2011 through December 2013. For each worker in the sample, we calculate their wage rate. We also adjust the wage rate to reflect a forecast of wages in 2015. This is done in two steps. First, based on legislation enacted as of April 2014, we estimate the minimum wage that would be in effect in January 2015 for each state and city that we consider. If a state or city has an indexed minimum wage, we increase the January 2014 state or city minimum wage by the Congressional Budget Office (CBO) inflation forecast for 2014 of 1.7%.

Since we use data from 2011 through 2013, we also follow the CBO approach for forecasting what the wage distribution would be in 2015. This is done in two steps. First, we adjust wages observed prior to 2013 to reflect 2013 minimum wage legislation. For example, if the minimum wage in a state was $7.25 in 2011 and grew to $8.00 by 2013, anyone who earned between $7.25 and $8.00 in 2011 would have their wage increased to $8.00. After wages are adjusted to 2013 levels, we assume that all wages grow by 2.9% in 2014. Using the resulting 2015 distribution of wages, we adjust for minimum wage legislation that would increase the minimum between 2013 and 2015. Anyone earning a wage between the 2013 and 2015 minimum wage is assigned a wage matching the 2015 minimum wage.

After generating the forecast 2015 distribution of wages reflecting wage growth and existing minimum wage legislation, we identify workers who would be affected by additional changes to the 2015 minimum wage as those with wages between the predicted minimum wage legislated for 2015 (or up to $.25 below it) and the proposed minimum.

To estimate the number of affected workers, we take two steps. First, for each state, we estimate the number of affected workers for 2013. Second, we adjust the weights in the 2011 and 2012 data so that the state-specific number of affected workers implied by the 2011 and 2012 data matches that for 2013. This adjustment is designed to correct for the changing economic climate as the economy recovers from the great recession and to generate estimates that are as close as possible to the most recent data (2013). After we adjust the 2011 and 2012 weights, we estimate the number of affected workers by summing their earnings weights and dividing the total by 36 (the number of months of data).

[1] Also, following CBO, anyone earning up to $.25 less than the 2011 minimum wage would have their wage increased by the amount that the minimum wage increased (i.e. a $7.00 wage would be increased to $7.75 in this example). This approach is used to adjust for the fact that many workers round their answers when asked about their wage.

TECHINCAL APPENDIX CONTINUED

Employment Loss

To estimate employment loss, for each affected worker we compute:

L = e *(Proposed Min Wage /Min Wage 2015 – 1)

where e is an assumed elasticity of employment with respect to changes in the minimum wage, Min Wage 2015 is the minimum wage currently legislated for 2015, and Proposed Min Wage is the minimum wage that is being proposed for 2015. Thus, for example, if a worker is projected to earn the federal minimum of $7.25 in 2015, the expected reduction in employment resulting from a $10.10 minimum wage in 2015 if e=.45 is .45*(10.10/7.25 – 1) = .18. That is, for every 100 workers currently earning the federal minimum, the expectation is that 18 would lose a job if the minimum wage elasticity is .45.

To estimate the aggregate employment loss in the economy, we use earnings weights to sum L across workers. We also follow the Congressional Budget Office (2014) and use an elasticity of 0.15 for non-teenagers and 0.45 for teenagers.

Cost to State and Local Government

We use the same data to estimate the cost to state and local government of a proposed minimum wage hike. We apply the same definition of affected workers described above and estimate the number of state and local government workers affected by a minimum wage hike. We do not, however, assume that there is any job loss for state and local workers as we do not have an appropriate elasticity estimate specific to state and local workers. To the extent that state or local governments reduce hours or employment in response tothe minimum wage hike, our estimate of the cost of the hike would be overstated.

To estimate the increase in annual payroll cost resulting from an increase in the minimum wage, we estimate the increase in annual cost for each worker as:

(Proposed Min Wage-Min Wage 2015)*weekly hours*52

We then multiply the increase in annual cost by the earnings weight for each worker and sum across workers. Since an increase in wages also requires increased employer contributions for Social Security, Medicare, workers' compensation and unemployment insurance, we apply an estimate of the payroll tax rate for these mandatory programs to calculate the additional cost for these programs.

For each state and city considered, we provide tables summarizing the number of affected workers, employment loss, and the distribution of employment loss by sex, education, race, age and industry. Given that we use three years of data, a rule of thumb for minimum sample size required to achieve a reasonably accurate estimate of the employment loss is to require at least 30,000 people be in the relevant category. For example, if there are fewer than 30,000 people projected to be in a particular industry category, the Bureau of Labor Statistics would not report the estimate due to a lack of reliability based on the variance of the estimate relative to its mean.

In addition to the estimate of employment loss, for each state or city considered, we estimate the number of state and local workers that would be affected by the minimum wage hike and the total annual cost to government in terms of wages and total compensation. As with the employment estimates, we advise caution in interpreting estimates that are based on fewer than 30,000 affected workers.

[3] Congressional Budget Office, "The Effects of a Minimum-Wage Increase on Employment and Family Income," February 2014.

[4] For workers paid by the hour the reported hourly wage was used. For workers who are not paid by the hour, we calculate the hourly wage by dividing usual weekly earnings by usual weekly hours. Overtime pay was calculated as time and one-half for hours above 40 hours for hourly workers.

[5] The assumed payroll tax for Medicare and Social Security is 7.65 percent. To estimate the payroll tax for workers' compensation and unemployment insurance, we use unpublished data from the 2010 Employer Cost of Employee Compensation database for state and local workers in the relevant region in 2010.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College,** and **St. Louis Community College, Harris-Stowe State University, Lincoln University,**. **Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Fiscal Note Summary

State and local governments estimate no direct costs or savings from the proposal, but operating costs could increase by an unknown annual amount that could be significant. State and local government tax revenue could change by an unknown annual amount ranging from a $4.4 million decrease to a $224 million increase depending on business decisions.

Jefferson City, MO 65101

RE: Petition approval request from Richard Von Glahn regarding a proposed statutory amendment to Chapter 290, version 10 (2018-082)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Richard Von Glahn on December 5, 2016.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jason Kander

Be it enacted by the people of the state of Missouri:

Sections 290.502, 290.512, and 290.527 of the Revised Statutes of Missouri are amended and a new section to be known as section 290.529 is enacted to read as follows:

290.502. 1. Except as may be otherwise provided pursuant to sections 290.500 to 290.530, effective January 1, 2007, every employer shall pay to each employee wages at the rate of $6.50 per hour, or wages at the same rate or rates set under the provisions of federal law as the prevailing federal minimum wage applicable to those covered jobs in interstate commerce, whichever rate per hour is higher.

2. The minimum wage shall be increased or decreased on January 1, 2008, and on January 1 of successive years, by the increase or decrease in the cost of living. On September 30, 2007, and on each September 30 of each successive year, the director shall measure the increase or decrease in the cost of living by the percentage increase or decrease as of the preceding July over the level as of July of the immediately preceding year of the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) or successor index as published by the U.S. Department of Labor or its successor agency, with the amount of the minimum wage increase or decrease rounded to the nearest five cents.

3. Except as may be otherwise provided pursuant to sections 290.500 to 290.530, and notwithstanding subsection (1) of this section, effective January 1, 2019, every employer shall pay to each employee wages at the rate of not less than $9.00 per hour, or wages at the same rate or rates set under the provisions of federal law as the prevailing federal minimum wage applicable to those covered jobs in interstate commerce, whichever rate per hour is higher. Thereafter, the minimum wage established by this subsection shall be increased each year by $1.00 per hour, effective January 1 of each of the next four years, until it reaches $13.00 per hour, effective January 1, 2023. Thereafter, the minimum wage established by this subsection shall be increased or decreased on January 1, 2024, and on January 1 of successive years, per the method set forth in subsection (2) of this section. If at any time the federal minimum wage rate is above or is thereafter increased above the minimum wage then in effect under this subsection, the minimum wage required by this subsection shall continue to be increased pursuant to this subsection (3), but the higher federal rate shall immediately become the minimum wage required by this subsection and shall be increased or decreased per the method set forth in subsection (2) for so long as it remains higher than the state minimum wage required and increased pursuant to this subsection.

4. For purposes of this section, the term "public employer" means an employer that is the state or a political subdivision of the state, including a department, agency, officer, bureau, division, board, commission, or instrumentality of the state, or a city, county, town, village, school district, or other political subdivision of the state. Subsection (3) of this section shall not apply to a public employer with respect to its employees. Any public employer that is subject to subsections (1) and (2) of this section shall continue to be subject to those subsections.

290.512. 1. [No] Except as provided in subsection (2) of this section, no employer of any employee who receives and retains compensation in the form of gratuities in addition to wages is required to pay wages in excess of fifty percent of the minimum wage rate specified in sections 290.500 to 290.530, however, total compensation for such employee shall total at least the minimum wage specified in sections 290.500 to 290.530, the difference being made up by the employer.

2. Beginning January 1, 2019 and effective on the dates set forth below in this subsection, and notwithstanding the percentage established in subsection (1) of this section, no employer of any employee who receives and retains compensation in the form of gratuities in addition to wages is required to pay wages in excess of the percent set forth below in this subsection of the minimum wage rate specified in subsection (3) of section 290.502 or, where applicable, the minimum wage rate otherwise specified in sections 290.500 to 290.530:

(1) fifty-one percent, effective January 1, 2019;
(2) fifty-three, effective January 1, 2020;
(3) fifty-five percent, effective January 1, 2021;
(4) fifty-seven percent, effective January 1, 2022;
(5) fifty-eight percent, effective January 1, 2023;
(6) sixty percent, effective January 1, 2024;

however, in all cases, total compensation for such employee shall total at least the minimum wage specified in subsection (3) of section 290.502 or, where applicable, the minimum wage rate otherwise specified in sections 290.500 to 290.530, the difference being made up by the employer.

3. For purposes of this section, the term "public employer" means an employer that is the state or a political subdivision of the state, including a department, agency, officer, bureau, division, board, commission, or instrumentality of the state, or a city, county, town, village, school district, or other political subdivision of the state. Subsection (2) of this section shall not apply to a public employer with respect to its employees. Any public employer that is subject to subsection (1) of this section shall continue to be subject to that subsection at

the percentage set forth therein of the minimum wage rate specified in subsections (1) and (2) of section 290.502 or, where applicable, the minimum wage rate otherwise specified in sections 290.500 to 290.530.

[2.] 4. If an employee receives and retains compensation in the form of goods or services as an incident of his employment and if he is not required to exercise any discretion in order to receive the goods or services, the employer is required to pay only the difference between the fair market value of the goods and services and the minimum wage otherwise required to be paid by sections 290.500 to 290.530. The fair market value of the goods and services shall be computed on a weekly basis. The director shall provide by regulation a method of valuing the goods and services received by any employee in lieu of the wages otherwise required to be paid under the provisions of sections 290.500 to 290.530. He shall also provide by regulation a method of determining those types of goods and services that are an incident of employment the receipt of which does not require any discretion on the part of the employee.

290.527. Any employer who pays any employee less wages than the wages to which the employee is entitled under or by virtue of sections 290.500 to 290.530 shall be liable to the employee affected for the full amount of the wage rate and an additional [equal] amount equal to twice the unpaid wages as liquidated damages, less any amount actually paid to the employee by the employer and for costs and such reasonable attorney fees as may be allowed by the court or jury. The employee may bring any legal action necessary to collect the claim. Any agreement between the employee and the employer to work for less than the wage rate shall be no defense to the action. All actions for the collection of any deficiency in wages shall be commenced within [two] three years of the accrual of the cause of action.

290.529. Except in the circumstances set forth in section 290.523, all the provisions of sections 290.500 to 290.530 are severable. If any provision, including any section, subsection, subdivision, paragraph, sentence, or clause, of sections 290.500 to 290.530, or the application thereof to any person or circumstance, is found by a court of competent jurisdiction to be invalid, unconstitutional, or unconstitutionally enacted, such decision shall not affect other provisions or applications of sections 290.500 to 290.530 that can be given effect without the invalid, unconstitutional, or unconstitutionally enacted provision or application.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-082)

Subject

Initiative petition from Richard Von Glahn regarding a proposed amendment to Chapter 290 of the Revised Statutes of Missouri. (Received December 6, 2016)

Date

December 22, 2016

Description

This proposal would amend Chapter 290 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Lara Granich and **Missouri Jobs with Justice Voter Action** provided information as proponents of the proposal to the State Auditor's office.

Robert Bonney, Chief Executive Officer of the Missouri Restaurant Association provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they assume that any potential costs arising from the adoption of this proposal can be absorbed with existing resources.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated they will defer to the Office of Administration regarding any costs associated with this initiative petition.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department because public employers are exempt.

Officials from the **Department of Health and Senior Services** indicated this proposal would have no direct fiscal impact on their department since government employees are exempt from its provisions. However, employees of certain entities that receive funding through the department's budget would be impacted, such as Medicaid Home and Community Based Services vendors/providers and Area Agencies on Aging.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition does not apply to public employers with respect to its employees. Therefore, this petition, if passed, would have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated it appears Sections 290.502.4 and 290.512.3 would exclude public employers from the provisions of 290.502 subsection (3) and 290.512 subsection (2). They are a part of the definition of public employers. Therefore they assume there would be no direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated they defer to the Office of Administration.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this petition will have no fiscal impact on their department. They defer to the Office of Administration - Budget and

Planning Division for a statewide response on how this petition may impact state revenues.

Officials from the **Department of Public Safety** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department. They defer to the Office of Administration for response to this fiscal note request.

Officials from the **Governor's office** indicated there should be no added cost or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no fiscal impact.

Officials from the **Office of Administration** indicated this proposal amends Sections 290.502, 290.512, 290.527, RSMo and adds Section 290.529, RSMo.

Section 290.502, RSMo, increases the minimum wage to $9.00 per hour, beginning January 1, 2019 and by another $1.00 per hour each year until it reaches $13.00 per hour beginning January 1, 2023. Thereafter, the minimum wage will be adjusted annually based on the increase/decrease in the cost of living.

Section 290.512, RSMo, increases the base salary for tipped employees. Effective January 1, 2019, employers must pay at least 51% of the minimum wage rate to tipped employees. Each year thereafter the rate increases until January 1, 2024 when tipped employees should be paid 60% of the minimum wage as established in Section 290.502, RSMo.

The proposal exempts public employers from both requirements; therefore there would be no cost to the State of Missouri.

Because no tax rates are affected, there is no direct impact on general and total state revenues. However, these proposals may have several indirect affects which could impact revenue collections by an unknown amount, including but not limited to:

- Increased wages for certain employees. According to the US BLS, in 2015, Missouri had 57,000 hourly employees earning wages at or below the federal minimum wage;[1]
- Increased consumption by those employees;
- Lower overall employment (if employers choose to hold costs steady);

[1] http://www.bls.gov/opub/reports/minimum-wage/2015/home.htm

- Lower business investment (if employers' payrolls increase);
- Increased prices as firms pass–through labor costs.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact for their office as it would be exempt from the provisions set forth in the petition.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this would have no fiscal impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated no fiscal impact is anticipated if this proposal is adopted because cities are excluded from operation of the proposal.

Officials from the **City of Raymore** indicated there would be no direct fiscal impact on employee salaries. However there would be a potential increase cost in the capital projects. We have no way of predicting that value.

Officials from **University of Missouri** indicated we do not see an impact on the University of Missouri System.

Officials from **University of Central Missouri** indicated no fiscal impact.

Officials from **Missouri State University** indicated there will be no fiscal impact to their university for this fiscal note.

Officials from **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated the proposed statutory amendment will have no fiscal impact on their university.

Lara Granich and **Missouri Jobs with Justice Voter Action** provided the following information as proponents of this initiative petition.

Re: Fiscal Impact Analysis of Minimum Wage Initiative Petitions

Proposal 1 $15 by 2026 and Tipped Minimum Wage at 100% by 2028
Proposal 2 $15 by 2026 and Tipped Minimum Wage at 60% by 2024
Proposal 3 $15 by 2026 and Tipped Minimum Wage at 100% by 2028
Proposal 4 $15 by 2026 and Tipped Minimum Wage at 60% by 2024
Proposal 5 $15 by 2027 and Tipped Minimum Wage at 100% by 2028
Proposal 6 $15 by 2027 and Tipped Minimum Wage at 60% by 2024
Proposal 7 $14 by 2024 and Tipped Minimum Wage at 100% by 2028
Proposal 8 $14 by 2024 and Tipped Minimum Wage at 60% by 2024
Proposal 9 $13 by 2023 and Tipped Minimum Wage at 100% by 2028
Proposal 10 $13 by 2023 and Tipped Minimum Wage at 60% by 2024
Proposal 11 $12 by 2022 and Tipped Minimum Wage at 100% by 2028
Proposal 12 $12 by 2022 and Tipped Minimum Wage at 60% by 2024

This letter is from Lara Granich and Missouri Jobs with Justice Voter Action, proponents of the above-referenced initiative petitions. Pursuant to RSMo. Section 116.175, we write to submit the following fiscal impact information to assist your office in its analysis of the fiscal impact of the above-mentioned twelve proposed Minimum Wage Initiative Petitions.

The estimated net fiscal impact for each of the twelve versions of the initiative in the final phase-in year is summarized in the right-most column of Table 2 below. The estimated net fiscal impact for each version of the initiative for 2019 and 2020 – the first two fiscal years of implementation – is summarized in Table 3 below.

Our analysis estimates the impact of each of the twelve proposed initiative petitions on state and local sales and personal income tax revenue in Missouri. We follow the process that has been used in the past to estimate the impact of minimum initiative petitions on state and local sales and personal income tax, with some refinements. We also address certain claims that have been made by opponents in the past.

As these proposed initiatives exclude from the minimum wage increases public workers employed by the state or by local governments, the initiatives are not expected to have any direct impact on state and local payroll costs. Accordingly, we do not include in our analysis any such estimates.

I. Estimate of Number of Workers Affected Statewide and the Impact on Their Wages

Table 1. Summary of the Number of Affected Workers and Aggregate Wage Increases for the Final Year of Minimum Wage Phase-In.

Proposal	Year of Peak Minimum Wage (MW)	Proposed Peak MW	Tipped MW in Peak MW Year	Workers Affected by MW Increase	Aggregate Annual Wage Increase in Nominal Dollars
1	2026	$ 15.00	$ 13.50	1,117,399	$ 8,294,071,138
2	2026	$ 15.00	$ 9.00	1,117,399	$ 8,165,764,211
3	2026	$ 15.00	$ 13.50	1,117,399	$ 8,294,071,138
4	2026	$ 15.00	$ 9.00	1,117,399	$ 8,165,764,211
5	2027	$ 15.00	$ 14.25	1,097,200	$ 8,058,515,525
6	2027	$ 15.00	$ 9.00	1,096,645	$ 7,908,877,243
7	2024	$ 14.00	$ 11.20	1,044,718	$ 7,064,599,152
8	2024	$ 14.00	$ 8.40	1,043,118	$ 6,985,083,230
9	2023	$ 13.00	$ 9.75	949,801	$ 5,741,687,801
10	2023	$ 13.00	$ 7.54	944,495	$ 5,682,599,137
11	2022	$ 12.00	$ 8.40	867,022	$ 4,552,685,065
12	2022	$ 12.00	$ 6.84	858,952	$ 4,517,542,341

Note: Author's Analysis of American Community Survey (ACS) Data from 2014.

Across the twelve proposals analyzed, the total aggregate wage increase for workers in Missouri ranges from a low of $4.517 billion (Proposal 12) to a high of $8.294 billion under Proposals 1 and 3. While some proposals have the same final impact numbers, they have different impacts in the initial years (not listed) based on the relative pace of increases in earlier years. A full, year-by-year impact analysis is presented in Appendix Tables 1 through 12 below.

The wage impact of an increase in the Missouri minimum wage is calculated using the following procedure. The American Community Survey (ACS) Public Use Micro Sample for the most recent year available (2014) for the State of Missouri was downloaded from the US Census Bureau. The ACS was chosen over the Current Population survey because the ACS has a significantly larger sample. We followed the method of Perry, Thomason, and Bernhardt (2016) for calculating an hourly wage rate from the ACS based on observed total annual wage income, typical hours worked each week and weeks worked per year. Since ACS income figures are clustered around whole-numbers, we smoothed the wage distribution by randomly adding or subtracting $0.25 from each wage figure.

Wage adjustments were made only for those individuals earning less than the proposed minimum wage, or proposed tipped minimum wage. We did not make additional adjustments for the "ripple effect" of minimum wage increases on workers earning slightly above the new threshold. Recent evidence suggests that workers earning up to 15% above of the minimum wage also receive small increases in response to a minimum wage increase. (See Wicks-Lim (2006) and Dube, Giuliano and Leonard (2015)). Thus, the estimated impacts listed above are likely to be smaller than the actual impact of increasing the minimum wage to the proposed level.

All wage earners are included in this calculation. To be consistent with past estimates, public employees should have been excluded. Employees in the public sector were included because the ACS does not have a published variable that

allows for identification of public employees. This inclusion of public employees will have a minimal impact on our results.[1]

All wages from the 2014 survey were adjusted upward to account for inflation between the time of the survey and the time of measurement of the impact. Actual inflation was to adjust wages to 2015. For all subsequent years between 2016 and 2028, baseline wages were inflated by the annual average rate of change in the Consumer Price Index for Urban Workers (CPI-U) for the Midwest region. The 2015 and 2016 Missouri Minimum wage of $7.65 was adjusted by the same factor prior to measuring the impact of a change to the proposed minimum wage in 2019.

After these adjustments, the resulting hourly wage of all employees was compared to the proposed minimum wage. A total of twelve proposals were analyzed. For each proposal, we constructed a baseline wage scenario which used only basic wage changes from expected inflation rates to predict each ACS respondent's hourly wage rate in each year between 2019 and 2028. We then constructed a counterfactual, or "proposed" wage distribution for each worker under all twelve minimum wage proposed scenarios. Since the minimum wage proposals offered six different paths for raising the minimum wage for all non-tipped private sector workers, and two different wage paths for tipped workers (for each proposal), we create separate minimum wage changes for tipped and non-tipped workers. Specifically, we used information on a worker's occupation and observed wage levels to separately identify tipped workers and assign them the proposed tipped minimum wage in each year, rather than the higher non-tipped minimum wage.[2]

If the proposed minimum wage was less than the inflation-adjusted hourly earnings of an employee, then no impact was calculated. If the proposed minimum wage was more than the hourly earnings on an employee, then the difference between the inflation-adjusted hourly earnings (i.e. baseline) and the proposed minimum wage was calculated. That difference was multiplied by the number of hours the employee worked in the year to calculate the annual impact for that employee. The result was then multiplied by a weighting factor for that employee in the population. The total impact for the State of Missouri was then summed across all affected workers to generate a total estimated increase in wage income in the state.

II. Economic Literature on the Impact of Minimum Wage Increases on Employment

Next we review the economic literature on the impact of minimum wage increases on employment. Opponents often claim that minimum wage increases may reduce employment in a state. If that were true, then those employment reductions would result in reductions in state income and sales tax revenue or increases in unemployment-related costs to the state.

However, as explained in greater detail below, review of the most credible recent empirical research on the minimum wage shows that increases have had no discernible impact on aggregate employment levels. Larger $15 minimum wage increases, such as those adopted recently in New York, California, Seattle and other jurisdictions, have not yet been studied to determine whether the same holds true for them. While it is possible that there may be some employment

[1] For Missouri's state employees, this can be validated by viewing the earnings of all state employees at: http://mapyourtaxes.mo.gov/MAP/Employees/. Larger counties and cities will also have almost all public employees earning more than the highest proposed minimum wage. Local public employees in small counties and towns may have some public employees who earn less than the highest proposed minimum.

[2] We defined tipped workers as those employed in occupations that typically receive a large share of income as tips. These occupations were 'Bartenders', 'Waiters and Waitresses', 'Food Servers, Non-restaurant' and 'Miscellaneous food preparation and serving related workers including dining room and cafeteria attendants and bartender helpers.'

losses from such larger minimum wage increases as the result of increased use of automation or other factors, we offset this potential negative effect by not also calculating the positive potential job growth stemming from multiplier effects of the spending of minimum wage workers who receive substantial raises. There is substantial research to indicate that increases in the minimum wage have multiplier effects that increase the direct effects. For this reason, and because of the likely increases in wages to individuals who earn above the proposed minimum wages, the wage and tax impacts summarized in the table are considered conservative estimates relative to the total impact that would occur as a result of increasing the minimum wage to the proposed levels.

Economists have conducted hundreds of studies of the employment impact of the minimum wage. A meta-study—a formal statistical study of studies—by Doucouliagos and Stanley (2009) reviewed all the research conducted over the last three decades on the employment impact of minimum wage increases on teenagers in the United States. The researchers concluded that the bulk of the studies find that higher minimum wages have had little or no discernible effect on the employment prospects of low-wage workers. Their study followed a rigorous, peer-reviewed procedure and has the advantage of using a set of predetermined, objective criteria for weighing the validity of statistical findings across studies with different results. (Source: Doucouliagos, Hristos and T. D. Stanley. 2009. "Publication Selection Bias in Minimum-Wage Research? A Meta-Regression Analysis." British Journal of Industrial Relations, vol. 47, no. 2, pp. 406–28.)

Recent theoretical and empirical research emphasizes several explanations for the consistently negligible employment impacts of moderate increases in the minimum wage. First, relative to total wage costs, minimum wage increases are small. Second, employers and workers appear to respond to minimum-wage increases in many ways that reduce the direct cost to employers and substantially reduce or eliminate the need to cut employment.

Probably the most important economic response to a higher minimum wage is a reduction in turnover. At higher wages, employers fill vacancies faster and retain employees longer, boosting total employment and average productivity per worker while reducing direct and indirect training costs. Dube, Lester, and Reich (2012), for example, examined the effect of the minimum wage on labor turnover among teens and restaurant workers. They find "...striking evidence that separations, new hires, and turnover rates for teens and restaurant workers fall substantially following a minimum wage increase..." (p. 2) Their findings, using nationally representative data, are consistent with local case studies of the minimum wage and related "living wage" laws, including Dube, Naidu, and Reich's (2007) analysis of the San Francisco city-wide minimum wage; Fairris's (2005) study of local government contractors in Los Angeles; Howes (2005) on homecare workers in California; and Reich, Hall, and Jacobs (2005) on workers at the San Francisco airport. (Sources: Dube, Arindrajit, T. William Lester, and Michael Reich. 2012. "Minimum Wage Shocks, Employment Flows and Labor Market Frictions." Berkeley, CA: Institute for Research on Labor and Employment. http://escholarship.org/uc/item/76p927ks; Dube, Arindrajit, Suresh Naidu, and Michael Reich. 2007. "The Economic Effects of a Citywide Minimum Wage." *Industrial and Labor Relations Review*, vol. 60, no. 4, pp. 522–543; Fairris, David. 2005. "The Impact of Living Wages on Employers: A Control Group Analysis of the Los Angeles Ordinance." *Industrial Relations*, vol. 44, no. 1, pp. 84–105; Howes, Candace. 2005. "Living Wages and the Retention of Home Care Workers in San Francisco." *Industrial Relations*, vol. 44, 5 no. 1, pp. 139–63; Reich, Michael, Peter Hall, and Ken Jacobs. 2005. "Living Wage Policies at the San Francisco Airport: Impacts on Workers and Businesses." *Industrial Relations*, vol. 44, no. 1, pp. 106–138.)

Employers also appear to respond to increases in the minimum wage by taking measures to boost productivity. Hirsch, Kaufman, and Zelenska's (2011) study of the impact of the federal minimum wage increase on 81 fast-food restaurants in Georgia and Alabama, for example, asked fast-food managers about the scope for efficiency improvements in

response to the minimum-wage rise. About 90% of managers indicated that they planned to respond to the minimum wage increase with increased performance standards such as "requiring a better attendance and on-time record, faster and more proficient performance of job duties, taking on additional tasks, and faster termination of poor performers." (p. 27) Roughly the same share of managers said that they sought to "boost morale" by presenting the minimum wage increase as a "challenge to the store" and using this as a way "to energize employees to improve productivity." (pp. 28–29) Based on their interviews with store managers, the researchers concluded that a minimum wage increase may function as a "catalyst or shock that forces managers to step out of the daily routine and think about where cost savings can occur." (p. 29) (Source: Hirsch, Barry T., Bruce Kaufman, and Tetyana Zelenska, "Minimum Wage Channels of Adjustment." IZA Discussion Paper No. 6132. Germany: Institute for the Study of Labor. http://www2.gsu.edu/~ecobth/IZA_HKZ_MinWageCoA_dp6132.pdf)

A higher minimum wage may also motivate workers to work harder, independently of any actions by employers to increase productivity. According to "efficiency wage" theory, wages above the competitive-market rate may elicit greater work effort for several reasons. As Carl Shapiro and Joseph Stiglitz (1984) have argued, higher pay increases the cost to workers of losing their job, potentially inducing greater effort from workers in order to reduce their chances of being fired. George Akerlof (1982), arguing from a more sociological point of view, has suggested that workers may see higher wages as a gift from employers, leading workers to reciprocate by working harder. (Sources: Shapiro, Carl and Joseph E. Stiglitz. 1984. "Equilibrium unemployment as a worker discipline device." *American Economic Review*, vol. 74, no. 3, pp. 433–44; Akerlof, George A. 1982. "Labor contracts as partial gift exchange." *Quarterly Journal of Economics*, vol. 97, no. 4, pp. 543–69.)

We therefore conclude that the proposed increase in the Missouri minimum wage would have no discernible impact on the employment levels of low-wage workers. Note too, we conclude the same as to small businesses. In fact, the proposed increases will not affect some small businesses as the state minimum wage law exempts individuals employed by any retail or service business that has a gross volume of sales made or business done of less than $500,000 annually. Accordingly, we do not factor in reductions in employment, or any resulting decrease in sales tax or income tax. We also do not project any increased unemployment insurance costs—both because we do not project any resulting job losses, and, additionally, because unemployment insurance costs are paid for by employer premiums, and so are ultimately not a cost to the state.

III. State and Local Sales and Personal Income Tax Revenue Impact of Raising the Minimum Wage

Based on the wage impact figures calculated above, and the understanding that the minimum wage increases would be unlikely to result in offsetting job losses, we next calculate the impact of the projected wage increases on state and local sales and personal income tax revenue in Missouri. We project only the direct impact of the twelve minimum wage increase scenarios on such tax revenue. We do not attempt to project the additional impact through a GDP multiplier effect, or the potentially higher sales taxes generated if employers offset wage increases with slightly higher prices (which would be taxable). Studies are mixed as to whether businesses increase prices by even small amounts when the minimum wage increases.

Increase in Personal Income Tax Revenue and Sales Tax Revenue Due to Increased Wages. In order to determine the projected increase in personal income tax revenues that would result directly from the increased wages, we had to develop assumptions about the effective income tax rates of the affected workers. We made the following assumptions with respect to the effective tax rate:

1. That 25% of affected workers can be claimed as a dependent on another party's Missouri income tax return and, as a result, would pay an effective tax rate of 6.0% on the increase in income;
2. That 50% of the affected workers would file as single taxpayers, would claim one deduction of $2,100, and would be entitled to a standard deduction of $5,800. This would result in an effective tax rate of 2.47%;
3. The remaining 25% would, we assumed, pay no additional Missouri income tax. In light of these assumptions, the increased Missouri income tax revenue for each petition version can be calculated as follows: (total wage increase * 25% * 6.0%) + (total wage increase * 50% * 2.47%) + (total wage increase *25% * 0%).

Sales Tax Revenue. The State of Missouri imposes a 4.225% state sales tax on those items that are not exempt from the sales tax base. In addition, the average local sales tax rate is 2.95%. As a result, the average Missouri net sales tax rate is 7.175%. To estimate the share of income that is spent on goods and services that are subject to sales taxes, we used data from the 2015 Consumer Expenditure Survey (CES) for the US to estimate the share of income spent on categories that are subject to sales taxes. The CES summary tables list average spending per consumer across 20 different categories (e.g. housing, transportation, food away from home) and we categorized each spending item as taxable or non-taxable and then calculated the share of spending that was taxable.[3] The resulting rate was 30.3%.

Based upon the above assumptions, and the total wage increase calculations for each version of the petition, we estimate that the increase in state and local sale tax revenue, and in state income tax revenue, resulting from the increased wages would be as follows for the final year of the minimum wage phase-in, for each of the twelve versions of the initiative:

Table 2. Summary of the Impact of Minimum Wage Increases on State and Local Sales and Income Taxes in Final Year of Full Minimum Wage Phase-In.

Proposal	Final Year of Minimum Wage Phase-In	State & Local Sales Tax Revenue Increase	Personal Income Tax Revenue	Total Sales and Personal Income Tax Revenue Increase
1	2026	$ 180,361,529	$ 226,842,846	$ 407,204,375
2	2026	$ 177,571,387	$ 223,333,651	$ 400,905,039
3	2026	$ 180,361,529	$ 226,842,846	$ 407,204,375
4	2026	$ 177,571,387	$ 223,333,651	$ 400,905,039
5	2027	$ 175,239,175	$ 220,400,400	$ 395,639,574
6	2027	$ 171,985,165	$ 216,307,793	$ 388,292,957
7	2024	$ 153,625,630	$ 193,216,787	$ 346,842,417
8	2024	$ 151,896,490	$ 191,042,026	$ 342,938,516
9	2023	$ 124,857,814	$ 157,035,161	$ 281,892,975
10	2023	$ 123,572,881	$ 155,419,086	$ 278,991,968
11	2022	$ 99,001,953	$ 124,515,937	$ 223,517,889
12	2022	$ 98,237,745	$ 123,554,783	$ 221,792,528

[3] Specifically, the categories we assumed to be subject to state and local sales taxes are: food, household furnishings and equipment, vehicle purchases, gasoline and motor oil, entertainment, and all other expenditures. We assumed that 50% of the spending on the category "apparel and services" was taxable.

Note: Author's Analysis of American Community Survey (ACS) data from 2014 and fiscal impact assumptions described above. All dollars are in nominal figures.

As described in Table 2 above, the final fiscal impact of the proposed minimum wage increases varies based on the ultimate level of the minimum wage and the degree of tipped minimum wage phase-out. The estimates of the total fiscal benefit range from $221 million to $407 million annually.

Section 23.140, RSMo., indicates that the fiscal note shall address the cost of the proposed legislation to the state for the first two fiscal years—which, in the case of the proposed initiatives, will be 2019 and 2020. Table 3 below summarizes our projected total sales and personal income tax revenue increases for years 2019 and 2020 for each of the twelve versions of the initiative:

Table 3. Summary of the Impact of Minimum Wage Increases on State and Local Sales and Income Taxes in 2019 & 2020

Proposal	Total Sales and Personal Income Tax Revenue Increase—2019	Total Sales and Personal Income Tax Revenue Increase—2020
1	$ 60,008,101	$ 88,368,944
2	$ 59,882,683	$ 88,058,046
3	$ 93,306,606	$ 123,377,155
4	$ 93,142,857	$ 122,961,967
5	$ 91,491,028	$ 117,027,046
6	$ 91,328,763	$ 116,631,083
7	$ 91,491,028	$ 127,734,685
8	$ 91,328,763	$ 127,305,194
9	$ 91,491,028	$ 127,734,685
10	$ 91,328,763	$ 127,305,194
11	$ 91,491,028	$ 127,734,685
12	$ 91,328,763	$ 127,305,194

Complete year-by-year summaries of the fiscal benefits for all twelve versions of the proposed initiative can be found in Appendix tables 1 through 12.

Please also consider the following with reference to section 23.140, RSMo. The proposed measures will not establish a program or agency that will duplicate an existing program or agency. There is not a federal mandate for the proposed measures (although the United States Department of Labor currently supports minimum wage increases). The proposed measures will not have significant direct fiscal impact upon political subdivisions of the state because the measures exclude employees of public employers. And, the proposed measures do not require new physical facilities. We reference the economic impact of the proposed measures on small businesses in Section II above.

We hope that this information is useful to your office as you prepare your analyses of the petitions.

Respectfully submitted,

Lara Granich
Missouri Jobs with Justice Voter Action

Re: Initiative Petitions 2018-073 through 2018-084

Dear Mr. Halwes,

I write on behalf of Robert Bonney. Mr. Bonney is the Chief Executive Officer of the Missouri Restaurant Association. Please consider this letter and the accompanying studies as his fiscal impact statement as an opponent of Initiative Petitions 2018-073 through 2018-084 (the "Initiative Petitions"). If passed, any of these twelve initiatives would have a substantial negative impact on state and local governments, as well as Missouri small businesses. Those effects are both direct (as noted in Section 1) and secondary (as noted in Sections 2 through 5). The direct effects stem from higher labor and contracting costs that the state and its political subdivisions will incur, despite the Initiatives' effort to exclude government workers from the mandate.

The indirect effects will present a debate this Office has seen before. The proponents of the Initiative Petitions will once again rely on data sourced from political activist groups who claim increases in the minimum wage only serve to create new taxable income. The reality is that such groups approach this issue with political bias. Their analysis is one-sided because it completely ignores the fact that a wage increase does not "create" income from thin air; instead, it is an economic transfer from Missouri businesses to workers. Missouri businesses must pay the new wages "created" by the increases. Political activists' models fail to account, then, for two specific manifestations of the "debit" side of this transfer: reductions in employment, and the reduction in corporate income tax paid based upon business done in Missouri.

The failure to account for any employment effect at any proposed wage increase—even a near doubling of the minimum wage to $15—is particularly puzzling, because Missouri's most populous areas border Illinois and Kansas. These states, respectively, have minimum wages of $8.25 and $7.25. Neither state adjusts the minimum wage for inflation. Likewise, the second

effect—loss of corporate income tax revenues—is a mathematical certainty. Missouri businesses will be the source of the wage increase, which will lower their own taxable income. Assuming a one-to-one substitution of "created" wages for lost corporate income, the difference in the rates at which these two types of income are taxed will result in a net decrease in state revenue. A dollar from increased wages is taxable by state government in Missouri at 6% or substantially less, whereas Missouri's corporate income tax rate is 6.25%.

On top of these two types of negative outcomes—lower employment and lower state tax revenues—there may be second-order effects to small businesses because they lack the access to capital to weather price fluctuations; they may not survive at all because they may not have the flexibility to simply cut employment, shifting their reliance to capital instead of labor resources, or suffering a decrease in production and revenue.

In short, much of the fiscal impact regarding the current crop of wage-related ballot measures is secondary: they cause transfers of wealth within (or out of) the state economy, and those transfers of wealth then create second-order effects for state and local governments via their collection of tax revenues and provision of welfare services for the unemployed or less-employed. Because these fiscal notes call for the Auditor operate in the area of secondary effects, it is critical that she treat both sides of the wealth transfer equally, and refrain from assessing only one half of the wage increase equation.

1. Direct Labor Cost Impact on State and Local Government Budgets

As noted to the State Auditor's Office previously by Dr. David Macpherson, a nationally prominent labor and economics expert, there are two ways to measure labor cost on state and local government budgets. First, one can use the information included in fiscal note responses from state and local government entities. It is important to note that these fiscal notes provide an incomplete and, therefore, too-low estimate of labor cost. Few state and local government entities respond to requests for a fiscal note response, and those that do respond often ignore important effects.

Second, data from the U.S. Census Bureau's Current Population Survey (CPS) can be used to calculate increased labor cost to state and local government entities in Missouri. To combat this time-honored analysis, and in a blatant attempt to manipulate the fiscal note process, the Initiative Petitions provide that they will raise the minimum wage for private workers, but not for workers employed by state or local governmental entities. No conceivable justification exists for solely raising the minimum wage on private businesses. Whatever the disparity between the value of total compensation at a private business and at a government employer, that disparity does not approach the wage adjustments at issue here, ranging from an inflation adjusted wage increase of 68.54% (($15-$8.90)/$8.90) in Initiative Petitions 2018-073 through 2018-076 to a wage increase of 42.01% (($15-$8.45)/$8.45) in Initiative Petitions 2018-083 through 2018-084.

Moreover, it is unreasonable to assume that on a sustained basis public employers, as defined in the Initiative Petitions, would be able to maintain dramatically lower wage levels than

private businesses. Public employers would lose staff employable at higher rates in the private market, imposing substantial costs on government productivity. Using the method traditionally employed by labor economists and followed by the Auditor's office, one can calculate the annual wage costs to state and local governmental entities, based on the annual wage cost for each state and local government worker in the ORG CPS, as detailed on page 6 of Dr. Macpherson's 2012 report, as well as in Dr. Macpherson's 2014 report, attached hereto as **Exhibit A and Exhibit B**. Even if the auditor finds that a specific estimate of costs is not determinable, the auditor should note that the initiative is "likely to result in significant costs to state and local governmental entities" through the form of higher wage costs and higher contracting costs.

The proponents of the Initiative Petitions may argue that the Auditor should abandon any state and local cost estimates altogether. The proponents will argue that provisions they have inserted in the statute would mean that state and local government entities will not have to pay higher wages to their employees. Setting aside unjustifiable discrimination against private employers (and "public employees"), the provision is of uncertain legal effect and constitutionality. A "public employer," defined in the initiatives as "the state or a political subdivision of the state" still incurs substantial costs for wages of individuals that are "private employees," rather than "public employees." Cleaning services, food service, and other essential services often rely on state contracts with outside vendors. Sometimes, a contract rate may vary depending on the cost of labor. Even if the contract rate is fixed, it must be re-bid periodically, and that bidding process would take into account the new minimum wage. Plainly, the initiative would impose higher costs for state and local governments in contracting with any private entity and its employees. As a matter of law, it would be insufficient and unfair for the Auditor's fiscal note or summary to simply assume that these costs to state and local governmental entities do not exist.

2. Cost of Unemployment Benefits

a) The effect of inflation on Missouri's minimum wage

CPS–ORG data show that between 2007 and 2015, median nominal wages for adult (25–59 years old) workers in the U.S. grew by 1.68 percent a year. However, Missouri's minimum wage is currently adjusted using "the percentage increase or decrease as of the preceding July over the level as of July of the immediately preceding year of the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W)." Section 290.502, RSMo. Coincidentally (or perhaps not), the CPI-W, over the period from 2006 to 2016, also increased at an average rate of 1.68 percent a year.

Year	CPI-W	Observed inflation %
2006	199.2	
2007	203.7	0.022590361
2008	216.304	0.061875307

2009	210.526	-0.0267124
2010	213.898	0.016017024
2011	222.686	0.041085003
2012	225.568	0.01294199
2013	230.084	0.02002057
2014	234.525	0.019301646
2015	233.806	-0.00306577
2016	234.771	0.004127353

Using Missouri's current inflation-adjusted minimum wage rate and an assumed, constant 1.68 percent increase in the CPI-W, the minimum wage in Missouri will be as follows:

Year	Estimated Minimum Wage
2016	$7.65 (observed)
2017	$7.70 (observed)
2018	$7.85
2019	$8.00
2020	$8.15
2021	$8.30
2022	$8.45
2023	$8.60
2024	$8.75
2025	$8.90
2026	$9.05
2027	$9.20

b) Calculating job loss attributable to increased minimum wage

At least one outside economist, James Sherk, has already provided an estimate for job loss in Missouri based on a $15 minimum wage. Mr. Sherk calculated the effect of a $15 minimum wage implemented in 2021. Mr. Sherk's figures accounted for inflation by estimating the present value of $15.00 in 2021, rather than estimating an absolute figure for wage inflation in Missouri. Mr. Sherk calculated the present value of $15.00 in 2021 to be $13.57, per hour, based on wage inflation of 1.68 percent. Mr. Sherk evaluated the change from $7.65 per hour to $13.57 per hour (a 77.39% increase), exclusive of agricultural workers. Cumulatively, Mr. Sherk

calculated this 77.39 percent increase in wages to reduce employment in the affected workforce by (0.7739*0.677) 52.39%.

Mr. Sherk calculated that approximately 40.9% of Missouri's Wage and Salary Workers would be affected by such a $15 minimum wage. Mr. Sherk's calculations reveal that a $15 minimum wage in 2021 would be expected to reduce the number of full-time equivalent jobs in Missouri by approximately 218,000. Based on CPS–ORG data, these figures reveal an affected workforce of approximately 416,086 workers impacted by a $15 minimum wage increase in 2021.

However, in 2014, Dr. Macpherson found, using more conservative, national-level Congressional Budget Office data, that an increase to a $10.10 minimum wage, effective January 1, 2015, would eliminate about 15,700 jobs in Missouri. Dr. Macpherson analyzed the effect of a Missouri $10.10 minimum wage using a model suitable to a national analysis. This analysis predicted a loss of 15,700 Missouri jobs based on a wage increase from $7.50 in 2014 to $10.10 in 2015 (a 34.67% increase).

On the whole, the analysis by Mr. Sherk is more instructive here, since it anticipates a state level change to $15.00. The most accurate way to determine the estimate of Workers Affected would be to analyze the CPS–ORG data. However, without such data readily available in the time constraints imposed by the fiscal note process, it is reasonable for estimation purposes to assume Mr. Sherk's figures are evenly distributed. Assuming that worker data follows an equal distribution, the Initiative Petitions would be expected to result in the following job losses:

Year of final prescribed wage increase	Wage without IP	Wage mandated by IP	Percentage increase	Percentage of affected workers who lose jobs (Percentage Increase x 0.677 Elasticity)	Estimate of Workers Affected	Estimate of Missouri Workers Unemployed by Initiative
2022	$8.45	$12.00	42.01%	28.44%	225,876	64,244
2023	$8.60	$13.00	51.16%	34.64%	275,076	95,279
2024	$8.75	$14.00	60.00%	40.62%	322,589	131,036
2026	$9.05	$15.00	65.75%	44.51%	353,481	157,334
2027	$9.20	$15.00	63.04%	42.68%	338,952	144,666

c) The best estimate for a price elasticity of demand for low-skilled labor is -0.677.

As noted by Mr. Sherk, starting wages of $15.00 per hour mean that full-time employee must create at least $38,700 a year in value for his or her employer (including wages, employer

payroll taxes, and mandatory healthcare benefits). High minimum wages and mandatory benefit costs make it much harder for less-experienced and less-skilled workers to find jobs, particularly full-time work.

Recent labor economics scholarship has revealed that, accounting for publication bias, a state-specific elasticity of demand for less-skilled workers is, on average, approximately -0.677, though some estimates are even higher, around -1.0.[1] "[E]conomists have extensively studied how businesses respond to higher wages overall, not just minimum-wage increases. On average these studies find a 10 percent increase in labor costs causes firms to reduce employment of less-skilled workers by 6.8 percent in the long run."[2]

While these elasticity estimates are substantial in absolute terms, there is reason to believe that such estimates might still understate the impact of a Missouri state-specific effort to increase the minimum wage. This is so for several reasons. First, traditionally, labor economists view labor as a reasonably difficult input to substitute; however, Missouri businesses have readily available options. There are relatively few barriers to doing business in Missouri's border states, and businesses can easily relocate across a state line to take advantage of more favorable wage (and tax laws). Additionally, substantially raising the cost for Missouri labor, relative to labor sources in other states and other countries, is likely to force many manufacturing jobs in Missouri to disappear entirely. Automation is also a significant risk. The substitution of labor is becoming increasingly easy due to technology advancements and the "sharing" economy, where fewer individuals are "employees" covered by the minimum wage. Finally, a labor "price shock" may result in significant decreases in the demand for goods and services. People make behavioral changes to avoid higher costs, including eating out less often and generally decreasing consumption (or shifting their activities to consumption involving comparatively low amounts of labor) wherever possible.

d) Unemployment Benefit Costs

We derived an average unemployment payout by calculating the expected weekly unemployment benefit amount. Based on current data, the expected unemployment weekly benefit amount of a worker making $7.65 an hour, on a 40 hour workweek, is $159.30 per week,

[1] Sherk, James, "How $15-per-Hour Minimum Starting Wages Would Affect Each State," The Heritage Foundation, http://report.heritage.org/ib4601.

[2] "The coefficients on these estimates imply an elasticity of –0.677 for a study published in 2012 (the most recent year in their data) of long-run unconditional labor demand for low-skilled labor in the U.S., estimated using industry-level administrative panel data and a structural form model." "Estimates that do not account for publication bias tend to slow a long-run elasticity closer to –1.0. See, for example, George Borjas, Labor Economics, 6th ed. (Columbus, OH: McGraw-Hill, 2013), Chapter 4: 'The evidence also suggests that the estimates of the long-run labor demand elasticity cluster around –1, so the long-run labor demand curve is indeed more elastic than the short-run curve.' " Sherk, available at http://report.heritage.org/ib4601.
